## **Cosmopolitanism in the Age of Globalization**

Lee Trepanier 2011-09-30 Thanks to advances in international communication and travel, it has never been easier to connect with the rest of the world. As philosophers debate the consequences of globalization, cosmopolitanism promises to create a stronger global community. *Cosmopolitanism in the Age of Globalization* examines this philosophy from numerous perspectives to offer a comprehensive evaluation of its theory and practice. Bringing together the works of political scientists, philosophers, historians, and economists, the work applies an interdisciplinary approach to the study of cosmopolitanism that illuminates its long and varied history. This diverse framework provides a thoughtful analysis of the claims of cosmopolitanism and introduces many overlooked theorists and ideas. This volume is a timely addition to sociopolitical theory, exploring the philosophical consequences of cosmopolitanism in today's global interactions.

Globalization and Human Rights Alison Brysk 2002-10-15 In this landmark volume, Alison Brysk has assembled an impressive array of scholars to address new questions about globalization and human rights. Is globalization generating both problems and opportunities? Are new problems replacing or intensifying state repression? How effective are new forms of human rights accountability? These essays include theoretical

analyses by Richard Falk, Jack Donnelly, and James Rosenau. Chapters on sex tourism, international markets, and communications technology bring new perspectives to emerging issues. The authors investigate places such as the Dominican Republic, Nigeria, and the Philippines. The contemporary world is defined by globalization. While global human rights standards and institutions have been established, assaults on human dignity continue. These essays identify the new challenges to be faced, and suggest new ways to remedy the costs of globalization.

*Cosmopolitanism, Migration and Universal Human Rights* Mogens Chrom Jacobsen 2020-09-01 This book describes the potential and challenges of cosmopolitanism from a philosophical and historical point of view. Through the prism of cosmopolitanism, this book considers how the recent surge in migration is affecting our current reality, while also taking stock of the contemporary potential of cosmopolitan ideas. It considers and compares the significance of religion and culture for the wider societal acceptance or rejection of refugees. Moreover, the book examines the European Court of Human Rights jurisprudence on immigration policies, non-refoulement, humanitarian law and gender. It presents empirically based research of a quantitative, qualitative and comparative nature regarding the determinants of attitudes towards cosmopolitanism and more generally concerning

public opinion on migration issues, and reflects on conceptions of and attitudes towards citizenship, while also imagining new forms of citizenship. This book serves as a comprehensive overview and resource for migration scholars from the social sciences and the humanities, as well as students and other stakeholders in the fields of migration and human rights.

*The Science of Right* Immanuel Kant 2012-11-01  
The Science of Right has for its object the principles of all the laws which it is possible to promulgate by external legislation. Where there is such a legislation, it becomes, in actual application to it, a system of positive right and law; and he who is versed in the knowledge of this system is called a jurist or jurisconsult (jurisconsultus). A practical jurisconsult (jurisperitus), or a professional lawyer, is one who is skilled in the knowledge of positive external laws, and who can apply them to cases that may occur in experience. Such practical knowledge of positive right, and law, may be regarded as belonging to jurisprudence (jurisprudentia) in the original sense of the term.

**Refugees and Forced Migrants in Africa and the EU** Elisabeth Wacker 2019-01-07  
The so-called 'refugee crisis' represents one of the biggest contemporary political and social challenges. Although many African countries have been dealing with forced migratory and refugee movements for decades, their experiences have so far largely been neglected in the predominantly Eurocentric public debate. The present volume aims to bridge this gap by providing comparative African and European perspectives from different disciplines, highlighting the challenges but also potential mutual benefits of social diversification, and offering an insight into possible solution strategies.

Cosmopolitanism and Empire Myles Lavan 2016

Its case studies of Near Eastern and Mediterranean empires combine to demonstrate the centrality of cosmopolitanism to the establishment and endurance of trans-cultural political orders"--

*Hobbes and Modern Political Thought* Zarka Yves Charles Zarka 2016-07-07  
Yves Charles Zarka shows you how Hobbes established the framework for modern political thought. Discover the origin of liberalism in the Hobbesian theory of negative liberty; that Hobbesian interest and contract are essential to contemporary discussions of the comportment of economic actors; and how state sovereignty returns anew in the form of the servility of the state. At the same time, Zarka controversially argues against received readings claiming that Hobbes is a thinker of a state monopoly on legitimate violence.
