Constructing a Chinese School of International Relations Yongjin Zhang, Teng-Chi

Chang, 2016-06-10 This edited volume offers arguably the first systemic and critical assessment of the debates about and contestations to the construction of a putative Chinese School of IR as sociological realities in the context of China's rapid rise to a global power status. Contributors to this volume scrutinize a particular approach to worlding beyond the West as a conscious effort to produce alternative knowledge in an increasingly globalized discipline of IR. Collectively, they grapple with the pitfalls and implications of such intellectual creativity drawing upon local traditions and concerns, knowledge claims, and indigenous sources for the global production of knowledge of IR. They also consider critically how such assertions of Chinese voices and articulation of their ambition for theoretical innovation from the disciplinary margins contribute to the emergence of a Global IR as a truly inclusive discipline that recognizes its multiple and diverse foundations. Reflecting the varied perspectives of both the active participants in the Chinese School of IR debates within China and the observers and critics outside China, this work will be of great interest to students and scholars of IR theory, Non-Western IR and Chinese Studies.

A Philosophical History of Police Power Melayna Kay Lamb, 2024-01-11 Rethinking the philosophical grounds of police power, Melayna Lamb argues that traditional ideas of sovereignty and

the law need to be radically re-evaluated. In placing police at the centre of analysis this book demonstrates the manner in which police power exists in a complex and overlapping relationship with sovereignty and law in a form which is not reducible to implementation. In doing this it argues for the centrality of order in any consideration of police and challenging a common narrative whereby a dynamic, interventionist sovereign power that follows from a belief of order as 'artificial' is replaced by a liberal, limited non-interventionist sovereign power that proceeds from a 'natural' order. Moving through thinkers such as Hobbes, Hegel and Adam Smith the book argues that police power is in fact an-archic in form, in a manner that makes it impossible to hold accountable through the law. Lamb adopts an interdisciplinary approach that turns to philosophy to make sense of global events that see police power at their centre. This includes the history of police brutality in the US, the structural injustices made more apparent by COVID-19 and the growing calls to abolish the police.

Challenge and Transformation Katherine J. Goodnow, Unesco, 2006 This publication looks at how change takes place in museums. Built around a series of case studies outlining the way ethnographic museums, historic sites and art galleries come to terms with issues of diversity and change, it is devoted to exploring diversity and promoting intercultural dialogue in museum practice.-- Publisher's description.

A Practical Guide to Group Facilitation Yorck von Korff, 2024-06-03 A Practical Guide to Group Facilitation introduces a unique threefold approach to facilitation, blending Person-Centered Practice, system knowledge, and method expertise together. It serves as a comprehensive resource for facilitators seeking to enhance their professional skills. The book delves into the significance of Person-Centered Practice as the cornerstone of facilitation, exploring personal facilitator qualities like congruence, empathic listening, and unconditional positive regard, inspired by the principles of Carl

Rogers. It successfully integrates Jane Loevinger's personal development theories with facilitator skill development, illustrating the symbiotic relationship between personal growth and effective facilitation. Additionally, the book incorporates Nonviolent Communication (NVC) into the facilitator's toolkit, offering practical strategies for navigating challenging situations. It covers a spectrum of facilitation methods, from structured approaches to the Person-Centered style of Carl Rogers, equipping facilitators to face diverse group contexts. Presenting valuable skills and insights to enhance professional practice, this book will be highly relevant reading for facilitators, mediators, and those offering training. It will also be useful reading for professionals in participatory processes such as coaches, team leaders, organizational leaders, managers, and mentors.

Ethnicity in China: A Critical Introduction Xiaowei Zang, 2015-06-05 On the global stage, China is often seen to be a homogenous nation when, in fact, it is a diverse multi-ethnic society, with 55 minority nationality groups recognized by the government. Scattered across the vast landmass, ethnic minorities in China occupy a precarious place in the state, where the Confucian concept of cultural community plays down ethnicity and encourages integration of minority nationalities into the majority Han-Chinese society. This insightful book reveals the ethnic diversity underlying the People's Republic of China and examines how ethnicity intersects with social and political issues through key themes such as ethnic inequality, the preservation and contribution of the rich traditions and customs of minority cultures, and the autonomy of regions such as Tibet and Xinjiang. The author investigates the important role of the state and Beijing's assimilation stance to show how its nationality policy, driven by Confucian assimilation ideology, has dictated China's own minority rights regime and influenced its foreign policy towards international minority rights. This book by a distinguished scholar of ethnicity in China will be essential reading for students and scholars of race and ethnic relations,

nationalism and Chinese culture and society.

Tourism and Development Richard Sharpley, David J. Telfer, 2014-11 This book explores the relationship between tourism and development and establishes a conceptual link between the interconnected disciplines of tourism studies and development studies. Dream To Freedom Robert Hoss, Lynne Hoss, 2013-06-01 Dreams are often laden with emotion. Not only do the dreams themselves contain emotional triggers, but a frightening dream can leave us stressed and shaken in waking life. We might also be anxious about the possible recurrence of a bad dream. The Dream to Freedom technique is an effective way to address both the fear-producing aspects of dreams, and the waking anxiety associated with the possible recurrence of the dream. Using a structured approach drawn from traditional Gestalt therapy, it identifies emotionally triggering elements of a dream, and then applies EFT (also known as tapping) to each one in turn. Robert and Lynne Hoss are pioneers of the Dream to Freedom technique, which shows you the hidden meaning of each dream element. This practice, when combined with EFT, often provides surprising insights about the link between the dream and your waking life problems. Dream to Freedom guides you on an imaginal journey to creating positive outcomes in your dreams. It's also been used to: Evoke lucid dreams; Eliminate recurring nightmares; Remember forgotten dreams; Access subconscious creativity; Heal old childhood traumas; Reduce emotional triggering when you can't recall a specific event; Heal anxiety, depression, panic attacks, and other psychological problems; Tap within dreams. Dream to Freedom represents one of the most fascinating frontiers in which EFT can be applied, and is recommended for longtime dreamwork students as well as those with a more

casual interest in the intersection between dreamwork, personal growth, and EFT.

Strategic Communication, Corporatism, and Eternal Crisis Phil Graham, 2017-05-08 This book traces a century of militarised communication that began in the United States in April, 1917, with the institution of the Committee on Public Information (CPI), headed by George Creel and tasked with persuading a divided US public to enter World War I. Creel achieved an historic feat of communication: a nationalising mass mediation event well before any instantaneous mass media technologies were available. The CPI's techniques and strategies have underpinned marketing, public relations, and public diplomacy practices ever since. The book argues that the CPI's influence extends unbroken into the present day, as it provided the communicative and attitudinal bases for a new form of political economy, a form of corporatism, that would come to its fullest flower in the "globalisation" project of the mid-1990s.

Rehabilitation for Traumatic Brain Injury Walter M. High Jr., Angelle M. Sander, Margaret A. Struchen, Karen A. Hart, 2005-07-07 Rehabilitation For Traumatic Brain Injury (TBI) is a state-of-the-science review of the effectiveness of rehabilitation interventions. Leading experts conduct evidence-based reviews of specific areas of brain injury rehabilitation summarizing what is known in each area, critiquing the methodological problems of studies in the area, and then outlining new directions for research. The book begins with a review of the history of rehabilitation for TBI from World War I until the present. The second section of the book examines the rehabilitation of specific cognitive impairments in awareness, memory, executive functioning, communication, and emotion and behavior. The third section investigates special topics in rehabilitation of persons with TBI including substance abuse, interventions for caregivers, and vocational rehabilitation. The fourth section of the book covers rehabilitation with specific populations: children, older adults, and persons from diverse

cultures. The final section examines topics in medical rehabilitation including treatment of spasticity, minimally conscious patients, and the contribution of neuroimaging to rehabilitation.

Pagan Ethics Michael York, 2015-08-05 This book is the first comprehensive examination of the ethical parameters of paganism when considered as a world religion alongside Christianity, Islam, Judaism, Hinduism and Buddhism. The issues of evil, value and idolatry from a pagan perspective are analyzed as part of the Western ethical tradition from the Sophists and Platonic schools through the philosophers Spinoza, Hume, Kant and Nietzsche to such contemporary thinkers as Grayling, Mackie, MacIntyre, Habermas, Levinas, Santayana, etc. From a more practical viewpoint, a delineation of applied pagan ethics is then presented in connection with current moral issues such as same-sex union, recreational drugs, environmental awareness, abortion and terrorism. Finally, overviews of sectarian pagan ethics (Shinto, Santeria, Heathenism, Druidry, Romuva, Slavic, Kemeticism, Classical and Wicca) provide both the general and pagan reader with an understanding of the provocative range and differentiation of pagan ethical thought. The book approaches the Western ethical tradition as an historical development and a continuing dialogue. The novelty of this approach lies in its consideration of paganism as a legitimate voice of religious spirituality rather than a satanic aberration or ridiculous childish behavior. The book is aimed at both the contemporary Western pagan and anyone with an interest in the moral dilemmas of our times and the desire to engage in the global ethical discussion. Among the more important features of the book are its presentation of a re-evaluation of idolatry, the notion of the virtue value, the richness of the pagan tradition, and the expansion of Western ethics beyond its Christian heritage.

Talking Policy Rob Watts, 2020-08-04 When we catch a bus, visit a doctor, borrow a book from the library or enrol in a course we benefit from the social policies of government. Talking Policy

explains how the myriad programs and services we take for granted are developed and delivered, and how this fits into the political process. There is a human and political aspect to social policy-making; it's not all rational solutions to measurable problems. The authors explain how issues come to be defined as social problems, and offer an account of the historical development of social policy and the welfare state in Australia. They also outline the competing political and philosophical ideas which influence the different ways in which governments respond to social inequality and needs in the community. With detailed case studies from variety of areas of social policy making, Talking Policy is a valuable introduction to this complex and important field. 'Talking Policy is an informative, insightful book that is also absorbing and challenging.' Lois Bryson, Emeritus Professor, University of Newcastle 'With a commitment to reinvigorate policy debate, the authors make a convincing case that at its heart policy-making is about competing ethical visions, that ideas count, and that words serve as tools in this political and contested activity.' Associate Professor, Carol Bacchi, University of Adelaide

Tourism Peter Robinson, 2012 ...offers a comprehensive collection of the most frequently studies concepts in the field. Within the text, key terms, concepts, typologies and frameworks are examined in the context of the broader social sciences, blending together theory and practice to explore the scope of the subject. Terms covered include: authenticity, destination management, geographies of tourism, hospitality, LGBT tourism, mobility, planning, society and culture, sociology in tourism, tourism strategy. Each entry contextualizes, defines and debates the concept discussed, providing an excellent starting point for those studying tourism for the first time, and a quick reference for those who are more experienced. With case studies, examples and further reading throughout, this text will be invaluable for all undergraduate and postgraduate tourism students.--Cover.

European Anti-Catholicism in a Comparative and Transnational Perspective Yvonne

Maria Werner,Jonas Harvard,2013-08-01 Tales about treacherous Jesuits and scheming popes are an important and pervasive part of European culture. They belong to a set of ideas, images, and practices that, when grouped under the label anti-Catholicism, represent a phenomenon that can be traced back to the Reformation. Anti-Catholic movements and sentiments crossed boundaries between European countries, contributing to the early modern consolidation of national identities. In the nineteenth century, secularist movements adopted and transformed confessional criticism in a new internationalist dimension that was articulated across the whole Western world. A variety of liberal, conservative, secular, Protestant, and other forces gave shape to this counter-image, taking on the function of a pattern from which one's own ideals and beliefs could be chiselled out. The contributions to this volume show how different national contexts affected the proliferation of anti-Catholic messages over the course of four centuries of European history, and demonstrate that anti-Catholicism constituted a powerful European cross-cultural phenomenon.

The Confiscation of American Prosperity M. Perelman,2007-10-01 This book argues that the right-wing revolution in the United States has created deepening inequality and will lead to economic catastrophe. The author makes the case that over the past three decades the rich have confiscated wealth and income from the poor and middle class to a far greater extent than many realize, and he explores in detail important but commonly unmeasured dimensions of inequality. He also takes aim at the economics profession, criticising the analytical blinders that leave economists incapable of seeing the coming crisis.

1st International Conference on Advances in Mineral Resources Management and Environmental Geotechnology Zacharias Agioutantis,2004

Doing Business In.. Andrew Bertsch,James Ondracek,2010-08-21 Each of the volumes in this

series focuses on different countries while highlighting salient issues for doing business in each respective country. Each chapter in the series follows a specific outline so readers can easily compare and contrast across multiple settings. The authors intend for this series to be ongoing with new volumes released nearly annually.

Mapping Academic Values in the Disciplines Davide Simone Giannoni, 2010 A broad strand of applied linguistic research has focused on the language of science and scholarship, stressing its role in the construction and negotiation of knowledge claims. Central to the success of such texts is the use of evaluative expressions encoding what is considered to be desirable or undesirable in a given domain. While the speech acts relevant to evaluation have been extensively researched, little is known of the underlying values they encode. This volume seeks to fill the gap by exploring the main facets of academic value in a corpus of research articles from leading journals in anthropology, biology, computer science, economics, engineering, history, mathematics, medicine, physics and sociology. The collocations and qualified entities associated with such variables in the corpus provide insights into how scholars draw on a repertoire of conventional, largely unqualified, axiological meanings instrumental to the production of new knowledge in their field.

Personal Knowledge Management David J. Pauleen, 2016-05-13 Individuals need to survive and grow in changing and sometimes turbulent organizational environments, while organizations and societies want individuals to have the knowledge, skills and abilities that will enable them to prosper and thrive. Personal Knowledge Management (PKM) is a means of coping with complex environmental changes and developments: it is a form of sophisticated career and life management. Personal Knowledge Management is an evolving concept that focuses on the importance of individual growth and learning as much as on the technology and management processes traditionally associated with

organizational knowledge management. This book looks at the emergence of PKM from a multi-disciplinary perspective, and its contributors reflect the diverse fields of study that touch upon it. Relatively little research or major conceptual development has so far been focused on PKM, but already significant questions are being asked, such as 'is there an inherent conflict between personal and organizational knowledge management and how best do we harmonize individual and organizational goals?' This book will inform, stimulate and challenge every reader. By delving both deeply and broadly into its subject, the distinguished authors help all those concerned with 'knowledge work' and 'knowledge workers' to see how PKM supports and affects individuals, organizations and society as a whole; to better understand the concepts involved and to benefit from relevant research in this important area.

Rotifer Symposium VI John Gilbert, E. Lubzens, M.R. Miracle, 2012-12-06 As in previous symposia, some current research topics were selected for review and eight invited papers were presented. For the first time a paper was presented on the historical aspects of Rotiferology, covering European research between 1680-1950. A special workshop session was devoted to a debate on a controversial topic: Rotifer Phylogeny. The workshop resulted in a very successful discussion and the integration of scattered evidence and hypotheses on the phylogenetic origin of rotifers, the relationships between major rotifer groups, and the mechanisms of evolution.
