**Kanishka** Devaguptapu Babu,2021-07-29 At RLS Productions in New York City, Indian-Americans Simrin and Priya, join their boss, Bob, whose ancestry is European, in hearing a pitch for a movie, from PG, a writer who mysteriously went AWOL after impressing them with part of his story a few years before. And as the increasingly enchanted producers listen, PG, who may or may not be telling a true story, weaves a tale of two interconnected families whose warm bond overcomes their cultural differences. The story stretches from India, to England, to the United States, in a colorful tapestry of family love, epic tragedy, and calamitous encounters with history. Redolent with rich tones of Hindu philosophy and culture, Kanishka melds historical fact with fiction, to show the human cost of blind ideology and make a compelling case for love surviving beyond the grave.

*International Intervention and State-making* Selver B.

Sahin, 2015-07-16 This book analyses the changing dynamics of sovereignty resulting from contemporary international state-building interventions. It aims to highlight how the exercise of 'exceptional' forms of power by intervening agencies impacts on the sovereign capacity of intervened states. Drawing upon in-depth analyses of three case studies – Kosovo, East Timor and the Kurdistan Regional Government, the book shifts the focus of the debate to the nature of contemporary intervention as an act of statemaking, and argues that foreign intervention changes the dynamics of political power upon which sovereignty is structured. At the same time, it reveals how intervention reproduces the imposed conditions of international state-making, thus permanently internalising external regulatory mechanisms. International intervention, in other words, becomes the constitutive element of governance in the newly created state. This book will be of much interest to students of statebuilding, war and conflict studies, global governance, security studies and IR.

*How Greek Science Passed On To The Arabs* Delacy

O'Leary, 2015-12-22 First published in 2002. The history of science is one of knowledge being passed from community to community over thousands of years, and this is the classic account of the most influential of these movements -how Hellenistic science passed to the Arabs where it took on a new life and led to the development of Arab astronomy and medicine which flourished in the courts of the Muslim world, later passing on to medieval Europe. Starting with the rise of Hellenism in Asia in the wake of the campaigns of Alexander the Great, O'Leary deals with the Greek legacy of science, philosophy, mathematics and medicine and follows it as it travels across the Near East propelled by religion, trade and conquest. Dealing in depth with Christianity as a Hellenizing force, the influence of the Nestorians and the Monophysites; Indian influences by land and sea and the rise of Buddhism, O'Leary then focuses on the development of science

during the Baghdad Khalifate, the translation of Greek scientific material into Arabic, and the effect for all those interested in the history of medicine and science, and of historical geography as well as the history of the Arab world.

Soft Target Zuhair Kashmeri, Brian McAndrew, 2005-09-06 A provocative look at one of Canada's biggest tragedies On March 16, 2005, almost twenty years after one of the biggest mass murders in Canadian Aviation history, the Air-India Case concluded with a verdict that authors Zuhair Kashmeri and Brian McAndrew predicted sixteen years ago when Soft Target was first published: not guilty. In this second edition, the two offer a detailed foreword that brings readers up-to-date with some startling new information surrounding the twin bombings on June 23, 1985 in the air over the Atlantic, and on the ground in Japan, which left 331 people dead. They offer key details from the trial of Ripudaman Singh Malik and Ajaib Singh Bagri that took place in a specially-built Vancouver courtroom, leads that were not followed up, and more details of India's intelligence service's clandestine interference in Canada. They explain how their own prediction that justice would not be found because of a botched investigation came true, and that only a public inquiry will offer closure to the families of the victims.

**The New Electronic Marketplace** George Christou, Seamus Simpson, 2007-01-01 This book breaks new ground by exploring governance strategies that the EU has been developing over the last decade for the growing electronic economy driven by the Internet. Through an analysis of key EU policy initiatives, the authors provide an explanation of both the form and mechanics of emergent governance arrangements within the European e-economy. Drawing on data gathered through interviews with key national and EU level policymakers, the volume applies theoretical insights from academic work on the 'regulatory' and 'post-regulatory' state to situate and explain the EU's role as an international regional actor in a new area of economic activity with

important national and global dimensions.

*India in a globalized world* Sagarika Dutt, 2013-07-19 This book looks at India in the context of a globalized world. It starts by looking at the history of Indian civilization, exploring the roots of Indian identity and highlighting processes such as foreign invasions, foreign trade, cultural imperialism, colonial rule and the growth of Indian nationalism. The book examines the gradual democratization of Indian politics. Cultural and ethnic divisions in Indian society are examined in depth, as are the problems that have prevented economic development and stood in the way of economic liberalization. The history of India's integration into the global economy is considered, and the opportunities available to the country in the early years of the 21st century are detailed. The final chapters consider the Indian government's perception of the Indian diaspora, as well as the changing priorities reflected in India's foreign policy since 1947.

*Governance and Regionalism in Asia* Nicholas Thomas, 2009-01-13 In the decade since the Asian financial crisis the ten states of Southeast Asia that form ASEAN, together with China, Japan and South Korea have formed the basis of a community intended to support the well-being of its member states, markets and peoples. This highly successful regionalisation was not anticipated by the region's leaders, however, and as a result, policy makers are increasingly talking about 'meeting fatigue' and the need to find a better way to govern regional affairs. Among the reforms being considered is a shift towards a more rules-based culture as well as the more explicit incorporation of both private sector and civil society organisations into the policy processes. In short, ASEAN+3 is seeking to develop new norms and processes for its networks and institutions. This book explores the pressures currently influencing East Asian regionalist policy debates, analysing the trend towards deeper integration and the emergence of a governance model for managing regional processes. Combining state and subnational perspectives in

conjunction with an examination of the role of the business community and civil society organisations, this book highlights the policy challenges confronting regionalism and governance in East Asia, including key issues such as the rule of law, financial cooperation and a case study on disaster management.

Law Reform in Developing and Transitional States Tim Lindsey, 2006-12-05 Law reform in developing countries has become an increasingly topical subject in recent years. A critical issue is why so many law reform projects in developing economies are regarded by their sponsors and recipients as unsuccessful. This informative book: examines examples of law reform projects in post-socialist and post-authoritarian states in Asia identifies common problems proposes analytical frameworks for understanding the problems identified. Though parallels between Asian models and those in developing states elsewhere in the world are strong, the book has been developed to avoid suggestion that the issues covered are somehow peculiarly 'Asian'- indeed, it is shown that cultural relativist approaches to Asia are unsustainable. This is an invaluable reference for those involved in the areas of development economics, Asian studies and comparative politics.

India, Pakistan and the Secret Jihad Praveen Swami, 2006-10-19 India, Pakistan and the Secret Jihad explores the history of jihadist violence in Kashmir, and argues that the violent conflict which exploded after 1990 was not a historical discontinuity, but, rather, an escalation of what was by then a five-decade old secret war. Praveen Swami addresses three key issues: the history of jihadist violence in Jammu and Kashmir, which is examined as it evolved from 1947-48 onwards the impact of the secret jihad on Indian policy-making on Jammu and Kashmir, and its influence on political life within the state why the jihad in Jammu and Kashmir acquired such intensity in 1990. This new work will be of much interest to students of the India-Pakistan conflict, South Asian politics and security studies in general.

## **Globalization And Infrastructural Development In India**

### **Territoriality, Asymmetry, and Autonomy S.**

Henders,2010-03-01 Minority special status arrangements figure prominently in efforts to articulate universality with territorialized difference in many parts of the world. Yet much of what has been written about this important modality of the asymmetrical state has focused exclusively on the liberal democratic West. This book extends the analysis. It offers a structured-focused comparison of the experience of the People's Republic of China, France, and Spain. Case studies on central Tibet, Hong Kong, Corsica, and Catalonia are used to identify the conditions that affect the degree to which special status arrangements enhance stability while improving the citizenship of both minority territorial communities and their more vulnerable residents.

### **How Governments Borrow** Ben Cormier,2024-05-29

How Governments Borrow reveals how annual borrowing decisions are informed by domestic politics. The book traces the annual fiscal policymaking process in Emerging Markets (EM) to show how a government's partisan policy preferences are a primary determinant of annual external borrowing decisions and thus patterns of debt accumulation. That sovereign debt composition has partisan political roots provides insights for scholars in political science, international relations, economics, sociology, and public administration that work on sovereign debt. Sovereign debt composition enhances or limits the capacity of an EM government to contribute to social and economic development. Many EMs depend on foreign currency debt. How much external debt an EM government owes, the cost of that debt, the maturity of that debt, and the conditions attached to that debt all determine the political and economic opportunities and risks associated with a government's borrowings. EMs borrow from different sources each year, leading them to build different sovereign debt structures over time. Some prioritize cheap yet conditional official credit,

which constrains policy autonomy but enhances debt sustainability. Others prioritize comparatively expensive bond markets, which enhances policy autonomy but brings more expensive repayment obligations on to national balance sheets. As countries accumulate debt, the borrowing choices they make come to have important effects on fiscal space, debt sustainability, and development.

*Tourism in South and Southeast Asia* C. Michael Hall, Stephen Page, 2012-10-12 'Tourism in South and South East Asia' is a comprehensive and solid introduction to tourism in South and South East Asia with a specific appeal both to institutions in the region, and other institutions who wish to expose students to one of the most dynamic tourism regions in the world. Despite downturns in outbound tourism (due to the current economic crisis), inbound tourism from outside the region has continued to increase with governments placing more emphasis on the economic significance of tourism than ever. 'Tourism in South and South East Asia' is the first tourism book to deal comprehensively with the implications of the Asian economic crisis for tourism. With South and South East Asia set to be the fastest growing area of tourism activity in the world well into the next century, 'Tourism in South and South East Asia' is an essential text for students both within and outside of this region. Dealing with concepts, themes and issues which are pertinent to tourism development, planning, marketing and management; these two internationally known authors have produced an authoritative text that covers all aspects of this topic through the use of illustrative and relevant case studies.

*Spheres of Exemption, Figures of Exclusion* Gry Ardal, Jacob Bock, 2010 The war on terror, the globalization of politics and the emergence of international law have shaped our recent history and brought about new questions and challenges for politicians as well as for the sciences concerned with understanding the dynamics at play. With contributions from philosophy, the history

of ideas, social science, political science and literature studies, *Spheres of Exemption, Figures of Exclusion* offers thirteen investigations into the co-constitutive relationship between subjectivity and political and legal order, combining theoretical reflection with empirical and historical case studies. The result is an interdisciplinary kaleidoscope providing the reader with distinct and original perspectives on what is at heart a singular concern: the significance of order and its limits for the exercise of freedom of thought and action for the human being.

*Autonomy and Armed Separatism in South and Southeast Asia* Michelle Ann Miller, 2012 Armed separatist insurgencies have created a real dilemma for many national governments of how much freedom to grant aggrieved minorities without releasing territorial sovereignty over the nation-state. This book examines different approaches that have been taken by seven states in South and Southeast Asia to try and resolve this dilemma through various offers of autonomy. Providing new insights into the conditions under which autonomy arrangements exacerbate or alleviate the problem of armed separatism, this comprehensive book includes in-depth analysis of the circumstances that lead men and women to take up arms in an effort to remove themselves from the state's borders by creating their own independent polity.

*Transparency and Authoritarian Rule in Southeast Asia* Garry Rodan, 2004-08-02 This book rejects the notion that the 1997-98 Asian economic crisis was further evidence that ultimately capitalism can only develop within liberal social and political institutions.

Media in China Stephanie Hemelryk Donald, Yin Hong, Michael Keane, 2014-02-04 Multinational media companies increasingly look to China as a highly important market for the future, but with what degree of confidence should they do so? Media in China is about a new kind of revolution in China - a revolution in which rapidly commercializing media industries confront slow-changing

power relations between political, social and economic spheres. This interdisciplinary collection draws on the expertise of industry professionals, academic experts and cultural critics. It offers a variety of perspectives on audio-visual industries in the world's largest media market. In particular, the contributors examine television, film, music, commercial and political advertising, and new media such as the internet and multimedia. These essays explore evolving audience demographics, new patterns of media reception in regional centres, and the gradual internationalization of media content and foreign investment in China's broadcasting industries. This book will of use to students and professionals involved in media and communication, as well as anyone interested in contemporary China.

Globalization, Governmentality and Global Politics Ronnie Lipschutz, James K. Rowe, 2006-03-07 Globalization is moving fast, impacting on the life of all nations with accelerating force. In this new study Ronnie Lipschutz shows how it is being handled by specific groups seeking positive outcomes for the people and causes they represent. Globalization, Governmentality and Global Politics details how the widespread failure of states and corporations to regulate the impact of increased globalization has given rise to non-governmental organizations and movements, aiming to influence corporations regarding social responsibilities and address key issues such as human rights, environmental destruction, unhealthy working conditions and child labour. Assessing the effectiveness of these efforts, it examines both the new movements and the issues they are tackling. With three key case studies on the clothing industry, sustainable forestry and corporate social responsibility, it explores the tensions between politics and management, examining the theoretical implications of regulation for politics, citizenship and the state. Finally, it takes a fresh look at what is to be done, calling for a return to politics centred on the direct participation of the individual in the social choices that affect quality of life, working conditions and the global

future.
