Humans Are Underrated Geoff Colvin, 2015-08-04 As technology races ahead, what will people do better than computers? What hope will there be for us when computers can drive cars better than humans, predict Supreme Court decisions better than legal experts, identify faces, scurry helpfully around offices and factories, even perform some surgeries, all faster, more reliably, and less expensively than people? It's easy to imagine a nightmare scenario in which computers simply take over most of the tasks that people now get paid to do. While we'll still need high-level decision makers and computer developers, those tasks won't keep most working-age people employed or allow their living standard to rise. The unavoidable question—will millions of people lose out, unable to best the machine?—is increasingly dominating business, education, economics, and policy. The bestselling author of *Talent Is Overrated* explains how the skills the economy values are changing in historic ways. The abilities that will prove most essential to our success are no longer the technical, classroom-taught left-brain skills that economic advances have demanded from workers in the past. Instead, our greatest advantage lies in what we humans are most powerfully driven to do for and with one another, arising from our deepest, most essentially human abilities—empathy, creativity, social sensitivity, storytelling, humor, building relationships, and expressing ourselves with greater power than logic can ever achieve. This is how we create durable value that is not easily replicated by technology—because we're hardwired to want it from humans. These high-value skills create tremendous competitive advantage—more devoted customers, stronger cultures, breakthrough ideas, and more effective teams. And while many of us regard these abilities as innate traits—"he's a real people person," "she's naturally creative"—it turns out they can all be developed. They're already being developed in a range of far-sighted organizations, such as:

- the Cleveland Clinic,

which emphasizes empathy training of doctors and all employees to improve patient outcomes and lower medical costs; • the U.S. Army, which has revolutionized its training to focus on human interaction, leading to stronger teams and greater success in real-world missions; • Stanford Business School, which has overhauled its curriculum to teach interpersonal skills through human-to-human experiences. As technology advances, we shouldn't focus on beating computers at what they do—we'll lose that contest. Instead, we must develop our most essential human abilities and teach our kids to value not just technology but also the richness of interpersonal experience. They will be the most valuable people in our world because of it. Colvin proves that to a far greater degree than most of us ever imagined, we already have what it takes to be great.

World Guide to Special Libraries Marlies Janson, Helmut Opitz, 2011-12-22 The World Guide to Special Libraries lists about 35,000 libraries world wide categorized by more than 800 key words - including libraries of departments, institutes, hospitals, schools, companies, administrative bodies, foundations, associations and religious communities. It provides complete details of the libraries and their holdings, and alphabetical indexes of subjects and institutions.

Strange Sisters Jaye Zimet, 1999 The classic pulps were detective stories, horror, fantasy, and science fiction, but in the midst of this melange developed a significant subcategory of lurid, titillating tales of lesbian love. Aimed primarily at a heterosexual audience they offered readers a glimpse into a secret world of illicit passion and scandalous sex between delicious and devilish dames. This book is the first to be devoted to the cover art of these wildly wicked novels. Bold, kitschy, colourful, they are fraught with sexual tension. Includes 200 full colour illustrations.

Japanese Media Cultures in Japan and Abroad: Transnational Consumption of Manga, Anime, and Media-Mixes Manuel

Hernández-Pérez,2019-06-24 In the last few decades, Japanese popular culture productions have been consolidated as one of the most influential and profitable global industries. As a creative industry, Japanese Media-Mixes generate multimillion-dollar

revenues, being a product of international synergies and the natural appeal of the characters and stories. The transnationalization of investment capital, diversification of themes and (sub)genres, underlying threat in the proliferation of illegal audiences, development of internet streaming technologies, and other new transformations in media-mix-based production models make the study of these products even more relevant today. In this way, manga (Japanese comics), anime (Japanese animation), and video games are not necessarily products designed for the national market. More than ever, it is necessary to reconcile national and transnational positions for the study of this cultural production. The present volume includes contributions aligned to the analysis of Japanese popular culture flow from many perspectives (cultural studies, film, comic studies, sociology, etc.), although we have emphasized the relationships between manga, anime, and international audiences. The selected works include the following topics: • Studies on audiences—national and transnational case studies; • Fandom production and Otaku culture; • Cross-media and transmedia perspectives; • Theoretical perspectives on manga, anime, and media-mixes.

Danger, Development and Legitimacy in East Asian

Maritime Politics Christian Wirth, 2017-11-15 Grounded in extensive empirical research, *Danger, Development and Legitimacy in East Asian Maritime Politics* addresses the major issues of geopolitics in the region that have been and will continue to shape the international politics of the Asia-Pacific for years to come. Covering the nation-states of China, Japan and South Korea, it includes an examination of the key island disputes, as well as analysis of the North Korea-South Korea

clashes in the Yellow Sea, controversies in Japan's relations with both Koreas and the so-called 'history disputes', including recognition of World War II atrocities across the region. In doing so, this book explores a range of themes from the ecological environment to the globalized nature of shipping and therein links the East Asian maritime sphere directly to the dynamics and developments in the domestic politics of each country. Thus, it serves to demonstrate how several controversial debates in the international politics of the Asia-Pacific are ultimately and inextricably intertwined. A timely contribution that furthers our understanding of contemporary politics of the Asia-Pacific, this book will be of great interest to students and scholars of Asian politics, international relations and the Asia-Pacific region in general.

Globalization and Environmental Challenges Hans Günter Brauch, Úrsula Oswald Spring, Czeslaw Mesjasz, John Grin, Pál Dunay, Navnita Chadha Behera, Béchir Chourou, Patricia Kamari-Mbote, P. H. Liotta, 2008-01-23 Put quite simply, the twin impacts of globalization and environmental degradation pose new security dangers and concerns. In this new work on global security thinking, 91 authors from five continents and many disciplines, from science and practice, assess the worldwide reassessment of the meaning of security triggered by the end of the Cold War and globalization, as well as the multifarious impacts of global environmental change in the early 21st century.

Governing Disaster in Urban Environments Julia Nevárez, 2018-04-02 Governing Disaster in Urban Environments provides a comprehensive account of relevant debates, conceptualizations, and practical considerations for the governance of disaster at multiple scales. In this interdisciplinary work, Julia Nevárez uses the example of Hurricane Sandy to analyze the complex phenomenon of climate change.

Cultural Barriers to the Success of Foreign Media Content Ulrike Rohn, 2009 What media content attracts

audiences across cultures and what does not? What does the cross-cultural audience demand depend on? The author takes a new approach to understanding cultural barriers to the success of foreign media content by analyzing the entry strategies of Time Warner, Disney, Viacom, News Corporation, and Bertelsmann with regard to China, India, and Japan in terms of their respective localization efforts. In-depth interviews with companies' representatives give an insight into how they view the need for locally-produced media in these countries. The author develops and employs the Lacuna and Universal Model that provides a new theoretical classification of reasons for the cross-cultural success and failure of media content, as well as the Vertical Barrier Chain that locates cultural barriers in the wider context of legal, political, and economic barriers to successful entry into foreign media markets.

Korean Pop Music ,2021-11-15 Korean popular music has in the last decade become a significant model for youth culture throughout Asia. Yet, although the Korean music industry is both vibrant and massive, this is the first book-length work devoted to the subject to appear in English.

Robinson Family Governess Judith Burtner, 2019-01-01 In

1911, 22 year old Hettie Belle Matthew takes a daring leap into the unknown as she sails away from her cosmopolitan life in the bustling Bay Area for the remote Hawaiian Islands to work as a Governess for the prominent and wealthy Robinson Family. Letters discovered by her granddaughter over a century later are painstakingly woven together to bring this true story to life with rare insight and authenticity. "Hettie Belle's descriptive letters from over one hundred years ago make me feel as if I know my grandparents well. Her experiences bring the family to life, and I am not able to put the book down!"-- LOIS ROBINSON SOMERS, Descendant "Hettie Belle's charming letters open a fascinating window into the world of Kaua`i and Ni`ihau over 100 years ago. Through her eyes we are introduced to the lives of the plantation elite who ran Kaua`i society and to the magnificent landscapes that surrounded them. Hettie writes with aloha for both land and people, and Judith Burtner provides the necessary context so that we can get the most out of Hetties letters."--ANDY BUSHNELL, Emeritus Professor of History, Kaua`i Community College

Hit Man Lawrence Sanders, 2011-11-03 Keller is a hit man who finds his life turned upside down when a job means more than the one allotted death... Keller is an assassin - he is paid by the job and works for a mysterious man who nominates hits and passes on commissions from elsewhere. Keller goes in, does the job, gets out: usually at a few hours' notice. Often Keller's work takes him out of New York to other cities, to pretty provincial towns that almost tempt him into moving to the woods and the lake shores . . . Almost, but not quite. But then a job goes wrong in a way Keller has never imagined and it leaves him with a big problem. Finding himself with an orphan on his hands, Keller's job begins to interfere with his carefully guarded life. And once you let someone in to your life, they tend to want to know what you do when you're away. And killing for a living, lucrative though it is, just doesn't find favour with some folks.
