**Public Policy for Academic Quality** David D. Dill, Maarja Beerkens, 2010-04-12 Over the last decade the structure of higher education in most countries has undergone significant change brought about by social demands for expanded access, technological developments, and market forces. In this period of change the traditional concerns with access and cost have been supplemented by a new concern with academic quality. As a consequence, new public policies on academic quality and new forms of academic quality assurance have rapidly emerged and swiftly migrated across continents and around the globe. The growing public debate about academic quality assurance within and across countries however has not always been well informed by analyses of the strengths and weaknesses of these new policy instruments. The Public Policy for Academic Quality Research Program (PPAQ) was designed to provide systematic analyses of innovative external quality assurance policies around the world. This volume presents the fourteen analyses of national policies on academic quality assurance conducted as part of the PPAQ Research Program utilizing the knowledge of informed international scholars. Each policy analysis examines the policy goals, implementation problems, and impacts of these newly developed national quality assurance instruments. The book concludes with an assessment of the lessons learned from these collected policy analyses and outlines the framework conditions that appear essential for assuring academic standards in the university sector.

Understanding Language Classroom Contexts Martin Wedell, Angi Malderez, 2013-04-11 Arguably the whole point of education is to effect change in what people know and are able to do. Globalization has contributed to a common perception worldwide of the need to introduce changes to the teaching and learning of languages. The success of many attempts to do so has been limited by insufficient consideration of implementation contexts. Understanding Language Classroom Contexts explores and illustrates how what happens in any (language) classroom is influenced by (and can be an influence on) the contexts in which it is situated. A clear understanding of these influences is thus the starting point for planning effective change. The book considers many visible and invisible features of the multiple layers of any context, and provides a framework for understanding the types of factors that may influence whether changes (planned by a teacher or externally initiated) are likely to be successful. The book will help teachers (and educational managers or change planners outside the classroom) to understand why their classrooms are as they are and so to make informed decisions about what can or cannot (or not easily) be changed, and suggests how any changes might be appropriately managed.

**Gender and Access to Land** Food and Agriculture Organization of the United Nations, 2002 This guide has been prepared to support land administrators in governments and their counterparts in civil society who are involved in land access and land administration questions in rural development. It is designed to show where and why gender inclusion is important in projects and programmes that aim at improving land tenure and land administration arrangements.

Challenges and Opportunities for Agricultural Intensification of the Humid Highland Systems of Sub-Saharan Africa Bernard Vanlauwe, Piet van Asten, Guy Blomme, 2014-10-07 The humid highlands in sub-Saharan Africa (SSA) are characterized by high population densities and require intensification. The Consortium for Improving Agriculture-based Livelihoods in Central Africa (CIALCA) has set up a research for development platform in various mandate areas in DR Congo, Burundi, and Rwanda, aiming to identify improved production, market, and nutrition options and facilitating the access for development partners to these options. This platform is supported by capacity building, multi-stakeholder dialogue, and monitoring and evaluation efforts. The conference, facilitated by CIALCA, aimed to (i) take stock of the state-of the art in agricultural intensification in the highlands of SSA and (ii) chart the way forward for agricultural research for development in the humid highlands of SSA, and more specifically in the recently launched Humidtropics Consortium Research Programme, through keynote, oral and poster presentations, and strategic panel discussions.

*Attaining Access for All* Asian Development Bank, 2010-10-01 Universal access to safe, reliable energy is a necessary condition for providing the poor with safe water and sanitation, for maintaining adequate standards of living, and for achieving any of the Millennium Development Goals. The Asian Development Bank recognizes the importance of electricity and water access for the poor and has committed to providing such access by establishing the Energy for All and Water for All initiatives. While broad efforts aimed at regulatory reform and increasing energy and water access may be helpful, targeted interventions, measures, and approaches are often needed to ensure that the poor benefit from these efforts. This publication identifies specific infrastructure and utility service reform measures that can be taken to advance the interests of the poor.

**The Governance of Daily Life in Africa** Giorgio Blundo, Pierre-Yves Le Meur, 2009 Anchored in an empirically-grounded anthropology, this book explores the notion of governance in a non-normative way. It describes and analyses the institutional and political processes through which social actors and groups - be they state, private or 'third-sector' - contribute to the provision of public and collective goods or services. The book draws on case studies from Anglophone and Francophone Africa, crossing anthropological traditions that have too often evolved in parallel directions and dealing with a range of topics such as health, water supply, sanitation and waste management, security, humanitarian aid, land issues and decentralisation. Beyond African boundaries, it contributes to current debates about governmentality, public policy, subject making, public/private boundaries, and the role of the state.

Standards and Quality in Higher Education John Brennan, Peter De Vries, Ruth Williams, 1997 This study addresses debates on academic standards and quality assurance from the perspectives of institutional leaders, national quality bodies and higher education researchers. It includes the results of studies of the impact of external quality assurance upon management and decision making.

Society, State and Market John Martinussen, 1997-02-15 As the only textbook that presents the full range of theoretical approaches and current debates on economic development, John Martinussen's guide is an essential reader and student text on this topic.

**The Transnational Land Rush in Africa** Logan Cochrane, Nathan Andrews, 2022-02-16 This volume provides up-to-date information on what has happened in the African 'land rush', providing national case studies for countries that were heavily impacted. The research will be a critical resource for students, researchers, advocates and policy makers as it provides detailed, long-term assessments of a broad range of national contexts. In addition to the specific questions of land and investment, this book sheds light on the broader international political economy of development in different African countries.

**The Qur'ān and the Moon** Imran HOSEIN, 2021-06-10 This book on the topic of 'The Qur'ān and the Moon-- Methodology for Monthly Recitation of the Qur'ān', is a companion volume to my previous book entitled 'Methodology for Study of the Qur'ān'; but which will now be renamed: 'The Qur'ān and the Stars--Methodology for Study of the Qur'ān'. I was in London on the evening of 29th day of Shabān 1440(H) when it became

known that the moon of Ramadān was not seen anywhere in UK, and yet schoolboys in the Muslim community declared that Ramadān had commenced in UK. The 'sheep' and the 'cattle' then followed them blindly! The same mistake was repeated in 1441(H) when they again commenced fasting one day early on the basis of a plea that they had arrived at the 30th day of Shabān. The 'sheep' and the 'cattle' again followed them blindly! They acted on the basis of an announcement that the moon was sighted in Dajjāl's kingdom of Saudi Arabia, or that the month had commenced in Saudi Arabia, and in doing so they made both a silly as well as a dangerous mistake in departing from the system of time ordained by Allah Most High. This book explains that mistake. Those who took that wrong decision, as well as those who accepted and followed that decision, will be questioned on Judgement Day for what they did. Since they started Ramadān (or Shabān before Ramadān) on the wrong day, the implication is that they lost the greatest night of the whole year--namely Lailatul Qadr; and even more damage was done when they consequently lost the capacity to connect from lunar time to cosmic time and thence to Absolute time. Only lunar time can take us to a timeless world; we can climb even up a mountain to sit in a cave, in an effort to travel to other worlds of space and time, -- but if we do not live in lunar time we will travel to nowhere! They are probably unaware that only lunar time can take us to a timeless world, and that whoever has never tasted timelessness can eventually become a prisoner of the Dunyah. The Imām of Purley Masjid in Croydon, London, made a tearful request that I address the subject of moon-sighting for the commencement of the lunar month in Islam so that Muslims might be better-guided on that subject. This book emerged in consequence of my attempt to respond to that request, and I am confident that our explanation of the subject of Dajjāl and the System of Time in Islam would now deter such Muslims who have the capacity to 'think', from ever again following those who, even though they are in London, recklessly rush to embrace a Saudi or a Moroccan moon. I am grateful for the numerous offers of help I received from so many to meet the cost of printing this book in several languages, so that, in addition to being sold on my online bookstore, [www.imranhosein.com](http://www.imranhosein.com), large numbers of copies could be distributed free of charge in UK and elsewhere. May Allah Most Kind, bless them all. Amīn! Those who read this book and would like to participate in the effort to print large numbers of copies for free distribution around the world, should kindly contact me by email. ( [inhosein@hotmail.com](mailto:inhosein@hotmail.com) ). If you would also like me to come in person to teach this subject to your community, do please send me an email and, if Allah so Wills, I will come to you.

Dajjal, the Qur'an, and Awwal Al-Zamaan: The Antichrist, The Holy Qur'an, and The Beginning of History Imran Hosein,2019-08-31 History began with a Divine warning not to approach a forbidden tree of lust to rule over others. History is ending with that new actor on the stage of the world displaying an unprecedented imperial lust to rule the world. That new actor possesses power unprecedented in human history and has already used that power through Gog and Magog to spread himself out in all directions as he took control of the world. He then proceeded to liberate the Holy Land for the Jews, to bring them back to the Holy Land to reclaim it as their own two thousand years after they had been expelled from it by Divine decree, and to restore in the Holy Land a State of Israel. That mysterious new actor is now preparing the way for Israel's Pax Judaica to replace USA's Pax Americana. This pioneering book on Islamic Eschatology has identified that strange and mysterious new actor who occupies center-stage in the world in the End-time, and who brought modern western civilization into being, as Dajjāl the false Messiah.
