Paul E. Jose

Doing Statistical Mediation and Moderation Paul E. Jose, 2013-03-29 Written in a friendly, conversational style, this book offers a hands-on approach to statistical mediation and moderation for both beginning researchers and those familiar with modeling. Starting with a gentle review of regression-based analysis, Paul Jose covers basic mediation and moderation techniques before moving on to advanced topics in multilevel modeling, structural equation modeling, and hybrid combinations, such as moderated mediation. User-friendly features include numerous graphs and carefully worked-through examples; Helpful Suggestions about procedures and pitfalls; Knowledge Boxes delving into special topics, such as dummy coding; and end-of-chapter exercises and problems (with answers). The companion website provides downloadable sample data sets that are used in the book to demonstrate particular analytic strategies, and explains how researchers and students can execute analyses using Jose's online programs, MedGraph and ModGraph. Appendices present SPSS, AMOS, and Mplus syntax for conducting the key types of analyses--

European Yearbook of International Economic Law 2016 Marc Bungenberg, Christoph Herrmann, Markus Krajewski, Jörg Philipp Terhechte, 2016-07-16 Volume 7 of the EYIEL focusses on critical perspectives of international economic law. Recent protests against free trade agreements such as the Transatlantic Trade and Investment Partnership (TTIP) remind us that international economic law has always been a politically and legally

contested field. This volume collects critical contributions on trade, investment, financial and other subfields of international economic law from scholars who have shaped this debate for many years. The critical contributions to this volume are challenged and sometimes rejected by commentators who have been invited to be “critical with the critics”. The result is a unique collection of critical essays accompanied by alternative and competing views on some of the most fundamental topics of international economic law. In its section on regional developments, EYIEL 7 addresses recent megaregional and plurilateral trade and investment agreements and negotiations. Short insights on various aspects of the Transpacific Partnership (TPP) and its sister TTIP are complemented with comments on other developments, including the African Tripartite FTA and the negotiations on a plurilateral Trade in Services Agreement (TiSA). Further sections address recent WTO and investment case law as well as recent developments concerning the IMF, UNCTAD and the WCO. The volume closes with reviews of recent books in international economic law.

Modeling Dyadic and Interdependent Data in the Developmental and Behavioral Sciences Noel A. Card, James P. Selig, Todd Little, 2011-04-12 This book reviews methods of conceptualizing, measuring, and analyzing interdependent data in developmental and behavioral sciences. Quantitative and developmental experts describe best practices for modeling interdependent data that stem from interactions within families, relationships, and peer groups, for example.

Complex models for analyzing longitudinal data, such as growth curves and time series, are also presented. Many contributors are innovators of the techniques and all are able to clearly explain the methodologies and their practical problems including issues of measurement, missing data, power and sample size, and the specific limitations of each method. Featuring a balance between analytic strategies and applications, the book addresses: The Actor-Partner Interdependence Model for analyzing influence between two individuals The Intraclass Correlational Approach for analyzing distinguishable roles (parent-child) or exchangeable (same-sex) dyadic data The Social Relations Model for analyzing group interdependency Social Network Analysis approaches for relationships between individuals This book is intended for graduate students and researchers across the developmental, social, behavioral, and educational sciences. It is an excellent research guide and a valuable resource for advanced methods courses.

Teaching Psychology in Higher Education Dominic Upton, Annie Trapp, 2010-01-22 This ground-breaking book is the first to address the learning and teaching issues associated with psychology in Higher Education in the UK and Europe Presents effective, evidence-based practice and advice for both experienced and new lecturers Covers challenging areas of psychology teaching, such as research methods and statistics, supervision of research projects and management of online learning Relevant for European Universities aligning with the Bologna Declaration

Privacy in the Information Society Philip Leith, 2016-12-05 Information society projects promise wealth and better services to those countries which digitise and encourage the consumer and citizen to participate. As paper recedes into the background and digital data becomes the primary resource in the information society, what does this mean for privacy? Can there be privacy when every communication made through ever-developing ubiquitous devices is recorded? Data protection legislation developed as a reply to large scale centralised databases which contained incorrect data and where data controllers denied access and refused to remedy information flaws. Some decades later the technical world is very different one, and whilst data protection remains important, the cries for more privacy-oriented regulation in commerce and eGov continue to rise. What factors should underpin the creation of new means of regulation? The papers in this collection have been drawn together to develop the positive and negative effects upon the information society which privacy regulation implies.

Biometric Systems James L. Wayman, Anil K. Jain, Davide Maltoni, Dario Maio, 2005-12-06 Biometric Systems provides practitioners with an overview of the principles and methods needed to build reliable biometric systems. It covers three main topics: key biometric technologies, design and management issues, and the performance evaluation of biometric systems for personal verification/identification. The four most widely used technologies are focused on - speech, fingerprint, iris and face recognition. Key features include: in-depth coverage of the technical and practical obstacles which are often neglected by application developers and system integrators and which

result in shortfalls between expected and actual performance; and protocols and benchmarks which will allow developers to compare performance and track system improvements.

Rethinking Transitional Gender Justice Rita Shackel, Lucy Fiske, 2018-10-08
This book draws together established and emerging scholars from sociology, law, history, political science and education to examine the global and local issues in the pursuit of gender justice in post-conflict settings. This examination is especially important given the disappointing progress made to date in spite of concerted efforts over the last two decades. With contributions from both academics and practitioners working at national and international levels, this work integrates theory and practice, examining both global problems and highly contextual case studies including Kenya, Somalia, Peru, Afghanistan and DRC. The contributors aim to provide a comprehensive and compelling argument for the need to fundamentally rethink global approaches to gender justice.

Peer Relationships in Cultural Context Xinyin Chen, Doran C. French, Barry H. Schneider, 2006-04-03
This book responds to the absence of a comprehensive consideration of the implications of culture for children's peer relationships. Although research in this field has burgeoned in recent years, cultural issues have often been overlooked. The chapters tap such issues as the impact of social circumstances and cultural values on peer relationships, culturally prescribed socialization patterns and processes, emotional

experience and regulation in peer interactions, children's social behaviors in peer interactions, cultural aspects of friendships, and peer influences on social and school adjustment in cultural context. The authors incorporate into their discussions findings from research programs using multiple methodologies, including both qualitative (e.g., interviewing, ethnographic and observational) and quantitative (e.g., large scale surveys, standardized questionnaires) approaches, based on a wide range of ages of children in cultures from East to West and from South to North (Asia, South America, the Mid-East, Southern Europe, and ethnic groups in the US).

The Cambridge Handbook of Violent Behavior and Aggression Daniel J. Flannery, Alexander T. Vazsonyi, Irwin D. Waldman, 2007-09-03 From a team of leading experts comes a comprehensive, multidisciplinary examination of the most current research including the complex issue of violence and violent behavior. The handbook examines a range of theoretical, policy, and research issues and provides a comprehensive overview of aggressive and violent behavior. The breadth of coverage is impressive, ranging from research on biological factors related to violence and behavior-genetics to research on terrorism and the impact of violence in different cultures. The authors examine violence from international cross-cultural perspectives, with chapters that examine both quantitative and qualitative research. They also look at violence at multiple levels: individual, family, neighborhood, cultural, and across multiple perspectives and systems, including treatment,

justice, education, and public health.

The Psychology Research Handbook Frederick T. L. Leong, 2006 This research guide includes practical instructions for graduate students and research assistants on the process of research planning and design, data collection and analysis and the writing of results. It also features chapters co-written by advanced research students providing real-world examples.

Legal Programming Brian Subirana, Malcolm Bain, 2006-10-03 Legal Programming: Designing Legally Compliant RFID and Software Agent Architectures for Retail Processes and Beyond provides a process-oriented discussion of the legal concerns presented by agent-based technologies, processes and programming. It offers a general outline of the potential legal difficulties that could arise in relation to them, focusing on the programming of negotiation and contracting processes in a privacy, consumer and commercial context. The authors will elucidate how it is possible to create form of legal framework and design methodology for transaction agents, applicable in any environment and not just in a specific proprietary framework, that provides the right level of compliance and trust. Key elements considered include the design and programming of legally compliant methods, the determination of rights in respect of objects and variables, and ontologies and programming frameworks for agent interactions. Examples are used to illustrate the points made and provide a practical perspective.

Essential HTML fast Duncan Reed, Peter Thomas, 2012-12-06 A quick, concise

guide to preparing a well-designed, professional web site using HTML. Using solid design principles and the full extent of the new HTML standard, users reading this book will quickly be able to design a professional-looking, easily extensible web site. Essential HTML fast is written to serve as a desktop quick-reference and will thus appeal to both business and home users, as well as students taking a course on HTML and web site design. Its logical structure allows readers to learn HTML stepwise, and to find answers to a specific problem quickly and easily. Topics covered include: how to plan your web site effectively; effective use of hypertext, images, audio and video; layout techniques using tables and list; how to use style sheets, font sizes, plans for mathematical equation mark-up and the integration of CGI scripts, Java and ActiveX. This will be essential reading for all professional developers and students wanting to learn HTML -- fast.

Principles and Practice of Structural Equation Modeling Rex B.

Kline, 2023-05-25 Significantly revised, the fifth edition of the most complete, accessible text now covers all three approaches to structural equation modeling (SEM)--covariance-based SEM, nonparametric SEM (Pearl's structural causal model), and composite SEM (partial least squares path modeling). With increased emphasis on freely available software tools such as the R lavaan package, the text uses data examples from multiple disciplines to provide a comprehensive understanding of all phases of SEM--what to know, best practices, and pitfalls to avoid. It includes exercises with answers,

rules to remember, topic boxes, and a new self-test on significance testing, regression, and psychometrics. The companion website supplies helpful primers on these topics as well as data, syntax, and output for the book's examples, in files that can be opened with any basic text editor. New to This Edition *Chapters on composite SEM, also called partial least squares path modeling or variance-based SEM; conducting SEM analyses in small samples; and recent developments in mediation analysis. *Coverage of new reporting standards for SEM analyses; piecewise SEM, also called confirmatory path analysis; comparing alternative models fitted to the same data; and issues in multiple-group SEM. *Extended tutorials on techniques for dealing with missing data in SEM and instrumental variable methods to deal with confounding of target causal effects. Pedagogical Features *New self-test of knowledge about background topics (significance testing, regression, and psychometrics) with scoring key and online primers. *End-of-chapter suggestions for further reading and exercises with answers. *Troublesome examples from real data, with guidance for handling typical problems in analyses. *Topic boxes on special issues and boxed rules to remember. *Website promoting a learn-by-doing approach, including data, extensively annotated syntax, and output files for all the book's detailed examples.

Handbook of Research Methods in Social and Personality Psychology Harry T. Reis, Charles M. Judd, 2000-03-13 This volume, first published in 2000,

provides an overview of research methods in contemporary social psychology.

Close Relationships Clyde Hendrick, Susan S. Hendrick, 2000-02-17 As Ellen Bercheid points out in her foreword to this volume, relationship science is a complex and ever expanding field. Much credit goes to editors Clyde Hendrick and Susan S. Hendrick for their scholarly dedication to the advancement of this multidisciplinary arena. This sourcebook demonstrates, yet again, their expertise and leadership as they succeed in combining many great contributions to the field by some of the most respected specialists around. Read this book for a panoramic view of close relationship research with highlights from current literature, original research, practical applications, and projections for future research.
