Women, Business and the Law 2021 World Bank, 2021-04-05 Women, Business and the Law 2021 is the seventh in a series of annual studies measuring the laws and regulations that affect women's economic opportunity in 190 economies. The project presents eight indicators structured around women's interactions with the law as they move through their lives and careers: Mobility, Workplace, Pay, Marriage, Parenthood, Entrepreneurship, Assets, and Pension. This year's report updates all indicators as of October 1, 2020 and builds evidence of the links between legal gender equality and women's economic inclusion. By examining the economic decisions women make throughout their working lives, as well as the pace of reform over the past 50 years, Women, Business and the Law 2021 makes an important contribution to research and policy discussions about the state of women's economic empowerment. Prepared during a global pandemic that threatens progress toward gender equality, this edition also includes important findings on government responses to COVID-19 and pilot research related to childcare and women's access to justice.

A History of Greek Art Mark D. Stansbury-O'Donnell, 2015-01-27 Offering a unique blend of thematic and chronological investigation, this highly illustrated, engaging text explores the rich historical, cultural,

and social contexts of 3,000 years of Greek art, from the Bronze Age through the Hellenistic period. Uniquely intersperses chapters devoted to major periods of Greek art from the Bronze Age through the Hellenistic period, with chapters containing discussions of important contextual themes across all of the periods Contextual chapters illustrate how a range of factors, such as the urban environment, gender, markets, and cross-cultural contact, influenced the development of art Chronological chapters survey the appearance and development of key artistic genres and explore how artifacts and architecture of the time reflect these styles Offers a variety of engaging and informative pedagogical features to help students navigate the subject, such as timelines, theme-based textboxes, key terms defined in margins, and further readings. Information is presented clearly and contextualized so that it is accessible to students regardless of their prior level of knowledge A book companion website is available at [www.wiley.com/go/greekart](http://www.wiley.com/go/greekart) with the following resources: PowerPoint slides, glossary, and timeline

*HIEROGLYPHS OF THE PHAISTOS DISC: history and full text translation.* Vitaly Surnin,2013-12-28 This book is the preliminary part of a great work titled «THE BOOK OF THE EGYPTIAN: The beginning of the basic Egyptology or a key to the understanding of history, philosophy and world religion». Usually, the introduction is made in the form of a brief preface or foreword, but I got a whole book as the first step in a multi-volume publication of the study. The purpose of this specific introduction as the beginning of

serious research – is right at the level of the opening to inspire a reader, showing him in a clear visual and comprehensible form, the whole true mechanism of the hieroglyphic writing. To achieve this, I will completely dispel the myth created by the modern science that hieroglyphs do not convey any meaning (of words, the whole idea), but only individual sounds (letters), or their combination (syllables). This scientific myth will be finally deprived of the status of scientific knowledge, and the translation of the Phaistos disc, on the contrary, will be clearly shown, what is called «broken apart», and will be read in the ancient hieroglyphic language united by the principle of construction – in the language of the ancient Egyptians. I can say that it will not be two simultaneously existing systems of hieroglyphs translation, as well as two Egyptologies, one will be false, and the other – true! To prove the validity of the system of translation I wanted to give you immediately not only a complete translation of the text of the Phaistos disc, where the number of occurrences of each hieroglyph is not big (1 to 19 times), but the translation of the whole ancient Egyptian writing, because the number of times it is used in there is thousands, if not even millions. And each such use of each hieroglyph is translating in the same way, so it creates the full reading of the hieroglyphic texts – writing, which will be easily read by everyone with the dictionary of hieroglyphs in the future. The main reason why I wanted to do it – is because, at first, I read the ancient Egyptian texts and only then, by chance, came across with the hieroglyphs of the Phaistos disc. But then, I decided to set a different aim – to teach the reader to think, and not just to read hieroglyphs. Since we have no ancient Egyptian temple, and you're not its novice, the method of achieving the aims will be different than in the antiquity. First of all, I would suggest not a translation of ancient Egyptian hieroglyphs, but a

complete translation of the Phaistos disc, and at the same time to give them a sort of test of common sense to modern science in the face of particular academies and universities of the world. Let them answer me the question, not knowing the translations of ancient Egyptian texts, – whether they think this translation of the Phaistos disc is correct? So when I completely publish «The Book of Egyptian», it will become clear who they are and where do they lead all of you. As they always test the students, it's a time to test them as well. Will they pass the test, I do not know, but any way, you, my reader, will get to know about it, (in the main manuscript) and will be able to draw your own conclusions about their intellectual level. Therefore, I recommend you to take this message of the book, at least with the attention, because not every day the science gets a ready revelation, designed in the form of scientific study. And here the attention and common sense will help the reader to re-look the original, pure, uncomplicated meaning of the Hieroglyphs, which through the veil of delusion will finally begin to appear in their true, original and vibrant colors – and finally, get from the nether world – into the realm of the living!

**Art** David A. Scott, 2016-12-31 This book presents a detailed account of authenticity in the visual arts from the Paleolithic to the postmodern. The restoration of works of art can alter the perception of authenticity and may result in the creation of fakes and forgeries. These interactions set the stage for the subject of this book, which initially examines the conservation perspective, then continues with a detailed discussion of notions of authenticity and philosophical background. There is a disputed territory between those who view the present-day cult of authenticity as fundamentally flawed and those who have

analyzed its impact upon different cultural milieus, operating across performative, contested, and fragmented ground. The book discusses several case studies where the ideas of conceptual authenticity, aesthetic authenticity, and material authenticity can be incorporated into an informative discourse about art from the ancient to the contemporary, illuminating concerns relating to restoration and art forgery.

*Turcologica Upsaliensia* ,2020-10-26 The richly illustrated essays in *Turcologica Upsaliensia* tell of scholars, travellers, diplomats and collectors who explored the Turkic-speaking world while affiliated with Sweden's oldest university, at Uppsala, and who enriched the University Library with collections of Turkic cultural heritage objects.

*Material Connections in the Ancient Mediterranean* Peter van Dommelen, A. Bernard Knapp, 2010-09-23 *Material Connections* eschews outdated theory, tainted by colonialist attitudes, and

develops a new cultural and historical understanding of how factors such as mobility, materiality, conflict and co-presence impacted on the formation of identity in the ancient Mediterranean. Fighting against 'hyper-specialisation' within the subject area, it explores the multiple ways that material culture was used to establish, maintain and alter identities, especially during periods of transition, culture encounter and change. A new perspective is adopted, one that perceives the use of material culture by prehistoric and historic Mediterranean peoples in formulating and changing their identities. It considers how objects and social identities are entangled in various cultural encounters and interconnections. The movement of people as well as objects has always stood at the heart of attempts to understand the courses and process of human history. The Mediterranean offers a wealth of such information and *Material Connections*, expanding on this base, offers a dynamic, new subject of enquiry – the social identity of prehistoric and historic Mediterranean people – and considers how migration, colonial encounters, and connectivity or insularity influence social identities. The volume includes a series of innovative, closely related case studies that examine the contacts amongst various Mediterranean islands – Sardinia, Corsica, Sicily, Crete, Cyprus, the Balearics – and the nearby shores of Italy, Greece, North Africa, Spain and the Levant to explore the social and cultural impact of migratory, colonial and exchange encounters. *Material Connections* forges a new path in understanding the material culture of the Mediterranean and will be essential for those wishing to develop their understanding of material culture and identity in the Mediterranean.

**Rethinking the Inka** Frances M. Hayashida, Andrés Troncoso, Diego Salazar, 2022-02-08 2023 Book Award, Society for American Archaeology A dramatic reappraisal of the Inka Empire through the lens of

Qullasuyu. The Inka conquered an immense area extending across five modern nations, yet most English-language publications on the Inka focus on governance in the area of modern Peru. This volume expands the range of scholarship available in English by collecting new and notable research on Qullasuyu, the largest of the four quarters of the empire, which extended south from Cuzco into contemporary Bolivia, Argentina, and Chile. From the study of Qullasuyu arise fresh theoretical perspectives that both complement and challenge what we think we know about the Inka. While existing scholarship emphasizes the political and economic rationales underlying state action, *Rethinking the Inka* turns to the conquered themselves and reassesses imperial motivations. The book's chapters, incorporating more than two hundred photographs, explore relations between powerful local lords and their Inka rulers; the roles of nonhumans in the social and political life of the empire; local landscapes remade under Inka rule; and the appropriation and reinterpretation by locals of Inka objects, infrastructure, practices, and symbols. Written by some of South America's leading archaeologists, *Rethinking the Inka* is poised to be a landmark book in the field.

*Singing for the Gods* Barbara Kowalzig, 2007-12-13 *Singing for the Gods* develops a new approach towards an old question in the study of religion - the relationship of myth and ritual. Focusing on ancient Greek religion, Barbara Kowalzig exploits the joint occurrence of myth and ritual in archaic and classical Greek song-culture. She shows how choral performances of myth and ritual, taking place all over the ancient Greek world in the early fifth century BC, help to effect social and political change in their own time. Religious song emerges as integral to a rapidly changing society hovering between local, regional, and panhellenic identities and between aristocratic rule and democracy. Drawing on contemporary debates

on myth, ritual, and performance in social anthropology, modern history, and theatre studies, this book establishes Greek religion's dynamic role and gives religious song-culture its deserved place in the study of Greek history.

Indians and Mestizos in the "Lettered City" Alcira Duenas, Alcira Dueñas, 2010-06-15 Through newly unearthed texts virtually unknown in Andean studies, *Indians and Mestizos in the Lettered City* highlights the Andean intellectual tradition of writing in their long-term struggle for social empowerment and questions the previous understanding of the lettered city as a privileged space populated solely by colonial elites. Rarely acknowledged in studies of resistance to colonial rule, these writings challenged colonial hierarchies and ethnic discrimination in attempts to redefine the Andean role in colonial society. Scholars have long assumed that Spanish rule remained largely undisputed in Peru between the 1570s and 1780s, but educated elite Indians and mestizos challenged the legitimacy of Spanish rule, criticized colonial injustice and exclusion, and articulated the ideas that would later be embraced in the Great Rebellion in 1781. Their movement extended across the Atlantic as the scholars visited the seat of the Spanish empire to negotiate with the king and his advisors for social reform, lobbied diverse networks of supporters in Madrid and Peru, and struggled for admission to religious orders, schools and universities, and positions in ecclesiastic and civil administration. *Indians and Mestizos in the Lettered City* explores how scholars contributed to social change and transformation of colonial culture through legal, cultural, and political

activism, and how, ultimately, their significant colonial critiques and campaigns redefined colonial public life and discourse. It will be of interest to scholars and students of colonial history, colonial literature, Hispanic studies, and Latin American studies.

**Global Atmospheric Change and its Impact on Regional Air Quality** Ian Barnes, 2012-12-06 The NATO ARW in Irkutsk was an excellent occasion for the coming together of Eastern and Western scientists who are involved in tropospheric science; the workshop has greatly contributed to the scientific and social understanding among the participants from the many different countries. Many new personal contacts were made which will help to strengthen future collaborations. In particular, the Lake Baikal area and the Limnological Institute offer splendid opportunities for environmental research which, in part, is already on going. For most participants it was the first time to see the impressive nature of the Lake Baikal region. Hopefully, there will be a chance for a follow-up event in Siberia where researchers from the East and West can again meet and engage in fruitful scientific dialogue. The book contains extended abstracts of the lectures and the poster presentations presented at the NATO ARW Global Atmospheric Change and its Impact on Regional Air Quality Irkutsk, Lake Baikal, Russian Federation, August 21-27, 2001. The ARW was composed of 22 oral presentations by key lecturers and 6 additional shorter oral presentations from participants. In a special poster session the 36 poster contributions were presented and discussed. Unfortunately not all contributors submitted extended abstracts, however, to compensate two contributions have been added from 2 participants who were originally invited but were unable to attend.

Radiocarbon Dating R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor's seminal book *Radiocarbon Dating: An Archaeological Perspective*. It covers the major advances and accomplishments of the  $^{14}\text{C}$  method in archaeology and analyzes factors that affect the accuracy and precision of  $^{14}\text{C}$ -based age estimates. In addition to reviewing the basic principles of the method, it examines  $^{14}\text{C}$  dating anomalies and means to resolve them, and considers the critical application of  $^{14}\text{C}$  data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology. This volume, again a benchmark for  $^{14}\text{C}$  dating, critically reflects on the method and data that underpins, in so many cases, the validity of the chronologies used to understand the prehistoric archaeological record.

**Maternal Fetal Transmission of Human Viruses and their Influence on Tumorigenesis** György Berencsi III, 2012-04-07 The human foetus is separated from the maternal blood by the syncytiotrophoblast induced by endogeneous human retrovirus-encoded proteins. This barrier is a highly developed one, which supports apical-basolateral transport of maternal idiotype and anti-idiotype IgG, IgG-virus complexes. The selective maternal-fetal transport of epitope- and paratope-bearing entities can influence the developing fetal immune system during pregnancy. The bidirectional maternal-fetal transfer of cells are of even more importance during pregnancy. Maternal cells with latent viruses transport viruses without impairment of fetal development. Cells with premalignant and malignant genetic transformation are also transported to the fetus. Fetal and neonatal tumours are initiated by such cells in spite of the antitumour potential of fetal

organism. On the contrary, the fetal cells repair maternal tissue injuries and survive in the organisms of the recipients for decades. These possess new consequences for the neonatal immunity and organ transplantation surgery.
