Intermarium Marek Jan Chodakiewicz, 2017-09-08 History and collective memories influence a nation, its culture, and institutions; hence, its domestic politics and foreign policy. That is the case in the Intermarium, the land between the Baltic and Black Seas in Eastern Europe. The area is the last unabashed rampart of Western Civilization in the East, and a point of convergence of disparate cultures. Marek Jan Chodakiewicz focuses on the Intermarium for several reasons. Most importantly because, as the inheritor of the freedom and rights stemming from the legacy of the Polish-Lithuanian/Ruthenian Commonwealth, it is culturally and ideologically compatible with American national interests. It is also a gateway to both East and West. Since the Intermarium is the most stable part of the post-Soviet area, Chodakiewicz argues that the United States should focus on solidifying its influence there. The ongoing political and economic success of the Intermarium states under American sponsorship undermines the totalitarian enemies of freedom all over the world. As such, the area can act as a springboard to addressing the rest of the successor states, including those in the Caucasus, Central Asia, and the Russian Federation. Intermarium has operated successfully for several centuries. It is the most inclusive political concept within the framework of the Commonwealth. By reintroducing the concept of the Intermarium into intellectual discourse the author highlights the autonomous and independent nature of the area. This is a brilliant and innovative addition to European Studies and World Culture.

A Civil-Military Response to Hybrid Threats Eugenio Cusumano, Marian Corbe, 2017-08-29 This edited volume provides scholars and practitioners with an in-depth examination of the role of civil-military cooperation in addressing hybrid threats. As they combine the simultaneous employment of conventional and non-conventional tools and target not only military objectives but governments and societies at large, hybrid threats cannot be countered solely by military means, but require an equally inclusive response encompassing a wide range of military and civilian actors. This book, which combines the perspectives of academics, military officers, and officials from international and non-governmental organisations, resorts to different case studies to illustrate the importance of civil-military cooperation in enhancing the resilience of NATO members and partners against a wide range of societal destabilization strategies, thereby contributing to the formulation of a civil-military response to hybrid threats.

European Energy Security Nataliya Esakova, 2013-01-24 Nataliya Esakova performs an analysis of the interdependencies and the nature of cooperation between energy producing, consuming and transit countries focusing on the gas sector. For the analysis the theoretical framework of the interdependence theory by Robert O. Keohane and Joseph S. Nye and the international regime theory are applied to the recent developments within the gas relationship between the European Union and Russia in the last decade. The objective of the analysis is to determine, whether a fundamental regime change in terms of international regime theory is taking place, and, if so, which regime change explanation model in terms of interdependence theory is likely to apply.

The Routledge Handbook of the Mongols and Central-Eastern Europe Alexander V. Maiorov, Roman Hautala, 2021-08-25 The Routledge Handbook of the Mongols and Central-Eastern Europe offers a comprehensive overview of the Mongols' military, political, socio-economic and cultural relations with Central and Eastern European nations between the thirteenth and fifteenth centuries. The Mongol Empire was the largest contiguous land empire in history, and one which contributed to the establishment of political, commercial and cultural contacts between all Eurasian regions. The Golden Horde, founded in Eastern Europe by Chinggis Khan's grandson, Batu, in the thirteenth century, was the dominant power in the region. For two hundred years, all of the countries and peoples of Central and Eastern Europe had to reckon with a powerful centralized state with enormous military potential. Some chose to submit to the Mongols whilst others defended their independence, but none could avoid the influence of this powerful empire. In this book, twenty-five chapters examine this crucial period in Central-Eastern European history, including trade, confrontation, and cultural and religious exchange between the Mongols and their neighbours. This book will be an essential reference for scholars and students of the Mongols, as well those interested in the political, social and economic history of medieval Central-Eastern Europe.

The Literary Field under Communist Rule Aušra Jurgutienė, Dalia Satkauskytė, 2019-06-03

This volume widens the field of Soviet literature studies by interpreting it as a multinational project, with national literatures acting not as copies of the Russian model, but as creators of a multidimensional literary space. The book proposes a reconsideration of Pierre Bourdieu's theory of literary field and analyzes the interactions of literature, power, and economics under the communist rule. The articles selected include theoretical discussions and case studies from different national literatures presenting different structural elements of the Soviet literary field, as well as phenomena created by the complexity of the field itself, such as the Aesopian language, state of emergency literature, or compromise as the essential element of the writers' identity.

Financial Institutions in Distress Ronald Davis, Stephan Madaus, Monica Marcucci, Irit

Mevorach, Riz Mokai, Barbara Romaine, Janis Sarra, Ignacio Tirado, 2023-08-25 Political boundaries are often porous to finance, financial intermediation, and financial distress. Yet they are highly impervious to financial regulation. When inhabitants of a country suffering a deficit of purchasing power are able to access and deploy funds flowing in from a country with a surfeit of such power, the inhabitants of both countries may benefit. They may also benefit when institutions undertaking such cross-border financial intermediation experience economies of scale and are able to innovate and to offer funds and services at lower costs. Inevitably, however, at least some such institutions will sometimes act imprudently, some of the projects in which such funds are deployed may be unwise, and other such projects can suffer from unforeseen circumstances. As a result of such factors, a financial institution may suffer distress in one country, and may then transmit such distress to other countries in which it operates. The efficacy of any response to such cross-border transmission of distress may turn on the response being given due effect in both (or all) the territories in which the distressed financial institution operates. This situation creates a conundrum for policymakers, legislators, and regulators who wish to enable those subject to their jurisdiction to access the benefits of cross-border financial intermediation, yet cannot make rules and regulations that would have effect outside that jurisdiction. This book explores this conundrum and offers a response. It does so by drawing on and adding to the literatures on financial intermediation, regulation, and distress, and on existing hard and soft laws and regulations. The book advocates for the creation of a model law that would address the full range of financial institutions, including insurance companies, and that would enable relevant authorities to cooperate with counterparts in advance of the onset of distress and to give appropriate effect in their jurisdiction to measures taken by counterpart authorities in other jurisdictions in which the distressed institution also operates.

NATO in the Cold War and After Sergey Radchenko, Timothy Andrews Sayle, Christian Ostermann, 2021-12-19 This book examines episodes in NATO’s history from the founding of the North Atlantic Alliance in 1949 to its transition to the post-Cold War order in the 1990s, with an eye to better understanding its present and its future. NATO’s history, now running over seventy years, can no longer be framed in Cold War terms alone. Nor can the organization be understood fully as a post-Cold War institution. Today’s NATO is a product of both these eras. This edited volume offers a reconsideration of NATO’s place in history, looking both at how the alliance coped with the Cold War and how it managed its difficult transition to the post-Cold War international order. Contributors recount how NATO coped with its many political and operational challenges, which on occasion threatened – but never managed to – derail the alliance. The book opens new vistas for explaining how NATO thrived and survived for decades and ponders whether it will survive for many more. The book will be of great value to scholars, students and policymakers interested in Politics, International Studies, Global Affairs and Public Policy. The chapters were originally published as a special issue of Journal of Strategic Studies.

Transverse Patterns in Nonlinear Optical Resonators Kestutis Staliunas, V.J. Sánchez-Morcillo, 2003-02-27 The growth of regularity from disorder, the evolution from the simple towards the complex, and the spontaneous formation of spatio temporal patterns in general are questions which intrigue everybody. This has been one of the basic philosophical topics from ancient to modern times. Is nature able to create something fundamentally new by itself? If yes, how does this creation occur? Or does nature only reproduce something which was already encoded in it, from the very beginning? This remained a topic exclusively for philosophers until very recently, and it was only a few decades ago that physicists started to convert this seemingly purely philosophical subject into a scientific discipline: a scientific discipline like other scientific disciplines, where one relies on formulas and equations, on numerical simulations, and on laboratory experiments. This book is not about general questions related to pattern formation and self organization in nature. It is about spontaneous patterns in just one part of nature in nonlinear optical systems, and, more precisely, in nonlinear optical resonators. Nonlinear optical systems represent a small part of nature, but a very representative part: one can observe here nearly all the known symmetries of patterns, one can generate nearly all known types of localized structures and one can realize nearly all known spatial instabilities and spatial bifurcations.

What Are the Chances? Barbara Blatchley, 2021-08-03 Winner, 2023 William James Book Award, American Psychological Association Division 1 in General Psychology Most of us, no matter how rational we think we are, have a lucky charm, a good-luck ritual, or some other custom we follow in the hope that it will lead to a good result. Is the idea of luckiness just a way in which we try to impose order on chaos? Do we live in a world of flukes and coincidences, good and bad breaks, with outcomes as random as a roll of the dice—or can our beliefs help change our luck? *What Are the Chances?* reveals how psychology and neuroscience explain the significance of the idea of luck. Barbara Blatchley explores how people react to random events in a range of circumstances, examining the evidence that the belief in luck helps us cope with a lack of control. She tells the stories of lucky and unlucky people—who won the lottery multiple times, survived seven brushes with death, or found an apparently cursed Neanderthal mummy—as well as the accidental discoveries that fundamentally changed what we know about the brain. Blatchley considers our frequent misunderstanding of randomness, the history of luckiness in different cultures and religions, the surprising benefits of magical thinking, and many other topics. Offering a new view of how the brain handles the unexpected, *What Are the Chances?* shows why an arguably irrational belief can—fingers crossed—help us as we struggle with an unpredictable world.

The Stories Old Towns Tell Marek Kohn, 2023-04-25 A fascinating journey through Europe's old towns, exploring why we treasure them—but also what they hide about a continent's fraught history. Historic quarters in cities and towns across the middle of Europe were devastated during the Second World War—some, like those of Warsaw and Frankfurt, had to be rebuilt almost completely. They are now centers of peace and civility that attract millions of tourists, but the stories they tell about places, peoples, and nations are selective. They are never the whole story. These old towns and their turbulent histories have been key sites in Europe's ongoing theater of politics and war. Exploring seven old towns, from Frankfurt and Prague to Vilnius in Lithuania, the acclaimed writer Marek Kohn examines how they have been used since the Second World War to conceal political tensions and reinforce certain versions of history. Uncovering hidden stories behind these old and old-seeming façades, Kohn offers us a new understanding of the politics of European history-making—showing how our visits to old towns could promote belonging over exclusion, and empathy over indifference.
