*The Texarkana Moonlight Murders* Michael Newton, 2013-05-14 In 1946, years before the phrase serial murder was coined, a masked killer terrorized the town of Texarkana on the Texas-Arkansas border. Striking five times within a ten-week period, always at night, the prowler claimed six lives and left three other victims wounded. Survivors told police that their assailant was a man, but could supply little else. A local newspaper dubbed him the Phantom Killer, and it stuck. Other reporters called the faceless predator the Moonlight Murderer, though the lunar cycle had nothing to do with the crimes. Texarkana's phantom was not America's first serial slayer; he certainly was not the worst, either in body count or sheer brutality. But he has left a crimson mark on history as one of those who got away. Like the elusive Axeman of New Orleans, Cleveland's Mad Butcher of Kingsbury Run, and San Francisco's Zodiac Killer, the Phantom Killer left a haunting mystery behind. This is the definitive story of that mystery.

**Serial Murder and the Psychology of Violent Crimes** Richard N. Kocsis, 2008-01-08 This book brings together an international collection of research literature on the topics of criminal profiling and serial violent crime by integrating the respected insights of both scholars and practitioners from around the globe. It explains etiological factors and psychological mechanisms to reveal criminal motives.

Perspectives on Structural Realism A. Hanami, 2003-11-28 Realism remains a predominant and most debated theoretical approach in International Relations research. Whether considered a scientific and accurate reflection of world politics or as reactionary and a distortion of realities and possibilities, both realism and its structural variant continue to be a source of fruitful research-whether within the program or in its rejection. The Realism approach itself is not uniform whether in relation to its implications or methodologies. Here leading scholars provide important perspectives on the insights and directions of Realist research in some of its most interesting variants. From rational choice to case studies, from theory to practice, the contributors explore both classic tenets of Realism as the balance of power and such apparent inconsistencies as foolish policies.

Energy Security and Climate Policy International Energy Agency, 2007 World energy demand is surging. Oil, coal and natural gas still meet most global energy needs, creating serious implications for the environment. One result is that CO<sub>2</sub> emissions, the principal cause of global warming, are rising. This study underlines the close link between efforts to ensure energy security and those to mitigate climate change. Decisions on one side affect the other. The book presents a framework to assess interactions between energy security and climate change policies, combining qualitative and quantitative analyses. The quantitative analysis is based on the development of energy security indicators, tracking the evolution of policy concerns linked to energy resource concentration. The indicators are applied to a reference scenario and CO<sub>2</sub> policy cases for five case-study countries: The

Czech Republic, France, Italy, the Netherlands, and the United Kingdom.. -->

**Smoking Policy** Robert L. Rabin, Stephen D. Sugarman, 1993 Public and governmental attitudes toward tobacco use are dramatically different today when compared to the attitudes of the mid-1960s. Smoking then was widely regarded as a mark of sophistication and a natural companion at work and play. The accumulating evidence on the serious health risks of smoking to both smokers and nonsmokers has changed those sentiments. Now tobacco use is increasingly a target of cultural disapproval - both in social circles and in the regulatory arena. *Smoking Policy: Law, Politics, and Culture* examines the interplay between public opinion and governmental action as norms have changed about whether one should smoke and where it is appropriate to do so. In this study, an interdisciplinary team from law, public health, communications, political science and sociology addresses a wide range of tobacco control issues. Topics covered include the politics of smoking control, lawsuits by smokers against the tobacco industry, the strategies of employers and insurers in discouraging smoking lessons from drug and alcohol control, the conversion of smoking from a health issue into a moral issue, the enforcement of no smoking rules, and the impact of tobacco advertising controls. This volume provides a comprehensive exploration of both institutional and informal mechanisms regulating tobacco use in late-twentieth century America. The contributors assess the roles played by public officials, corporations and insurers, the scientific, public health and medical communities, and opinion leaders. *Smoking Policy* is essential reading for policymakers and advocates, professionals in law, public health, and social science fields, corporate officials, and those generally interested in issues of smoking and public health.

**Perils of Anarchy** Michael E. Brown, Sean M. Lynn-Jones, Steven E. Miller, 1995-03-27 Current debates about the nature of international politics have centered on the clash between supporters and critics of realism. The *Perils of Anarchy* brings together a number of recent essays written in the realist tradition. It includes realist interpretations of the collapse of the Cold War order and of the emerging order that has replaced it, the sources of alignment and aggression, and the causes of peace. A final section provides a counterpoint by raising criticisms of and alternatives to the realist approach. Contributors Charles L. Glaser, Christopher Layne, Peter Liberman, Lisa L. Martin, John J. Mearsheimer, Paul Schroeder, Randall Schweller, Stephen M. Walt, Kenneth N. Waltz, William C. Wohlforth, Fareed Zakaria. *An International Security Reader*

***International Poisonous Plants Checklist*** D. Jesse Wagstaff, 2008-07-07 Knowledge of plant toxicity has always been important, but the information has not always been reliable. Now, increasing international trade is drawing attention to the inadequacy of regional information and highlighting the geographical fragmentation and notorious discrepancies of thinly documented information. The international community of safety regulators, toxicologists, and poison control personnel requires a single reference compiled of verifiable, primary source reports of common poisonous plants. Intended for just that purpose, *International Poisonous Plant Checklist: An Evidence-Based Reference* successfully addresses the deficiencies and gaps in the current literature. Using accepted botanic names, the book defines the known set of toxic vascular plants. The use of botanic names satisfies the need for an international standard of identity to support worldwide communication and

commerce. Also, taxonomy based on common ancestry and genetic connections provides a rational basis for studying and using plant relationships. The author supports toxicity information with references to the primary literature. Each entry includes referenced citations supporting the toxicity of the plant, symptoms and circumstances of toxic exposure, dosage and potency, chemical analysis, botany, pharmacology, mechanism and metabolism, and control. Finally, the book cross-references selected synonyms and common names. The checklist is organized alphabetically with two types of entries. The main entry documents the toxic plants themselves and a secondary entry lists selected synonyms and common names cross-referenced to the main entries. Including virtually all common animal feed plants, human food plants, and many plants that are sources of herbal products and dietary supplements, tonics, and therapeutic agents, this timely checklist compiles and verifies the known data on toxic vascular plants from around the world.

**Realism and International Politics** Kenneth Neal Waltz, 2008 Realism and International Politics brings together the collected essays of Kenneth N. Waltz, one of the most important and influential thinkers of international relations in the second half of the twentieth century. His books *Man, the State and War* and *Theory of International Politics* are classics of international relations theory and gave birth to the school of thought known as neo-realism or structural realism, out of which many of the current crop of realist scholars and thinkers has emerged. Waltz frames these seminal pieces in his theoretical development by explaining the context in which they were written and, building on the broader aims of these theories, explains the elusive nature of power balancing in today's international system. It is an essential volume for both students and scholars.

**Crime Classification Manual** John E. Douglas, Ann W. Burgess, Allen G. Burgess, Robert K. Ressler, 2011-01-06 This is the second edition of the landmark book that standardized the language and terminology used throughout the criminal justice system. It classifies the critical characteristics of the perpetrators and victims of major crimes—murder, arson, sexual assault, and nonlethal acts—based on the motivation of the offender. The second edition contains new classifications on computer crimes, religion-extremist murder, and elder female sexual homicide. This edition also contains new information on stalking and child abduction, the use of biological agents as weapons, cybercrimes, Internet child sex offenders, burglary and rape, and homicidal poisoning. In addition, many of the case studies and crime statistics have been updated.

**Myth in Indo-European Antiquity** Gerald James Larson, C. Scott Littleton, Jaan Puhvel, 2021-05-28 This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1974.

**Arabian Drugs in Medieval Mediterranean Medicine** Zohar Amar, 2016-12-05 Explores the impact of drugs introduced by the Arabs on medieval Mediterranean medicine For more than one thousand years Arab medicine held sway in the ancient world, from the shores of Spain in the West to China,

India and Sri Lanka (Ceylon) in the East. This book explores the impact of Greek (as well as Indian and Persian) medical heritage on the evolution of Arab medicine and pharmacology, investigating it from the perspective of materia medica a reliable indication of the contribution of this medical legacy. Focusing on the main substances introduced and traded by the Arabs in the medieval Mediterranean including Ambergris, camphor, musk, myrobalan, nutmeg, sandalwood and turmeric the authors show how they enriched the existing inventory of drugs influenced by Galenic-Arab pharmacology. Further, they look at how these substances merged with the development and distribution of new technologies and industries that evolved in the Middle Ages such as textiles, paper, dyeing and tanning, and with the new trends, demands and fashions regarding spices, perfumes, ornaments (gemstones) and foodstuffs some of which can be found in our modern-day food basket. Key Features Assesses the assimilation of theoretical and practical Greek, Indian and Persian medicine into Arabic medical culture Reconstructs and presents a list of medicinal substances distributed by the Arabs as a result of their conquests Tells the stories of 33 new Arabic drugs within the context of their natural history Describes the contribution of the Arabs to the daily medieval cultural material (medicine, cosmetics, perfumery, dyeing of materials, industrial products and precious stones) Includes 35 colour illustrations

**Executing Magic in the Modern Era** Owen Davies, Francesca Matteoni, 2017-07-19

This book is open access under a CC BY 4.0 license This book explores the magical and medical history of executions from the eighteenth to the early twentieth century by looking at the afterlife potency of criminal corpses, the healing activities of the executioner, and the magic of the gallows site. The use of corpses in medicine and magic has been recorded back into antiquity. The lacerated bodies of Roman gladiators were used as a source of curative blood, for instance. In early modern Europe, a great trade opened up in ancient Egyptian mummies and the fat of executed criminals, plundered as medicinal cure-alls. However, this is the first book to consider the demand for the blood of the executed, the desire for human fat, the resort to the hanged man's hand, and the trade in hanging rope in the modern era. It ends by look at the spiritual afterlife of dead criminals.

**Popular Romances of the West of England, Or, The Drolls, Traditions and Superstitions of Old Cornwall** Robert Hunt, 1865

**The History of Sir Thomas Thumb** Charlotte Mary Yonge, 1855

The Arthur of the Welsh Rachel Bromwich, Alfred Owen Hughes Jarman, Brynley F. Roberts, 1991 This volume is unique in offering a comprehensive discussion of the subject. It will appeal widely to medievalists, to Welsh and Celtic scholars and to those non-specialists who have felt the fascination of the figure of Arthur and wish to know more. Little, if anything, is known historically of Arthur, yet for centuries the romances of Arthur and his court dominated the imaginative literature of Europe in many languages. The roots of this vast flowering of the Arthurian legend are to be found in early Welsh tradition and this volume gives an account of the Arthurian literature produced in Wales, in both Welsh and Latin, during the Middle Ages. The distinguished contributors offer a comprehensive view of recent scholarship relating to Arthurian literature in early Welsh and other Brythonic sources. The volume includes chapters on the historical Arthur, Arthur in early Welsh verse, the legend of Merlin, the tales of Culhwch ac Olwen, Geraint, Owain,

Peredur, The Dream of Rhonabwy and Trystan ac Esyllt. Other chapters investigate the evidence for the growth of the Arthurian theme in the Triads and in the Historia Regum Britanniae of Geoffrey of Monmouth, and discuss the Breton connection and the gradual transmission of the legend to the non-Celtic world.
