**Middle Income Access to Justice** M. J. Trebilcock,Lorne Sossin,A. J. Duggan,2012-01-01 Featuring contributions by leading Canadian and international scholars, practitioners, and members of the judiciary, this multidisciplinary collection draws on scholarship in the fields of law, social science, and public policy. There is a particular emphasis on family law, consumer law, and employment law, as these are the areas where research has indicated that unmet legal needs are highest.

**Pentecostals, Proselytization, and Anti-Christian Violence in Contemporary India** Chad M. Bauman,2015-01-02 Every year, there are several hundred attacks on India's Christians. These attacks are carried out by violent anti-minority activists, many of them provoked by what they perceive to be a Christian propensity for aggressive proselytization, or by rumored or real conversions to the faith. Pentecostals are disproportionately targeted. Drawing on extensive interviews, ethnographic work, and a vast scholarly literature on interreligious violence, Hindu nationalism, and Christianity in India, Chad Bauman examines this phenomenon. While some of the factors in the targeting of Pentecostals are obvious and expected-their relatively greater evangelical assertiveness, for instance-other significant factors are less acknowledged and more surprising: marginalization of Pentecostals by mainstream Christians, the social location of Pentecostal Christians, and transnational flows of missionary personnel, theories, and funds. A detailed analysis of Indian Christian history, contemporary Indian politics, Indian social and cultural characteristics, and Pentecostal belief and practice, this volume sheds important light on a troubling fact of contemporary Indian life.

**One Health and the Politics of Antimicrobial Resistance** Laura H. Kahn,2016-08-15 Does the use of low-dose antibiotics in livestock put human health at risk? Zoonoses—infectious diseases, such as SARS and mad cow, that originate in animals and spread to humans—reveal how intimately animal and human health are linked. Complicating this relationship further, when livestock are given antibiotics to increase growth, it can lead to resistant bacteria. Unfortunately, there are few formal channels for practitioners of human medicine and veterinary medicine to communicate about threats to public health. To address this problem, Dr. Laura H. Kahn and her colleagues are promoting the One Health concept, which seeks to increase communication and collaboration between professionals in human, animal, and environmental health. In *One Health and the Politics of Antimicrobial Resistance*, Dr. Kahn investigates the use of antibiotics and the surge in antimicrobial resistance in food animals and humans from a One Health perspective. Although the medical community has blamed the problem on agricultural practices, the agricultural community insists that antibiotic resistance is the result of indiscriminate use of antibiotics in human medicine. Dr. Kahn argues that this blame game has fueled the politics of antibiotic resistance and hindered the development of effective policies to address the worsening crisis. Combining painstaking research with unprecedented access to international data, the book analyzes the surprising outcomes of differing policy approaches to antibiotic resistance around the globe. By integrating the perspectives of both medicine and agriculture and exploring the history and science behind the widespread use of growth-promoting antibiotics, *One Health and the Politics of Antimicrobial Resistance* examines the controversy in a unique way while offering policy recommendations that all sides can accept.

**Balancing Student Mobility Rights and National Higher Education Autonomy in the European Union** Alexander Hoogenboom,2017-09-25 Traditionally viewed as a positive phenomenon, student mobility has recently come under critical scrutiny as a result of the financial crisis pushing European solidarity to its breaking point, and the fear of excessive EU incursion into the autonomy of Member States with respect to their higher education systems. In *Balancing Student Mobility Rights and National Higher Education Autonomy in the European Union*, Alexander Hoogenboom contributes to the ongoing and evolving debate from a legal perspective. The book offers recommendations with a view to reconcile the mobility rights of Union citizens for study purposes and the need to respect Member State autonomy in the organisation of their higher education systems. The argument made suggests rethinking established principles in EU free movement law while encouraging greater EU involvement in student funding opportunities.

**Sex and Gender** Hilary M. Lips,2020-04-10 Are sex and gender really two different things? How malleable is gender identity? Do both gender and sex have to be conceptualized as binaries—as having two distinct but complementary categories? Should we emphasize gender differences, or is that the wrong question? When should we call a gender difference “small”? Are women really “nonaggressive” or does that label stem from stereotyping? How does subtle or “modern” sexism work on its targets? Scholarship on these and other gender-related questions has exploded in recent years. Hilary Lips synthesizes that research for students in an accessible and readable way. Concepts on sex and gender are presented with the social context in which they were developed. As in previous editions, Lips takes a multicultural approach, discussing the gender experiences of people from a wide range of races, cultures, socioeconomic statuses, and gender and sexual identities. She emphasizes empirical research but takes a critical approach to that research.

**New Policies for New Residents** Deborah J. Milly,2014-02-18 In recent decades, many countries have experienced both a rapid increase of in-migration of foreign nationals and a large-scale devolution of governance to the local level. The result has been new government policies to promote the social inclusion of recently arrived residents. In *New Policies for New Residents*, Deborah J. Milly focuses on the intersection of these trends in Japan. Despite the country's history of restrictive immigration policies, some Japanese favor a more accepting approach to immigrants. Policies supportive of foreign residents could help attract immigrants as the country adjusts to labor market conditions and a looming demographic crisis. As well, local citizen engagement is producing more inclusive approaches to community. Milly compares the policy discussions and outcomes in Japan with those in South Korea and in two similarly challenged Mediterranean nations, Italy and Spain. All four are recent countries of immigration, and all undertook major policy innovations for immigrants by the 2000s. In Japan and Spain, local NGO-local government collaboration has influenced national policy through the advocacy of local governments. South Korea and Italy included NGO advocates as policy actors and partners at the national level far earlier as they responded to new immigration, producing policy changes that fueled local networks of governance and advocacy. In all these cases, Milly finds, nongovernmental advocacy groups have the power to shape local governance and affect national policy, though in different way.

**Internet Child Pornography and the Law** Yaman Akdeniz,2016-05-23 This book provides a critical assessment of the problem of internet child pornography and its governance through legal and non-legal means, including a comparative assessment of laws in England and Wales, the United States of America and Canada in recognition that governments have a compelling interest to protect children from sexual abuse and exploitation. The internet raises novel and complex challenges to existing regulatory regimes. Efforts towards legal harmonization at the European Union, Council of Europe, and United Nations level are examined in this context and the utility of additional and alternative methods of regulation explored. This book argues that effective implementation, enforcement and harmonization of laws could substantially help to reduce the availability and dissemination of child pornography on the internet. At the same time, panic-led policies must be avoided if the wider problems of child sexual abuse and commercial sexual exploitation are to be meaningfully addressed.

**Eastern European Economies** Marcus Goncalves,Erika Cornelius Smith,2016-06-27 Nearly seven decades ago, six countries in

Western Europe (Belgium, France, West Germany, Italy, Luxembourg, and the Netherlands) decided to take economic cooperation to the next level. The vision of the EU founding states, epitomized by the Schuman Declaration in 1950, was to tie their economies so closely together that war would become impossible. Robert Schuman, author of the plan, believed Europe could not be made all at once, or according to a single plan. It would have to be built through concrete achievements which first create a de facto solidarity. The countries within the ÒEuropean CommunityÓ benefited enormously from free trade and common economic policies, in particular structural funds designed to foster convergence by funding infrastructure and investments in poorer regions. This book examines how similar transitions and integration into the European Union are experienced in individual central and eastern European states through the use of country scans in the regional blocks of CEE, SEE, and CIS.

**Climate Change 2001: Mitigation** Bert Metz,Ogunlade Davidson,Rob Swart,Jiahua Pan,2001-07-12 Some issues addressed in this Working Group III volume are mitigation of greenhouse gas emissions, managing biological carbon reservoirs, geo-engineering, costing methods, and decision-making frameworks.

Towards the Learning Grid Pierluigi Ritrovato,2005 Annotation Towards the Learning Grid Advances in Human Learning Services Volume 127 Frontiers in Artificial Intelligence and Applications Edited by: P. Ritrovato, C. Allison, S.A. Cerri, T. Dimitrakos, M. Gaeta and S. Salerno November 2005, approx. 248 pp., hardcover There is a paradigm shift in informatics in general and in technologies enhancing human learning in particular. The debate between the evolutionaries those that wish to optimize and refine current approaches and the revolutionaries those that support a fundamental change of approach is quite actual. Within the Internet communities, the debate is hidden behind the words semantic WEB versus semantic Grid ; within educational technologists between content/resource centered and conversation centered e-learning, or either between teaching and pedagogy on the one side, and learning and communities of practice on the other. In general, in informatics, the shift from a product-page oriented to a service-conversation oriented view may possibly impact most if not all the foreseen applications, in e-learning, but also in e-science, e-democracy, e-commerce, e-health, etc. Part A of the book is dedicated to Position papers: visions about what to do and why to do it in the next years. The remaining parts (B to D) offer partial answers to how to do it. Part B concerns what we called: Content-centered services, i.e.: a vision of learning systems that privileges knowledge and its structures, standards and their interoperability, storage and retrieval services. The subsequent part C has been called: Holistic services to refer to more mature and integrated solutions that address not only content but more generally the creation and management of human Virtual Communities connected on the Grid in order to offer and consume different services facilitating and enhancing human learning. Finally part D is concerned with new directions in learning services.

*Crossing the Rubicon* Michael C. Ruppert,2004-09-15 The acclaimed investigative reporter and author of *Confronting Collapse* examines the global forces that led to 9/11 in this provocative exposé. The attacks of September 11, 2001 were accomplished through an amazing orchestration of logistics and personnel. *Crossing the Rubicon* examines how such a conspiracy was possible through an interdisciplinary analysis of petroleum, geopolitics, narco-traffic, intelligence and militarism—without which 9/11 cannot be understood. In reality, 9/11 and the resulting War on Terror are parts of a massive authoritarian response to an emerging economic crisis of unprecedented scale. Peak Oil—the beginning of the end for our industrial civilization—is driving the elites of American power to implement unthinkable draconian measures of repression, warfare and population control. *Crossing the Rubicon* is more than a story of corruption and greed. It is a map of the perilous terrain through which we are all now making our way.
