Relearning to E-learn M. S. Bowles, Marcus Stuart Bowles, 2004 Examines the issue of how people communicate and learn in the electronic environment. It explores many of the problems associated with the newness of e-learning and the diverse approaches to e-learning adopted by the academic, government, corporate and community sectors.

**Drugged Out** Suzette A. Haughton, 2011-05-16 This book explores drug trafficking within the context of globalisation and examines state instituted responses to curb this problem. It demystifies Jamaican, British, and American states' roles in the face of drug trafficking, arguing that both developed and developing states pursue their interests and maximize their goals by exercising state-power.

**Reconciliation after Terrorism** Judith Renner, Alexander Spencer, 2012-03-12 Reconciliation after Terrorism brings together scholars from the hitherto disparate fields of terrorism and reconciliation studies, in order to examine whether reconciliation is a possible strategy for dealing with and ending a terrorist conflict. Although terrorist activities often play a role in situations of conflict and transition, terrorists are generally not taken into consideration as active participants by researchers and practitioners. In some cases, the terrorists turn into political actors during the reconciliation process and their past is not an issue anymore, as it was the case with the ANC in South Africa. This book examines the notion of reconciliation with terrorists from a theoretical and empirical perspective. The notion of engagement and reconciliation with terrorist groups is generally seen as problematic, if not impossible. This is somewhat surprising, given that the idea of societal reconciliation has become a common response to state terror- although not usually in situations of conflict with sub-state terrorist actors. Similar to state terror, sub-state terrorism is a sign of a deep societal rift which reconciliation measures may help to overcome. The text investigates the reconciliatory process further, raising the central questions: (a) what constitutes 'reconciliation' as a process and an outcome; and (b) how can reconciliation be facilitated in a situation of social conflict. This book will be of much interest to students of terrorism studies, transitional justice, conflict resolution, peace and conflict studies and IR in general. \* \* \* Reconciliation after Terrorism was featured in the Terrorism Bookshelf: Top 150 Books on Terrorism and Counterterrorism, selected and reviewed by Joshua Sinai. -Perspectives on Terrorism, Vol. 6, No 2, 2012\* \* \*

**Marxism and Phenomenology** Bryan Smyth, Richard Westerman, 2021-10-25 This volume examines various points of contact between Marxism and phenomenology. Although these traditions can appear conceptually incompatible, the contributors reveal productive complementarities on themes such as alienation, reification, and ecology, which illuminate and can help to resolve the crises of contemporary capitalism.

Talent Management Innovations in the International Hospitality Industry Stefan Jooss, Ralf Burbach, Huub Ruël, 2021-07-27 Talent Management Innovations in the International Hospitality Industry explores a wide range of subjects within the talent management field, including employer branding, creative talent, talent pools, and mentoring initiatives, along with a focus on talent identification, development, and retention.

Science and Golf IV Eric Thain, 2002 This is a collection of the best research papers from the World Scientific Congress of Golf, which brings together all the world's leading golf researchers.

*The Assyrian Genocide* Hannibal Travis, 2017-07-20 For a brief period, the attention of the international community has focused once again on the plight of religious minorities in Iraq, Syria, and Turkey. In particular, the abductions and massacres of Yazidis and Assyrians in the Sinjar, Mosul, Nineveh Plains, Baghdad, and Hasakah regions in 2007–2015 raised questions about the prevention of genocide. This book, while principally analyzing the Assyrian genocide of 1914–1925 and its implications for the culture and politics of the region, also raises broader questions concerning the future of religious diversity in the Middle East. It gathers and analyzes the findings of a broad spectrum of historical and scholarly works on Christian identities in the Middle East, genocide studies, international law, and the politics of the late Ottoman Empire, as well as the politics of the Ottomans' British and Russian rivals for power in western Asia and the eastern Mediterranean basin. A key question the book raises is whether the fate of the Assyrians maps onto any of the concepts used within international law and diplomatic history to study genocide and group violence. In this light, the Assyrian genocide stands out as being several times larger, in both absolute terms and relative to the size of the affected group, than the Srebrenica genocide, which is recognized by Turkey as well as by international tribunals and organizations. Including its Armenian and Greek victims, the Ottoman Christian Genocide rivals the Rwandan, Bengali, and Biafran genocides. The book also aims to explore the impact of the genocide period of 1914–1925 on the development or partial unraveling of Assyrian group cohesion, including aspirations to autonomy in the Assyrian areas of northern Iraq, northwestern Iran, and southeastern Turkey. Scholars from around the world have collaborated to approach these research questions by reference to diplomatic and political archives, international legal materials, memoirs, and literary works.

Orphan Drugs and Rare Diseases David C Pryde, Michael J Palmer, 2014 This book provides an up-to-date monograph on the drug discovery and regulatory elements of therapeutics used to treat rare or orphan diseases.

**The Means to Kill** Gerrit Dworok, Frank Jacob, 2015-11-19 Throughout human history, technological innovation has functioned as a driver of civilization and inspired many people's belief in progress. When it comes to warfare, where technology is applied with a cruel and deadly logic, a nuanced view is needed. From siege engines to drones, innovation has often served a less enlightened aim: elimination of the enemy. This collection of new essays from specialists in military history examines the interdependence between war and technology from a number of regional perspectives.

Reassessing the Pink Tide Rahul A. Sirohi, Samyukta Bhupatiraju, 2020-10-30 This book evaluates the record of the Left in Brazil and Venezuela, two key cases of the "pink tide" wave. The wave of Left governments that emerged across Latin America in the early 2000s – a process dubbed the "pink tide" – has been on the wane in recent years. The Left regimes that, at one point, seemed unbeatable have either been defeated at the ballot, ousted through coups or have had to contend with increasing economic and political conflicts which have nullified many of their achievements. This book argues – like many voices on the Left today – that the waning of the "pink tide" in the region must be viewed in the context of the Left's inability to initiate radical structural changes in its constituencies. At the same time,

however, the book makes the case for a more nuanced and balanced evaluation of the development record of the Left than is often done. In doing so, it seeks to go beyond the reform–revolution binary that has blinkered recent assessments and intends to highlight alternative paths that the Left could have taken.

*U.S. Latino Issues* Rodolfo F. Acuña Ph.D., 2003-10-30 Does the term Latino—a construct of the U.S. government—successfully encompass the wide variety of Spanish-speaking people in this country? This introductory topic begins an overview of 10 major controversies that have embroiled U.S. Latinos, including Puerto Ricans, in recent years. Latinos have one of the fastest-growing populations in the United States today, making these issues front-page news across the country. Issues include: • Race Classification • Assimilation • Bilingual Education • Open Borders • Affirmative Action • Interracial Dating and Marriage • Funding Education and Health Care for Undocumented Immigrant • Amnesty Program • U.S. Military and Political Presence in Cuba • U.S. Military Bases in Puerto Rico Each topic is presented with a background, pro and con positions, and questions for the purpose of student debate and papers.

**Energy, Governance and Security in Thailand and Myanmar (Burma)** Adam Simpson, 2016-04-29 Across the world states are seeking out new and secure supplies of energy but this search is manifesting itself most visibly in Asia where rapid industrialisation in states such as China and India is fomenting a frantic scramble for energy resources. Due to entrenched societal inequities and widespread authoritarian governance, however, the pursuit of national energy security through transnational energy projects has resulted in devastating impacts on the human and environmental security of local populations. These effects are particularly evident in both Thailand and Myanmar (Burma), which, located at the crossroads of Asia, are increasingly engaged in the cross-border energy trade. Based on extensive fieldwork and theoretical analysis this ground-breaking book proposes a new critical approach to energy and environmental security and explores the important role that both local and transnational environmental movements are playing, in the absence of effective and democratic governments, in providing 'activist environmental governance' for energy projects throughout the region. By comparing the nature of this activism under two very different political regimes it delivers crucial theoretical insights with both academic and policy implications for the sustainable and equitable development of the South's natural resources.

*Trade Negotiations in Agriculture* University of Calgary. Latin American Research Centre, 2005 In the current age of globalization, collaboration between nations is paramount. In September 2003, a group of academics, government officials, and business leaders gathered at the University of Calgary under the auspices of its Latin American Research Centre (LARC) to discuss issues related to international trade negotiations in agriculture. This innovative undertaking, which was a collaborative effort of York University, the University of Western Ontario, L'Université du Québec à Montréal, and the University of Calgary, had one main objective: to identify trade issues common to Canada and Brazil and to formulate possible plans for co-operation and coalition-building. *Trade Negotiations in Agriculture: A Future Common Agenda for Brazil and Canada?* is one result of this highly successful conference. This collection highlights some of the outstanding contributions from conference participants and provides useful background information for those who want to learn more about these important international economic issues. With Contributions by: Eugene Bealieu Shenjie Chen James D. Gaisford Annette Hester Grant E. Issac Mario Q.M. Jales Marcos S. Jank Florencia Jubany Jane H. Kelley Willima A. Kerr Laura J. Loppacher James D. Rude Estela Tavares May T. Yeung

*Power, Pedagogy and Praxis*, 2008-01-01 The aim of the text is to respond to gaps in an emergent discourse running along minority/majority world fault lines through various perspectives linking globalization, education and human rights.

**Lost in Cognition** Eric Laurent, 2018-05-11 This book examines the pretensions of the new paradigm in psychology that has put itself forward as the model for the future of the clinical disciplines, thereby seeking to put paid to psychoanalysis. What is this paradigm shift? It goes by the name of cognitive-behaviourism. Where does it come from? From the United States. Until the nineteen-sixties, behavioural psychology had enjoyed a certain prestige in the US. It was later disqualified by the objections from the linguist Noam Chomsky who held that no learning procedure could ever account for linguistic ability. This ability was surely innate, Chomsky argued, and so he set about hunting out the organ of language. Behaviour had to be complemented by a machine for taking cognisance, a machine that was innate and which conformed to the post-Chomskyan model. It took the discipline some thirty years to deck itself out in new clothes. The advances in biology, in neurology, and in the nebula that resulted from them under the 'neuroscience' label, oversaw this change.

*The Oxford Handbook of Evidence-Based Management* Denise M. Rousseau, 2013-12-15 From medicine to education, evidence-based approaches aim to evaluate and apply scientific evidence to a problem in order to arrive at the best possible solution. Thus, using scientific knowledge to inform the judgment of managers and the process of decision-making in organizations, Evidence-based Management (EBMgt) is the science-informed practice of management. Written by leading experts in the study and practice of EBMgt, *The Oxford Handbook of Evidence-based Management* provides an overview of key EBMgt ideas and puts them in context of promoting evidence-based practice. Furthermore, it addresses the roles and contributions of practitioners, educators, and scholars -- the primary constituents of EBMgt -- while providing perspectives and resources for each. Divided into three sections (research, practice, and education), this handbook examines the realities of everyday management practice and the role EBMgt can play in improving managerial decision making and employee well being and instructs educators in their roles as designers of curricula and resources. As the first major volume to capture the spirit of this emerging movement, *The Oxford Handbook of Evidence-based Management* shows how practitioners can use high-quality knowledge gleaned from scientific research in order to make better use of available data and ultimately make more mindful decisions.

*A History of Mining in Latin America* Kendall W. Brown, 2012-03-16 For twenty-five years, Kendall Brown studied Potosí, Spanish America's greatest silver producer and perhaps the world's most famous mining district. He read about the flood of silver that flowed from its Cerro Rico and learned of the toil of its miners. Potosí symbolized fabulous wealth and unbelievable suffering. New World bullion stimulated the formation of the first world economy but at the same time it had profound consequences for labor, as mine operators and refiners resorted to extreme forms of coercion to secure workers. In many cases the environment also suffered devastating harm. All of this occurred in the name of wealth for individual entrepreneurs, companies, and the ruling states. Yet the question remains of how much economic development mining managed to produce in Latin America and what were its social and ecological consequences. Brown's focus on the legendary mines at Potosí and comparison of its operations to those of other mines in Latin America is a well-written and accessible study that is the first to span the colonial era to the

present.

**The Journal of College and University Law** ,2004

Slavery in Brazil Herbert S. Klein, Francisco Vidal Luna, 2010 This is the first complete modern survey of the institution of slavery in Brazil and how it affected the lives of enslaved Africans. It is based on major new research on the institution of slavery and the role of Africans and their descendants in Brazil. This book aims to introduce the reader to this latest research, both to elucidate the Brazilian experience and to provide a basis for comparisons with all other American slave systems.

Consensus William Hayes, 2013-07-01 The purpose of this book is to help the reader understand our differences and to suggest a way that we can reach a consensus on education reform.
