International Perspectives on Natural Disasters: Occurrence, Mitigation, and Consequences Joseph P. Stoltman,John Lidstone,Lisa M. DeChano,2007-03-01 Reports of natural disasters fill the media with regularity. Places in the world are affected by natural disaster events every day. Such events include earthquakes, cyclones, tsunamis, wildfires – the list could go on for considerable length. In the 1990s there was a concentrated focus on natural disaster information and mitigation during the International Decade for Natural Disasters Reduction (IDNDR). The information was technical and provided the basis for

major initiatives in building structures designed for seismic safety, slope stability, severe storm warning systems, and global monitoring and reporting. Mitigation, or planning in the event that natural hazards prevalent in a region would suddenly become natural disasters, was a major goal of the decade-long program. During the IDNDR, this book was conceptualized, and planning for its completion began. The editors saw the need for a book that would reach a broad range of readers who were not actively or directly engaged in natural disasters relief or mitigation planning, but who were in decision-making positions that provided an open window for addressing natural disaster issues. Those people were largely elected public officials, teachers, non-governmental organization staff, and staff of faith-based organizations. Those people, for the most part, come to know very well the human and physical characteristics of the place in which they are based. With that local outreach in mind, the editors intended the book to encourage readers to: 1.

Sovereignty Under Challenge Nathan Glazer, 2017-09-20 Sovereignty-the authority of a state to wield ultimate power over its territory, its citizens, its institutions-is everywhere undergoing change as states respond in various ways to the challenges posed, from above and below. Above the state is the widening net of international institutions and treaties

dealing with human rights, trade, investment, and monetary affairs; and below it are rising claims within states from long-resident groups discontented with the political order and from new migrants testing its authority. *Sovereignty under Challenge* deals with a range of such challenges and responses, analyzed in authoritative studies by leading scholars. The introductory chapter sets forth the theme that sovereignty is asserted clearly, but often unpredictably, when governments respond to challenge. It suggests ways of classifying these responses as variables that help explain the changing nature of sovereignty. Part 1, *The Citizen and the State*, treats the rising tide of dual citizenship and the concerns this arouses in the United States; the work of national human rights commissions in Asia; and the challenge posed to the state by the Falungong movement in China. The two chapters in Part 2, *The Government as Decision-Maker*, examine Japan's response to global warming and the problems of the World Health Organization in orchestrating collaboration among Southeast Asian states in implementing infectious disease control. Part 3, *Sovereignty and Culture*, looks at conflicts engendered by outside change on indigenous economic, cultural, and legal institutions in India, Fiji, Indonesia, and Malaysia. The chapters in Part 4, *Sovereignty and the Economy*, analyze the economic and cultural instability induced by Chinese migration to Russia's far east; the impact on state sovereignty brought about by transnational regulatory campaigns and social activism; the question of indigenous land rights in the Philippines; and the impact of transnational corporations on information technology in Asia. A concluding chapter offers a global assessment of the current status of state sovereignty.

Preventing Earthquake Disasters: The Grand Challenge in Earthquake Engineering National Research Council, Division on Engineering and Physical Sciences, Board on Infrastructure and the Constructed Environment, Committee to Develop a Long-Term Research Agenda for the Network for Earthquake Engineering Simulation (NEES), 2003-12-07 The Network for Earthquake Engineering Simulation (NEES), administered by the National Science Foundation (NSF), is scheduled to become operational in 2004. These network sites will perform a range of experiments to test and validate complex computer models being developed to simulate the behavior of structures subjected to earthquakes. To assist in this effort, the NSF requested the National Research Council (NRC) to frame the major questions to be addressed by and to develop a long-term research agenda for NEES. Preventing Earthquake Disasters presents an overview of the grand challenge including six critical research problems making up that challenge. The report also provides an assessment of earthquake engineering research issues and the role of information technology in that research effort, and a research plan for NEES.

Risks Challenging Publics, Scientists and Governments Scira Menoni, 2010-03-15 The contributions in Risks Challenging Publics, Scientists and Government looks at risks not just as a technical, social, political or economic matter, but as originating and challenging the various disciplines. Israeli Backpackers Chaim Noy, Erik Cohen, 2012-02-01 In the period after their military service, Jewish Israeli youth customarily embark on a unique touristic practice:

the backpacking trip. Combining sociological, anthropological, and psychological research—based on innovative fieldwork conducted with Israeli backpackers in Israel and abroad—this book depicts the complex relationship between the traveling youth and their society of origin. Via a perspective the editors term outside-in, we learn how social and cultural tensions and tenets, identities, fantasies, and preoccupations are acted out within a symbolic, touristic space by scores of Israeli youth.

Flood Damage Survey and Assessment Daniela Molinari, Scira Menoni, Francesco Ballio, 2017-06-28 Floods can have a devastating impact on life, property and economic resources. However, the systematic collection of damage data in the aftermath of flood events can contribute to future risk mitigation. Such data can support a variety of actions including the identification of priorities for intervention during emergencies, the creation of complete event scenarios to tailor risk mitigation strategies, the definition of victim compensation schemes, and the validation of damage models to feed cost-benefit analysis of mitigation actions. Volume highlights include: • Compilation of real world case studies elaborating on the survey experiences and best practices associated with flood damage data collection, storage and analysis, that can help strategize flood risk mitigation in an efficient manner • Coverage of different flooding phenomena such as riverine and mountain floods, spatial analysis from local to global scales, and stakeholder perspectives, e.g. public decision makers, researchers, private companies • Contributions from leading experts in the field, researchers and practitioners, including civil protection actors working at different spatial and administrative level, insurers, and professionals working in the field of natural hazard risks mitigation *Flood Damage Survey and Assessment: New*

Insights from Research and Practice will be a valuable resource for earth scientists, hydrologists, meteorologists, geologists, geographers, civil engineers, insurers, policy makers, and planners. Read an interview with the editors to find out more:

Rebels on the Air Jesse Walker, 2004-06-01 Boring DJs who never shut up, and who don't even pick their own records. The same hits, over and over. A constant stream of annoying commercials. How did radio get so dull? Not by accident, contends journalist and historian Jesse Walker. For decades, government and big business have colluded to monopolize the airwaves, stamping out competition, reducing variety, and silencing dissident voices. And yet, in the face of such pressure, an alternative radio tradition has tenaciously survived. Rebels on the Air explores these overlooked chapters in American radio, revealing the legal barriers established broadcasters have erected to ensure their dominance. Using lively anecdotes drawn from firsthand interviews, Walker chronicles the story of the unsung heroes of American radio who, despite those barriers, carved out spaces for themselves in the spectrum, sometimes legally and sometimes not. Walker's engaging, meticulous account is the first comprehensive history of alternative radio in the United States. From the unlicensed amateurs who invented broadcasting to the community radio movement of the 1960s and 1970s, from the early days of FM to today's micro radio movement, Walker lays bare the hidden history of broadcasting. Above all, Rebels on the Air is the story of the pirate broadcasters who shook up radio in the 1990s and of the new sorts of radio we can expect in the next century, as the microbroadcasters crossbreed with the even newer field of Internet broadcasting.
