Che Guevara's Face Danielle Smith-Llera,2016-07 Discusses the iconic photograph of revolutionary Che Guevara taken in 1960 by Cuban photographer Alberto Korda--

The Making of Saints James F Hopgood,2005-04-24 A multidisciplinary study of the commonalities between heroes, icons, saints, and their institutions, across several cultures.

The Semiotics of Che Guevara Maria-Carolina Cambre,2014-11-20 Alberto Korda's famous photograph of Che Guevara titled the Guerrillero Heroico has been reproduced, modified and remixed countless times since it was taken on March 5, 1960, in Havana, Cuba. This book looks again at this well-known mass-produced image to explore how an image can take on cultural force in diverse parts of the globe and legitimate varying positions and mass action in unexpected global political contexts. Analytically, the book develops a comparative analysis of how images become attached to a range of meanings that are absolutely inseparable from their contexts of use. Addressing the need for a fluid and responsive approach to the study of visual meaning-making, this book relies on multiple methodologies such as semiotics, research-creation, multimodal discourse analysis, ethnography and phenomenology and shows how each method has something to offer toward the understanding of the social and cultural work of images in our globally oriented cultures.

Ecologies of Affect Tonya K. Davidson,Ondine Park,Rob Shields,2013-06-01 Ecologies of Affect offers a synthetic introduction to the felt dynamics of cities and the character of places. The contributors capture the significance of affects including desire, nostalgia, memory, and hope in forming the identity and tone of places. The critical intervention this collection of essays makes is an active, consistent engagement with the virtualities that produce and refract our idealized attachments to place. Contributors show how place images, and attempts to build communities, are, rather than abstractions, fundamentally tied to and revolve around such intangibles. We understand nostalgia, desire, and hope as virtual; that is, even though they are not material, they are nevertheless real and must be accounted for. In this book, the authors take up affect, emotion, and emplacement and consider them in relation to one another and how they work to produce and are produced by certain temporal and spatial dimensions. The aim of the book is to inspire readers to consider space and place beyond their material properties and attend to the imaginary places and ideals that underpin and produce material places and social spaces. This collection will be useful to practitioners and students seeking to understand the power of affect and the importance of virtualities within contemporary societies, where intangible goods have taken on an increasing value.

Heartthrobs Carol Dyhouse,2017-02-09 What can a cultural history of the heartthrob teach us about women, desire, and social change? From dreams of Prince Charming or dashing military heroes, to the lure of dark strangers and vampire lovers; from rock stars and rebels to soulmates, dependable family types or simply good companions, female fantasies about men tell us as much about the history of women as about masculine icons. When girls were supposed to be shrinking violets, passionate females risked being seen as 'unbridled', or dangerously out of control. Change came slowly, and young women remained trapped in double-binds. You may have needed a husband in order to survive, but you had to avoid looking like a gold-digger. Sexual desire could be dangerous: a rash guide to making choices. Show attraction too openly and you might be judged 'fast' and undesirable. Education and wage-earning brought independence and a widening of cultural horizons. Young women in the early twentieth century showed a sustained appetite for novel-reading, cinema-going, and the dancehall. They sighed over Rudolph Valentino's screen performances, as tango-dancer, Arab tribesman, or desert lover. Contemporary critics were sniffy about 'shop-girl' taste in literature and in men, but as consumers, girls had new clout. In Heartthrobs, social and cultural historian Carol Dyhouse draws upon literature, cinema, and popular romance to show how the changing position of women has shaped their dreams about men, from Lord Byron in the early nineteenth century to boy-bands in the early twenty-first. Reflecting on the history of women as consumers and on the nature of fantasy, escapism, and 'fandom', she takes us deep into the world of gender and the imagination. A great deal of feminist literature has shown women as objects of the 'male gaze': this book looks at men through the eyes of women.

Human Extinction Émile P. Torres,2023-06-15 This volume traces the origins and evolution of the idea of human extinction, from the ancient Presocratics through contemporary work on existential risks. Many leading intellectuals agree that the risk of human extinction this century may be higher than at any point in our 300,000-year history as a species. This book provides insight on the key questions that inform this discussion, including when humans began to worry about their own extinction and how the debate has changed over time. It establishes a new theoretical foundation for thinking about the ethics of our extinction, arguing that extinction would be very bad under most circumstances, although the outcome might be, on balance, good. Throughout the book, graphs, tables, and images further illustrate how human choices and attitudes about extinction have evolved in Western history. In its thorough examination of humanity's past, this book also provides a starting point for understanding our future. Although accessible enough to be read by undergraduates, Human Extinction contains new and thought-provoking research that will benefit even established academic philosophers and historians.

Churchill and the Battle of Britain Nicola Barber,2017-12-11 How did Winston Churchill inspire Britain and its Empire in the dark days of 1940, when defeat in World War II seemed imminent, and how did that lead to victory in the Battle of Britain? What choices did he have, what support and advice did he receive, and how did his decisions affect history and his legacy? This book looks at a momentous event from World War II, showing how one of the world's most famous leaders chose to follow a particular course of action.

The Soul of an American President Alan Sears,Craig Osten,Ryan Cole,2019-06-04 While there have been many biographies of Dwight D. Eisenhower that focus on his military career or the time of his presidency, none clearly explores the important role faith played both in his personal life and in his public policy. This despite the fact that he is the only US president to be baptized as a Christian while in office. Alan Sears and Craig Osten invite you on a journey that is unique in American history and is essential to understanding one of the most consequential, admired, and complex Americans of the 20th Century. The story begins in abject poverty in rural Texas, then travels through Kansas, West Point, two World Wars, and down Pennsylvania Avenue. This is the untold story of a man whose growing faith sustained him through the loss of a young son, marital difficulties, depression, career disappointments, and being witness to some of the worst atrocities humankind has devised. A man whose faith was based in his own sincere personal conviction, not out of a sense of political expediency or social obligation. You've met Dwight Eisenhower the soldier and Dwight Eisenhower the president. Now meet Dwight Eisenhower the man of faith.

Deus in Machina:Religion, Technology, and the Things in Between Jeremy Stolow,2013 This interdisciplinary volume explores how two domains of human experience and action-religion and technology-are implicated in one another. Combining rich historical and ethnographic detail with extended theoretical reflection, Deus in Machina challenges longstanding assumptions about religion and/as technology and outlines new directions of inquiry at the crossroads of religious studies, science and technology studies, communication studies, history, anthropology, and philosophy.

Section 27 and Freedman's Village in Arlington National Cemetery Ric Murphy,Timothy Stephens,2020-03-04 From its origination, Arlington National Cemetery's history has been compellingly intertwined with that of African Americans. This book explains how the grounds of Arlington House, formerly the home of Robert E. Lee and a plantation of the enslaved, became a military camp for Federal troops, a freedmen's village and farm, and America's most important burial ground. During the Civil War, the property served as a pauper's cemetery for men

too poor to be returned to their families, and some of the very first war dead to be buried there include over 1,500 men who served in the United States Colored Troops. More than 3,800 former slaves are interred in section 27, the property's original cemetery.

Creative Industries and Developing Countries Barrowclough,2012-11-12 Pushing the frontiers of the new development paradigm, this book guides debates, clarifies new themes and illustrates how the cultural resources of the developing world can become a new way of integrating into the global economy - helping to raise the voices of developing countries, widening the range of creative choices and promoting cultural diversity and economic and human development. Mixing theory, country case-studies and policy analysis this volume argues that developing countries can use their creative assets and energies as a source of economic growth - if they can better position themselves in the global economy, turning on its head the polarized debate about commerce and culture to take a fresh look at some traditional activities whose intrinsic cultural value has for too long hidden their economic worth. It includes essays from economists, lawyers and industry experts on global trade trends; digital-technology; film in West Africa; audio visuals in India; the music industry in Brazil and the Caribbean; the copyright industry in Arab countries, and policy lessons from developed countries - including sources of finance, subsidies and the role of incubators and intermediaries. Fresh and incisive, this policy lead book on one of the world's fastest growing sectors is an invaluable resource for to economists and policy-makers alike, as well as those with an interest in industrial organization, development policy, evolutionary economics and the creative industries.

Charles Crichton Quentin Falk,2021-06-29 Charles Crichton is perhaps best remembered as the director of the unlikely blockbuster hit A Fish Called Wanda, made when he was seventy-seven years old. But the most significant part of his career was spent at Ealing Studios in the 1940s and 1950s, working on such beloved comedies as Hue and Cry, The Lavender Hill Mob and The Titfield Thunderbolt. Nonetheless, as this pioneering study of Crichton's work reveals, his filmmaking skills extended way beyond comedy to wartime dramas and film noir, and his adaptability served him well when he made the transition into primetime television, working on popular shows such as The Avengers, Space: 1999 and The Adventures of Black Beauty. Featuring first-hand testimony from colleagues ranging from Dame Judi Dench and Petula Clark to John Cleese and Sir Michael Palin, this riveting account of Crichton's fascinating life in film will appeal to film scholars and general readers alike.
