International Labour Migration in the Middle East and Asia Kwen Fee Lian, Naomi Hosoda, Masako Ishii, 2019-08-22 The discourse on migration outcomes in the West has largely been dominated by issues of integration, but it is more relevant to view immigration in non-Western societies in relation to practices of exclusion and inclusion. Exclusion refers to a situation in which individuals and groups are usually denied access to the goods, services, activities and resources associated with citizenship. However, this approach has been criticised in relation to gender issues, which are very relevant to the situation of migrants. The authors in this volume address this criticism. Furthermore, when framed within a North–South discourse, it may be potentially ethnocentric to assume that the experience of exclusion is cross-culturally uniform. Indeed, work on migration issues has invariably been conducted within such a discourse. The contributors go beyond this binary discourse of 'exclusion versus inclusion' which has dominated migration research. They examine the situation of migrants in the Middle East and Asia as one that encompasses both exclusion and inclusion, addressing related concepts of empowerment, ethnocracy, the feminisation of migration and gendered geographies of power, liberal constraint and multiculturalism, individual agency, migrant-friendly discourses, spaces of emancipation and spaces of insecurity. The book highlights current research in the Arab Gulf states, and examines multiculturalism in Asia more broadly. It will be of particular interest to students and researchers in international labour migration studies in the Middle East and Asia.

The Lost Eleven Denise George, Robert Child, 2017-01-31 Nearly forgotten by history, this is the story of the Wereth Eleven, African-American soldiers who fought courageously for freedom in WWII—only to be ruthlessly executed by Nazi troops during the Battle of the Bulge. Their story was almost forgotten by history. Now known as the Wereth Eleven, these brave African-American soldiers left their homes to join the Allied effort on the front lines of WWII. As members of the 333rd Field Artillery Battalion, they provided crucial fire support at the Siege of Bastogne. Among the few who managed to escape the Nazi's devastating Ardennes Offensive, they found refuge in the small village of Wereth, Belgium. A farmer and supporter of the Allies took the exhausted and half-starved men into his home. When Nazi authorities learned of their whereabouts, they did not take the soldiers prisoner, but subjected them to torture and execution in a nearby field. Despite their bravery and sacrifice, these eleven soldiers were omitted from the final Congressional War Crimes report of 1949. For seventy years, their files—marked secret—gathered dust in the National Archive. But in 1994, at the site of their execution, a memorial was dedicated to the Wereth Eleven and all African-American soldiers who fought in Europe. Drawing on firsthand interviews with family members and fellow soldiers, *The Lost Eleven* tells the complete story of these nearly forgotten soldiers, their valor in battle and their tragic end. Madison Parish Richard P. Sevier, 2003 Founded in 1838 and located in extreme northeastern Louisiana, Madison Parish has a rich and colorful history. It is the setting of Kate Stone's best-selling Civil War diary, *Brokenburn*, and played an important role during that era—Generals Grant, Sherman, and McClernan assembled their troops in Madison Parish months before their assault on Vicksburg. Sarah Breedlove, better known as Madam C.J. Walker, was born in Madison Parish and ultimately rose from a lowly washerwoman to the first black female millionaire in the United States. *Images of America: Madison Parish*, containing over 200 black-and-white images, highlights the history of this fascinating community through photographs, drawings, and maps. Included are Civil War scenes, the 1907 bear hunt by President Theodore Roosevelt, and numerous professional photographs of the disastrous 1927 flood that paralyzed the parish and surrounding areas for several months.

African Ethnobotany in the Americas Robert Voeks, John Rashford, 2012-09-25 African Ethnobotany in the Americas provides the first comprehensive examination of ethnobotanical knowledge and skills among the African Diaspora in the Americas. Leading scholars on the subject explore the complex relationship between plant use and

meaning among the descendants of Africans in the New World. With the aid of archival and field research carried out in North America, South America, and the Caribbean, contributors explore the historical, environmental, and political-ecological factors that facilitated/hindered transatlantic ethnobotanical diffusion; the role of Africans as active agents of plant and plant knowledge transfer during the period of plantation slavery in the Americas; the significance of cultural resistance in refining and redefining plant-based traditions; the principal categories of plant use that resulted; the exchange of knowledge among Amerindian, European and other African peoples; and the changing significance of African-American ethnobotanical traditions in the 21st century. Bolstered by abundant visual content and contributions from renowned experts in the field, African Ethnobotany in the Americas is an invaluable resource for students, scientists, and researchers in the field of ethnobotany and African Diaspora studies.

Wildlife of the Tibetan Steppe George B. Schaller, 2000-05 The Chang Tang, the vast, remote Tibetan steppe, is one of the most forbidding places on earth. Yet this harsh land is home to a unique assemblage of large mammals, including Tibetan antelope, gazelle, argali sheep, wild ass, wild yak, wolves, snow leopards, and others. Since 1985, George B. Schaller and his Chinese and Tibetan co-workers have surveyed the flora and fauna of the Chang Tang. Their research provides the first detailed look at the natural history of one of the world's least known ecosystems.

African American Slave Medicine Herbert C. Covey, 2008-09-09 African-American Slave Medicine offers a critical examination of how African-American slaves' medical needs were addressed during the years before and surrounding the Civil War. Drawing upon ex-slave interviews conducted during the 1930s and 1940s by the Works Project Administration (WPA), Dr. Herbert C. Covey inventories many of the herbal, plant, and non-plant remedies used by African-American folk practitioners during slavery. He demonstrates how active the slaves were in their own medical care and the important role faith played in the healing process. This book links each referenced plant or herb to modern scientific evidence to determine its actual worth and effects on the patients. Through his study, Dr. Covey unravels many of the complex social relationships found between the African-American slaves, Whites, folk practitioners, and patients. African-American Slave Medicine is a compelling and captivating read that will appeal to scholars of African-American history and those interested in folk medicine.

The Chemistry and Biology of Volatiles Andreas Herrmann, 2011-06-15 Coming to a conclusion, this wonderful, informative and very interesting book presents an excellent overview of small volatile organic compounds and their role in our life and environment. Really fascinating is the entirety of scientific disciplines which were addressed by this book. –Flavour and Fragrance Journal, 2011 ... this book deserves to be a well-used reference in the library of any laboratory specialising in VOC. –Chemistry World, 2011 Volatile compounds are molecules with a relatively low molecular weight allowing for an efficient evaporation into the air. They are found in many areas of our everyday-life: they are responsible for the communication between species such as plants, insects or mammals; they serve as flavours or fragrances in many food products or perfumed consumer articles; and they play an important role in atmospheric chemistry. This book takes an interdisciplinary approach to volatile molecules. Review-style introductions to the main topics in volatile chemistry and biology are provided by international experts, building into a broad overview of this fascinating field. Topics covered include: The structural variety of volatile compounds Biogenesis of volatiles Synthesis of natural and non-natural volatiles Analysis of volatiles Volatile compounds as semiochemicals in plant-plant or plant-insect interactions Volatiles in pest control Pheromones and the influence of volatiles on mammals Olfaction and human perception Volatiles as fragrances The generation of flavours and food aroma compounds Stabilisation and controlled release of volatiles The impact of volatiles on the environment and the atmosphere

Global Climate Change and Extreme Weather Events Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2008-09-23 Long before the germ theory of disease was described, late in the nineteenth century, humans knew that climatic conditions influence the appearance and spread of epidemic diseases. Ancient notions about the effects of weather and climate on disease remain embedded in our collective consciousness—through expressions such as cold for rhinovirus infections; malaria, derived from the Latin for bad air; and the common complaint of feeling under the weather. Today, evidence is mounting that earth's climate is changing at a faster rate than previously appreciated, leading researchers to view the longstanding relationships between climate and disease with new urgency and from a global perspective. On December 4 and 5, 2007, the Forum on Microbial Threats hosted a public workshop in Washington, DC to consider the possible infectious disease impacts of global climate change and extreme weather events on human, animal, and plant health, as well as their expected implications for global and national security.
