Northern Plains Native Americans Shane Balkowitsch, 2023-10-17 North Dakotan Shane Balkowitsch's quest to take 1000 Native American wet-plates portraits in the present day is one step closer with this second volume. In this series of wet-plate collodion book of portraits of Northern Plains Native Americans, the photographer/author continues with his distinctive and unique presentation that is the only one to have ever been instigated or created for this particular group of Native Americans. The technique he uses, wet-plate collodion and the eye of the author align to present a masterful, unique, and respectful array that is sumptuous and compelling. Here the subjects are presented in their native garb, giving he subjects the opportunity explore their self-image, in a safe space where who they are how they see themselves are certain to be respected and admired. Wet-plate collodion is one of the earliest forms of photography. A wet-plate photographer makes a film based on a piece of glass or metal using collodion, submerges it in a silver nitrate solution to make it light sensitive, and then exposes the photograph usually in an old style wood bellows camera box and antique brass lens from the 1800's. The end result is a one-of-a-kind, archival object of art that will last many lifetimes. Shane and his Native American sitters have collaborated in the creation of a piece of contemporary history using classical methodology. The legacy he has created is indeed, who they were, what they were like, and what they did. There is nothing like it in the library of Native American portraiture in the modern era. The photographer's effort is to show that his subjects are still here--with their culture, dignity, and traditions.

Hard Times and New Deal in Kentucky George T. Blakey, 2014-07-15 The Great Depression and the New Deal touched the lives of almost every Kentuckian during the 1930s. Fifty years later the Commonwealth is still affected by the legacies of that era and the policies of the Roosevelt

administration. George T. Blakey has written the first full study of this turbulent decade in Kentucky, and he offers a fresh perspective on the New Deal programs by viewing them from the local and state level rather than from Washington. Thousands of Kentuckians worked for New Deal programs such as the Civilian Conservation Corps and the Works Projects Administration; thousands more kept their homes through loans from the Home Owners Loan Corporation. Tobacco growers adopted new production techniques and rural farms received their first electricity because of the Agricultural Adjustment and Rural Electrification administrations. The New Deal stretched from the Harlan County coal mines to a TVA dam near Paducah, and it encompassed subjects as small as Social Security pension checks and as large as revived Bourbon distilleries. The impact of these phenomena on Kentucky was both beneficial and disruptive, temporary and enduring. Blakey analyzes the economic effects of this unprecedented and massive government spending to end the depression. He also discusses the political arena in which Governors Laffoon, Chandler, and Johnson had to wrestle with new federal rules. And he highlights social changes the New Deal brought to the Commonwealth: accelerated urbanization, enlightened land use, a lessening of state power and individualism, and a greater awareness of Kentucky history. *Hard Times and New Deal* weaves together private memories of older Kentuckians and public statements of contemporary politicians; it includes legislative debates and newspaper accounts, government statistics and personal reminiscences. The result is a balanced and fresh look at the patchwork of emergency and reform activities which many people loved, many others hated, but no one could ignore.

Identity Capitalists Nancy Leong,2021-02-09 Nancy Leong reveals how powerful people and institutions use diversity to their own advantage and how the rest of us can respond—and do better. Why do people accused of racism defend themselves by pointing to their black friends? Why do men accused of sexism inevitably talk about how they love their wife and daughters? Why do colleges and corporations alike photoshop people of color into their websites and promotional materials? And why do companies selling everything from cereal to sneakers go out of their way to include a token woman or person of color in their advertisements? In this groundbreaking book, Nancy Leong coins the term identity capitalist to label the powerful insiders who eke out social and economic value from people of color, women, LGBTQ people, the poor, and other outgroups. Leong deftly uncovers the rules that govern a system in which all Americans must survive: the identity marketplace. She contends that the national preoccupation with diversity has, counterintuitively, allowed identity capitalists to infiltrate the legal system, educational institutions, the workplace, and the media. Using examples from law to literature, from politics to pop culture, Leong takes readers on a journey

through the hidden agendas and surprising incentives of various ingroup actors. She also uncovers a dire dilemma for outgroup members: do they play along and let their identity be used by others, or do they protest and risk the wrath of the powerful? Arming readers with the tools to recognize and mitigate the harms of exploitation, *Identity Capitalists* reveals what happens when we prioritize diversity over equality.

Stats: Data and Models, Global Edition Paul Velleman, Richard D. De Veaux, David E. Bock, 2016-09-29 Richard De Veaux, Paul Velleman, and David Bock wrote *Stats: Data and Models* with the goal that students and instructors have as much fun reading it as they did writing it. Maintaining a conversational, humorous, and informal writing style, this new edition engages students from the first page. The authors focus on statistical thinking throughout the text and rely on technology for calculations. As a result, students can focus on developing their conceptual understanding. Innovative Think/Show/Tell examples give students a problem-solving framework and, more importantly, a way to think through any statistics problem and present their results. YouTube Jean Burgess, Joshua Green, 2013-04-16 YouTube is one of the most well-known and widely discussed sites of participatory media in the contemporary online environment, and it is the first genuinely mass-popular platform for user-created video. In this timely and comprehensive

introduction to how YouTube is being used and why it matters, Burgess and Green discuss the ways that it relates to wider transformations in culture, society and the economy. The book critically examines the public debates surrounding the site, demonstrating how it is central to struggles for authority and control in the new media environment. Drawing on a range of theoretical sources and empirical research, the authors discuss how YouTube is being used by the media industries, by audiences and amateur producers, and by particular communities of interest, and the ways in which these uses challenge existing ideas about cultural 'production' and 'consumption'. Rich with both concrete examples and featuring specially commissioned chapters by Henry Jenkins and John Hartley, the book is essential reading for anyone interested in the contemporary and future implications of online media. It will be particularly valuable for students and scholars in media, communication and cultural studies.

Redefining Global Strategy, with a New Preface Pankaj Ghemawat, 2018-04-10 New Tools for Succeeding Globally Why do so many global strategies fail--despite companies' powerful brands and other border-crossing advantages? Because a one-size-fits-all strategy no longer stands a chance. When firms believe in the illusions of a flat world and the death of distance, they charge across borders as if the globe were one seamless marketplace. But cross-border differences are larger than we assume. Most economic activity--including trade, real and financial investment, tourism, and communication--happens locally, not internationally. In this semiglobalized approach, companies can cross borders more profitably by basing their strategies on the geopolitical differences that matter; they must identify the barriers their strategies will have to overcome, and they must build bridges to cross those barriers. Based on rigorous research, Pankaj Ghemawat shows how to create successful strategies and provides practical management tools so you can: Assess the cultural, administrative,

geographic, and economic differences between regions at the industry level--and decide which ones require attention Track the implications of the specific border-crossing actions that will impact your company's ability to create value the most Generate superior performance through strategies that are optimized for the three A's: adaptation (adjusting to differences), aggregation (overcoming differences), and arbitrage (exploiting differences) Using in-depth examples, Ghemawat reveals how companies such as Cemex, Toyota, Procter & Gamble, Tata Consultancy Services, IBM, and GE Healthcare are adroitly managing cross-border differences. He also shares examples of other well-known companies that have failed at this challenge. Crucial for any business competing across borders, *Redefining Global Strategy* will help you make the most of our semiglobalized world.

After the Public Turn Frank Farmer, 2013-04-15 In *After the Public Turn*, author Frank Farmer argues that counterpublics and the people who make counterpublics—"citizen bricoleurs"—deserve a more prominent role in our scholarship and in our classrooms. Encouraging students to understand and consider resistant or oppositional discourse is a viable route toward mature participation as citizens in a democracy. Farmer examines two very different kinds of publics, cultural and disciplinary, and discusses two counterpublics within those broad categories: zine discourses and certain academic discourses. By juxtaposing these two significantly different kinds of publics, Farmer suggests that each discursive world can be seen, in its own distinct way, as a counterpublic, an oppositional social formation that has a stake in widening or altering public life as we know it. Drawing on major figures in rhetoric and cultural theory, Farmer builds his argument about composition teaching and its relation to the public sphere, leading to a more sophisticated understanding of public life and a deeper sense of what democratic citizenship means for our time.

Educational visions Rebecca Ferguson, Ann Jones, Eileen Scanlon, 2019-12-18 What have been the

biggest successes in educational technology – and why have they succeeded when others have failed? Educational Visions shows how innovations including citizen science, learning at scale, inclusive education, learning design and analytics have developed over decades. The book is shaped by the visions pursued by one research group for the past 40 years. It outlines the group's framework for innovation and shows how this can be put into practice to achieve long-term results that benefit both students and teachers at every educational level.

Let's Pretend This Never Happened Jenny Lawson, 2013-03-05 The #1 New York Times bestselling (mostly true) memoir from the hilarious author of *Furiously Happy*. “Gaspingly funny and wonderfully inappropriate.”—O, The Oprah Magazine When Jenny Lawson was little, all she ever wanted was to fit in. That dream was cut short by her fantastically unbalanced father and a morbidly eccentric childhood. It did, however, open up an opportunity for Lawson to find the humor in the strange shame-spiral that is her life, and we are all the better for it. In the irreverent *Let's Pretend This Never Happened*, Lawson's long-suffering husband and sweet daughter help her uncover the surprising discovery that the most terribly human moments—the ones we want to pretend never happened—are the very same moments that make us the people we are today. For every intellectual misfit who thought they were the only ones to think the things that Lawson dares to say out loud, this is a poignant and hysterical look at the dark, disturbing, yet wonderful moments of our lives. Identity Papers Bronwyn T Williams, 2006-09-30 How do definitions of literacy in the academy, and the pedagogies that reinforce such definitions, influence and shape our identities as teachers, scholars, and students? The contributors gathered here reflect on those moments when the dominant cultural and institutional definitions of our identities conflict with our other identities, shaped by class, race, gender, sexual orientation, location, or other cultural factors. These writers explore the struggle, identify the sources of conflict, and discuss how they respond personally to such tensions in their scholarship, teaching, and administration. They also illustrate how writing helps them and their students compose alternative identities that may allow the connection of professional identities with internal desires and senses of self. They emphasize how identity comes into play in education and literacy and how institutional and cultural power is reinforced in the pedagogies and values of the writing classroom and writing profession.

Laying the Foundation John W. White, Heather Gilbert, 2016-03-15 Laying the Foundation: Digital

Humanities in Academic Libraries examines the library's role in the development, implementation, and instruction of successful digital humanities projects. It pays special attention to the critical role of librarians in building sustainable programs. It also examines how libraries can support the use of digital scholarship tools and techniques in undergraduate education. Academic libraries are nexuses of research and technology; as such, they provide fertile ground for cultivating and curating digital scholarship. However, adding digital humanities to library service models requires a clear understanding of the resources and skills required. Integrating digital scholarship into existing models calls for a reimagining of the roles of libraries and librarians. In many cases, these reimagined roles call for expanded responsibilities, often in the areas of collaborative instruction and digital asset management, and in turn these expanded responsibilities can strain already stretched resources. *Laying the Foundation* provides practical solutions to the challenges of successfully incorporating digital humanities programs into existing library services. Collectively, its authors argue that librarians are critical resources for teaching digital humanities to undergraduate students and that libraries are essential for publishing, preserving, and making accessible digital scholarship.
