Access to Justice for Vulnerable and Energy-Poor Consumers Naomi Creutzfeldt,Chris Gill,Marine Cornelis,Rachel McPherson,2021-07-01 How do ordinary people access justice? This book offers a novel socio-legal approach to access to justice, alternative dispute resolution, vulnerability and energy poverty. It poses an access to justice challenge and rethinks it through a lens that accommodates all affected people, especially those who are currently falling through the system. It raises broader questions about alternative dispute resolution, the need for reform to include more collective approaches, a stronger recognition of the needs of vulnerable people, and a stronger emphasis on delivering social justice. The authors use energy poverty as a site of vulnerability and examine the barriers to justice facing this excluded group. The book assembles the findings of an interdisciplinary research project studying access to justice and its barriers in the UK, Italy, France, Bulgaria and Spain (Catalonia). In-depth interviews with regulators, ombuds, energy companies, third-sector organisations and vulnerable people provide a rich dataset through which to understand the phenomenon. The book provides theoretical and empirical insights which shed new light on these issues and sets out new directions of inquiry for research, policy and practice. It will be of interest to researchers, students and policymakers working on access to justice, consumer vulnerability, energy poverty, and the complex intersection between these fields. The book includes contributions by Cosmo Graham (UK), Sarah Supino and Benedetta Voltaggio (Italy), Marine Cornelis (France), Anaïs Varo and Enric Bartlett (Catalonia) and Teodora Peneva (Bulgaria).

Statics and Mechanics of Structures Steen Krenk, Jan Høgsberg, 2013-03-02 The statics and mechanics of structures form a core aspect of civil engineering. This book provides an introduction to the subject, starting from classic hand-calculation types of analysis and gradually advancing to a systematic form suitable for computer implementation. It starts with statically determinate structures in the form of trusses, beams and frames. Instability is discussed in the form of the column problem - both the ideal column and the imperfect column used in actual column design. The theory of statically indeterminate structures is then introduced, and the force and deformation methods are explained and illustrated. An important aspect of the book's approach is the systematic development of the theory in a form suitable for computer implementation using finite elements. This development is supported by two small computer programs, MiniTruss and MiniFrame, which permit static analysis of trusses and frames, as well as linearized stability analysis. The book's final section presents related strength of materials subjects in greater detail; these include stress and strain, failure criteria, and normal and shear stresses in general beam flexure and in beam torsion. The book is well-suited as a textbook for a two-semester introductory course on structures.

The Sober Truth Lance Dodes, Zachary Dodes, 2015-03-17 A powerful exposé of Alcoholics Anonymous, 12-step programs, and the rehab industry—and how a failed addiction treatment model came to dominate America. “A humane, science-based, global view of addiction . . . an essential, bracing critique of the rehab industry and its ideological foundations that we have much to learn from.” —Gabor Maté M.D., author of *In The Realm of Hungry Ghosts* Alcoholics Anonymous has become so infused in our society that it is practically synonymous with addiction recovery. Yet the evidence shows that AA has only a 5–10 percent success rate—hardly better than no treatment at all. Despite this, doctors, employers, and judges regularly refer addicted people to treatment programs and rehab facilities based on the 12-step model. In *The Sober Truth*, acclaimed addiction specialist Dr. Lance Dodes exposes the deeply flawed science that the 12-step industry has used to support its programs. Dr. Dodes analyzes dozens of studies to reveal a startling pattern of errors, misjudgments, and biases. He also pores over the research to highlight the best peer-reviewed studies available and discovers that they reach a grim consensus on the program's overall success. But *The Sober Truth* is more than a book about addiction. It is also a book about science and how and why AA and rehab became so popular, despite the discouraging data. Drawing from thirty-five years of clinical practice and firsthand accounts submitted by addicts, Dr. Dodes explores the entire story of AA's rise—from its origins in early fundamentalist religious and mystical beliefs to its present-day place of privilege in politics and media. A powerful response to the monopoly of the 12-step program and the myth that they are a universal solution to addiction, *The Sober Truth* offers new and actionable information for

addicts, their families, and medical providers, and lays out better ways to understand addiction for those seeking a more effective and compassionate approach to this treatable problem.

White Collar Crime Katalin Ligeti, Stanislaw Tosza, 2018-11-29 White collar crime has expanded significantly over the course of the past two decades. Yet, not only as the amount of national and international legislation in the field grown, but it has also endured changes driving it away from the classic criminal law. These trends have been reflected in changes to national legislation, not infrequently prompted by supranational law, for example, in the financial or the environmental sector. New punishing regimes have emerged, such as UN blacklisting, smart sanctions, civil asset forfeiture, financial supervisory powers, compliance law, and anti-money laundering laws. Furthermore, the role of administrative sanctioning law has been growing as well as the role of private actors in the enforcement of punitive sanctions. The aim of this volume is to examine how various national criminal justice systems across Europe deal with the aforementioned challenges. In the first part, it takes a closer look at the following national systems: France, Germany, Poland and Sweden. Furthermore, it compares the European approach with the American one as a source of inspiration for unresolved difficulties and future developments. Further still, the authors explore those challenging issues regarding the field of economic and financial crime, including the Senior Managers Regime, corporate criminal liability, and whistle-blowers' protection. Timely and pertinent, this is an important new work in a fast-moving field.

Acoustics of Ducts and Mufflers M. L. Munjal, 2014-02-04 Fully updated second edition of the premier reference book on muffler and lined duct acoustical

performance Engine exhaust noise pollutes the street environment and ventilation fan noise enters dwellings along with fresh air. People have become conscious of their working environment. Governments of most countries have responded to popular demand with mandatory restrictions on sound emitted by automotive engines, and a thorough knowledge of acoustics of ducts and mufflers is needed for the design of efficient muffler configurations. This fully updated Second Edition of *Acoustics of Ducts and Mufflers* deals with propagation, reflection and dissipation/absorption of sound along ducts/pipes/tubes, area discontinuities, perforated elements and absorptive linings that constitute the present-day mufflers and silencers designed to control noise of exhaust and intake systems of automotive engines, diesel-generator sets, compressors and HVAC systems. It includes equations, figures, tables, references, and solved examples and unsolved exercises with answers, so it can be used as a text book as well as a reference book. It also offers a complete presentation and analysis of the major topics in sound suppression and noise control for the analysis and design of acoustical mufflers, air conditioning and ventilation duct work. Both the fundamentals and the latest technology are discussed, with an emphasis on applications. Deals with reactive mufflers, dissipative silencers, the frequency-domain approach, and the time-domain approach. Fully updated second edition of the premier reference book on muffler and lined duct acoustical performance, in one complete volume. Presents original new research on topics including baffle silencers and louvers, 3D analytical techniques, and flow-acoustic analysis of multiply-connected perforated-element mufflers. Includes a general design procedure to help muffler designers in the automotive industry, exhaust noise being a major component of automobile and traffic noise pollution. Written by an expert with four decades' experience in teaching to graduate students, publishing extensively in reputed international journals, and consulting with industry for noise control as well as designing for quietness.

Money Felix Martin, 2013-06-06 What is money, and how does it work? The conventional answer is that people once used sugar in the West Indies, tobacco in Virginia, and dried cod in Newfoundland, and that today's financial universe evolved from barter. Unfortunately, there is a problem with this story. It's wrong. And not just wrong, but dangerous. *Money: the Unauthorised Biography* unfolds a panoramic secret history and explains the truth about money: what it is, where it comes from, and how it works. Drawing on stories from throughout human history and around the globe, *Money* will radically rearrange your understanding of the world and shows how money can once again become the most powerful force for freedom we have ever known.

Comparative Counter-Terrorism Law Kent Roach, 2015-07-23 Terrorism law is as international as it is regionally distinct and as difficult to define as it is essential to address. Given recent pressures to harmonize terrorism laws from international organizations like the United Nations Security Council, the Financial Action Task Force, and the Council of Europe, this book presents readers with an up-to-date assessment of terrorism law across the globe. Covering twenty-two jurisdictions across six continents, the common framework used for each chapter facilitates national comparisons of a range of laws including relevant criminal, administrative, financial, secrecy, and military laws. Recognizing that similar laws may yield different outcomes when transplanted into new contexts, priority of place is given to examples of real-world application. Including a thematic introduction and conclusion, this book will help to establish comparative counter-terrorism law as an emerging discipline crossing the boundaries of domestic and international law.

Organising Care in a Time of Covid-19 Justin Waring, Jean-Louis Denis, Anne Reff Pedersen, Tim Tenbenschel, 2021-11-08 The COVID-19 pandemic has led to radical transformations in the organisation and delivery of health and care services across the world. In many countries, policy makers have rushed to re-organise care services to meet the surge demand of COVID-19, from re-purposing existing services to creating new 'field' hospitals. Such strategies signal important and sweeping changes in the organisation of both 'COVID' and 'non-COVID' care, whilst asking more fundamental questions about the long-term organisation of care 'after COVID'. In some contexts, the pandemic has exposed the fragilities and vulnerabilities of care systems, whilst in others, it has shown how services are organised to be more resilient and adaptive to unanticipated pressures. The COVID-19 pandemic presents a rare opportunity to examine empirically and to develop new theoretical frameworks on how and why health systems adapt to such unusual and intense pressures. International contributors consider how responses to COVID-19 are transforming the organisation and governance of health and care services and explore questions around strategic leadership at local, regional, national and transnational level. The book offers unique insight and analysis on the dynamics of policy-making, the organisation and governance of care organisations, the role of technologies in governing, the changing role of professionals and the possibilities for more resilient care systems.

Prosecuting and Punishing Multi-Offenders in the EU Nele Audenaert, Wendy De Bondt, 2021-07-01 This book elaborates on the rules governing the prosecution and sentencing of multi-offenders. The term 'multi-offender' is used for an offender that has committed a series of offences (either in one single act or in different acts); hence the addition of 'multi' in 'multi-offender'. A crucial element thereto is that the whole series of offences – which make the offender a multi-offender – has been committed before being subject to a final conviction. A comparative EU-study was conducted, focussing on the rules governing multi-offenders within different EU Member States. It reveals that this type of offenders challenge both the legislator and the prosecution and judges: when the offences are prosecuted in one go, the challenges are linked to finding an appropriate way to assess the severity of the criminal behaviour; if however the offences are prosecuted in several simultaneous or consecutive proceedings, the challenges are linked to taking account of the simultaneous or past proceeding. These challenges only grow if proceedings take place in different EU Member States. The analysis presented in this book is essential reading for EU policy makers, national policy makers, academics and defence lawyers throughout the EU working with multi-offenders. Undoubtedly, it will be an asset to their work in both mere national as well as in cross-border cases.

Systems for the Phonetic Transcription of English Rafael Monroy Casas,2011 This book covers in a systematic way the main systems of phonetic transcription currently used for English. Unlike other texts in the market, which focus on just one type of transcriptional model, the book provides theoretical information and full practice for all systems.
 The material is divided into seven sections headed by a lengthy introduction to the history and development of the International Phonetic Alphabet. A set of eighteen samples from real contemporary colloquial English (British English), graded in terms of difficulty, follows. The accent chosen is the one known as RP or BBC English, with some minor concession to other regional varieties which do not stray dramatically from RP. Different models of representation are used under three main transcription systems: qualitative, quantitative and mixed. By using an identical set of texts in ordinary spelling for each system, the reader can constantly check different ways of transcribing a word or an utterance depending on the model used.

The African Criminal Court Gerhard Werle,Moritz Vormbaum,2016-11-29 This book offers the first comprehensive and in-depth analysis of the provisions of the ‘Malabo Protocol’—the amendment protocol to the Statute of the African Court of Justice and Human and Peoples’ Rights—adopted by the African Union at its 2014 Summit in Malabo, Equatorial Guinea. The Annex to the protocol, once it has received the required number of ratifications, will create a new Section in the African Court of Justice and Human and Peoples’ Rights with jurisdiction over international and transnational crimes, hence an ‘African Criminal Court’. In this book, leading experts in the field of international criminal law analyze the main provisions of the Annex to the Malabo Protocol. The book provides an essential and topical source of information for scholars, practitioners and students in the field of international criminal law, and for all readers with an interest in political science and African studies. Gerhard Werle is Professor of German and International Criminal Law, Criminal Procedure and Modern Legal History at Humboldt-Universität zu Berlin and Director of the South African-German Centre for Transnational Criminal Justice. In addition, he is an Extraordinary Professor at the University of the Western Cape and Honorary Professor at North-West University of Political Science and Law (Xi’an, China). Moritz Vormbaum received his doctoral degree in criminal law from the University of Münster (Germany) and his postdoctoral degree from Humboldt-Universität zu Berlin. He is a Senior Researcher at Humboldt-Universität, as well as a coordinator and lecturer at the South African-German Centre for Transnational Criminal Justice.
