Its easy-to-follow format enables you to find the topic and specific recipe you need right away and match it to your network and security issue. Topics include: Configuring and managing ScreenOS firewalls NTP (Network Time Protocol) Interfaces, Zones, and Virtual Routers Mitigating Denial of Service Attacks DDNS, DNS, and DHCP IP Routing Policy-Based Routing Elements of Policies Authentication Application Layer Gateway (SIP, H323, RPC, RTSP, etc.,) Content Security Managing Firewall Policies IPSEC VPN RIP, OSPF, BGP, and NSRP Multicast -- IGMP, PIM, Static Routes Wireless Along with the usage and troubleshooting recipes, you will also find plenty of tricks, special considerations, ramifications, and general discussions of interesting tangents and network extrapolation. Engineering Geology for Society and Territory - Volume 5 Giorgio Lollino, Andrea Manconi, Fausto Guzzetti, Martin Culshaw, Peter Bobrowsky, Fabio Luino, 2014-08-25 This book is one out of 8 IAEG XII Congress volumes, and deals with the theme of urban geology. Along with a rapidly growing world population, the wave of urban growth continues, causing cities to swell and new metropolitan centers to emerge. These global trends also open new ventures for underground city development. Engineering geology plays a major role in facing the increasing issues of the urban environment, such as: finding aggregates for construction works; providing adequate water supply and waste management; solving building problems associated to geological and geomorphological conditions; evaluating host rock conditions for underground constructions; preventing or mitigating geological and seismic hazards. Furthermore, this book illustrates recent advancements in sustainable land use planning, which includes conservation, protection, reclamation and landscape impact of open pit mining and alternative power generation. The Engineering Geology for Society and Territory volumes of the IAEG XII Congress held in Torino from September 15-19, 2014, analyze the dynamic role of engineering geology in our changing world and build on the four main themes of the congress: environment, processes, issues and approaches. The congress topics and subject areas of the 8 IAEG XII Congress volumes are: 1. Climate Change and Engineering Geology 2. Landslide Processes River Basins 3. Reservoir Sedimentation and Water Resources 4. Marine and Coastal Processes Urban Geology 5. Sustainable Planning and Landscape Exploitation 6. Applied Geology for Major Engineering Projects 7. Education, Professional Ethics and Public Recognition of Engineering Geology 8. Preservation of Cultural Heritage

Sprayed Concrete Lined Tunnels Alun Thomas, 2008-10-08 Practising engineers on site, in the design office or in client organizations will find this book an excellent introduction to the design and construction of sprayed concrete lined (SCL) tunnels. The complex behaviour of the early age behaviour of the sprayed concrete requires careful management. This book covers all aspects of SCL tunnelling - from the constituents of sprayed concrete to detailed design and management during construction. Although there is a close interdependence between all the facets of sprayed concrete, few engineers have the right breadth of experience and expertise, and this urgently needs to be transferred to the wider engineering community. Disseminating essential information for tunnelling engineers, *Sprayed Concrete Lined Tunnels* is key reading for all involved in or studying the process.

THE CONSEQUENCES OF DISASTERS Helen James, Douglas Paton, 2015-12-22 *The Consequences of Disasters: Demographic, Planning and Policy Implications* presents innovative multi-disciplinary perspectives on how people and societies respond to, and recover from sudden, unexpected crisis events like natural disasters which impact tragically on the established patterns and structures of their lives. Through detailed empirical analysis which employs both qualitative and quantitative research methodologies, the twenty-two chapters in this fine volume explore these critical issues. Chapters have a wide global range across both democratic and transforming governance systems which spotlight the many different ways in which different political jurisdictions respond to the demographic, planning and policy implications of the natural disasters affecting their citizens. The authors collectively provide insights into varying socio-cultural and political disaster frameworks from China, Japan, the USA, New Zealand,

Myanmar, Indonesia, Taiwan, Iran, The Philippines and Pakistan. Taking the conceptual and analytical lens of social capital, family formation and migration patterns, the authors employ comparative demographic, anthropological and sociological approaches to present the human security contexts of natural disasters when they unexpectedly wreak havoc on human societies, and the coping and response behaviors they adopt, develop and use as survivors as they set about re-building their lives over periods that can extend over several years. This book provides many innovative insights which will be of value to disaster policy experts, practitioners in the humanitarian field, civil society and government sectors and researchers engaged in disaster recovery and reconstruction practice and research.

USMC David Stuart Alexander, 2007-01-30 U.S. Marine Colonel David Saxon has finished five months of bureaucratic hell at the Pentagon. The confines of his office had turned Saxon into a pent-up, caged beast, until he got what he wanted—a mission back to the danger zone... Marine Colonel David Saxon's "Big Mean One" Special Ops team is being airlifted to extract hostages seized onboard an ocean liner by the infamous terrorist, Carlos Evangelista. It's a daring mid-sea rescue, one certain to cause heavy casualties. But the "Evangelist" has more in mind than slaughtering innocent civilians. A neo-Soviet plot plans to kill Libya's Kaddafi—so that a new Libyan strongman will welcome placement of Soviet missiles for a nuclear strike against the U.S. Sixth Fleet, on maneuvers in the Gulf of Sidra. To the neo-Soviet leadership and the "Evangelist," it's just the first round in a world-dominating game of nuclear brinkmanship. But to Saxon's team, it's the last round of a game with only one acceptable outcome—the obliteration of America's enemies...
