Transforming Trauma Philip Tedeschi, Molly Anne Jenkins, 2019-07-15 Have you ever looked deep into the eyes of an animal and felt entirely known? Often, the connections we share with non-human animals represent our safest and most reliable relationships, offering unique and profound opportunities for healing in periods of hardship. This book focuses on research developments, models, and practical applications of human-animal connection and animal-assisted intervention for diverse populations who have experienced trauma. Physiological and psychological trauma are explored across three broad and interconnected domains: 1) child maltreatment and family violence; 2) acute and post-traumatic stress, including military service, war, and developmental trauma; and 3) times of crisis, such as the ever-increasing occurrence of natural disasters, community violence, terrorism, and anticipated or actual grief and loss. Contributing authors, who include international experts in the fields of trauma and human-animal connection, examine how our relationships with animals can help build resiliency and foster healing to transform trauma. A myriad of animal species and roles, including companion, therapy, and service animals are discussed. Authors also consider how animals are included in a variety of formal and informal models of trauma recovery across the human lifespan, with special attention paid to canine- and equine-assisted interventions and psychotherapy. In addition, authors emphasize the potential impacts to animals who provide trauma-informed services, and discuss how we can respect their participation and implement best practices and ethical standards to ensure their well-being. The reader is offered a comprehensive understanding of the history of research in this field, as well as the latest advancements and areas in need of further or refined investigation. Likewise, authors explore, in depth, emerging practices and methodologies for helping people and communities thrive in the face of traumatic events and their long-term impacts. As animals are important in cultures all over the world, cross-cultural and often overlooked animal-assisted and animal welfare applications are also highlighted throughout the text.

Calculus Gilbert Strang, 2017-09-14 Gilbert Strang's clear, direct style and detailed, intensive explanations make this textbook ideal as both a course companion and for self-study. Single variable and multivariable calculus are covered in depth. Key examples of the application of calculus to areas such as physics, engineering and economics are included in order to enhance students' understanding. New to the third edition is a chapter on the 'Highlights of calculus', which accompanies the popular video lectures by the author on MIT's OpenCourseWare. These can be accessed from math.mit.edu/~gs.

A Historical Review and Analysis of Army Physical Readiness Training and Assessment Whitfield East, 2013-12 The Drillmaster of Valley Forge-Baron Von Steuben-correctly noted in his Blue Book how physical conditioning and health (which he found woefully missing when he joined Washington's camp) would always be directly linked to individual and unit discipline, courage in the fight, and victory on the battlefield. That remains true today. Even an amateur historian, choosing any study on the performance of units in combat, quickly discovers how the levels of conditioning and physical performance of Soldiers is directly proportional to success or failure in the field. In this monograph, Dr. Whitfield Chip East provides a pragmatic history of physical readiness training in our Army. He tells us we initially mirrored the professional Armies of Europe as they prepared their forces for war on the continent. Then he introduces us to some master trainers, and shows us how they initiated an American brand of physical conditioning when our forces were found lacking in the early wars of the last century. Finally, he shows us how we have and must incorporate science (even when there exists considerable debate!) to contribute to what we do-and how we do it-in shaping today's Army. Dr. East provides the history, the analysis, and the pragmatism, and all of it is geared to understanding how our Army has and must train Soldiers for the physical demands of combat. Our culture is becoming increasingly "unfit, due to poor nutrition, a lack of adequate and formal exercise, and too much technology. Still, the Soldiers who come to our Army from our society will be asked to fight in increasingly complex and demanding conflicts, and they must be prepared through new, unique, and scientifically based techniques. So while Dr. East's monograph is a fascinating history, it is also a required call for all leaders to better understand the science and the art of physical preparation for the battlefield. It was and is important for us to get this area of training right, because getting it right means a better chance for success in combat.

The Combined Action Platoons Michael Peterson, 1989-06-26 This is the first comprehensive history for the academic reader of the Combined Action Program (CAP) in Vietnam. Created as a response by the U.S. Marines to what was known as the other war in Vietnam, the CAP Program was comprised of platoons each combining a fourteen man marine rifle squad, a navy corpsman, and a platoon of South Vietnamese militia. These CAP units were unique to the war. Their function was to capture and hold rather than to search and destroy. While the main forces of the Army and Marines all too often waged war on the Vietnamese hamlets, the CAP marines waged war from the hamlets. Their intent was to keep the hamlet intact. The uniqueness of the CAP Program justifies this study not only from an historical and political perspective but also sociologically. The CAP Marines were among the few Americans who lived with the Vietnamese in their own setting for long periods of time, developing community projects and civic action programs. The 1980s has brought about a resurgence of valuable research, the declassification of official documentation, and most important, an emotional distance from the trauma of defeat. The author takes full advantage of these conditions to present a thorough and

comprehensive history and civic program analysis. Many critics of the Vietnam War now agree that the tactics of the Combined Action Program were among the most promising of the war. The CAP Marines fought a deadly and personal war with the Viet Cong and the North Vietnamese Army. In this volume, the author achieves his twofold objective. He not only provides a valuable historical account of the Program, but also analyzes the civic action and community development projects undertaken by the CAP Marines. His study is done with an eye to the future as U.S. counterinsurgency has again found expression in other Third World conflicts.

Public Administration David Rosenbloom, 2008 The seventh edition of *Public Administration: Understanding Management, Politics, and Law in the Public Sector* grounds students in the fundamentals of public administration while embracing its complexity through multiple sets of values that affect administrative management of the American state. This cutting-edge new edition explains and analyzes public administration from the point of view of three well-established perspectives: management, politics, and law.

Ethics and Drug Resistance: Collective Responsibility for Global Public Health Euzebiusz Jamrozik, Michael Selgelid, 2020-10-26 This Open Access volume provides in-depth analysis of the wide range of ethical issues associated with drug-resistant infectious diseases. Antimicrobial resistance (AMR) is widely recognized to be one of the greatest threats to global public health in coming decades; and it has thus become a major topic of discussion among leading bioethicists and scholars from related disciplines including economics, epidemiology, law, and political theory. Topics covered in this volume include responsible use of antimicrobials; control of multi-resistant hospital-acquired infections; privacy and data collection; antibiotic use in childhood and at the end of life; agricultural and veterinary sources of resistance; resistant HIV, tuberculosis, and malaria; mandatory treatment; and trade-offs between current and future generations. As the first book focused on ethical issues associated with drug resistance, it makes a timely contribution to debates regarding practice and policy that are of crucial importance to global public health in the 21st century.

Romantic legends of Spain Gustavo Adolfo Bécquer, 2022-06-02 *Romantic legends of Spain* by Gustavo Adolfo Bécquer is a compilation of 21 historical romance stories. Gustavo was a Spanish Romanticist poet and writer (mostly short stories) of the 19th century, also a playwright, literary columnist, and talented in drawing. Today he is considered one of the most important figures in Spanish literature and is considered by some as the most read writer after Miguel de Cervantes. His work approached the traditional poetry and themes in a modern way, and he is considered the founder of modern Spanish lyricism. Some of the notable recitals include: Master Pérez the organist -- The emerald eyes -- The golden bracelet -- The ray of moonshine -- The devil's cross -- Three dates -- The Christ of the skull -- The white doe, etc.

Globalization and International Law D. Bederman,2008-06-23 This volume develops a set of provocative themes: globalization is not new; it is neither legally inevitable nor irreversible; and international legal systems and institutions can assert only a special and limited influence on globalizing developments.

10,000 Famous Freemasons William Denslow,2007-06 This is volume one of four. This very rare and long out of print biographical work is a must for any Mason with a desire for Masonic research. This is NOT a photocopy of the original work, but a completely new, re-type set edition. While a few editorial changes have been made the work is for the most part as it was when first published. The largest change is the addenda that was at the end of the 4th edition. The addenda was a collection of corrections and additions to the work. We have incorporated the corrections and additions into the work itself removing the need for the addenda. DON'T FORGET: This is a FOUR book set with each book sold separately. The ISBNs are: 1887560319, 1887560793, 1887560424 & 1887560068.

Bringing Society Back In Edward P. Weber,2003-02-14 In the last two decades, people in a growing number of localities in the United States have developed grassroots ecosystem management (GREM) as a means to resolve policy problems affecting their environment, economy, and communities. Ad hoc and voluntary groups of environmentalists, developers, businesspeople, federal and state resource managers, farmers, loggers, local citizens, and those representing recreation interests use deliberation and consensus to enhance public policy performance. Instead of focusing on specific issues such as air pollution, GREM emphasizes the integrated management of entire watersheds and ecosystems. But what happens to democratic accountability in these collaborative efforts? Despite concerns that they might result in special interest government, the acceleration of environmental degradation, and an end-run around national environmental protection laws, this book suggests otherwise. *Bringing Society Back In* establishes a theoretical framework for exploring issues of policy performance and democratic accountability raised by GREM. Through three case studies—the Applegate Partnership in Oregon, the Henry's Fork Watershed Council in Idaho, and the Willapa Alliance in Washington state—it explores the mechanisms used to determine how accountability works. The book finds that by combining traditional and formal governance structures with informal institutions, GREM can be accountable to individuals, communities, surrounding regions, and the nation. The book also identifies conditions under which GREM is most likely to achieve democratic accountability. In addition, it investigates the connection between accountability and policy performance. The evidence suggests that GREM can produce environmental policy outcomes that are supportive not only of the environment and economy, but also of environmental sustainability.

From Cyrus to Alexander Pierre Briant,2002-06-23 Around 550 B.C.E. the Persian people—who were previously practically unknown in the annals of history—emerged from their base in southern Iran (Fars) and engaged in a monumental adventure that, under the leadership of Cyrus the Great and his successors, culminated in the creation of an immense Empire that stretched from central Asia to Upper Egypt, from the Indus to the Danube. The Persian (or Achaemenid, named for its reigning dynasty) Empire assimilated an astonishing diversity of lands, peoples, languages, and cultures. This conquest of Near Eastern lands completely altered the history of the world: for the first time, a monolithic State as vast as the future Roman Empire arose, expanded, and matured in the course of more than two centuries (530–330) and endured until the death of Alexander the Great (323), who from a geopolitical perspective was “the last of the Achaemenids.” Even today, the remains of the Empire—the terraces, palaces, reliefs, paintings, and enameled bricks of Pasargadae, Persepolis, and Susa; the impressive royal tombs of Naqsh-e Rostam; the monumental statue of Darius the Great—serve to remind visitors of the power and unprecedented luxury of the Great Kings and their loyal courtiers (the “Faithful Ones”). Though long eclipsed and overshadowed by the towering prestige of the “ancient Orient” and “eternal Greece,” Achaemenid history has emerged into fresh light during the last two decades. Freed from the tattered rags of “Oriental decadence” and “Asiatic stagnation,” research has also benefited from a continually growing number of discoveries that have provided important new evidence—including texts, as well as archaeological, numismatic, and iconographic artifacts. The evidence that this book assembles is voluminous and diverse: the citations of ancient documents and of the archaeological evidence permit the reader to follow the author in his role as a historian who, across space and time, attempts to understand how such an Empire emerged, developed, and faded. Though firmly grounded in the evidence, the author’s discussions do not avoid persistent questions and regularly engages divergent interpretations and alternative hypotheses. This book is without precedent or equivalent, and also offers an exhaustive bibliography and thorough indexes. The French publication of this magisterial work in 1996 was acclaimed in newspapers and literary journals. Now *Histoire de l’Empire Perse: De Cyrus à Alexandre* is translated in its entirety in a revised edition, with the author himself reviewing the translation, correcting the original edition, and adding new documentation. Pierre Briant, Chaire Histoire et civilisation du monde achéménide et de l’empire d’Alexandre, Collège de France, is a specialist in the history of the Near East during the era of the Persian Empire and the conquests of Alexander. He is the author of numerous books. Peter T. Daniels, the translator, is an independent scholar, editor, and translator who studied at Cornell University and the University of Chicago. He lives and works in New York City.
