📖 **The Empty Chair** Vikram Kolmannskog,2018-04-19 Through eight compelling stories we get to know the Gestalt therapist Vikram Kolmannskog and some of his clients. These include the businessman Carl who is suffering from chronic burnout, the overwhelmed Marianne who believes she may have been the victim of sexual assault, the trans woman Annette who breaks with dominant gender norms, the prisoner Jonny who is now encircled by his own self-made wall of isolation, and the beautiful Ask, who falls in love and others fall in love with - including the therapist Vikram. Through these tales of psychotherapy we see how both suffering and healing can occur. With increased awareness and through dialogue we can experience more of ourselves, the other and our world. We become more whole - and that is a good definition of health.

📖 **Environmentalism and Economic Justice** Laura Pulido,1996-02 Ecological causes are championed not only by lobbyists or hikers. While mainstream environmentalism is usually characterized by well-financed, highly structured organizations operating on a national scale, campaigns for environmental justice are often fought by poor or minority communities. Environmentalism and Economic Justice is one of the first books devoted to Chicano environmental issues and is a study of U.S. environmentalism in transition as seen through the contributions of people of color. It elucidates the various forces driving and shaping two important examples of environmental organizing: the 1965-71 pesticide campaign of the United Farm Workers and a grazing conflict between a Hispano cooperative and mainstream environmentalists in northern New Mexico. The UFW example is one of workers highly marginalized by racism, whose struggle--as much for identity as for a union contract--resulted in boycotts of produce at the national level. The case of the grazing cooperative Ganados del Valle, which sought access to land set aside for elk hunting, represents a subaltern group fighting the elitism of natural resource policy in an effort to pursue a pastoral lifestyle. In both instances Pulido details the ways in which racism and economic subordination create subaltern communities, and shows how these groups use available resources to mobilize and improve their social, economic, and environmental conditions. Environmentalism and Economic Justice reveals that the environmental struggles of Chicano communities do not fit the mold of mainstream environmentalism, as they combine economic, identity, and quality-of-life issues. Examination of the forces that create and shape these grassroots movements clearly demonstrates that environmentalism needs to be sensitive to local issues, economically empowering, and respectful of ethnic and cultural diversity.

📖 **Sowing the Seeds of Victory** Rose Hayden-Smith,2014-04-24 Sometimes, to move forward, we must look back. Gardening activity during American involvement in World War I (1917-1919) is vital to understanding current work in agriculture and food systems. The origins of the American Victory Gardens of World War II lie in the Liberty Garden program during World War I. This book examines the National War Garden Commission, the United States School Garden Army, and the Woman's Land Army (which some women used to press for suffrage). The urgency of wartime mobilization enabled proponents to promote food production as a vital national security issue. The connection between the nation's food readiness and national security resonated within the U.S., struggling to unite urban and rural interests, grappling with the challenges presented by millions of immigrants, and considering the country's global role. The same message--that food production is vital to national security--can resonate today. These World War I programs resulted in a national gardening ethos that transformed the American food system.
