The Changing Frontier Adam B. Jaffe,Benjamin F. Jones,2015-08-14 In 1945, Vannevar Bush, founder of Raytheon and one-time engineering dean at MIT, delivered a report to the president of the United States that argued for the importance of public support for science, and the importance of science for the future of the nation. The report, *Science: The Endless Frontier*, set America on a path toward strong and well-funded institutions of science, creating an intellectual architecture that still defines scientific endeavor today. In *The Changing Frontier*, Adam B. Jaffe and Benjamin Jones bring together a group of prominent scholars to consider the changes in science and innovation in the ensuing decades. The contributors take on such topics as changes in the organization of scientific research, the geography of innovation, modes of entrepreneurship, and the structure of research institutions and linkages between science and innovation. An important analysis of where science stands today, *The Changing Frontier* will be invaluable to practitioners and policy makers alike.

The End of the Cognitive Empire Boaventura de Sousa Santos,2018-07-16 In *The End of the Cognitive Empire* Boaventura de Sousa Santos further develops his concept of the epistemologies of the South, in which he outlines a theoretical, methodological, and pedagogical framework for challenging the dominance of Eurocentric thought. As a collection of knowledges born of and anchored in the experiences of marginalized peoples who actively resist capitalism, colonialism, and patriarchy, epistemologies of the South represent those forms of knowledge that are generally discredited, erased, and ignored by dominant cultures of the global North. Noting the declining efficacy of established social and political solutions to combat inequality and discrimination, Santos suggests that global justice can only come about through an epistemological shift that guarantees cognitive justice. Such a shift would create new, alternative strategies for political mobilization and activism and give oppressed social groups the means through which to represent the world as their own and in their own terms.
