Poetry's Afterlife Kevin Stein, 2010-07 The great pleasure of this book is the writing itself. Not only is it free of academic and 'lit-crit' jargon, it is lively prose, often deliciously witty or humorous, and utterly contemporary. Poetry's Afterlife has terrific classroom potential, from elementary school teachers seeking to inspire creativity in their students, to graduate students in MFA programs, to working poets who struggle with the aesthetic dilemmas Stein elucidates, and to teachers of poetry

on any level. --- Beckian Fritz Goldberg, Arizona State University Kevin Stein is the most astute poet-critic of his generation, and this is a crucial book, confronting the most vexing issues which poetry faces in a new century. ---David Wojahn, Virginia Commonwealth University At a time when most commentators fixate on American poetry's supposed death, Kevin Stein's *Poetry's Afterlife* instead proposes the vitality of its aesthetic hereafter. The essays of *Poetry's Afterlife* blend memoir, scholarship, and personal essay to survey the current poetry scene, trace how we arrived here, and suggest where poetry is headed in our increasingly digital culture. The result is a book both fetchingly insightful and accessible. Poetry's spirited afterlife has come despite, or perhaps because of, two decades of commentary diagnosing American poetry as moribund if not already deceased. With his 2003 appointment as Illinois Poet Laureate and his forays into public libraries and schools, Stein has discovered that poetry has not given up its literary ghost. For a fated art supposedly pushing up aesthetic daisies, poetry these days is up and about in the streets, schools, and universities, and online in new and compelling digital forms. It flourishes among the people in a lively if curious underground existence largely overlooked by national media. It's this second life, or better, *Poetry's Afterlife*, that his book examines and celebrates. Kevin Stein is Caterpillar Professor of English and Director of the Creative Writing Program at Bradley University and has served as Illinois Poet Laureate since 2003, having assumed the position formerly held by Gwendolyn Brooks and Carl Sandburg. He is the author of numerous books of poetry and criticism. digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication. Making of the Tunisian Revolution Nouri Gana, 2013-09-07 From late 2010 to the present day, the Arab world has been shot through with insurrection and revolt. As a result, Tunisia is now seen as the unlikely birth place and exemplar of the process of democratisation long overdue in the Arab world. Mixing political, historical, economic, social and cultural analyses and approaches, these essays reflect on the local, regional and transnational dynamics together with the long and short term factors that, when combined, set in motion the Tunisian revolution and the Arab uprisings. Above all, the book maps the intertwined genealogies of cultural dissent that have contributed to the mobilisation of

protesters and to the sustenance of protests between 17 December 2010 and 14 January 2011, and beyond.

Fighting for American Manhood Kristin L. Hoganson, 1998-01-01 This groundbreaking book blends international relations and gender history to provide a new understanding of the Spanish-American and Philippine-American wars. Kristin L. Hoganson shows how gendered ideas about citizenship and political leadership influenced jingoist political leaders' desire to wage these conflicts, and she traces how they manipulated ideas about gender to embroil the nation in war. She argues that racial beliefs were only part of the cultural framework that undergirded U.S. martial policies at the turn of the century. Gender beliefs, also affected the rise and fall of the nation's imperialist impulse. Drawing on an extensive range of sources, including congressional debates, campaign speeches, political tracts, newspapers, magazines, political cartoons, and the papers of politicians,

soldiers, suffragists, and other political activists, Hoganson discusses how concerns about manhood affected debates over war and empire. She demonstrates that jingoist political leaders, distressed by the passing of the Civil War generation and by women`s incursions into electoral politics, embraced war as an opportunity to promote a political vision in which soldiers were venerated as model citizens and women remained on the fringes of political life. These gender concerns not only played an important role in the Spanish-American and Philippine-American wars, they have echoes in later time periods, says the author, and recognizing their significance has powerful ramifications for the way we view international relations. The Forgotten Jews of Avoyelles Parish, Louisiana Carol Mills-Nichol, 2012-09-01 The author takes the reader on a journey through time from the earliest beginnings of the parish, through the Civil War, and two World Wars, and finally, to the last man standing who practices Judaism today in this mostly agrarian section of the state.

The Ambitions of Jane Franklin Alison Alexander, 2013-03-25 A genius at publicity before the term existed, Jane Franklin was a celebrity in the mid-19th century. This is her remarkable life, including her extensive travels, her years in Tasmania as the governor's wife, and her very public battle to save her husband, the Arctic explorer Sir John Franklin, from accusations of cannibalism. Winner of the 2014 National Biography Award In a period when most ladies sat at home with their embroidery, Jane Franklin achieved fame throughout the western world, and was probably the best travelled woman of her day. Alison Alexander traces the life of this inimitable woman, from her birth in late eighteenth-century London, her marriage at the ripe age of 36 years to Sir John Franklin, to her many trips to far-flung locations, including Russia, the Holy Land, northern Africa, America and Australia. Once Jane Franklin married, her original ambition - to live life to the full - was joined by an equally ardent desire to make her kind and mild husband a success. Arriving in Tasmania in 1837 when Sir John became governor, she swept like a whirlwind through the colony: attempting to rid the island of snakes; establishing a scientific society and the Hobart regatta; adopting an Aboriginal girl, and sending a kangaroo to Queen Victoria. She continued her intrepid travels, becoming the first white woman to travel overland from Melbourne to Sydney. When her husband disappeared in the Arctic on an expedition to discover the Northwest Passage, she badgered the Admiralty, the public and even the President of the United States to fund trips to locate him, and then defended his reputation when remains of the expedition were located and there were claims of cannibalism. Single-handedly, she turned him from a failure into one of England's noblest heroes. She continued travelling well into her 70s and died at age 84, refusing to take her medicine to the last.

Design with Climate Victor Olgyay, 2015-09-01 Architects today incorporate principles of sustainable design as a matter of necessity. But the challenge of unifying climate control and building functionality, of securing a managed environment within a natural setting—and combating the harsh forces of wind, water, and sun—presented a new set of obstacles to architects and engineers in the mid-twentieth century. First published in 1963, *Design with Climate* was one of the most pioneering books in the field and remains an important reference for practitioners, teachers, and students, over fifty years later. In this book, Victor Olgyay explores the impact of climate on shelter design, identifying four distinct climatic regions and explaining the effect of each on orientation, air movement, site, and materials. He derives principles from biology, engineering, meteorology, and physics, and demonstrates how an analytical approach to climate management can merge into a harmonious and aesthetically sound design concept. This updated edition contains four new essays that provide unique insights on issues of climate design, showing how Olgyay's concepts work in contemporary practice. Ken Yeang, John Reynolds, Victor W. Olgyay, and Donlyn Lyndon explore bioclimatic design, eco design, and rational regionalism, while paying homage to Olgyay's impressive groundwork and contributions to the field of architecture.

Protein Folding and Misfolding Heinz Fabian, Dieter Naumann, 2011-09-18 Infrared spectroscopy is

a new and innovative technology to study protein folding/misfolding events in the broad arsenal of techniques conventionally used in this field. The progress in understanding protein folding and misfolding is primarily due to the development of biophysical methods which permit to probe conformational changes with high kinetic and structural resolution. The most commonly used approaches rely on rapid mixing methods to initiate the folding event via a sudden change in solvent conditions. Traditionally, techniques such as fluorescence, circular dichroism or visible absorption are applied to probe the process. In contrast to these techniques, infrared spectroscopy came into play only very recently, and the progress made in this field up to date which now permits to probe folding events over the time scale from picoseconds to minutes has not yet been discussed in a book. The aim of this book is to provide an overview of the developments as seen by some of the main contributors to the field. The chapters are not intended to give exhaustive reviews of the literature but, instead to illustrate examples demonstrating the sort of information, which infrared techniques can provide and how this information can be extracted from the experimental data. By discussing the strengths and limitations of the infrared approaches for the investigation of folding and misfolding mechanisms this book helps the reader to evaluate whether a particular system is appropriate for studies by infrared spectroscopy and which specific advantages the techniques offer to solve specific problems.
