E-learning and Disability in Higher Education Jane K. Seale,2013-10-08 Most people working within the higher education sector understand the importance of making e-learning accessible to students with disabilities, yet it is not always clear exactly how this should be accomplished. E-Learning and Disability in Higher Education evaluates current accessibility practice and critiques the extent to which 'best' practices can be confidently identified and disseminated. This second edition has been fully updated and includes a focus on research that seeks to give 'voice' to disabled students in a way that provides an indispensable insight into their relationship with technologies and the institutions in which they study. Examining the social, educational, and political background behind making online learning accessible in higher and further education, E-Learning and Disability in Higher Education considers the roles and perspectives of the key stake-holders involved in e-learning: lecturers, professors, instructional designers, learning technologists, student support services, staff developers, and senior managers and administrators.

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith,2011 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Louisiana's Response to Extreme Weather Shirley Laska,2019-11-12 This book is open access under a CC BY 4.0 license. This book takes an in-depth look at Louisiana as a state which is ahead of the curve in terms of extreme weather events, both in frequency and magnitude, and in its responses to these challenges including recovery and enhancement of resiliency. Louisiana faced a major tropical catastrophe in the 21st century, and experiences the fastest rising sea level. Weather specialists, including those concentrating on sea level rise acknowledge that what the state of Louisiana experiences is likely to happen to many more, and not necessarily restricted to coastal states. This book asks and attempts to answer what Louisiana public officials, scientists/engineers, and those from outside of the state who have been called in to help, have done to achieve resilient recovery. How well have these efforts fared to achieve their goals? What might these efforts offer as lessons for those states that will be likely to experience enhanced extreme weather? Can the challenges of inequality be truly addressed in recovery and resilience? How can the study of the Louisiana response as a case be blended with findings from later disasters such as New York/New Jersey (Hurricane Sandy) and more recent ones to improve understanding as well as best adaptation applications – federal, state and local?

How to Conquer the World Garrett Wasny,1999 Management consultant, author, and Web master Garrett Wasny provides an annotated listing of over 8,000 international trade resources for businesspeople searching for global customers, partners, and suppliers on the World Wide Web. Organized into ten chapters covering geographic markets and global business functions and covering some 230 countries and territories, the volume provides relevant tips on Internet use and appendices offering a variety of resources on identifying useful associates, drafting initial correspondence, tracking information, and troubleshooting.

Mathematical Logic for Computer Science Zhongwan Lu,1998 Mathematical logic is essentially related to computer science. This book describes the aspects of mathematical logic that are closely related to each other, including classical logic, constructive logic, and modal logic. This book is intended to attend to both the peculiarities of logical systems and the requirements of computer science. In this edition, the revisions essentially involve rewriting the proofs, increasing the explanations, and adopting new terms and notations.

Cyndi's List Cyndi Howells,2001 A two volume set which provides researchers with more than 70,000 links to every conceivable genealogical resource on the Internet.

Louisiana Haunted Forts Elaine Coleman,2005-07-21 Although there are numerous books about Louisiana, little information about the forts are included and none combines the forts with ghost stories. Louisiana has five distinct regions, and all have historic forts, ranging from French rule to Spanish, Confederate, Federal, and even Privateer. Each unique story is heightened by ghostly legends. The state is already a strong tourist attraction with a \$5.2 billion business yearly, 87,000 employees in tourism, and a population of over 4,000,000.

Celebrating Latino Folklore [3 volumes] Maria Herrera-Sobek,2012-07-16 Latino folklore comprises a kaleidoscope of cultural traditions. This compelling three-volume work showcases its richness, complexity, and beauty. Latino folklore is a fun and fascinating subject to many Americans,

regardless of ethnicity. Interest in—and celebration of—Latin traditions such as Día de los Muertos in the United States is becoming more common outside of Latino populations. *Celebrating Latino Folklore: An Encyclopedia of Cultural Traditions* provides a broad and comprehensive collection of descriptive information regarding all the genres of Latino folklore in the United States, covering the traditions of Americans who trace their ancestry to Mexico, Spain, or Latin America. The encyclopedia surveys all manner of topics and subject matter related to Latino folklore, covering the oral traditions and cultural heritage of Latin Americans from riddles and dance to food and clothing. It covers the folklore of 21 Latin American countries as these traditions have been transmitted to the United States, documenting how cultures interweave to enrich each other and create a unique tapestry within the melting pot of the United States.

Playing with Fire John W. Sutherlin, Daniel Elliot Gonzalez, 2021-04-15 *Playing with Fire* chronicles the ongoing struggle facing Louisiana families trying to live and work against the backdrop of corrupt politicians and corporate greed. However, the story presented here is relevant wherever low-income, disenfranchised people are not included in decisions about their health and environment. This book examines the tale of Marine Shale Processors, the world's largest hazardous waste company, and the women who fought to protect their community and their children. The lesson here is that a dedicated group of people fighting for what is right can win and it serves as an example for any community that wants to determine what their own environmental future. *Playing with Fire* is a well-documented account that provides lessons for communities, government agencies, and corporations. It dispels the narrative that low-income communities must settle for jobs at the expense of clean air and water and politicians and demonstrates that corporations that further trample on the rights of people will ultimately pay the price.

Love, Marriage, and Money Gail Liberman, Alan Lavine, 1998 Communication tips combined with financial strategies fortify this powerful, yet fun-to-read resource for those contemplating tying the knot. Succinct and to the point, this book blends psychological, legal, and financial information together for anyone about to say I do.

Clash of Extremes Marc Egnal, 2010-01-05 *Clash of Extremes* takes on the reigning orthodoxy that the American Civil War was waged over high moral principles. Marc Egnal contends that economics, more than any other factor, moved the country to war in 1861. Drawing on a wealth of primary and secondary sources, Egnal shows that between 1820 and 1850, patterns of trade and production drew the North and South together and allowed sectional leaders to broker a series of compromises. After midcentury, however, all that changed as the rise of the Great Lakes economy reoriented Northern trade along east-west lines. Meanwhile, in the South, soil exhaustion, concerns about the country's westward expansion, and growing ties between the Upper South and the free states led many cotton planters to contemplate secession. The war that ensued was truly a clash of extremes. Sweeping from the 1820s through Reconstruction and filled with colorful portraits of leading individuals, *Clash of Extremes* emphasizes economics while giving careful consideration to social conflicts, ideology, and the rise of the antislavery movement. The result is a bold reinterpretation that will challenge the way we think about the Civil War.

Groundwater Contamination, Volume II Chester D. Rail, 2000-05-02 Fully updated and expanded into two volumes, the new edition of *Groundwater Contamination* explains in a comprehensive way the sources for groundwater contamination, the regulations governing it, and the technologies for abating it. This volume discusses aquifer management and strategies for stormwater control and groundwater restoration. A number of case histories on site analysis and remediation based on DOE and state documents are included. Among the many new features of this edition are a full discussion of risk assessment, the preparation of groundwater protection plans, and references linking the text to over 2,300 water-related Web sites.

There is No Such Thing as a Natural Disaster Gregory Squires, Chester Hartman, 2013-01-11 *There is No Such Thing as a Natural Disaster* is the first

comprehensive critical book on the catastrophic impact of Hurricane Katrina on New Orleans. The disaster will go down on record as one of the worst in American history, not least because of the government’s inept and cavalier response. But it is also a huge story for other reasons; the impact of the hurricane was uneven, and race and class were deeply implicated in the unevenness. Hartman and. Squires assemble two dozen critical scholars and activists who present a multifaceted portrait of the social implications of the disaster. The book covers the response to the disaster and the roles that race and class played, its impact on housing and redevelopment, the historical context of urban disasters in America and the future of economic development in the region. It offers strategic guidance for key actors - government agencies, financial institutions, neighbourhood organizations - in efforts to rebuild shattered communities.
