Fadó Rónán Gearóid Ó Domhnaill,2013-11-01 With Fadó, long forgotten about episodes from Irish history are presented in easy to follow short chapters. Who was Crom Cruach and what are Holy Wells? Who were the priest catchers and why were corpses stolen? How did a Cork woman become a feared pirate of the Caribbean and why is William Melville not loved by all in his native county? For such a small island, Ireland has history and archaeology in abundance and much of this is often only known to people in the locality. The author has travelled the island extensively and researched long forgotten characters and events, some of whom are stranger than fiction. Irish men and women of all hues and generations are examined here as the reader is guided through a land of heroes and villains, saints and scholars, pestilence and prosperity. Fadó is a book that can be read with ease and the author's passion for his subject is infectious. It is a must read for anyone interested in Irish history.

Introduction to Transgender Studies Ardel Haefele-Thomas,2019-02-05 This is the first introductory textbook intended for transgender/trans studies at the undergraduate level. The book can also be used for related courses in LGBTQ, queer, and gender/feminist studies. It encompasses and connects global contexts, intersecting identities, historic and contemporary issues, literature, history, politics, art, and culture. Ardel Haefele-Thomas embraces the richness of intersecting identities—how race, ethnicity, sexual orientation, class, nation, religion, and ability have cross-influenced to shape the transgender experience and trans culture across and beyond the binary. Written by an accomplished teacher with experience in a wide variety of higher learning institutions, this new text inspires readers to explore not only contemporary transgender issues and experiences but also the global history of gender diversity through the ages. Introduction to Transgender Studies features: -A welcoming approach that creates a safe space for a wide range of students, from those who have never thought about gender issues to those who identify as transgender, trans, nonbinary, agender, and/or gender expansive. -Writings from the Community essays that relate the chapter theme to the lived experiences of trans and LGB people and allies from different parts of the world. -Key concepts, film and media suggestions, topics for discussion, activities, and ideas for writing and research to engage students and serve as a review at exam time. -Instructors' resources that will be available that include key teaching points with discussion questions, activities, research projects, tips for using the media suggestions, PowerPoint presentations, and sample syllabi for various course configurations. Intended for introductory transgender, LGBTQ+, or gender studies courses through upper-level electives related to the expanding field of transgender studies, this text has been successfully class-tested in community colleges and public and private colleges and universities.

Drawn to Purpose Martha H. Kennedy,2018-02-14 Published in partnership with the Library of Congress, Drawn to Purpose: American Women Illustrators and Cartoonists presents an overarching survey of women in American illustration, from the late nineteenth into the twenty-first century. Martha H. Kennedy brings special attention to forms that have heretofore received scant notice--cover designs, editorial illustrations, and political cartoons--and reveals the contributions of acclaimed cartoonists and illustrators, along with many whose work has been overlooked. Featuring over 250 color illustrations, including eye-catching original art from the collections of the Library of Congress, Drawn to Purpose provides insight into the personal and professional experiences of eighty women who created these works. Included are artists Roz Chast, Lynda Barry, Lynn Johnston, and Jillian Tamaki. The artists' stories, shaped by their access to artistic training, the impact of marriage and children on careers, and experiences of gender bias in the marketplace, serve as vivid reminders of social change during a period in which the roles and interests of women broadened from the private to the public sphere. The vast, often neglected, body of artistic achievement by women remains an important part of our visual culture. The lives and work of the women responsible for it merit much further attention than they have received thus far. For readers who care about cartooning and illustration, Drawn to Purpose provides valuable insight into this rich heritage.

Grand Canyon E. H. Watts,2022-01-14 When you visited Yellowstone National Park, did you think to yourself, this does not look like a Volcano? Twenty-nine pieces of evidence suggest Yellowstone is not a volcano. There is a missing planet and an asteroid belt between Jupiter and Mars. Have you ever wondered what made it possible to rain on earth for 40 days and 40 nights as mentioned in Genesis 7:12? In this publication scientific and geological evidence come together to confirm what Genesis has said all along. Have you ever wondered why there are so many underwater cities found all around the world? Are you aware that mass changes gravity? Genesis 19:23-25, states mass came onto earth out of a clear blue sky and buried the cities of Sodom and Gomorrah. Many unexplained mysteries are now explained. Things like: Why does the Coconino sandstone show evidence of vertical deposition? Where did the Coconino sandstone come from? Why is the Earth axis tilted to 23.5 degrees? Why are there no marine fossils above the KT boundary? How did the fountains of the great deep burst forth? Why are dinosaurs drowned and buried in shallow clean mudstone on hill tops in Montana? Evidence supports dinosaurs were wiped out less than 5,000 years ago. Please watch the movie, Is Genesis History. Directed by Thomas Purifoy. 2017; USA: Compass Cinema, 2017. DVD." Evidence supports celestial Impact at Yellowstone and global mass fallout changing gravity. Gravity change is what made the water vapor canopy become unstable and start falling as rain for 40 days and 40 nights causing global flooding in the year 2,348 B.C.E. Reviewed in the United States on February 26, 2019 Verified Purchase. Grand Canyon: The Watts Theory ***** "The Watts Theory, while based largely on historic and anecdotal material, is a most engaging hypothesis. Like theories outlined in such books as VanDonikin's 'Chariots of the Gods', Watts presents compelling arguments in support of an alternative view of several of nature's mysteries, including the creation of the Grand Canyon and Yellowstone. While raising as many questions as it endeavors to answer, The 'Watts Theory' is an intriguing and credible explanation of many natural anomalies that remain largely unanswered by pure academic science. I would recommend that anyone interested in geological history, read the 'Watts Theory', with an open mind. It is well researched, documented and thought provoking." Field and Service Robotics Marco Hutter,Roland Siegwart,2017-11-01 This book contains the proceedings of the 11th FSR (Field and Service Robotics), which is the leading single-track conference on applications of robotics in challenging environments. This conference was held in Zurich, Switzerland from 12-15 September 2017. The book contains 45 full-length, peer-reviewed papers organized into a variety of topics: Control, Computer Vision, Inspection, Machine Learning, Mapping, Navigation and Planning, and Systems and Tools. The goal of the book and the conference is to report and encourage the development and experimental evaluation of field and service robots, and to generate a vibrant exchange and discussion in the community. Field robots are non-factory robots, typically mobile, that operate in complex and dynamic environments: on the ground (Earth or other planets), under the ground, underwater, in the air or in space. Service robots are those that work closely with humans to help them with their lives. The first FSR was held in Canberra, Australia, in 1997. Since that first meeting, FSR has been held roughly every two years, cycling through Asia, Americas, and Europe.

3D Computer Vision Christian Wöhler,2012-07-23 This indispensable text introduces the foundations of three-dimensional computer vision and describes recent contributions to the field. Fully revised and updated, this much-anticipated new edition reviews a range of triangulation-based methods, including linear and bundle adjustment based approaches to scene reconstruction and camera calibration, stereo vision, point cloud segmentation, and pose estimation of rigid, articulated, and flexible objects. Also covered are intensity-based techniques that evaluate the pixel grey values in the image to infer three-dimensional scene structure, and point spread function based approaches that exploit the effect of the optical system. The text shows how methods which integrate these concepts are able to increase reconstruction accuracy and robustness, describing applications in industrial quality inspection and metrology, human-robot interaction, and remote sensing.

Innovations for Shape Analysis Michael Breuß,Alfred Bruckstein,Petros Maragos,2013-04-04 The concept of 'shape' is at the heart of image processing and computer vision, yet researchers still have some way to go to replicate the human brain's ability to extrapolate meaning from the most basic of outlines. This volume reflects the advances of the last decade, which have also opened up tough new challenges in image processing. Today's applications require flexible models as well as efficient, mathematically justified algorithms that allow data processing within an acceptable timeframe. Examining important topics in continuous-scale and discrete modeling, as well as in modern algorithms, the book is the product of a key seminar focused on innovations in the field. It is a thorough introduction to the latest technology, especially given the tutorial style of a number of chapters. It also succeeds in identifying promising avenues for future research. The topics covered include mathematical morphology, skeletonization, statistical shape modeling, continuous-scale shape models such as partial differential equations and the theory of discrete shape descriptors. Some authors highlight new areas of enquiry such as partite skeletons, multi-component shapes, deformable shape models, and the use of distance fields. Combining the latest theoretical analysis with cutting-edge applications, this book will attract both academics and engineers.

Digital Terrain Analysis in Soil Science and Geology Igor Florinsky,2016-07-11 Digital Terrain Analysis in Soil Science and Geology, Second Edition, synthesizes the knowledge on methods and applications of digital terrain analysis and geomorphometry in the context of multi-scale problems in soil science and geology. Divided into three parts, the book first examines main concepts, principles, and methods of digital terrain modeling. It then looks at methods for analysis, modeling, and mapping of spatial distribution of soil properties using digital terrain analysis, before finally considering techniques for recognition, analysis, and interpretation of topographically manifested geological features. Digital Terrain Analysis in Soil Science and Geology, Second Edition, is an updated and revised edition, providing both a theoretical and methodological basis for understanding and applying geographical modeling techniques. Presents an integrated and unified view of digital terrain analysis in both soil science and geology Features research on new advances in the field, including DEM analytical approximation, analytical calculation of local morphometric variables, morphometric globes, and two-dimensional generalized spectral analytical methods Includes a rigorous description of the mathematical principles of digital terrain analysis Provides both a theoretical and methodological basis for understanding and applying geographical modeling

Advanced Information Systems Engineering Klaus R. Dittrich,Andreas Geppert,Maira C. Norrie,2003-05-15 Since the late 1980s, the CAiSE conferences have provided a forum for the presentation and exchange of research results and practical experiences within the field of Information Systems Engineering. CAiSE 2001 was the 13th conference in this series and was held from 4th to 8th June 2001 in the resort of Interlaken located near the three famous Swiss mountains – the Eiger, Mönch, and Jungfrau. The first two days consisted of pre-conference workshops and tutorials. The workshop themes included requirements engineering, evaluation of modeling methods, data integration over the Web, agent-oriented information systems, and the design and management of data warehouses. Continuing the tradition of recent CAiSE conferences, there was also a doctoral consortium. The pre-conference tutorials were on the themes of e-business models and XML application development. The main conference program included three invited speakers, two tutorials, and a panel discussion in addition to presentations of the papers in these proceedings. We also included a special ‘practice and experience’ session to give presenters an opportunity to report on and discuss experiences and investigations on the use of methods and technologies in practice. We extend our thanks to the members of the program committee and all other referees without whom such conferences would not be possible. The program committee, whose members came from 20 different countries, selected 27 high-quality research papers and 3 experience reports from a total of 97 submissions. The topics of these papers span the wide-range of topics relevant to information systems engineering – from requirements and design through to implementation and operation of complex and dynamic systems.

Wertebildung im Religionsunterricht. Eine empirische Untersuchung im berufsbildenden Bereich Friedrich Schweitzer,Joachim Ruopp,Georg Wagensommer,2012 An den Religionsunterricht im Bereich der beruflichen Bildung richten sich besondere Erwartungen. Von Seiten der Politik ebenso wie von Handwerk und Industrie wird ausdrücklich die Forderung erhoben, das der Religionsunterricht einen Beitrag zur Wertebildung leisten soll. Allerdings, es fehlen fast vollständig Befunde dazu. Erstmals werden in diesem Band mit qualitativ-empirischen Methoden einzelne Unterrichtsstunden im Blick auf die Wertebildung und Werteorientierungen von Schülerinnen und Schülern im Bereich des beruflichen Bildungswesens untersucht. Der erste Teil bietet Zugänge zur Thematik der Wertebildung sowie zur Fragestellung der Untersuchung. Im zweiten Teil werden die Befunde der Studie vorgestellt, besonders im Hinblick auf die von der Schülerschaft artikulierten Werte und die Strukturen von Unterricht. Darauf folgt eine Beschreibung der Perspektiven für die Praxis.

Fugitives and Refugees Chuck Palahniuk,2007-12-18 Want to know where Chuck Palahniuk's tonsils currently reside? Been looking for a naked mannequin to hide in your kitchen cabinets? Curious about Chuck's debut in an MTV music video? What goes on at the Scum Center? How do you get to the Apocalypse Café? In the closest thing he may ever write to an autobiography, Chuck Palahniuk provides answers to all these questions and more as he takes you through the streets, sewers, and local haunts of Portland, Oregon. According to Katherine Dunn, author of the cult classic *Geek Love*, Portland is the home of America's "fugitives and refugees." Get to know these folks, the "most cracked of the crackpots," as Palahniuk calls them, and come along with him on an adventure through the parts of Portland you might not otherwise believe actually exist. No other travel guide will give you this kind of access to "a little history, a little legend, and a lot of friendly, sincere, fascinating people who maybe should've kept their mouths shut." Here are strange personal museums, weird annual events, and ghost stories. Tour the tunnels under downtown Portland. Visit swingers' sex clubs, gay and straight. See Frances Gabe's famous 1940s Self-Cleaning House. Look into strange local customs like the I-Tit-a-Rod Race and the Santa Rampage. Learn how to talk like a local in a quick vocabulary lesson. Get to know, I mean really get to know, the animals at the Portland zoo. Oh, the list goes on and on.
