1001 Best Internet Sites for Educators Mark

Treadwell, 2001-06 This second edition of a resource designed to help teachers find relevant information on the Internet for both themselves and their students, provides concise reviews of more than 1,000 Web sites sorted by subject area. Each site is evaluated with one to five stars for content, presentation and grade level. Easy-to-follow explanations are provided of how each site can be used in the classroom. Also presented are search tips to help teacher find more sites on their own. Besides the rating of Internet sites, the book includes information on hardware and software requirements, safety on the Internet, plug-ins, and helpful information such as criteria for site selection and searching the Web. An element called Finding Where You Have Been helps teachers relocate sites they have viewed. Other helpful features are Searching the Web and a Glossary of Terms to familiarize teachers and students with the Internet. The introductory material on Safety on the Internet provides guidelines for teachers. A generic Acceptable Use Policy is also included that is copyright-free for schools to adapt to their needs. Recommendations for filtering software are offered for Internet use in places where individual monitoring is not possible, such as libraries. Data is provided on an Internet license system in which parents or caregivers sign an agreement for their child to access the Internet. Sites are provided under the following curriculum areas: language arts; mathematics; science; foreign languages; general and professional sites for educators; health and physical education; information and communication; music and performing arts; technology in education; and visual arts. The American Legal Profession Christopher P.

Banks, 2023-11-10 This book is a tight and fresh analysis of the American legal profession and its significance to society and its

citizens. The book's primary objective is to expose, and correct, the principal misconceptions— myths— surrounding prelaw study, law school admission, law school, and the American legal profession itself. These issues are vitally important to prelaw advisors and instructors in light of the difficult problems caused by the Great Recessions of 2008 and 2020- 2021 and the disruptions caused by the COVID-19 pandemic. Aimed equally at prelaw advisors and potential law students, this book can be used as a supplement in the interdisciplinary undergraduate law-related instructional market, including courses that cater to majors/minors in political science and criminal justice in particular. It can also be used in career counselling, internships, and the extensive paralegal program market. New to the Second Edition • Expanded coverage to include paralegal and legal assistant training. • New material on women and minority law students who are transforming law schools and the profession. • Explores challenges to the legal profession posed by economic recession, COVID-19, high tuition rates, exploding student loan debt, internet technological advances, and global competitive pressures, including legal outsourcing and DIY legal services. • Updated data and tables along with all underlying research.
