Mathematics Education in Different Cultural Traditions- A Comparative Study of East Asia and the West Frederick Koon-Shing Leung, Klaus-D. Graf, Francis J. Lopez-Real, 2006-08-02 The idea of the ICMI Study 13 is outlined as follows: Education in any social environment is influenced in many ways by the traditions of these environments. This study brings together leading experts to research and report on mathematics education in a global context. Mathematics education faces a split phenomenon of difference and correspondence. A study attempting a comparison between mathematics education in different traditions will be helpful to understanding this phenomenon.

The United States, China and Southeast Asian Security W. Bert, 2002-12-10 China's growing economy and military power may allow it to challenge US influence in East and Southeast Asia. Wayne Bert examines the likelihood of this and the impact it would have on Southeast Asian security. The approach taken by both the US and China will affect the outcome of this struggle and both the Southeast Asian commitment to economic growth and the development of regional institutions will encourage peaceful evolution and a power transition that avoids major conflict.

Constructing a Security Community in Southeast Asia Amitav Acharya, 2001 This book contains the most comprehensive and critical account available of the evolution of The Association of Southeast Asian Nations (ASEAN) norms and the viability of the ASEAN way of conflict management.

Political Development in Hong Kong Ngok Ma, 2007-01-01 This book reviews the political development of Hong Kong before and after 1997, in particular the evolution of state-society relations in the last two decades, to analyze the slow development of democracy and governance in Hong Kong after 1997. This book is a most comprehensive analysis of the multi-faceted changes in Hong Kong in the last 20 years. The scope of changes analyzed included state functions and institutions, political changes such as party development and development of the Legislative Council, and social changes such as social movements, civil liberties, etc. It helps the reader understand the crisis of governance of Hong Kong after 1997, and the difficulty of democratic development in Hong Kong over the years. The book covers: changing state institutions in Hong Kong in the last few decades; party development in Hong Kong; the changing role and function of the legislature in Hong Kong; the evolution of social movement and movement organizational forms; media freedom, civil liberties, and the role of civil society; and theoretical discussions concerning governance problems and state-society relations in Hong Kong. Special emphasis is placed on how these changes brought about a new state-society relation, which in turn brought governance difficulties after 1997.

Phenomenology and the Human Positioning in the Cosmos Anna-Teresa Tymieniecka, 2012-10-24 The classic conception of human transcendental consciousness assumes its self-supporting existential status within the horizon of life-world, nature and earth. Yet this assumed absoluteness does not entail the nature of its powers, neither their constitutive force. This latter call for an existential source reaching beyond the generative life-world network. Transcendental consciousness, having lost its absolute status (its point of reference) it is the role of the logos to lay down the harmonious positioning in the cosmic sphere of the all, establishing an original foundation of phenomenology in the primogenital onto-poiesis of life.

Japan and China in the World Political Economy Saadia Pekkanen, Kellee Tsai, 2006-06-01 Two powers in East Asia today stand to define the region's economic and commercial future: Japan, which rose in a spectacular industrial burst to become at present the

world's second largest economy; and China, which is rapidly advancing towards a market economy under the watchful eye of the world. While much has been made of Japan and China's particular economic institutions and developmental paths, few works analyze them in a comparative framework. Including contributions from leading academics, the text focuses on the period from the 1980s to the onset of the 2000s, reviewing the experiences of Japan and China across the areas of development, trade, investment, finance and technology. Drawing on a combination of official documents, economic statistics, case studies and original fieldwork, this book will give political scientists, political economists, business concerns, and policy analysts a firmer grasp of the role Japan and China stand to play in the world political economy.

Gouvernementalität, Staat und Weltgesellschaft Andreas Vasilache, 2013-10-29 Dieser Band setzt sich mit der Regierungs- und Staatsanalytik Michel Foucaults, ihrer theoretischen und konzeptionellen Diskussion sowie ihrer Anwendung in der empirischen Forschung auseinander. Dabei wird die Rolle des Staates sowohl im Denken Foucaults als auch in Forschungsperspektiven thematisiert, die auf seinen Gouvernementalitätsansatz rekurrieren. Der Band bringt politikwissenschaftliche, soziologische und philosophische Perspektiven zusammen und weist drei – miteinander verwobene – Schwerpunkte auf. So findet im ersten Abschnitt eine theoretische Auseinandersetzung mit Foucaults Regierungs- und Staatsdenken statt. Der zweite Abschnitt des Bandes ist der konzeptuellen Diskussion der Gouvernementalitätsperspektive und ihrer empirischen Operationalisierbarkeit gewidmet. Schließlich wird im dritten Abschnitt der Blick auf die Weltgesellschaft ausgeweitet und der Gouvernementalitätsansatz für die Analyse internationaler Politik sowie in den Internationalen Beziehungen (IB) fruchtbar gemacht.

Strategy in the Contemporary World John Baylis, James J. Wirtz, Colin S. Gray, 2013 The fourth edition of this successful textbook has been revised and updated in light of recent events, and includes a new chapter on the rise of cyberpower. Its comprehensive coverage of issues of war and peace such as terrorism, intelligence, and weapons of mass destruction makes it the major strategic studies textbook in the field.

Confucianism and Democratization in East Asia Doh Chull Shin, 2011-12-30 For decades, scholars and politicians have vigorously debated whether Confucianism is compatible with democracy, yet little is known about how it affects the process of democratization in East Asia. In this book, Doh Chull Shin examines the prevalence of core Confucian legacies and their impacts on civic and political orientations in six Confucian countries: China, Japan, South Korea, Singapore, Taiwan, and Vietnam. Analyses of the Asian Barometer and World Values surveys reveal that popular attachment to Confucian legacies has mixed results on democratic demand. While Confucian political legacies encourage demand for a non-liberal democratic government that prioritizes the economic welfare of the community over the freedom of individual citizens, its social legacies promote interpersonal trust and tolerance, which are critical components of democratic civic life. Thus, the author argues that citizens of historically Confucian Asia have an opportunity to combine the best of Confucian ideals and democratic principles in a novel, particularly East Asian brand of democracy.

Social Protest in Contemporary China, 2003-2010 Yanqi Tong, Shaohua Lei, 2013-11-12 China's economic transformation has

brought with it much social dislocation, which in turn has led to much social protest. This book presents a comprehensive analysis of the large-scale mass incidents which have taken place in the last decade. The book analyses these incidents systematically, discussing their nature, causes and outcomes. It shows the wide range of protests – tax riots, land and labour disputes, disputes within companies, including private and foreign companies, environmental protests and ethnic clashes – and shows how the nature of protests has changed over time. The book argues that the protests have been prompted by the socioeconomic transformations of the last decade, which have dislocated many individuals and groups, whilst also giving society increased autonomy and social freedom, enabling many people to become more vocal and active in their confrontations with the state. It suggests that many protests are related to corruption, that is failures by officials to adhere to the high standards which should be expected from benevolent government; it demonstrates how the Chinese state, far from being rigid, bureaucratic and authoritarian, is often sensitive and flexible in its response to protest, frequently addressing grievances and learning from its own mistakes; and it shows how the multilevel responsibility structure of the Chinese regime has enabled the central government to absorb the shock waves of social protest and continue to enjoy legitimacy.

Changing the Face of the Urban Economy Carrie Liu Currier, 2004

Post-Communist Democratization John S. Dryzek, Leslie Holmes, 2002-06-13 This book examines the way democracy is thought about and lived by people in the post-communist world.

India's Grand Strategy Kanti Bajpai, Saira Basit, V. Krishnappa, 2014-08-07 As India prepares to take its place in shaping the course of an 'Asian century', there are increasing debates about its 'grand strategy' and its role in a future world order. This timely and topical book presents a range of historical and contemporary interpretations and case studies on the theme. Drawing upon rich and diverse narratives that have informed India's strategic discourse, security and foreign policy, it charts a new agenda for strategic thinking on postcolonial India from a non-Western perspective. Comprehensive and insightful, the work will prove indispensable to those in defence and strategic studies, foreign policy, political science, and modern Indian history. It will also interest policy-makers, think-tanks and diplomats.

Affect and American Literature in the Age of Neoliberalism Rachel Greenwald Smith, 2015-04-20 Rachel Greenwald Smith's *Affect and American Literature in the Age of Neoliberalism* examines the relationship between contemporary American literature and politics. Through readings of works by Paul Auster, Karen Tei Yamashita, and others, Smith challenges the neoliberal notion that emotions are the property of the self.

The Age of Dystopia Louisa MacKay Demerjian, 2016-02-29 This book examines the recent popularity of the dystopian genre in literature and film, as well as connecting contemporary manifestations of dystopia to cultural trends and the implications of

technological and social changes on the individual and society as a whole. Dystopia, as a genre, reflects our greatest fears of what the future might bring, based on analysis of the present. This book connects traditional dystopian works with their contexts and compares these with contemporary versions. It centers around two main questions: Why is dystopia so popular now? And, why is dystopia so popular with young adult audiences? Since dystopia reflects the fears of society as a whole, this book will have broad appeal for any reader, and will be particularly useful to teachers in a variety of settings, such as in a high school or college-level classroom to teach dystopian literature, or in a comparative literature classroom to show how the genre has appeared in multiple locales at different times. Indeed, the book's interdisciplinary nature allows it to be of use in classes focussing on politics, bioethics, privacy issues, women's studies, and any number of additional topics.

The Reluctant Superpower W. Bert, 1997-07-07 This book examines the nature of the war in the former Yugoslavia, US interests there and US perceptions of the conflict. The policies of the Bush and Clinton administrations toward the war and the factors discouraging US intervention are examined and evaluated in the context of a post-Cold War international system. Finally, the lessons for future decisions on international intervention in a post-Cold War where old policy guidelines are obsolete are discussed and critiqued.

The Literary Utopias of Cultural Communities, 1790-1910 Marguérite Corporaal, Evert Jan van Leeuwen, 2010 This volume of essays by scholars in the field of English and American studies brings together a variety of perspectives on the utopian literature originating from cultural communities from 1790-1910. Ranging from the Lunar society to the Nationalist movement, and from the Transcendentalists to the Indian Monday Club the fifteen peer-reviewed articles examine a wide range of contexts in which utopian literature was written, and will be of interest to scholars in the field of cultural and literary studies alike. Moreover, the volume presents the reader with a unique overview of developments in Utopian thinking and literature throughout the long nineteenth century. Specific attention is paid to the transatlantic nature of cultural communities in which utopian writings were produced and read as well as to the colonial contexts of nineteenth-century utopian literature. As such, the collection offers a novel approach to a tradition of utopian writing that was essentially transcultural. Marguérite Corporaal (Radboud University Nijmegen) and Evert Jan van Leeuwen (Leiden University) are lecturers in English and American literature in the Netherlands.
