That the World May Know James Dawes,2009-06-30 What can we do to prevent more atrocities from happening in the future, and to stop the ones that are happening right now? Global Political Ecology Richard Peet,Paul Robbins,Michael Watts,2010-12-17 The world is caught in the mesh of a series of environmental crises. So far attempts at resolving the deep basis of these have been superficial and disorganized. Global Political Ecology links the political economy of global capitalism with the political ecology of a series of environmental disasters and failed attempts at environmental policies. This critical volume draws together contributions from twenty-five leading intellectuals in the field. It begins with an introductory chapter that introduces the readers to political ecology and summarizes the books main findings. The following seven sections cover topics on the political ecology of war and the disaster state; fuelling capitalism: energy scarcity and abundance; global governance of health, bodies, and genomics; the contradictions of global food; capital's marginal product: effluents, waste, and garbage; water as a commodity, a human right, and power; the functions and dysfunctions of the global green economy; political ecology of the global climate, and carbon emissions. This book contains accounts of the main currents of thought in each area that bring the topics completely up-to-date. The individual chapters contain a theoretical introduction linking in with the main themes of political ecology, as well as empirical information and case material. Global Political Ecology serves as a valuable reference for students interested in political ecology, environmental justice, and geography.

Disaster Management and Civil Society Alpaslan Özerdem,2006 Natural disasters have a profound impact upon the societies they affect but one important aspect that has yet to receive attention is how the relationship between state and society is affected in the aftermath of such events. How the state responds to such events can generate powerful forces within society for political, economic and social change.--Bloomsbury publishing.

A Restatement of the History of Islam and Muslims Sayed Ali Asgher Razwy,2015-07-20 This is a new story of Islam. It is the story of the movement which was launched by Muhammad, the Messenger of God, in A.D. 610 in Makkah, and was consummated with the support of his cousin,

collaborator and vicegerent, Ali ibn Abi Talib, in A.D. 632 in Medina. It covers a period of ninety years from A.D. 570 when he was born in Makkah, to A.D. 661 when his successor, Ali ibn Abi Talib, was assassinated in Kufa. Countless histories of Islam have been written in the past and will be written in the future. The spectacular advance of Islam in the missionary field in our own times; the renaissance of the Muslim nations after many centuries of slumber; the obtrusion of oil as a new factor in world politics in this century; but above all and most recently, the success of the Islamic Revolution in Iran, all are acting, both in the east and in the west, as catalysts of a new interest in Islam. The Revolution in Iran, has, in fact, triggered a world-wide explosion of interest in Islam, and many new books are being written on the subject - both by Muslims and non-Muslims...

Microbial Interventions in Agriculture and Environment Dhananjaya Pratap Singh, Vijai Kumar Gupta, Ratna Prabha, 2019-11-27 Microbial communities and their functions play a crucial role in the management of ecological, environmental and agricultural health on the Earth. Microorganisms are the key identified players for plant growth promotion, plant immunization, disease suppression, induced resistance and tolerance against stresses as the indicative parameters of improved crop productivity and sustainable soil health. Beneficial belowground microbial interactions with the rhizosphere help plants mitigate drought and salinity stresses and alleviate water stresses under the unfavorable environmental conditions in the native soils. Microorganisms that are inhabitants of such environmental conditions have potential solutions for them. There are potential microbial communities that can degrade xenobiotic compounds, pesticides and toxic industrial chemicals and help remediate even heavy metals, and thus they find enormous applications in environmental remediation. Microbes have developed intrinsic metabolic capabilities with specific metabolic networks while inhabiting under specific conditions for many generations and, so play a crucial role. The book *Microbial Interventions in Agriculture and Environment* is an effort to compile and present a great volume of authentic, high-quality, socially-viable, practical and implementable research and technological work on microbial implications. The whole content of the volume covers protocols, methodologies, applications, interactions, role and impact of research and development aspects on microbial interventions and technological outcomes in prospects of agricultural and environmental domain including crop production, plant-soil health management, food & nutrition, nutrient recycling, land reclamation, clean water systems and agro-waste management, biodegradation & bioremediation, biomass to bioenergy, sanitation and rural livelihood security. The covered topics and sub-topics of the microbial domain have high implications for the targeted and wide readership of researchers, students, faculty and scientists working on these areas along with the agri-activists, policymakers, environmentalists, advisors etc. in the Government, industries and non-government level for reference and knowledge generation.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Vulnerable Livelihoods in Somali Region, Ethiopia Stephen Devereux, 2006 Presents an investigation into the causes and consequences of livelihood vulnerability in Somali Region, Ethiopia. People in this region, pastoralists, agro-pastoralists, farmers and traders, have suffered a series of livelihood shocks in recent years, some natural (droughts, livestock disease), others political (a crackdown on contraband trade, bans by Gulf states on livestock imports, violent conflict between (sub-)clans or between Ogaden National Liberation Front (ONLF) militia and the state). As a result of these multiple shocks, and because rainfall in the Horn of Africa has been low in recent years, questions are being asked about the sustainability of pastoralism as a livelihood system, not only in Somali Region but throughout the Greater Horn of Africa.

Jock Around the Clock John Birchard, 2010-11-29 Jock Around the Clock takes you back three decades to a time when satellite broadcasting and the concept of all sports all the time were brand-new. It's the story of how ESPN founders Bill and Scott Rasmussen, having been forced out of their TV sports network, turned to radio and gave birth to the all-sports network, Enterprise Radio. The story features names familiar to American sports fans as they gather to launch the network that would flash across the sky for a brief few months, then flame out, leaving behind the blueprint so many others have copied since.

Black Genesis Robert Bauval, Thomas Brophy, 2011-03-28 Presents proof that an advanced black African civilization inhabited the Sahara long before Pharaonic Egypt • Reveals black Africa to be at the genesis of ancient civilization and the human story • Examines extensive studies into the lost civilization of the "Star People" by renowned anthropologists, archaeologists, genetic scientists, and cultural historians as well as the authors' archaeoastronomy and hieroglyphics research • Deciphers the history behind the mysterious Nabta Playa ceremonial area and its stone calendar circle and megaliths Relegated to the realm of archaeological heresy, despite a wealth of hard scientific evidence, the theory that an advanced civilization of black Africans settled in the Sahara long before Pharaonic Egypt existed has been dismissed and even condemned by conventional Egyptologists, archaeologists, and the Egyptian government. Uncovering compelling new evidence, Egyptologist Robert Bauval and astrophysicist Thomas Brophy present the anthropological, climatological, archaeological, geological, and genetic research supporting this hugely debated theory of the black African origin of Egyptian civilization. Building upon extensive studies from the past four decades and their own archaeoastronomical and hieroglyphic research, the authors show how the early black culture known as the Cattle People not only domesticated cattle but also had a sophisticated grasp of astronomy; created plentiful rock art at Gilf Kebir and Gebel Uwainat; had trade routes to the Mediterranean coast, central Africa, and the Sinai; held spiritual and occult ceremonies; and constructed a stone calendar circle and megaliths at the ceremonial site of Nabta Playa reminiscent of Stonehenge, yet much older. Revealing these "Star People" as the true founders of ancient Egyptian civilization, this book completely rewrites the history of world civilization, placing black Africa back in its rightful place at the center of mankind's origins.
