Containing over 60,000 entries, this new edition of the authoritative work on slang details the slang and unconventional English of the English-speaking world since 1945, and through the first decade of the new millennium, with the same thorough, intense, and lively scholarship that characterized Partridge’s own work. Unique, exciting and, at times, hilariously shocking, key features include: unprecedented coverage of World English, with equal prominence given to American and British English slang, and entries included from Australia, New Zealand, Canada, India, South Africa, Ireland, and the Caribbean emphasis on post-World War II slang and unconventional English published sources given for each entry, often including an early or significant example of the term’s use in print. Hundreds of thousands of citations from popular literature, newspapers, magazines, movies, and songs illustrating usage of the headwords dating information for each headword in the tradition of Partridge, commentary on the term’s origins and meaning New to this edition: A new preface noting slang trends of the last five years Over 1,000 new entries from the US, UK and Australia New terms from the language of social networking Many entries now revised to include new dating, new citations from written sources and new glosses The New Partridge Dictionary of Slang and Unconventional English is a spectacular resource infused with humour and learning – it’s rude, it’s delightful, and it’s a prize for anyone with a love of language.

🔍 **Relevance Regained** H. Thomas Johnson, 2002-01-15 Building on his pathbreaking, award-winning bestseller, Relevance Lost, H. Thomas Johnson presents a devastating critique of the top-down hierarchical accounting systems that have dominated American corporations since the 1950s. In Relevance Regained, Johnson shows exactly how managing by remote control through results-oriented accounting information has obstructed the real business objective: to reduce process variation and lead times for the purpose of obtaining and keeping satisfied customers. The failure of most American businesses to be competitive and profitable, he contends, is their reliance on management accounting information to control people’s actions and productivity. Cost-focused imperatives from on high must be replaced, Johnson asserts, with information systems that link actions with imperatives of global competition. Self-managing work teams, according to Johnson, must own problem-solving information to reduce variation, delays, and excess in processes. Johnson prescribes the necessary changes in management principles that must replace the outdated style associated with the industrial revolution. Responsiveness to customers—not accounting costs—and flexibility—reducing lead times and removing constraints—are necessary for sustained competitive excellence and long-term profitability. Johnson discusses the radical overhauls of companies, such as General Electric’s work-outs/best practices program and Harley-Davidson’s work simplification programs, and shows how these strong commitments to new strategies maximize a company’s most important assets: people and time. To be globally competitive, he claims, a company’s work must be directed toward selling to customers, not just selling products.

The first part covers the principles of health interoperability, why it matters, why it is hard and why models are an important part of the solution. The second part covers clinical terminology and SNOMED CT. The third part covers the main HL7 standards: v2, v3, CDA and IHE XDS. The new fourth part covers FHIR and has been contributed by Grahame Grieve, the original FHIR chief.

The maps detail over 100 separate categories of cause of death, including various cancers, suicides, assault by firearms, multiple sclerosis, pneumonia, hypothermia, falls, and Parkinson’s disease, and show how often these occurred in different neighbourhoods.
