Billy and Blaze C.W. Anderson,2012-07-17 The first book in the classic, beloved Billy and Blaze series, from renowned author C.W. Anderson. Billy was a little boy who “loved horses more than anything else in the world.” Imagine how happy he was when he got his very own pony for his birthday! From that day on, Billy was seldom seen without his new friend, Blaze. Riding through fields and woods, Billy and Blaze learned to trust and understand one another—and to jump over fences and fallen trees with ease. They were a great team, but were they good enough to win the gleaming silver cup at the Mason Horse Show? This is the first book in the classic Billy and Blaze series. Sensitive drawings and easy-to-read words capture the warmth and gentle understanding between a boy and his horse.

Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Women Who Built Omaha Eileen Wirth,2022-05 2023 Nebraska Book Award During the 1930s the Federal Writers' Project described Omaha as a man's town, and histories of the city have all but ignored women. However, women have played major roles in education, health, culture, social services, and other fields since the city's founding in 1854. In *The Women Who Built Omaha* Eileen Wirth tells the stories of groundbreaking women who built Omaha, including Susette Bright Eyes LaFlesche, who translated at the trial of Chief Standing Bear; Mildred Brown, an African American newspaper publisher; Sarah Joslyn, who personally paid for Joslyn Art Museum; Mrs. B of Nebraska Furniture Mart; and the Sisters of Mercy, who started Omaha's Catholic schools. Omaha women have been champion athletes and suffragists as well as madams and bootleggers. They transformed the city's parks, co-founded Creighton University, helped run Boys Town, and so much more, in ways that continue today.

Our Common Future ,1990

Sacred Smokes Theodore C. Van Alst,2018-08-15 Growing up in a gang in the city can be dark. Growing up Native American in a gang in Chicago is a whole different story. This book takes a trip through that unexplored part of Indian Country, an intense journey that is full of surprises, shining a light on the interior lives of people whose intellectual and emotional concerns are often overlooked. This dark, compelling, occasionally inappropriate, and often hilarious linked story collection introduces a character who defies all stereotypes about urban life and Indians. He will be in readers’ heads for a long time to come.

Joss Whedon and Race Mary Ellen Iatropoulos,2016-11-10 Joss Whedon is known for exploring philosophical questions through socially progressive narratives in his films, television shows and comics. His work critiques racial stereotypes, sometimes repudiating them, sometimes reinvesting in them (sometimes both at once). This collection of new essays explores his representations of racial power dynamics between individuals and institutions and how the Whedonverse constructs race, ethnicity and nationality relationships.

Rural Rebellion Ross Benes,2021-01-26 After Ross Benes left Nebraska for New York, he witnessed his polite home state become synonymous with “Trump country.” Long dismissed as “flyover” land, the area where he was born and raised suddenly became the subject of TV features and frequent opinion columns. With the rural-urban divide overtaking the national conversation, Benes knew what he had to do: he had to go home. In *Rural Rebellion* Benes explores Nebraska’s shifting political landscape to better understand what’s plaguing America. He clarifies how Nebraska defies red-state stereotypes while offering readers insights into how a frontier state with a tradition of nonpartisanship succumbed to the hardened right. Extensive interviews with US senators, representatives, governors, state lawmakers, and other power brokers illustrate how local disputes over health-care coverage and education funding became microcosms for our current national crisis. *Rural Rebellion*

is also the story of one man coming to terms with both his past and present. Benes writes about the dissonance of moving from the most rural and conservative region of the country to its most liberal and urban centers as they grow further apart at a critical moment in history. He seeks to bridge America's current political divides by contrasting the conservative values he learned growing up in a town of three hundred with those of his liberal acquaintances in New York City, where he now lives. At a time when social and political differences are too often portrayed in stark binary terms, and people in the Trump-supporting heartland are depicted in reductive, one-dimensional ways, Benes tells real-life stories to add depth and nuance to our understanding of rural Americans' attitudes about abortion, immigration, big government, and other contentious issues. His argument and conclusion are simple but powerful: that Americans in disparate places would be less hostile to one another if they just knew each other a little better. Part memoir, journalism, and social science, *Rural Rebellion* is a book for our times.

Ethical issues, environmental management, and professionalism, and environmental economic problems are illustrated to assist the reader in understanding and applying quantitative analysis of environmental problems. Explanation of scientific principles and concepts needed for risk assessment, waste management, contaminant transport, environmental hydrogeology, and environmental engineering & chemistry. A fully supportive glossary, appendices and tables throughout the text contain physical, chemical and biological resources necessary for all environmental practitioners.

The Land Speaks Debbie Lee, Kathryn Newfont, 2017-10-03 *The Land Speaks* explores the intersection of two vibrant fields, oral history and environmental studies. Ranging across farm and forest, city and wilderness, river and desert, this collection of fourteen oral histories gives voice to nature and the stories it has to tell. These essays consider topics as diverse as environmental activism, wilderness management, public health, urban exploring, and smoke jumping. They raise questions about the roles of water, neglected urban spaces, land ownership concepts, protectionist activism, and climate change. Covering almost every region of the United States and part of the Caribbean, Lee and Newfont and their diverse collection of contributors address the particular contributions oral history can make toward understanding issues of public land and the environment. In the face of global warming and events like the Flint water crisis, environmental challenges are undoubtedly among the most pressing issues of our time. These essays suggest that oral history can serve both documentary and problem-solving functions as we grapple with these challenges.

Creating Minnesota Annette Atkins, 2008-10-14 *Selected Writings of Victoria Woodhull* Victoria Claflin Woodhull, 2010-05-01 Suffragist, lecturer, eugenicist, businesswoman, free lover, and the first woman to run for president of the United States, Victoria C. Woodhull (1838?1927) has been all but forgotten as a leading nineteenth-century feminist writer and radical. *Selected Writings of Victoria Woodhull* is the first multigenre, multisubject collection of her materials, giving contemporary audiences a glimpse into the radical views of this nineteenth-century woman who advocated free love between consensual adults and who was labeled "Mrs. Satan" by cartoonist Thomas Nast. Woodhull's texts reveal the multiple conflicting aspects of this influential woman, who has been portrayed in the past as either a disreputable figure or a brave pioneer. This collection of letters, speeches, essays, and articles elucidate some of the lesser-known movements and ideas of the nineteenth century. It also highlights, through Woodhull's correspondence with fellow suffragist Lucretia Mott, tensions within the suffragist movement and demonstrates the changing political atmosphere and role of women in business and politics in the late nineteenth century. With a comprehensive introduction contextualizing Woodhull's most important writing, this collection provides a clear lens through which to view late nineteenth-century suffragism, labor reform, reproductive rights, sexual politics, and spiritualism.

Iodine Deficiency Disorders and Their Elimination Elizabeth N. Pearce, 2017-01-20 Iodine is an essential micronutrient and an integral component of the thyroid hormones, which are required for normal growth and development. The iodine deficiency disorders (IDD) encompass a spectrum of adverse health effects including goiter, cretinism, hypothyroidism, growth retardation, and increased pregnancy loss and infant mortality. This volume summarizes the current understanding of the effects of iodine deficiency as well as iodine excess. It also discusses best practices for salt iodization, the mainstay of global IDD prevention efforts, and other forms of food fortification. The effectiveness of iodine supplementation for vulnerable populations, an evolving strategy in many regions, is also described. Low level environmental exposure to chemicals such as perchlorate and thiocyanate, which competitively block thyroidal iodine uptake, appears to be ubiquitous worldwide. There has been recent concern that such environmental exposures might pose a health hazard by inducing or aggravating underlying thyroid dysfunction. This up-to-date volume explores both the effects of iodine deficiency as well as the best strategies for IDD prevention.

The Western Journals of Nehemiah and Henry Sanford, 1839 - 1846 Kenneth E. Lewis, 2019-03-01 The late antebellum period saw the dramatic growth of the United States as Euro-American settlement began to move into new territories west of the Mississippi River. The journals and letters of businessmen Nehemiah and Henry Sanford, written between 1839 and 1846, provide a unique perspective into a time of dramatic expansion in the Great Lakes and beyond. These accounts describe the daily experiences of Nehemiah and his wife Nancy Shelton Sanford as they traveled west from their Connecticut home to examine lands for speculation in regions undergoing colonization, as well as the experiences of their son Henry who later came out to the family's western property. Beyond an interest in business, the Sanfords' journals provide a detailed picture of the people they encountered and the settlements and country through which they passed and include descriptions of events, activities, methods of travel and travel accommodations, as well as mining in the upper Mississippi Valley and Michigan's Upper Peninsula and a buffalo hunt on the Great Plains. Through their travels the Sanfords give us an intimate glimpse of the immigrants, settlers, Native Americans, missionaries, traders, mariners, and soldiers they encountered, and their accounts illuminate the lives and activities of the newcomers and native people who inhabited this fascinating region during a time of dramatic transition.
