Mobile Confederates from Shiloh to Spanish Fort Arthur E. Green,2012 The 21st Alabama Volunteers CSA was created in October 1861 and remained in the vicinity of Mobile, Alabama, for most of the war. It was staffed primarily by local Mobile area men supplemented with some additional men from South Alabama counties. The 21st Regiment included existing companies such as the French Guards, the Spanish Guards, the British Guards and the Mobile Cadets. It served gallantly at Shiloh in April 1862 and suffered heavily in that conflict. Lieutenant George Dixon was a member of the 21st who was wounded at Shiloh; he later died with his crew in command of the submarine Hunley at Charleston after sinking the first enemy warship by submarine warfare. The 21st manned and defended the forts at the mouth of Mobile Bay, Fort Gaines, Fort Morgan and Fort Powell at Grant's Pass as well as forts at Oven Bluff and Choctaw Bluff on the Alabama and Tombigbee Rivers north of Mobile. The 21st suffered the siege and defeat at Spanish Fort in April 1865. The abstracted compiled service records of almost 3,000 men who served are contained in this roster. Entries are arranged alphabetically by surname. A brief history of the 21st Alabama Infantry Volunteers, an appendix and a bibliography add to the value of this work.

Educating the Top 100 Percent Stephen G. Katsinas,Nathaniel J. Bray,Martha J. Kanter,2022-08-23 Educating the Top 100 Percent assesses the decline of higher education funding and offers ambitious policy recommendations to restore the possibility of accessible, affordable education for all. Stephen G. Katsinas, Nathaniel J. Bray, and Martha J. Kanter probe the complex interplay of federal, state, and local policies and illustrate how government actions have, over time, contributed to the long-term slide of US educational attainment. Declining federal and state funding of public higher education has forced institutions to revise their financial models, passing costs directly through to students, to the detriment of prospective students—and the nation. Experts in education policy, the authors point out how the unintended consequences of today's funding model deny an ever-increasing portion of the population important educational and professional opportunities. By providing context for how we arrived at this financial conundrum and analyzing robust quantitative data from national sources, Katsinas and his colleagues offer pragmatic, sustainable, and stable policy options for educating all Americans. The authors provide innovative ideas, key lessons learned, and actionable proposals to fund public higher education. Their top-down federal and bottom-up local and state policy solutions aim to rectify plummeting high school-to-college continuation and college graduation rates. As a result, they present a vision of a brighter economic, cultural, and civic future for educating all Americans. Educating the Top 100 Percent demonstrates how stable, sustainable funding policies can scaffold a better public higher education system for all.

Investigating the Ordinary Sarah E. Price,Philip J. Carr,2018-01-16 Makes the case that the everyday should and does matter in archaeology. The content is fresh, the approaches are varied, and the case is convincing.--Adam King, editor of Archaeology in South Carolina: Exploring the Hidden Heritage of the Palmetto State Focusing on the daily concerns and routine events of people in the past, Investigating the Ordinary argues for a paradigm shift in the way southeastern archaeologists operate. Instead of dividing archaeological work by time periods or artifact types, the essays in this volume unite separate areas of research through the theme of the everyday. Ordinary activities studied here range from flint-knapping to ceremonial crafting, from subsistence to social gatherings, and from the Paleoindian period to the nineteenth century. Contributors demonstrate that attention to everyday life can help researchers avoid overemphasizing data and jargon and instead discover connections between the people of different eras. This approach will also inspire archaeologists with ways to engage the public with their work and with the deep history of the southeastern United States.

Contesting the Past, Reconstructing the Nation Ben Railton,2007-09-30 In this study of Gilded Age literature and culture, Ben Railton proposes that in the years after Reconstruction, America's identity was often connected through distinct and competing conceptions of the nation's history. Concerned with key social questions such as race, Native Americans, women, and the South, Contesting the Past, Reconstructing the Nation provided close readings of a number of texts for the ways they highlight these issues. This book examines established classics, newer additions to the canon, largely forgotten best-sellers, recovery gems, and autobiographical works by Douglass and Truth, poems by Harper and Piatt, and short stories by Woolson and Cooke. These readings contribute to ongoing conversations over historical literature's definition and value, and a greater understanding of not only American society in the Gilded Age, but also debates on our shared but contested history that remain very much alive in the present. -- From publisher's description.

Cadets on Campus John A. Coulter,2017-03-24 Since the founding of the United States Military Academy at West Point in 1802, more than eight hundred military schools have existed in this country. The vast majority have closed their doors, been absorbed into other educational institutions, or otherwise faded away, but others soldier on, adapting to changing times and changing educational needs. While many individual institutions have had their histories written or their stories told, to date no single book has attempted to explore the full scope of the military school in American history. *Cadets on Campus* is the first book to cover the origin, history, and culture of the nation's military schools—secondary and collegiate—and this breadth of coverage will appeal to historians and alumni alike. Author John Alfred Coulter identifies several key figures who were pivotal to the formation of military education, including Sylvanus Thayer, the “father of West Point,” and Alden Partridge, the founder of the school later known as Norwich University, the first private military school in the country. He also reveals that military schools were present across the nation, despite the conventional wisdom that most military schools, and, indeed, the culture that surrounds them, were limited to the South. Coulter addresses the shuttering of military schools in the era after the Vietnam War and then notes a curious resurgence of interest in military education since the turn of the century.

Slides for Students Gary D. Fisk,2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. *Slides for Students* does just that.*Slides for Students* is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, *Slides for Students* discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

Animals and Their Children in Victorian Culture Brenda Ayres,Sarah Elizabeth Maier,2019-11-20 Whether a secularized morality, biblical worldview, or unstated set of mores, the Victorian period can and always will be distinguished from those before and after for its pervasive sense of the proper way of thinking, speaking, doing, and acting. Animals in literature taught Victorian children how to behave. If you are a postmodern posthumanist, you might argue, But the animals in literature did not write their own accounts. Animal characters may be the creations of writers' imagination, but animals did and do exist in their own right, as did and do humans. The original essays in *Animals and Their Children in Victorian* explore the representation of animals in children's literature by resisting an anthropomorphized perception of them. Instead of focusing on the domestication of animals, this book analyzes how animals in literature civilize children, teaching them how to get along with fellow creatures—both human and nonhuman.
