## **Military Nanotechnology** Jürgen

Altmann, 2007-05-07 With revolutionary changes in nanotechnology (NT) now on the horizon, many countries have started major research and development (R&D) programmes, which are mainly civilian. Often overlooked are military R&D programmes - in particular those of the US government. This is the first systematic and comprehensive presentation of the potential military applications of NT. In ten to twenty years, these applications may include extremely small computers, robots, missiles, satellites, launchers and sensors. They may also provide lighter and stronger materials for vehicles and weapons, implants in soldiers' bodies, metal-free firearms, autonomous fighting systems, and smaller chemical and biological weapons. These potential uses raise strong concerns. This assessment is made from a viewpoint of international security, considering the new criteria of dangers for arms control and the international law of warfare, dangers for stability through potential new arms races and proliferation, and dangers for humans and society. Some military applications, such as computers, will be so close to civilian uses that limits are impractical. Others, such as sensors for biological-warfare agents, may contribute to stronger protection against terrorist attacks and better verification of compliance with arms-control treaties. For preventive limitation of these new technologies, specific approaches are proposed that balance positive civilian uses and take into account verification of compliance, with a view to international peace and security, not national military strength. This book will be of great interest to scholars of military technology, non-lethal weapons, disarmament and security studies in general.

*Britain's Roman Mosaic Pavements* Michael Dawson, 2021-05-20 Antiquarian interest in the Roman period mosaics of Britain began in the 16th century. This book is the first to explore responses and attitudes to mosaics, not just at the point of discovery but during their subsequent history. It is a field which has received scant attention and provides a compelling insight into the agency of these remains.

**Network Access, Regulation and Antitrust** Diana L. Moss, 2005-03-04 The rapid growth of network industries has generated much comment amongst academics and policy makers. This timely volume takes an interdisciplinary, case study-based approach to examining network issues and experiences in order to develop recommendations that can inform antitrust, regulatory and legislative policy. Legal, economic, political and institutional aspects of network access are analyzed. The first part of the volume focuses on five topics that are central to reasoned analysis of the access problem. The second part presents ten case studies of network access in the energy, transportation, telecommunications, internet and banking industries. The volume concludes with comparisons and contrasts across the cases and policy recommendations. *Network Access, Regulation and Antitrust* will prove invaluable to students of business, economics, law and economics and industrial economics, policy makers and academics working in the field.

**How the Internet Became Commercial** Shane Greenstein, 2017-09-26 In less than a decade, the Internet went from being a series of loosely connected networks used by universities and the military to the powerful commercial engine it is today. This book describes how many of the key innovations that made this possible came from entrepreneurs and iconoclasts who were outside the mainstream—and how the commercialization of the

Internet was by no means a foregone conclusion at its outset. Shane Greenstein traces the evolution of the Internet from government ownership to privatization to the commercial Internet we know today. This is a story of innovation from the edges. Greenstein shows how mainstream service providers that had traditionally been leaders in the old-market economy became threatened by innovations from industry outsiders who saw economic opportunities where others didn't—and how these mainstream firms had no choice but to innovate themselves. New models were tried: some succeeded, some failed. Commercial markets turned innovations into valuable products and services as the Internet evolved in those markets. New business processes had to be created from scratch as a network originally intended for research and military defense had to deal with network interconnectivity, the needs of commercial users, and a host of challenges with implementing innovative new services. How the Internet Became Commercial demonstrates how, without any central authority, a unique and vibrant interplay between government and private industry transformed the Internet.

**Mosaic** Council of Europe, Council of Europe Staff, 2010-03-31 In 1998, the Council of Europe and the European Commission decided to take common action in the field of youth. Both institutions initiated a partnership agreement with the aim to promote active European citizenship and civil society by giving impetus to the training of youth leaders and youth workers working within a European dimension. In 2003, additional agreements were signed in the fields of youth research and Euro-Mediterranean youth co-operation. Since 2005, the partnership between the European Commission and the Council of Europe in the field of Youth activities have been focusing on the following topics: European Citizenship, human rights

education and intercultural dialogue, quality and recognition of youth work and training, better understanding and knowledge of youth and youth policy development. The partnership between the Council of Europe and the European Commission in the field of Youth brings together the two institutions' experience in non formal education, youth policy, youth research and youth work practice. The co-operation between the two institutions covers a wide spectrum of activities such as training, seminars, workshops, networking and dialogue design. Results and other material are made available on the partnership website (<http://youth-partnership.coe.int>) and in various publications, including the Training Kits (T-Kits). All activities and publications enhance the exchange of experience and good practice between the actors involved and contribute to the implementation of the political objectives of both partners.

*The Myth of a Gentile Galilee* Mark A. Chancey, 2002-05-23 The Myth of a Gentile Galilee is the most thorough synthesis to date of archaeological and literary evidence relating to the population of Galilee in the first-century CE. The book demonstrates that, contrary to the perceptions of many New Testament scholars, the overwhelming majority of first-century Galileans were Jews. Utilizing the gospels, the writings of Josephus, and published archaeological excavation reports, Mark A. Chancey traces the historical development of the region's population and examines in detail specific cities and villages, finding ample indications of Jewish inhabitants and virtually none for gentiles. He argues that any New Testament scholarship that attempts to contextualize the Historical Jesus or the Jesus

movement in Galilee must acknowledge and pay due attention to the region's predominantly Jewish milieu. This accessible book will be of interest to New Testament scholars as well as scholars of Judaica, Syro-Palestinian archaeology, and the Roman Near East.

**The Placentia Area - A Changing Mosaic** Lee K.M. Everts, 2016-02-27 Touching on the wide array of people and events who have brought life to the history of the Placentia area, *The Placentia Area - A Changing Mosaic* offers a glimpse of the deep history that has transformed this part of Newfoundland and Labrador. The history is a collection of interconnected stories. Geological processes forged a landscape that would feature in later actions and activities. Geology created a wide expansive beach that Basque fish harvesters discovered was perfect for drying fish. This attribute, along with its deep harbour, then ensured that Placentia would go on to function in the struggles between the French and English. And from this period, the Placentia area has evolved, playing a role in the lives of well-known characters such as Pierre le Moyne d'Iberville or Roger F. Sweetman, as well as the less known, yet equally important, women and men who simply came to make a life for themselves. To the present day, the latter has remained a defining quality of the region.

The Millennial Mosaic Reginald W. Bibby, Joel Thiessen, Monetta Bailey, 2019-07-13 The bottom line: Millennials are looking good There's a lot of consternation about the Millennial generation – Canada's youngest adults born since the mid-1980s and now reaching their thirties. But the speculation has not been accompanied by sound and comprehensive information – until now. Highly respected sociologist and veteran trend-tracker Reginald W. Bibby teams up with two Gen X colleagues, Joel Thiessen and Monetta Bailey, to provide an up-to-date reading on how Millennials see the world – their values, joys, and concerns;

their views of family, sexuality, spirituality, and other Canadians; and their hopes and expectations as they look to the future. What's more, the authors compare Millennials with Gen Xers, Boomers, and Pre-Boomers. Their conclusion? Canada's much-criticized Millennials may well be a solid upgrade on previous generations – speaking well for the country's future.

**A Mosaic of Gendered Power Imbalances** Julia Schweiger, 2003-06-20 Inhaltsangabe: Summary: Over the last decade, media and politicians have been praising the great economic and democratic progress of the former state socialist countries in East Central Europe. At the same time, however, there have been occasional news about a growing income gap, high female unemployment rates, highly restrictive abortion legislation etc. in those countries. This contradiction caught my attention. In my thesis, I wanted to get to the bottom of it. Thus, the main questions at the beginning of my work were the following: What changed after the implosion of state socialism in the countries of East Central Europe? And how? What were the gendered implications of these changes? What role have the European Union and the possibility of gaining EU membership been playing in the transformation processes especially regarding the power relations between men and women? I decided to restrict my research to seven former state socialist countries in East Central Europe that are currently candidates for membership in the European Union: Poland, Czechoslovakia, respectively the Czech Republic and the Slovak Republic, Hungary, Slovenia, Bulgaria, and Romania. To approach the questions standing at the beginning of my work, I went way back to early socialist theorists, protagonists, and movements and their ideas and goals. I was particularly interested in women and gender issues in these theories and ideas. The next step was trying to

grasp the state socialist reality. From this vantage point, I could finally analyse the changes and transformation processes that have been taking place since the implosion of state socialism. I decided to use a feminist approach with gender as a central category of analysis. This is a very fruitful way to discover and reveal social interconnections, causes and outcomes of economic, political, and social processes, as well as crucial patterns that have been influencing and/or directing the processes in the East Central European countries under consideration over the last decades. Since the topic of my thesis is in the realm of international politics, I am taking a look at the encounters of feminist approaches and international relations at the beginning of my work. After that I am giving an overview of the main approaches to researching and theorizing the transformation processes in the former state socialist countries of East Central Europe, followed by an explanation of the approach I am taking. Then I am [...]
