Feminism and Religion Michele A. Paludi,J. Harold Ellens,2016-03-21 Renowned subject experts Michele A. Paludi and J. Harold Ellens lead readers through a detailed exploration of the feminist methods, issues, and theoretical frameworks that have made women central, not marginal, to religions around the world. At a conference in 2013, Gloria Steinem noted that religion is the biggest problem facing feminism today. In this insightful volume, a team of researchers, psychologists, and religious leaders led by editors Michele A. Paludi and J. Harold Ellens supply their expertise and informed opinions to examine the problems, spur understanding, and pose solutions to the conflicts between religion and women's rights, thereby advocating a global interest in justice and love for women. Examples of subjects addressed include the pro-life/pro-choice debate, feminism in new age thought, and the complex intersections of religion and feminism combined with gender, race, and ethnicity. The contributed work in this unique single-volume book enables a better understanding of how various religions view women—both traditionally and in the modern context—and how feminist thinking has changed the roles of women in some world religions. Readers will come away with clear ideas about how religious cultures can honor feminist values, such as family-friendly workplace policies, reproductive justice, and pay equity, and will be prepared to engage in conversation and constructive debate regarding how faith and feminism are interrelated today.

Industrial Development Report 2016 United Nations Industrial Development Organization (UNIDO),2015-12-31 This report looks at how technology and innovation achieves inclusive and sustainable industrial development (ISID). Its main finding is that ISID is feasible and technology can simultaneously serve all three dimensions of sustainability, including economic, social and environmental. Rapid inclusive and sustainable industrialization can happen more frequently provided that policymakers firmly steer the industrialization process with opportune policies and avoid past mistakes. In some cases, the spread of technology has not materialized in concrete growth opportunities because of the lack of technological capabilities. Innovation needs to be supported by interventions strengthening the process from invention to adoption, as capabilities are developed and high tech manufacturing sectors are created, seeing higher rates of sustainable growth.

Saudi Arabia and Nuclear Weapons Norman Cigar,2016-03-10 Nuclear proliferation in the Middle East remains an issue of concern. Saudi Arabia's actions will largely rest on Iran's decisions, and discussions and preparations within Saudi Arabia would suggest that it is ready to react to potential shifts in the region's nuclear powers. Saudi Arabia and Nuclear Weapons uses an inside out approach that emphasises the Saudis' own national interests in relation to the nuclear threat, and their understanding of the role of nuclear weapons in defense, foreign policy and the concept of deterrence. It is the first study with comprehensive use of the local Arabic language military and civilian media to provide this understanding of official thinking and policy. The Saudi case study is contextualised against the prevailing proliferation models, to conclude that the Saudi case shares both commonalities and elements of uniqueness with other proliferation cases, implying the need for a 'multi-causal' approach. Its comparative analysis also suggests potential implications applicable more broadly to the issue of

nuclear proliferation. A comprehensive study of Saudi Arabia's attitude to nuclear weapons, this book offers an exploration of nuclear proliferation that would interest students, scholars and policymakers working in Middle East studies, as well as Military and nuclear proliferation studies.

Pakistan Rohan Gunaratna, Khuram Iqbal, 2012-01-01 As made abundantly clear in the classified documents recently made public by WikiLeaks, Pakistan is the keystone in the international fight against terrorism today. After the US-led coalition targeted terrorist groups operating in Afghanistan, these groups, including al Qaeda and the Taliban, relocated to the Federally Administered Tribal Area of Pakistan. From its base in this remote, inhospitable region of Pakistan, al Qaeda and its associated cells have planned, prepared, and executed numerous terrorist attacks around the world, in addition to supporting and waging insurgencies in Iraq, Afghanistan, Yemen, Somalia, and elsewhere. This book is the first detailed analysis of the myriad insurgent groups working in Pakistan. Written by well-known expert on global terrorism Rohan Gunaratna and Khuram Iqbal, a leading scholar in Pakistan, the book examines and reviews the nature, structure, and agendas of the groups, their links to activists in other countries, such as India and Iran, and the difficulties of defeating terrorism in this part of the world. Drawing on extensive field research and interviews with government officials and former terrorists, the authors argue that Pakistan faces grave and continuing pressures from within, and that without steadfast international goodwill and support, the threats of extremism, terrorism, and insurgency will continue to grow. This timely and necessary book argues that if the international community is to win the battle against ideological extremism and operational terrorism around the world, then Pakistan should be in the vanguard of the fight.

Schutz und Andacht im Islam: Dokumente in Rollenform aus dem 14.-19. Jh. Tobias Nünlist, 2020-09-25 Schutz und Andacht im Islam befasst sich mit handschriftlichen Dokumenten in Rollenform, die zwischen dem 14. und 19. Jh. entstanden sind. Die vorgestellten Belegstücke stammen aus unterschiedlichen geographischen Kontexten: a. Städtedreieck Tabriz-Konya-Bagdad; b. persischer Kulturraum; c. Osmanisches Reich. Diese Rollen waren bei Angehörigen von Männerbünden (Sufi-Orden, Futuwwa- und Ahī-Gruppierungen, Gilden) beliebt. Die Studie untersucht das auf diesen Dokumenten verwendete textliche und ge-stalterische Vokabular. Neben Passagen aus dem Koran (auch vollständige Abschriften) lassen sich oft Gebete und weitere Texte frommen Inhalts feststellen. Gelegentlich finden sich Hinweise, dass die Dokumente aus heterodoxen Umfeldern stammen. Die Studie unterstreicht ausserdem den hohen kunsthistorischen Wert der vorgestellten Belegstücke, die oft für Angehörige von gesellschaftlichen Eliten angefertigt worden sind. Devotion and Protection in Islam deals with hand-written documents in the scroll format dating from the 14th-19th centuries. These documents can be attributed to various geographic contexts: a. the triangle between the cities of Tabriz, Konya and Baghdad; b. the Persianate world; c. the Ottoman Empire. These scrolls were appreciated by members of different associations (Männerbünde; e.g. Sufi orders, Futuwwa and Ahī groups). This study analyses the textual and ornamental vocabulary applied on the scrolls. The copied texts mostly comprise passages from the Quran and prayers. Certain features suggest that such scrolls were often produced in heterodox environments. Additionally, this study underscores the high art-historical value of these documents, particularly appreciated by members of the ruling elite.

Computational Analysis of Terrorist Groups: Lashkar-e-Taiba V.S. Subrahmanian, Aaron Mannes, Amy Sliva, Jana Shakarian, John P. Dickerson, 2012-08-28 Computational Analysis of Terrorist Groups: Lashkar-e-Taiba provides an in-depth look at Web intelligence, and how advanced mathematics and modern computing technology can influence the insights we have on terrorist groups. This book primarily focuses on one famous terrorist group known as Lashkar-e-Taiba (or LeT), and how it operates. After 10 years of counter Al Qaeda operations, LeT is considered by many in the counter-terrorism community to be an even greater threat to the US and world peace than Al Qaeda. Computational Analysis of Terrorist Groups: Lashkar-e-Taiba is the first book that demonstrates how to use modern computational analysis techniques including methods for "big data" analysis. This book presents how to quantify both the environment in which LeT operate, and the actions it took over a 20-year period, and represent it as a

relational database table. This table is then mined using sophisticated data mining algorithms in order to gain detailed, mathematical, computational and statistical insights into LeT and its operations. This book also provides a detailed history of Lashkar-e-Taiba based on extensive analysis conducted by using open source information and public statements. Each chapter includes a case study, as well as a slide describing the key results which are available on the authors' web sites. Computational Analysis of Terrorist Groups: Lashkar-e-Taiba is designed for a professional market composed of government or military workers, researchers and computer scientists working in the web intelligence field. Advanced-level students in computer science will also find this valuable as a reference book.

Transhumant Grazing Systems in Temperate Asia Food and Agriculture Organization of the United Nations, 2003 This book brings together studies by national scientists on traditional transhumant grazing systems, emphasizing grazing management and overall land use. Focus is on two zones in temperate Asia: the Himalaya-Hindu Kush and the colder areas of China, Mongolia and parts of Central Asia. Under prevailing conditions, mobile herding is the only sustainable way the population can make best use of the natural resources, but systems were dislocated by collectivization. In the Himalaya there is conflict between herders and sedentary groups. While poor pasture condition is a major constraint, the main problems are socio-economic and institutional and relate to land tenure and grazing rights. Fodder crops are, however, of great interest for settled groups who use the same pastures. Focus on technical solutions, herder training and participatory approaches should be within the context of political decisions.--Publisher's description.

The Secrets of Pilgrimage Ghazzālī, 2009

Force and Fanaticism Simon Ross Valentine, 2015-01-09 Wahhabism is an Islamic reform movement found mainly in Saudi Arabia. Closely linked to the Saudi monarchy, it enforces a strict code of morality and conduct monitored by mutawa (religious police), and governs every facet of Saudi life according to its own strict interpretation of Shariah, including gender segregation. Wahhabism also prohibits the practice of any other faith (even other forms of Islam) in Saudi Arabia, which is also the only country that forbids women from driving. But what exactly is Wahhabism? This question had long occupied Valentine, so he lived in the Kingdom for three years, familiarizing himself with its distinct interpretation of Islam. His book defines Wahhabism and Wahhabi beliefs and considers the life and teaching of Muham-mad ibn Abd'al Wahhab and the later expansion of his sect. Also discussed are the rejection of later developments in Islam such as bid'ah; harmful innovations, among them celebrating the prophet's birthday and visiting the tombs of saints; the destruction of holy sites due to the fear of idolatry; Wahhabi law, which imposes the death sentence for crimes as archaic as witch- craft and sorcery, and the connection of Wahhabism with militant Islam globally. Drawing on interviews with Saudis from all walks of life, including members of the feared mutawa, this book appraises of one of the most significant movements in contemporary Islam.
