Drosophilidae (Diptera) Irina Brake, Gerhard Baechli,2013-01-21 Concerns about global biodiversity are rising dramatically, yet we are lagging behind in the most basic prerequisite for its understanding and conservation: the inventory. Insect species may make up five or ten times the number of all other plant and animal species combined, and as such they represent one of the major challenges in biosystematic science. World Catalogue of Insects is an initiative aiming at compiling worldscale, authoritative catalogues of monophyletic insect taxa. Volumes in this series contain standard nomenclatorial information on all names pertaining to the taxon treated, including type locality and distribution to the extent this is relevant. Additional information is optional, e.g., location, status and condition of types; biology; bibliographical information; pest status; vector status; etc. This volume nine focuses on Drosophilidae (Diptera). (Series: World Catalogue of Insects)

Good Economics for Hard Times Abhijit V. Banerjee, Esther Duflo,2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

Religion and Contemporary Politics [2 volumes] Timothy J. Demy, Jeffrey M. Shaw Ph.D.,2019-09-19 With respect to the countries of the world, this work addresses two basic questions: How does religion affect politics in this country? and How does politics affect religion in this country? Although there are many books on the topics of religion and politics, reference works that consider the two together are few, with those that do exist primarily addressing theory rather than trends. The present work does the latter, contextualizing them within regional and national boundaries. In so doing, it recognizes the power of political and religious ideas and movements on individuals, communities, and nations, making the work a valuable resource for several disciplines, among them political science, international relations, religion, and sociology. The work focuses on the interplay of religion and politics in countries around the world with an emphasis on the post-2000s. It is organized by global geographic regions including Africa, Central and South America, and the Middle East and presents countries alphabetically within those sections. Each region has a brief overview of the political-religious dynamics of the area so readers can compare and contrast the dynamics between and among countries in a region. The work also includes an introduction, sidebars, and a bibliography.

HACCP and ISO 22000 Ioannis S. Arvanitoyannis,2009-11-09 Food Safety is an increasingly important issue. Numerous foodcrises have occurred internationally in recent years (the use of the dye Sudan Red I; the presence of acrylamide in various fried and baked foods; mislabelled or unlabelled genetically modified foods; and the outbreak of variant Creutzfeldt-Jakob disease) originating in both primary agricultural production and in the food manufacturing industries. Public concern at these and other events has led government agencies to implement a variety of legislative actions covering many aspects of the food chain. This book presents and compares

the HACCP and ISO 22000:2005 food safety management systems. These systems were introduced to improve and build upon existing systems in an attempt to address the kinds of failures which can lead to food crises. Numerous practical examples illustrating the application of ISO 22000 to the manufacture of food products of animal origin are presented in this extensively-referenced volume. After an opening chapter which introduces ISO 22000 and compares it with the well-established HACCP food safety management system, a summary of international legislation relating to safety in foods of animal origin is presented. The main part of the book is divided into chapters which are devoted to the principle groups of animal-derived food products: dairy, meat, poultry, eggs and seafood. Chapters are also included on catering and likely future directions. The book is aimed at food industry managers and consultants; government officials responsible for food safety monitoring; researchers and advanced students interested in food safety.

Deze studie is geschreven door wetenschappers uit verschillende disciplines, waaronder architectuur, stedenbouw, sociale wetenschappen, aardrijkskunde en antropologie. Een deel van de auteurs behandelt de mondiale ambities van de steden, terwijl andere hun culturele en architecturale uitingen onderzoeken.

Governance and Public Sector Reform in Asia Anthony Cheung, Ian Scott, 2003-08-29
Based on new field research, this book assesses the current state of governance and public sector reforms in eleven Asian countries and jurisdictions, especially in the wake of the recent regional financial crisis that seriously affected some of them. It analyses reform efforts comparatively against a backdrop of governance problems, and seeks to establish whether these efforts represent a substantive shift in attitudes towards reform or whether they serve simply to reinforce existing practices. The authors explore a number of important themes that are central to governance and public sector reform issues. These include the role of the state, the success or failure of organizational reforms, corruption, the applicability of the new public management model in the Asian context, and the governance values and reform models promoted by regional and international agencies.
