Robert Lindley Murray: the Reluctant U.S. Tennis Champion Roger W. Ohnsorg, 2011-02-03 Robert Lindley Lin Murray, a middle-distance runner and tennis player and a Phi Beta Kappa chemical engineer at Stanford University, went east after graduating in 1914 to play tennis. He beat the top intercollegiate players, won several tournaments, and earned a fourth place national ranking. Murray won the 1916 U.S. Indoor title and joined Hooker Electrochemical in Niagara Falls, New York. Reluctant to play in the 1917 and 1918 national championships due to wartime contracts, Murray was persuaded by Hookers president to play and he won them both, the latter over Bill Tilden. Murray rose through the ranks of Hooker to president, CEO, and chairman of the board and was elected to the International Tennis Hall of Fame a year before retiring. Leading into Murrays exploits is a concise history of tennis, when and where the game was introduced to the United States, and American tennis through Lin Murrays brief but brilliant career. Also included is a review of California tennis and the significant impact of its players during the second decade of the twentieth century. The book concludes with short biographies of Murrays female and male contemporaries, before shorts and skirts replaced flannels and petticoats.

**Civil War Biographies from the Western Waters** Myron J. Smith, Jr., 2015-02-06 From 1861 to 1865, the Civil War raged along the great rivers of the Ohio and Mississippi valleys. While various Civil War biographies exist, none have been devoted exclusively to participants in the Western river war as waged down the Mississippi to the mouth of the Red River, and up the Ohio, the Tennessee and the Cumberland. Based on the Official Records, county histories, newspapers and internet sources, this is the first work to profile personnel involved in the fighting on these great streams. Included in this biographical encyclopedia are Union and Confederate naval officers down to the rank of mate; enlisted sailors who won the Medal of Honor, or otherwise distinguished themselves or who wrote accounts of life on the gunboats; army officers and leaders who played a direct role in combat along Western waters; political officials who influenced river operations; civilian steamboat captains and pilots who participated in wartime logistics; and civilian contractors directly involved, including shipbuilders, dam builders, naval constructors and munitions experts. Each of the biographies includes (where known) birth, death and residence data; unit organization or ship; involvement in the river war; pre- and post-war careers; and source documentation. Hundreds of individuals are given their first historic recognition.

The History of Blacks in Canada George H. Junne, 2003-03-30 This fascinating bibliography of source materials clearly demonstrates the significant roles blacks have played in the history and culture of Canada from its beginnings as well as their 400-year fight for equity and justice. Organized by area of endeavor and by province, the source materials detailed here reveal that blacks in Canada have created a rich, diverse, and complex legacy. This volume lists resources that point to blacks' history as soldiers, prospectors, educators, cowboys, homesteaders, entertainers, legislators, athletes, artists, servants, and writers. The most comprehensive bibliography about blacks in Canada that has been published, it is well organized to facilitate locating specific topics or people spanning black history. Also included are newspapers and videos that add their own unique contribution. Academicians, researchers, students, and interested lay people will find an organized compilation of a vast number of primary and secondary sources about blacks in Canada.

The CSS Arkansas Myron J. Smith, Jr., 2011-09-08 While the Monitor and Merrimack are the most famous of the Civil War ironclads, the Confederacy had another ship in its flotilla that carried high hopes and a metal hull. The makeshift CSS Arkansas, completed by Lt. Isaac Newton Brown and manned by a mixed crew of volunteers, gave the South a surge of confidence when it launched in 1862. For 28 days of summer, the ship engaged in five battles with Union warships, falling victim in the end only to her own primitive engines. The saga of the CSS Arkansas represents the last significant Rebel naval activity in the war's Western theater.

**The Hidden Debate** Akil Kokayi Khalfani, 2005-10-28 The Hidden Debate is a fresh and cutting-edge comparative analysis of the ongoing and highly charged social conflict over affirmative action in South Africa and the United States. The debate over affirmative action has raged for over 30 years in the United States and since the early 1990s in South Africa with minimal agreement or resolution. In part this discord remains because scholars, journalists, politicians, and other social analysts have failed to properly specify and examine the problem.

*The Fight for the Yazoo, August 1862\_ÑJuly 1864* Myron J. Smith, Jr., 2012-10-10 Following the loss of the CSS Arkansas in early August 1862, Union and Confederate eyes turned to the Yazoo River, which formed the developing northern flank for the South's fortress at Vicksburg, Mississippi. For much of the next year, Federal efforts to capture the citadel focused on possession of that stream. Huge battles and mighty expeditions were launched (Chickasaw Bayou, Yazoo Pass, Steele's Bayou) from that direction, but the city, guarded by stout defenses, swamps, and motivated defenders, could not be turned. Finally, Union troops ran down the Mississippi and came up from the south and the river defenses and the bastion itself were taken from the east. From July 1863 to August 1864, sporadic Confederate resistance necessitated continued Federal attention. This book recounts the whole story.

*Mallory, Irvine and Everest* Robert H Edwards, 2024-07-30 Unique and unconventional, Robert H. Edwards' book provides a new perspective on mountaineering's greatest riddle. With fresh information, some controversial opinions, and plenty food for thought, it is bound to pour more fuel into the eternal flame that is the mystery of Mallory and Irvine. For this alone I highly recommend reading it! - Jochen Hemmleb (Mountaineering writer and filmmaker, coinstigator and member of the 1999 expedition that found Mallory's body, and three more search expeditions to Mount Everest) 'For a quarter of a century I've been held captive by the ghosts of Mallory & Irvine and their mysterious disappearance on Mount Everest in 1924. Finally, Bob Edwards has meticulously assembled all of the facts, the clues, and the countless possibilities surrounding their fate in a single, fascinating book.' - Thom Dharma Pollard (Member of the 1999 expedition that found Mallory's body) The last climb of George Mallory and Andrew Irvine, towards the summit of Mount Everest on 8 June 1924, has been shrouded in mystery for a century. Were they the first humans to stand at the highest point in the world? The discovery of Mallory's body in 1999 did nothing to resolve the mystery. Until now, accounts of their climb have been driven by speculation and preconceived narrative. In this book, which marks the 100th anniversary of the fateful climb, Dr Robert Edwards brings the fresh and original perspective of a mathematician to the story of Mallory and Irvine. Dr Edwards has assembled the contemporary accounts of the early British expeditions, written by the climbers and their leaders, and has identified their anomalies and inconsistencies. He has studied the letters of George Mallory, and has held in his hand the diaries of Andrew Irvine. He has viewed, in person, some of the surviving artifacts: the ice axe found in 1933, and Mallory's boots, recovered in 1999. He has corresponded with modern mountaineers who have climbed Everest. Above all, he has applied mathematics and modern imaging and mapping technology to an analysis of what the 1924 climbers could, and could not, have seen and done.

Stephen Russell Mallory Rodman L. Underwood, 2015-06-08 Just as Confederate naval action is commonly overshadowed by the land battles of the Civil War, the navy's originator, Stephen Mallory, is often overlooked in favor of more famous leaders. Mallory had served as one of Florida's U.S. senators for ten years before becoming navy secretary in the Confederate government, challenged to create a valid military force where none had existed. This biography chronicles Mallory's formative years in Key West, his decades of public service, and his declining days. It discusses his career in the United States Senate, where he chaired the Committee for Naval Affairs, helping to strengthen—in an ironic twist of fate—the very navy he would later attempt to defeat. The work also examines the challenges and obstacles Mallory faced in creating a navy for the South. Special attention is given to Mallory's family relationships. Primary sources include autobiographical documents and archival records.

**Storm Over Key West** Mike Pride,2020-12-01 A few weeks after the Emancipation Proclamation took effect, James Montgomery sailed into Key West Harbor looking for black men to draft into the Union army. Eager to oblige him, the military commander in town ordered every black man from fifteen to fifty to report to the courthouse, "there to undergo a medical examination, preparatory to embarking for Hilton Head, S.C." Montgomery swept away 126 men. Storm over Key West is a little-known story woven of many threads, but its main theme is the denial to black people of the equality central to the American ideal. After the island's slaves flocked to freedom during the summer of 1862, the white majority began a century-long campaign to deny black residents civil rights, education, literacy, respect, and the vote. Key West's harbor and two major federal forts were often referred to as "America's Gibraltar." This Gibraltar guarded the Florida Straits between Key West and Cuba and thus access to the Gulf of Mexico. When Union forces seized it before the war, the southernmost point of the Confederacy slipped out of Confederate hands. This led to a naval blockade based in Key West that devastated commerce in Florida and beyond. This book is the widest-ranging narrative history to date of the military bastion in the Florida Keys.

**Marvel Comics into Film** Matthew J. McEniry,Robert Moses Peaslee,Robert G. Weiner,2016-04-05 Marvel Studios' approach to its Cinematic Universe--beginning with the release of Iron Man (2008)--has become the template for successful management of blockbuster film properties. Yet films featuring Marvel characters can be traced back to the 1940s, when the Captain America serial first appeared on the screen. This collection of new essays is the first to explore the historical, textual and cultural context of the larger cinematic Marvel universe, including serials, animated films, television movies, non-U.S. versions of Marvel characters, films that feature characters licensed by Marvel, and the contemporary Cinematic Universe as conceived by Kevin Feige and Marvel Studios. Films analyzed include Transformers (1986), Howard the Duck (1986), Blade (1998), Planet Hulk (2010), Iron Man: Rise of Technovore (2013), Elektra (2005), the Conan the Barbarian franchise (1982-1990), Ultimate Avengers (2006) and Ghost Rider (2007).

The End of Woman Carrie Gress,2023-08-15 Feminism Doesn’t Empower Women. It Erases Them. The bestselling author of Theology of Home, Carrie Gress shows that fifty years of radical feminism have solidified the primacy of the traditionally male sphere of life and devalued the attributes, virtues, and strengths of women. Feminism, the ideology dedicated to smashing the patriarchy, has instead made male lives the norm for everyone. After fifty years of radical feminism, we can’t even define woman. In this powerful new book, Carrie Gress says what cannot be said: feminism has abolished women. Hulking trans women thrash female athletes. Mothers abort their baby girls. Drag queens perform obscene parodies of women. Females are enslaved for men’s pleasure—or they enslave themselves. Feminism doesn’t avert these tragedies; it encourages them. The carefree binge of self-absorption has left women exploited, unhappy, dependent on the state, and at war with men. And still, feminists cling to their illusions of liberation. But there are real answers. Real answers for real women. Carrie Gress—a wife, mother, and philosopher—punctures the myth of feminism, exposing its legacy of abuse, abandonment, and anarchy. From the serpent’s seduction of Eve to Mary Shelley’s Frankenstein to Kate Millett’s lust, violence, and insanity to Meghan Markle’s havoc-ridden rise to royalty, Gress presents a history as intriguing as the characters who lived it. The answers women most desperately need, she concludes, are to be found precisely where they are most afraid to look. Only a rediscovery of true womanhood—and motherhood—can pull our society back from the brink. And happiness is possible only if women are open to making peace with men, with children, with God, and—no less difficult—with themselves. For feminism’s victims, Gress is a welcoming voice in the darkness: The door is open. The lights are on. Come home.
