Mama's Pick Jonetta Whitten-Stephens,2002-11 A Kiss for Grandma: For Mothers Whose Daughters have Babies of their Own by Edwina Gary Experience a heart-warming story of one mother's emotional connection to her daughter's first pregnancy; experience one woman's joy of becoming a grandmother. This is a wonderful story of a journey back in time and a journey into the future-all in nine months. Through her daughter's pregnancy, a soon-to-be grandmother relives moments of her own pregnancy and is brought face-to-face with questions about her own role as a mother. How did you feel when your daughter told you that she was pregnant? What were your thoughts? Edwina was ambivalent. She was happy for her daughter, but ambivalent. Eventually her unborn grandbaby put everything in a new perspective. Settle back for a few moments of the heart. You will laugh and cry at the same time. This story is a story of puppy love and goose bumps and second chances. Edwina was very happy; but she was just not connected until a Kiss for Grandma touched her heart and changed her life.

Mama's Song Gayle Jennings,2014-11-17 Mama's Song is a portrait of life in the tiny rural community of Elgood, West Virginia, in the early 1900s. It centers around the Higginbothams, a close-knit farming family, and particularly on Maude, their youngest daughter. It chronicles how their lives are shaped by historical events,

their own personal choices, and the trials they face in an era before modern conveniences and modern medicine. They are just an ordinary family--none of them pursue or gain worldly fame. Even so, their unassuming lives are powerful examples of faith, perseverance, and sacrificial love, and the impact that simple acts of kindness have on the lives of others. Their journey through life teaches them that love, loss, and grief are intertwined and will always be so, this side of heaven.

Academic Discourse across Cultures Igor Lakić, Milica Vuković, Branka Živković, 2015-09-10 Academic discourse has recently become a blooming field of research for linguists interested in genre and discourse analysis, as well as pragmatics. The methodology and conventions employed in academic discourse, however, vary across cultures to a certain degree, and often represent obstacles for publishing in international journals for authors whose native language is not English, as top journals tend to centre on the Anglo-Saxon academic writing norms. This is one of the major reasons why national academic discourses need to be linguistically profiled and studied and contrastively compared against these norms. This volume contributes to this very objective by shedding light on academic discourse as effectuated in various, mostly Balkan countries, and contrasts it against the corresponding western, English discourse. Furthermore, academic discourse is studied through a variety of genres it can assume, such as research articles, conference proceedings, and university lectures. Through exploring the cultural differences in academic discourse and the standards of international academic writing, this volume offers readers a chance to become better equipped in publishing abroad. Opening with a chapter focusing on the general structure of research articles and national writing habits as a potential hindrance to publishing abroad, the book goes on to study the rhetorical structure of the abstracts, introductions and conclusions of research articles in linguistics, economics and civil engineering. The second part of the book deals with hedging, contrastively studied in international and national journals, with the following chapters studying cohesion as accomplished in academic writing. Part three deals with the syntactic and semantic features of academic discourse. This book will be of particular interest to linguists interested in genre and discourse analysis in general and academic discourse, and will also appeal to scholars from other research backgrounds wishing to familiarise themselves with international and national academic conventions, and thus overcome the hurdles relating to academic writing conventions when publishing abroad.

Communicate what You Mean Carroll Washington Pollock, Samuela Eckstut-Didier, 1997 Now in its second edition, this text helps students gain an excellent foundation in English grammar through numerous exercises, both oral and written. Discussion topics include pollution, politics, and cultural differences and similarities.

Cities and Cinema Barbara Menzel, 2008-03-19 Films about cities abound. They provide fantasies for those who recognize their city and those for whom the city is a faraway dream or nightmare. How does cinema rework city

planners' hopes and city dwellers' fears of modern urbanism? Can an analysis of city films answer some of the questions posed in urban studies? What kinds of vision for the future and images of the past do city films offer? What are the changes that city films have undergone? *Cities and Cinema* puts urban theory and cinema studies in dialogue. The book's first section analyzes three important genres of city films that follow in historical sequence, each associated with a particular city, moving from the city film of the Weimar Republic to the film noir associated with Los Angeles and the image of Paris in the cinema of the French New Wave. The second section discusses socio-historical themes of urban studies, beginning with the relationship of film industries and individual cities, continuing with the portrayal of war torn and divided cities, and ending with the cinematic expression of utopia and dystopia in urban science fiction. The last section negotiates the question of identity and place in a global world, moving from the portrayal of ghettos and barrios to the city as a setting for gay and lesbian desire, to end with the representation of the global city in transnational cinematic practices. The book suggests that modernity links urbanism and cinema. It accounts for the significant changes that city film has undergone through processes of globalization, during which the city has developed from an icon in national cinema to a privileged site for transnational cinematic practices. It is a key text for students and researchers of film studies, urban studies and cultural studies.

The Healer's Power Howard Brody, 1992 Although the physician's use and misuse of power have been discussed in the social sciences and in literature, they have never been explored in medical ethics until now. In this book, Dr. Howard Brody argues that the central task is not to reduce the physician's power, as others have suggested, but to develop guidelines for its use, so that the doctor shares with the patient both information and the responsibility for deciding on appropriate treatment. Dr. Brody first reviews literary works dealing with medical power, from Dostoevsky's *The Grand Inquisitor* to stories by William Carlos Williams, Vonda McIntyre, and Richard Selzer. These works, he shows, reveal the healers' ambivalence over their own power and patients' fears of the abuse of power. Dr. Brody then points out important but neglected ethical issues that emerge from an analysis of power, such as the tension between care of individual patients and the pressures of the doctor's workload; the rescue fantasy that impels some physicians to extraordinary lengths to save a life; and the economic system, which rewards surgeons and other specialists more than it does physicians who spend time talking with patients about their problems. He also shows how the perspective of shared power can shed new light on standard topics in medical ethics--from informed consent and confidentiality to resource allocation and cost containment.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
