*Performance Art in China* Thomas J. Berghuis, 2006 Performance Art in China takes as its subject one of the most dynamic and controversial areas of experimental art practice in China. In his comprehensive study, Sydney-based theorist and art historian Thomas J. Berghuis introduces and investigates the idea of the role of the mediated subject of the acting body in art, a notion grounded in the realization that the body is always present in art practice, as well as its subsequent, secondary representations. Through a series of in-depth case studies, Berghuis reveals how, during the past 25 years, Chinese performance artists have acted out their art, often in opposition to the principles governing correct behavior in the public domain. In addition to a 25-year chronology of events, a systematic index of places, names and key terms, as well as a bibliography and a glossary in English and Chinese, this study also offers the reader numerous previously unpublished photos and documents.

Reference Asian Man International Atomic Energy Agency, 2008 This document presents the first ever set of independently generated data on dietary intakes and organ contents of elements that are important in radiological protection, namely, caesium, iodine, strontium, thorium and uranium, in Asian populations. In addition to the collection of information on elements that are important in radiological protection and in publications on Reference Man including Asian populations, this project also generated data on elements of interest in nutrition and human health. The results presented in this document will thus be of interest not only to professionals involved in aspects of radiological protection associated with unsealed sources but also to nutritionists and other health professionals monitoring intakes of trace elements.

**Handbook of Anatomical Models for Radiation Dosimetry** Xie George Xu, Keith F.

Eckerman, 2009-09-01 Over the past few decades, the radiological science community has developed and applied numerous models of the human body for radiation protection, diagnostic imaging, and nuclear medicine therapy. The Handbook of Anatomical Models for Radiation Dosimetry provides a comprehensive review of the development and application of these computational models, known as phantoms. An ambitious and unparalleled project, this pioneering work is the result of several years of planning and preparation involving 64 authors from across the world. It brings together recommendations and information sanctioned by the International Commission on Radiological Protection (ICRP) and documents 40 years of history and the progress of those involved with cutting-edge work with Monte Carlo Codes and radiation protection dosimetry. This volume was in part spurred on by the ICRP's key decision to adopt voxelized computational phantoms as standards for radiation protection purposes. It is an invaluable reference for those working in that area as well as those employing or developing anatomical models for a number of clinical applications. Assembling the work of nearly all major phantom developers around the world, this volume examines: The history of the research and development in computational phantoms Detailed accounts for each of the well-known phantoms, including the MIRD-5, GSF Voxel Family Phantoms, NCAT, UF Hybrid Pediatric Phantoms, VIP-Man, and the latest ICRP Reference Phantoms Physical phantoms for experimental radiation dosimetry The smallest voxel size (0.2 mm), phantoms developed from the Chinese Visible Human Project Applications for radiation protection dosimetry involving environmental, nuclear power plant, and internal contamination exposures Medical applications, including nuclear medicine therapy, CT examinations, x-ray radiological image optimization, nuclear medicine imaging, external photon and proton treatments, and management of respiration in modern image-guided radiation treatment Patient-specific phantoms used for radiation treatment

planning involving two Monte Carlo code systems: GEANT4 and EGS Future needs for research and development Related data sets are available for download on the authors' website. The breadth and depth of this work enables readers to obtain a unique sense of the complete scientific process in computational phantom development, from the conception of an idea, to the identification of original anatomical data, to solutions of various computing problems, and finally, to the ownership and sharing of results in this groundbreaking field that holds so much promise.

**Dialogue** Lu Xiao 晓,2010-06-01 What forces continue to oppress and restrain women artists in contemporary China? Some powerful answers are provided in this fictional memoir of Xiao Lu, who played an important role in the avant-garde cultural scene during the tumultuous early months of 1989. The acclaimed China/AvantGarde exhibition organized by Gao Minglu at the National Art Museum in Beijing was shut down after about three hours from its opening Feb. 5 1989, when Xiao Lu shot live bullets into her mock-up of two telephone booths, turning an edgy installation work into an over-the-edge performance piece and an icon of the modern Chinese art movement. Many questions were left unanswered from where she got the gun to what she meant by all this. As it turns out, the man and the woman pictured in these two phone booths were specific people, and she was one of them the daughter of the director of a provincial art academy. Her father helped her get into the Central Academy in Beijing, where she was abused in various ways. In the 1989 exhibition, symbolically, she shot her nemesis, then went outside to a public telephone, called him, and told him what she had done. These events are naturally at the center of her memoir, but in describing the events and their aftermath, she offers remarkably candid views on the difficulties facing women in contemporary art circles and the way cultural power is exercised in China.--Publisher description.

*The Silver Market Phenomenon* Florian Kohlbacher, 2008 The current shift in demographics - aging and shrinking populations - in many countries around the world presents a major challenge to companies and societies alike. One particularly essential implication is the emergence and constant growth of the so-called silver market, the market segment more or less broadly defined as those people aged 55 and older. Increasing in number and share of the total population while at the same time being relatively well-off, this market segment can be seen as very attractive and promising, although still very underdeveloped in terms of product and service offerings. This book offers a thorough and up-to-date analysis of the challenges and opportunities in leveraging innovation, technology, product development and marketing for elder consumers and employees. Key lessons are drawn from the Japanese lead market as well as other select countries.

**Golden Aging** Maurizio Bussolo, Johannes Koettl, Emily Sinnott, 2015-06-23 Societies across Europe and Central Asia are aging, but people are not necessarily living longer. This demographic trend-caused by a decrease in fertility rather than improved longevity-presents both challenges and opportunities for governments, the private sector, and individuals alike. Some of the challenges are well known. Output per capita becomes smaller if it is shared with an increasingly larger group of dependent older people. At a certain point, there may not be sufficient resources to maintain the living standards of this older group, especially if rising expenditures on health care, long-term care, and pensions must be financed through the contributions and taxes paid by ever-smaller younger age groups. Working adults also contribute the most to the pool of savings. As the size of this group shrinks, savings will decline. But these challenges can be transformed into opportunities. Consider these examples: As longevity increases, workers tend to stay in the workforce longer, and, with the

right incentives, they will increase their savings. Many current workers, and perhaps even more in the future, will thus not necessarily become dependent once they turn 65. And with slower population growth and smaller young age groups, societies will have an opportunity to improve the quality of education and maintain productivity. Firms in some countries are already adapting by capitalizing on skills that appreciate with age. Cardiovascular diseases account for more than half the difference in life expectancy (above age 50) between the region and Western Europe for men and 75 percent of the corresponding difference for women. Healthier behavior and health systems focused on preventive care could, with no cost increase, dramatically reduce this risk. These opportunities are not to be missed. As populations age, public discourse ranges from concerns about economic decline and fiscal sustainability of pensions and health systems to optimism about opportunities for healthier and more productive aging. The main contribution of Golden Aging is perhaps to show that demography and its consequences are not fixed. Much will depend on how people, firms, and societies adapt and how policy makers and institutions facilitate their behavioral adjustments. The future for Europe and Central Asia does not have to be gray-it can be a golden era of healthy, active, and prosperous aging.

**Economic Foundations for Creative Ageing Policy** Andrzej Klimczuk, 2015-08-12 Ageing populations are a major consideration for socio-economic development in the early twenty-first century. This demographic change is mainly seen as a threat rather than as an opportunity to improve the quality of human life, especially in Europe, where ageing has resulted in a reduction in economic competitiveness. Economic Foundations for Creative Ageing Policy mixes the silver economy, the creative economy, and the social economy to construct positive solutions for an ageing population. Klimczuk covers theoretical analyses and case study descriptions of good practices to

suggest strategies that could be internationally popularized.

*Salesman in Beijing* Arthur Miller, 2005 In 1983, Arthur Miller was invited to Beijing to direct the first Chinese production of *Death of a Salesman*. This book is the diary he kept during of that unique and eccentric production. The diary portrays the challenges that faced Miller as a Liberal American playwright and director working in Communist China. Miller's major concern was how to overcome the linguistic and cultural difficulties of trying to communicate his artistic vision to a Chinese cast. The result is not merely an interesting account of a highly unusual production, but it also reveals the process any production may go through, and is an insight into the mind of a considerate director. \* Long-overdue reissue of a seminal theatre book by the great American dramatist.

**Subversive Expectations** Sally Banes, 1998 The rise of performance art as chronicled by renowned critic Sally Banes. Her approach to the complex matrix of art, community, and culture draws on histories and theories of painting, photography, dance, theater, and folklore. Her vivid descriptions and provocative interpretations fill a gap in the history of contemporary performance--where the avant-garde met the mainstream.

*The Other Shore* Gao Xingjian, 1999-06-15 Gao Xingjian is the leading Chinese dramatist of our time. He is also one of the most moving and literary writers for the contemporary stage. His plays have been performed all around the world, including China, Hong Kong, Taiwan, Japan, Australia, the Ivory Coast, the United States, France, Germany and other European countries. Born and educated in China, Gao studied French literature at the Beijing Foreign Languages Institute between 1957-1962. After the Cultural Revolution, he became a resident playwright at the Beijing People's Art Theatre. His works, including *Bus Stop*, *Absolute Signal*, and *Wilderness Man*, were trend-setting and have created many controversies and a wave of experimental drama in China. In 1987 he settled

in Paris, France and continued to write in Chinese and in French. He was awarded the Chevalier de l'Ordre des Arts et des Lettres by the French Government in 1992. The present collection contains five of Gao Xingjian's most recent works: *The Other Shore* (1986), *Between Life and Death* (1991), *Dialogue and Rebuttal* (1992), *Nocturnal Wanderer* (1993), and *Weekend Quartet* (1995). One finds poetry, comedy as well as tragedy in the plays, which are graced by beautiful language and original imagery. Combining Zen philosophy and a modern worldview, they serve to illuminate the gritty realities of life, death, sex, loneliness, and exile, all essential concerns in Gao's understanding of the existence of modern man. The plays are also manifestations of the dramatist's idea of the tripartite actor, a process by which the actor neutralizes himself and achieves a disinterested observation of his self in performance.

Effective Investments on Capital Markets Waldemar Tarczyński, Kesra Nermend, 2019-07-17 This proceedings volume presents current research and innovative solutions into capital markets, particularly in Poland. Featuring contributions presented at the 10th Capital Market Effective Investments (CMEI 2018) conference held in Międzyzdroje, Poland, this book explores the future of capital markets in Poland as well as comparing it with the capital markets of other developed regions around the world. Divided into four parts, the enclosed papers provide a background into the theoretical foundations of capital market investments, explores different approaches—both classical and contemporary—to investment decision making, analyzes the behaviors of investors using experimental economics and behavioral finance, and explores practical issues related to financial market investments, including real case studies. In addition, each part of the book begins with an introductory chapter written by thematic editors that provides an outline of the subject area and a summary of the papers presented.

*Aging in Europe* J. J. F. Schroots,1999 Human aging is perhaps the most complex and important subject that will be facing science and societies in the next century. Persons seem to be living longer and remaining more active than their parents and grandparents. This is leading to social and demographic shifts that must be accommodated by society. On the other hand it presents perplexing questions about the underlying processes and determinants of healthy aging. This book gives a design for research that will increase our understanding of the factors that influence healthy aging and can lead to improvements in reducing the levels of disability in the population. It's focus is on biobehavioural and psychological factors contributing to healthy aging. Since human aging is determined by many interacting conditions inside and outside of the organism, research should concentrate on ecological relationships between the human organism and its social and physical environment. Not only individual characteristics associated with aging are discussed in this book, but also their impacts on society. Living longer means most persons will have fewer years to earn money to maintain their lives in a longer retirement. How can these two forces be resolved through public policy? At the same time greater competence in the later years needs clues to ways of releasing this productivity for the benefit of society and individuals. Adding healthy life expectancy and creating as much as possible disability-free years is a goal that can only be reached through fact

finding by a multidisciplinary team of scientist collaborating on an international basis. Such a team is present in the collaborators represented in this book. The information presented in 'Aging in Europe' has not been available in any single source before. In many ways this book provides a model of gaining knowledge through cooperation that should guide us in the next century and beyond.

*Eudemus of Rhodes* William Fortenbaugh, 2018-01-31 Eudemus of Rhodes was a pupil of Aristotle in the second half of the fourth century BCE. When Aristotle died, having chosen Theophrastus as his successor, Eudemus returned to Rhodes where it appears he founded his own school. His contributions to logic were significant: he took issue with Aristotle concerning the status of the existential is, and together with Theophrastus he made important contributions to hypothetical syllogistic and modal logic. He wrote at length on physics, largely following Aristotle, and took an interest in animal behavior. His histories of geometry, arithmetic, and astronomy were of great importance and are responsible for much of what we know of these subjects in earlier times. Volume 11 in the series Rutgers Studies in Classical Humanities is different in that it is composed entirely of articles that discuss Eudemus from a variety of viewpoints. Sixteen scholars representing seven nations have contributed essays to the volume. A special essay by Dimitri Gutas brings together for the first time the Arabic material relating to Eudemus. Other contributors and essays are: Hans B. Gottschalk, Eudemus and the Peripatos; Tiziano Dorandi, Quale aspetto controverso della biografia di Eudemo di Rodi; William W. Fortenbaugh, Eudemus' Work On Expression; Pamela M. Huby, Did Aristotle Reply to Eudemus and Theophrastus on Some Logical

Issues?; Robert Sharples, Eudemus Physics: Change, Place and Time; Han Baltussen, Wehrli's Edition of Eudemus of Rhodes: The Physical Fragments from Simplicius' Commentary on Aristotle's Physics; Sylvia Berryman, Sumphues and Suneches: Continuity and Coherence in Early Peripatetic Texts; Istvbn Bodnbr, Eudemus' Unmoved Movers: Fragments 121-123b Wehrli; Deborah K. Bowen, Eudemus' History of Early Greek Astronomy: Two Hypotheses; Dmitri Panchenko, Eudemus Fr. 145 Wehrli and the Ancient Theories of Lunar Light; and Gbbor Betegh, On Eudemus Fr. 150 Wehrli.[Eudemus of Rhodes] marks a substantial progress in our knowledge of Eurdemus. For it enlarges the scope of the information available on this author, highlights the need of, and paves the way to, a new critical edition of the Greek fragments of his works, and provides a clearer view of his life, thought, sources and influence. In all these respects, it represents a necessary complement to Wehrli's edition of Eudemus' fragments. -Amos Bertolacci, The Classical BulletinIstvbn Bodnbr is a member of the philosophy department at the Eotvos University in Budapest, where he teaches and does research on ancient philosophy. He has been a junior fellow at the Center for Hellenic Studies and most recently has been an Alexander von Humboldt Stipendiat in Berlin at the Max Plank Institut for Wissenschaftsgeschichte and at the Freie Universitot.William W.
