Beyond NJ 9842 Nitin A Gokhale, 2015-04-27 Operation Meghdoot was launched by the Indian Army on the barren and icy heights of the Siachen Glacier to thwart Pakistan from gaining control of this strategically located glacier. For three decades since then, Indian and Pakistani troops have been locked in an undeclared war on the world's highest - and coldest - battlefield.

The Fear that Stalks Lora Prabhu, Sarah Pilot, 2014-03-11 This book is an attempt to understand the causes, nature and consequences of gender-based violence in public spaces. It provides a framework that locates gender based violence within the politics and dynamics of public space, and helps us to understand the commonality between these diverse forms of violence, ranging from sexual harassment, sexual assault, moral policing, 'honour' killing, acid throwing, witch hunting, parading naked, tonsuring, rape and homicide. The writers unpack and examine the idea of a 'public' space: although by and large a notional space, they begin by identifying it as the geographical space between the home and the workplace and then, go beyond this to look at the violation faced by homeless women and girls who live on the streets, as well as those who work in public spaces in the unorganised sector. Published by Zubaan.

Dissent on Core Beliefs Simone Chambers, Peter Nosco, 2015-04-23 This volume explores how nine different religious and secular traditions deal with pluralism, dissent, and the challenges these issues pose.

Power and Contestation Nivedita Menon, Aditya Nigam, 2008-02-29 1989 marks the unraveling of India's 'Nehruvian Consensus' around the idea of a modern, secular nation with a self-reliant economy. Caste and religion have come to play major roles in national politics. Global economic integration has led to conflict between the state and dispossessed people, but processes of globalization have also enabled new spaces for political assertion, such as around sexuality. Older challenges to the idea of India continue from movements in Kashmir and the North-East, while Maoist insurgency has deepened its bases. In a world of American Empire, India as a nuclear power has abandoned non-alignment, a shift that is contested by voices within. *Power and Contestation* shows that the turbulence and turmoil of this period are signs of India's continued vibrancy and democracy. The book is an ideal introduction to the complex internal histories and external power relations of a major global player for the new century.

Coastal Regulation in India - Why Do We Need a New Notification? ,

Lobbyists Rajeev Jayaswal, 2017-01-06 In early 2000, India caught attention of global petroleum giants after it announced world's biggest gas discovery. In 2004, it

announced another world-class oil discovery in Rajasthan. These developments raised India's hope that the world's fourth largest oil importer would be able to significantly reduce over-dependence on the Gulf and other oil producing countries. But, subsequent developments belied the hope. Soon India's oil and gas dream turned out to be a nightmare. Controversies gripped domestic oil and gas industry. Greed for gas resulted into a major corporate war. It involved politicians, media and some members of the civic society. The Congress-led Manmohan Singh government was accused of encouraging crony capitalism. Allegations of corruption triggered probes by auditors and investigative agencies. Bureaucrats stopped taking decisions. The government suffered acute policy paralysis. Exploration and production of oil and gas suffered. In less than one decade India's import dependence jumped. India left Japan behind to become world's third largest oil importer after the United States and China. This would have comforted oil exporting countries. India would continue to remain their most dependable market as it imported more than 80% crude oil it processes. The future \$150-160 oil market was secure thanks to intense internal strife over oil and gas matters. But, a question remained unanswered. Was the decade-long turbulence sponsored by some lobbyists having share in this import pie? This book is an attempt to examine it. Was it a mere coincidence that India's energy security engagements with neighbours, particularly with Iran lost vigour after the first Oil Minister Mani Shankar Iyer was removed? Was the Civil Nuclear Deal an American sugar-coated pill that contained the Nuclear Non-proliferation Treaty (NPT)? The book highlights certain factual developments at that time that would throw some light on these questions. This book is also iconoclastic. It attempts to change the popular

perception created by certain groups or individuals around the oil and gas sector controversies. It explains how certain political and corporate elements took advantage of the confusion to pursue their self interests? What was perceived as black was in fact, not so dark and what was felt completely white, had shades of gray. So far people had been shown only 180-degree of the oil and gas controversies. This book brings up the other side of the picture, which was hitherto hidden. This is an attempt to complete the circle so that reader can form a 360-degree picture.

Gender, Governance and Empowerment in India

Sreevidya Kalaramadam, 2016-03-22 Since the mid-1980s, the presence of women in governance has become a major marker of successful democracy in global and national discourses on the democratization of society. A diverse set of nation-states have legislatively mandated gender quotas to ensure the presence of elected women representatives (EWRs) in various rungs of governance. Since 1993, the Indian state has legislated a massive program of democratization and decentralization. As a result, more than 1.5 million EWRs have taken office within the lower rungs of governance or the Panchayati Raj Institutions (PRI). This book is an ethnography of the Indian state and its policy of legislated entry of women into political life. It argues that political participation of women is necessary to change the political practices in society, to make institutions more gender, class and caste representative, and to empower individual women to negotiate both formal and informal institutions. Its locus is the everyday life contexts of EWRs in the southern Indian state of Karnataka who negotiate their own meanings of politics, state, society, empowerment and political subjectivity. Analysing three factors - structural boundaries, sociocultural

divisions and conjunctural limitations imposed on the participation of EWRs by political parties – the book demonstrates that the social embeddedness of PRIs within everyday practices and social relations of identity and power severely constrain and shape the political participation and empowerment of EWRs. Providing a valuable insight into contemporary state and feminist praxis in India, this book will be of interest to scholars of grass-roots democracy, gender studies and Asian politics.

Tribal women Entrepreneurs: Problems and Prospectus

Dr. Sushama Rajeev Hasabnis, 2017-08-17 Why is the number of women entrepreneurs low among tribal people? What problems do women in these tribes face? What measures can they take to overcome their problems? What are their prospects as entrepreneurs? A person who has any of these queries, will find answers within this book. *Tribal Women Entrepreneurs: Problems and Prospectus* is a study to aid policy makers, planners, researchers, academicians, and existing or potential tribal women entrepreneurs.

You must achieve seamless integration for operations personnel to work with the solution. This integration is necessary to ensure that the product can be used easily by the users. Product integration contains multiple dimensions, such as security, navigation, data and task integrations. Within the context of the scenarios in this book, you see examples of these integrations. The scenarios implemented in this book are largely based on the input from the integration team, and several clients using IBM products. We based these scenarios on common real-life examples that IT operations often have to deal with. Of course, these scenarios are only a small subset of the possible integration scenarios that can be accomplished by the Tivoli products, but they were chosen to be representative of the integration possibilities using the Tivoli products. We discuss these implementations and benefits that are realized by these integrations, and also provide sample scenarios of how these integrations work. This book is a reference guide for IT architects and IT specialists working on integrating Tivoli products in real-life environments.

Persecuted Paul A. Marshall, Lela Gilbert, Nina Shea, 2013 A timely journalistic look inside worldwide Christian persecution. The persecution of Christians is widespread and increasing in many areas. In 2010, the Pew Forum on Religion and Public Life, the gold standard of contemporary religion statistics, concluded that Christians are the most widely persecuted religious group in the world. In December 2010, the Vatican reported the same conclusion. This timely and well-documented book tells this story well, in a journalistic and lively way, punctuated with compelling stories. *Persecuted* offers readers an overview

of Christian persecution, analyzing patterns of repression, abuse, and violence across the globe. It explores the reasons that specific ideological, religious, and political groups and establishments target Christian believers as enemies. Woven throughout are vivid examples of Christians persecuted and harassed for their faith. These cases illuminate the courage it takes to be a Christian in today's world. The book provides examples of how the church, including the American church, has successfully diminished or halted repression in other countries, and suggests the steps we can take together in the future.
