India-ASEAN Relations Dr. Tripti Sharma, 2021-09-11 The changes in the global environment such as the demise of the socialist system, initiation of globalization, the declining position of international organizations and reduction in the importance of forums like NAM have made it imperative for India to review its old foreign policy nuances. For long, India hardly regarded the countries of Southeast Asia and South Pacific as priority areas despite the latter's cultural, political, economic and strategic significance. The long spell of mutual alienation understandably gave way to mutual distrust and suspicion. This dark period in India's relations with the countries of Southeast Asia and South Pacific was, however, brought to an end following the reshaping and reorientation of India's foreign policy, manifest in the vigorous pursuit of 'Look East' policy, it was Prime Minister Narasimha Rao who concentrated on forging links and enhancing cultural, economic, political and strategic cooperation with Southeast Asia and transformed this important urge into India's foreign policy initiative that culminated in 'Look East' policy. India's engagement with the Association of Southeast Asian Nations (ASEAN) started with its Look East Policy in the year 1991. ASEAN has a membership of 10 countries, namely Brunei Darussalam, Cambodia, Indonesia, Laos PDR, Malaysia, Myanmar, Philippines, Singapore, Thailand and Vietnam. India became a sectoral dialogue partner of ASEAN in 1992 and full dialogue partner in 1996. In November 2001, the ASEAN-India relationship was upgraded to the summit level. Consequently, the latter had already registered impressive progress in the field of economy, strategy and cultural relations between India and ASEAN.

The Domestic Abroad Latha Varadarajan, 2010-10-08 In the past few decades, and across disparate geographical contexts, states have adopted policies and initiatives aimed at institutionalizing relationships with their diasporas. These practices, which range from creating new ministries to granting dual citizenship, are aimed at integrating diasporas as part of a larger global nation that is connected to, and has claims on the institutional structures of the home state. Although links, both formal and informal, between diasporas and their presumptive homelands have existed in the past, the recent developments constitute a far more widespread and qualitatively different phenomenon. In this book, Latha Varadarajan theorizes this novel and largely overlooked trend by introducing the concept of the domestic abroad. Varadarajan demonstrates that the remapping of the imagined boundaries of the nation, the visible surface of the phenomenon, is intrinsically connected to the political-economic transformation of the state that is typically characterized as neoliberalism. The domestic abroad must therefore be understood as the product of two simultaneous, on-going processes: the diasporic re-imagining of the nation and the neoliberal restructuring of the state. The argument unfolds through a historically nuanced study of the production of the domestic abroad in India. The book traces the complex history and explains the political logic of the remarkable transition from the Indian state's guarded indifference toward its diaspora in the period after independence, to its current celebrations of the global Indian nation. In doing so, The Domestic Abroad reveals the manner in which the boundaries of the nation and the extent of the authority of the state, in India and elsewhere, are dynamically shaped by the development of capitalist social relations on both global and national scales.

Language Policy Challenges in Multi-Ethnic Malaysia Saran Kaur Gill, 2013-12-09 Set in Malaysia, this book encompasses language and cultural policy challenges that many other multi-ethnic nations currently have to address. The people of Malaysia constitute a diverse ethnic, linguistic and cultural population and one of the continuing challenges is the development and establishment of the Malaysian people's ethnic, national and global cultural identities. This challenge is evident in the journey of language and cultural policy from the post-independence period to the 21st century; a period of over 50 years. The book highlights political, socio-cultural, economic and knowledge economy factors as they impact on decisions made by the government with regard to language policy in the various educational systems. It examines decisions made on the selection of the national language, the medium of instruction in educational systems, the varying changes in language policy for the field of science and technology and the maintenance and sustenance of minority languages.

Fundamentals of Applied Acarology Manjit Singh Dhooria, 2016-12-14 Acarology - the study of mites and ticks, is a subdiscipline of Zoology, and is many times considered in the field of Entomology (the study of insects). Mites and ticks are distributed throughout the world and inhabit almost every ecosystem (both terrestrial and aquatic) including grassland soils. More than 55,000 species of mites and ticks are already described. Mites and ticks directly affects humans as pests of different crops, fruit plants, vegetable crops and field crops; as parasites of human beings, veterinary animals, poultry and pets; pests of stored grains and other products; mushrooms and cheese; and as parasites of honeybees. Mite infestations are responsible for economic losses worth billions of dollars in terms of reduced crop yields and lowered quality of produce. Many species of mites serve as vectors of various plant diseases; some species of ticks cause losses through blood feeding and by transmitting many diseases among man and animals. House-dust mite allergies, and tick bite allergies are also common in many parts of the world. Present Book, Fundamentals of Applied Acarology, is written keeping in view non-availability of any standard text dealing in different aspects of acarology at one place. Separate chapters in this book are devoted to Importance of Acarology, Historical account, acarine technology, morphology and anatomy of Acari; Feeding, Development and Reproduction. Molecular developments in relation to mites and ticks are also discussed. Role of mites and ticks in Quarantines of plants and animals; forensic/criminal investigations; and importance of accidental acarophagy are discussed in detail. Safe usage of pesticides based on their mode of action (IRAC's Groups), development of acaricide resistance and measures to mitigate it are discussed. Mite pests of fruit trees, vegetable plants, and floricultural plants; field crops; mite problems in greenhouses/polyhouses; and mite problems encountered under organic cultivation of plants; and their management through minimum usage of pesticides are emphasized. Role of different predaceous mites in controlling plant pests like thrips, aphids and scale insects is elaborately discussed. Biological control of phytophagous mites is discussed in detail. Different animal parasitic mites and ticks are discussed from veterinary and medical point of view. At the end of each chapter, many important references for further reading; and Electronic References (ER) in the form of youtube links and other weblinks are given to understand fully how these tiny creatures look like; behave, feed and reproduce; nature of damage they cause to plants and animals; and measures to mitigate them. Weblinks will stimulate interest in the readers for more information about different mites and ticks. The knowledge contained in the book may prove as best material for General and Applied Acarology course for graduate and post-graduate levels, teachers and researchers in entomology, pest control advisors, professional entomologists, pesticide industry managers, policy planners, and others having interest in mites and ticks./div

Stepping Out of the Brain Drain Michele R. Pistone, John J. Hoeffner, 2007 *Stepping Out of the Brain Drain* is an important contribution to the intensifying debate about highly skilled migration from developing to developed countries. Addressing the issue from the perspective of Catholic social thought, the authors demonstrate that both the economic and ethical rationales for the teaching's opposition to 'brain drain' have been undermined in recent years and show how the adoption of a less critical policy could provide enhanced opportunities for poor countries to accelerate their economic development.

Music in Colonial Punjab Radha Kapuria, 2023-04-15 This book offers the first social history of music in undivided Punjab (1800-1947), beginning at the Lahore court of Maharaja Ranjit Singh and concluding at the Patiala royal darbar. It unearths new evidence for the centrality of female performers and classical music in a region primarily viewed as a folk music centre, featuring a range of musicians and dancers -from 'mirasis' (bards) and 'kalawants' (elite musicians), to 'kanjris' (subaltern female performers) and 'tawaifs' (courtesans). A central theme is the rise of new musical publics shaped by the anglicized Punjabi middle classes, and British colonialists' response to Punjab's performing communities. The book reveals a diverse connoisseurship for music with insights from history, ethnomusicology, and geography on an activity that still unites a region now divided between India and Pakistan.
