Proceedings of the Casualty Actuarial Society Casualty Actuarial Society, 1999 List of members for the years 1914-20 are included in v. 1-7, after which they are continued in the Year book of the society, begun in 1922.

Framing Age Iris Loffeier, Benoît Majerus, Thibault Moulart, 2017-05-12 Ageing populations have gradually become a major concern in many industrialised countries over the past fifty years, drawing the attention of both politics and science. The target of a raft of health and social policies, older people are often identified as a specific, and vulnerable, population. At the same time, ageing has become a specialisation in many disciplines -

medicine, sociology, psychology, to name but three - and a discipline of its own: gerontology. This book questions the framing of old age by focusing on the relationships between policy making and the production of knowledge. The first part explores how the meeting of scientific expertise and the politics of old age anchors the construction of both individual and collective relationships to the future. Part II brings to light the many ways in which issues relating to ageing can be instrumentalised and ideologised in several public debate arenas. Part III argues that scientific knowledge itself composes with objectivity, bringing ideologies of its own to the table, and looks at how this impacts discourse about ageing. In the final part, the contributors discuss how the frames can themselves be experienced at different levels of the division of labour, whether it is by people who work on them (legislators or scientists), by people working with them (professional carers) or by older people themselves. Unpacking the political and moral dimensions of scientific research on ageing, this cutting-edge volume brings together a range of multidisciplinary, European perspectives, and will be of use to all those interested in old age and the social sciences.

Modèle Du Workfare Ou Modèle de L'insertion? La Transformation de L'assistance Sociale Au Canada Et Au Quebec
Sylvie Morel, Canada. Status of Women Canada, 2002 The overall objective of this study is to do a comparative analysis of the principles and modalities that are shaping the transformation of social assistance policy in Canada, primarily in Quebec. It also takes a brief look at the experiences of Ontario and New Brunswick. It describes 2 models of government intervention in the conception and implementation of the new contract of social

assistance reciprocity between the poor and the State: workfare, as developed in the United States, and insertion, the chosen model in France. The focus of the study is to describe, in relation to these 2 models, the social assistance configuration of rights and duties currently being institutionalized between women and the State within Canada and Quebec.

Gifts B. P. Nichol, 2003 BpNichol's The Martyrology is a long poem begun in 1967 and continuing until Nichol's death in 1988. It includes Books 1 & 2 (1972), Book(s) 7 & (1990), and Ad Sanctos: Book 9 (1992). The text in this volume is a facsimile, with minor corrections, of the 1990 edition of Gifts. --Coach House Books.

Palliative Care for Older People Lieve Van Den Block, 2015 The ageing of society is becoming a major public health issue, posing challenges to social and health care structures in many countries. This book demonstrates the added value of palliative care which, although traditionally focused on cancer and the very end of life, can play a role in strengthening and complementing the care of older people. The book outlines the current state of worldwide policy work, research, and innovations in the field of public health and palliative care for older people and concludes with recommendations for policy and decision makers, at international and national level.

Learning and Cognition in Autism Eric Schopler, Gary B. Mesibov, 2013-06-29 This first-of-its-kind volume describes the cognitive and educational characteristics of people with autism. Leading experts in the field contribute papers to this book, explaining intervention techniques and strategies. Parents, researchers, professionals, and clinicians interested in educating people with autism will appreciate this volume.

Exploring Parliament Cristina Leston-Bandeira, Louise Thompson, 2018 The only text to combine academic and

practitioner perspectives with evidence based case studies to reveal what really goes on behind the scenes of Parliament. Draws on the perspectives of academics and parliamentary practitioners, to give students an authentic insight into the workings of Parliament. Provides a series of evidence-based case studies so that students can fully understand the reality of Parliament in practice. Explores the relationships between the different structures, parliamentarians and practitioners within Parliament on both a formal and an informal level, to enable student to understand the essential processes and actors. --

The Oxford Handbook of Numerical Cognition Roi Cohen Kadosh, Ann Dowker, 2015 How do we understand numbers? Do animals and babies have numerical abilities? Why do some people fail to grasp numbers, and how we can improve numerical understanding? Numbers are vital to so many areas of life: in science, economics, sports, education, and many aspects of everyday life from infancy onwards. Numerical cognition is a vibrant area that brings together scientists from different and diverse research areas (e.g., neuropsychology, cognitive psychology, developmental psychology, comparative psychology, anthropology, education, and neuroscience) using different methodological approaches (e.g., behavioral studies of healthy children and adults and of patients; electrophysiology and brain imaging studies in humans; single-cell neurophysiology in non-human primates, habituation studies in human infants and animals, and computer modeling). While the study of numerical cognition had been relatively neglected for a long time, during the last decade there has been an explosion of studies and new findings. This has resulted in an enormous advance in our understanding of the neural and cognitive mechanisms of numerical cognition. In addition, there has recently been increasing interest and concern about pupils' mathematical achievement in many countries, resulting in attempts to use research to guide mathematics instruction in schools, and to

develop interventions for children with mathematical difficulties. This handbook brings together the different research areas that make up the field of numerical cognition in one comprehensive and authoritative volume. The chapters provide a broad and extensive review that is written in an accessible form for scholars and students, as well as educationalists, clinicians, and policy makers. The book covers the most important aspects of research on numerical cognition from the areas of development psychology, cognitive psychology, neuropsychology and rehabilitation, learning disabilities, human and animal cognition and neuroscience, computational modeling, education and individual differences, and philosophy. Containing more than 60 chapters by leading specialists in their fields, the Oxford Handbook of Numerical Cognition is a state-of-the-art review of the current literature.

Shaking the World for Jesus Heather

Hendershot, 2010-03-15 In 1999, the Reverend Jerry Falwell outed Tinky-Winky, the purple character from TV's Teletubbies. Events such as this reinforced in many quarters the common idea that evangelicals are reactionary, out of touch, and just plain paranoid. But reducing evangelicals to such caricatures does not help us understand their true spiritual and political agendas and the means they use to advance them. *Shaking the World for Jesus* moves beyond sensationalism to consider how the evangelical movement has effectively targeted Americans—as both converts and consumers—since the 1970s. Thousands of products promoting the Christian faith are sold to millions of consumers each year through the Web, mail order catalogs, and even national chains such as Kmart and Wal-Mart. Heather Hendershot explores in this book the vast industry of film, video, magazines, and kitsch that evangelicals use to spread their message. Focusing on the center of conservative evangelical culture—the white, middle-class Americans who can afford to buy Christian

lifestyle products—she examines the industrial history of evangelist media, the curious subtleties of the products themselves, and their success in the religious and secular marketplace. To garner a wider audience, Hendershot argues, evangelicals have had to carefully temper their message. But in so doing, they have painted themselves into a corner. In the postwar years, evangelical media wore the message of salvation on its sleeve, but as the evangelical media industry has grown, many of its most popular products have been those with heavily diluted Christian messages. In the eyes of many followers, the evangelicals who purvey such products are sellouts—hucksters more interested in making money than spreading the word of God. Working to understand evangelicalism rather than pass judgment on it, *Shaking the World for Jesus* offers a penetrating glimpse into a thriving religious phenomenon.

Mathematical Difficulties ,2008-07-25 This book examines the mathematical difficulties in typical and atypical populations. It discusses the behavioural, educational and neuropsychological characteristics of people with mathematical difficulties, and educational interventions to prevent, diagnose, treat or ameliorate such difficulties. The book brings together studies from different disciplines, including developmental psychology, neuroscience and education, and includes perspectives from practicing teachers. The book is divided into three major sections. The first includes chapters about the nature and characteristics of mathematical difficulties in the population as a whole, in relation to both psychology and education. The second deals with mathematical difficulties in children with other problems such as specific language impairment and dyslexia. The third discusses methods of interventions aimed at preventing, treating or ameliorating mathematical difficulties, and will include discussions of assessment and diagnosis.

Disciplined Minds Jeff Schmidt,2000 In this book about the world of professional work, Jeff Schmidt demonstrates that the

workplace is inherently political and is a battleground for the very identity of the individual, as is graduate school where professionals are trained.
