*Scarlet Women* Ian Graham, 2016-01-26 In 1965, an impoverished elderly woman was found dead in Nice, France. Her death marked the end of an era; she was the last of the great courtesans. Known as La Belle Otero, she was a volcanic Spanish beauty whose patrons included Kaiser Wilhelm II, the Prince of Wales (later King Edward VII) and Grand Duke Nicholas of Russia. She accumulated an enormous fortune, but gambled it all away. *Scarlet Women* tells her story and many more, including: Marie Duplessis, who inspired characters by both Dumas and Verdi; Clara Ward, a rare American courtesan who hunted for a European aristocrat, but having married a Belgian prince, ran away with a gypsy violinist; Ninon de L'Enclos, who was offered 50,000 crowns by Cardinal Richelieu for one night. Money left in her will paid for Voltaire's education. Courtesans were an elite group of talented, professional mistresses. The most successful became wealthy and famous in their own right. While they led charmed lives, they occupied a curious position: they enjoyed freedom and political power unknown to most women, but they were ostracised by polite society. From the hetaerae of ancient

Greece to the cortigiani onesti of 16th century Venice, the oiran of Edo-period Japan to the demimondaines of 19th century France, this captivating book--perfect for readers of *A Treasury of Royal Scandals*--uncovers the rich, colorful lives of these women who dared to pursue fortunes outside their societies' norms.

**Vie­­i scandaloase: curtezane, concubine ­i amante celebre** Ian Graham, 2015-10-26 În 1965, o b­­trân­ era g­­sit­ moart­ într-o camer­ de hotel din Nisa. Moartea ei marca sfâr­itul unei epoci: era ultima mare curtezan­ din Europa. Cunoscut­ drept La Belle Otero, fusese o frumoșe­e spaniol­ vulcanic­ printre ai c­­rei protectori s-au num­rat kaizerul Wilhelm al II-lea, Prin­ul de Wales (ulterior regele Eduard al VII-lea) ­i marele duce Petru Nikolaevici al Rusiei. A acumulat o avere uriaș­, pe care îns­ a pierdut-o la jocurile de noroc. Vie­­i scandaloase cuprinde poveștile celor mai faimoase (sau r­­u-famate) femei, a c­­ror prad­ o constituiau cei mai boga­i ­i mai puternici b­­rba­i ai timpului lor. Între ele, Thaïs, celebra curtezan­ din Grecia antic­ responsabil­ pentru incendierea Persepolisului; Marie Duplessis, care a inspirat personajele din *Dama cu camelii* de Dumas ­i La

Traviata de Verdi; Cora Pearl, despre care se spune că, la una dintre petrecerile ei legendare, s-a servit goală oaspeților pe o tavă de argint; Ninon de L'Enclos, căreia cardinalul Richelieu i-a oferit 50.000 de coroane ca să petreacă o noapte în compania ei; Lola Montez, o falsă dansatoare spaniolă care a provocat o revoluție. *Meister Eckhart and the Beguine Mystics* Bernard McGinn, 1997-01-09 The great German mystic Meister Eckhart remains one of the most fascinating figures in Western thought. Revived interest in Eckhart's mysticism has been matched, and even surpassed, by the study of the women mystics of the late 13th century. This book argues that Eckhart's thought cannot be fully understood until it is viewed against the background of the breakthroughs made by the women mystics who preceded him.

Agricultural Drones K. R. Krishna, 2018-03-26 Agricultural drones are expected to revolutionize the way we conduct agronomic procedures and maintain natural vegetation on earth. This book explores

the increasing importance of the role of aerial robots in managing agricultural farms and natural resources. *Agricultural Drones: A Peaceful Pursuit* provides a wealth of information on drone usage in agriculture. The book discusses the advanced sensors and imaging capabilities of drones that give farmers new ways to increase yields and reduce crop damage. An introductory chapter provides historical data, with details about various models of drones as well as the most recent and popular agricultural drones in usage. The book goes on to look at such topics as the use of drones for soil fertility, production agronomy, irrigation, weed control, pest and disease control, grain yield forecasting, and economic advantages from drone use. This timely and useful volume will be a valuable resource for faculty, agricultural extension officers, and farmers and farm consultancy agencies. This book would also serve as an excellent textbook for students in agriculture, engineering, geography, etc. Key features:

- outlines the advantages of using drones in agriculture, such as for the management of soil fertility, the study of natural resources and vegetation, the maintenance of adequate irrigation, and the control of weeds and pests
- covers the economic advantages of using drones in agriculture
-

examines the regulatory aspects of agricultural drones • provides actual examples of drone usage in agriculture

**Measuring Distance to the SDG Targets 2019 An Assessment of Where OECD Countries Stand**  
OECD,2019-05-20 The Sustainable Development Goals (SDGs) set a broad and ambitious programme for the world to achieve by 2030. With 17 Goals, underpinned by 169 Targets, the complex and integrated nature of the 2030 Agenda presents national governments with huge challenges for implementation. To assist countries, the OECD has developed a unique methodology allowing comparison of progress across SDG goals and targets.

Abiotic Stress Physiology of Horticultural Crops N.K. Srinivasa Rao,K.S. Shivashankara,R.H. Laxman,2016-04-08 This book brings together recent advances in the area of abiotic stress tolerance in various vegetables, fruit crops, plantation crops and tuber crops. The main challenges to improving the productivity of horticultural crops are the different types of abiotic stresses generally caused by climate change at the regional and global level. Heat, drought, cold and salinity are the major abiotic

stresses that adversely affect growth and productivity and can trigger a series of morphological, physiological, biochemical and molecular changes in various horticultural crops. To date, there are no books covering horticultural crop-specific abiotic stress tolerance mechanisms and their management. Addressing that gap, the book is divided into 2 sections, the first of which highlights recent advances in the general aspects of abiotic stress tolerance like the role of hormones, reactive oxygen species, seed treatments, molecular mechanisms of heat tolerance and heavy metal toxicity, while the second focuses on the abiotic stress tolerance mechanisms of various vegetables, fruit crops, plantation crops and tuber crops. It includes comprehensive discussions of fruit crops like mango, grapes, banana, litchi and arid zone fruits; vegetables crops like tomato, capsicum, onion and tuber crops; and plantation crops like coconut, areca nut, oil palm and black pepper. Among the strategies for plant stress survival, examples of both avoidance and tolerance relevant to particular crops are examined in detail, supported by selected comprehensive case studies of progress. As such, the book offers a valuable resource suited for scientists and graduate students working in the fields of crop improvement, genetic

engineering, and the abiotic stress tolerance of horticultural crops.

**Immigration, Integration and Education** Oakleigh Welply, 2021-11-29 Winner of the 2023

Globalisation and Education SIG Best Book Award at CIES 2023! **Immigration, Integration and Education** offers a unique comparative analysis of the views and experiences of children of immigrants in school in France and England. It showcases how the theorization of children's narratives can offer

new methodological tools and insights in comparative education and help understand the different role of educational systems and discourses around issues of immigration, integration, race, language and religion. Presenting an in-depth analysis of children's own narratives, this book offers a close comparative examination of the French and English educational systems, and the ways in which they impact on the experiences and identities of children of immigrants. The narratives of the children reveal the multiple forms of othering, discrimination and exclusion that shape their experiences in school, but also the multiple strategies they deploy to navigate these complex educational landscapes. It stresses that beyond national ideologies and philosophies of integration, structural and cultural aspects need to be explored to understand the role played by schools in the inclusion of immigrant populations. This book is an essential resource for academics, researchers and graduate students in the fields of sociology of education, migration studies, intercultural education, educational policy and comparative and international education. It will also appeal to those who are committed to addressing inequalities and discrimination in education.

**The annals of St-Bertin** ,2013-01-01 The Annals of St-Bertin, covering the years 830 to 882, are the main narrative source for the Carolingian world in the ninth century. This richly-annotated translation by a leading British specialist makes these Carolingian histories accessible in English for the first time, encouraging readers to reassess and evaluate a crucially formative period of European history. Produced in the 830s in the imperial palace of Louis the Pious, The Annals of St-Bertin were continued away from the Court, first by Bishop Prudentius of Troyes, then by the great scholar-politician Archbishop Hincmar of Rheims. The authors' distinctive voices and interests give the work a personal tone rarely found in medieval annals. They also contain uniquely detailed information on Carolingian politics, especially the reign of the West Frankish king, Charles the Bald (840-877). No

other source offers so much evidence on the Continental activities of the Vikings. Janet L. Nelson offers in this volume both an entrée to a crucial Carolingian source and an introduction to the historical setting of the Annals and possible ways of reading the evidence. The Annals of St-Bertin will be valuable reading for academics, research students and undergraduates in medieval history, archaeology and medieval languages. It will also fascinate any general reader with an interest in the development of European culture and society.

*The Prince, the Princess and the Perfect Murder* Andrew Rose,2014 The royal family's darkest secret and the establishment cover-up. Never told before, this is the story of Edward, the Prince of Wales, the true love of his life, and the murder of an Arab playboy. It takes place in maisons de rendezvous, luxurious chateaux in the French countryside providing hospitality for the British upper classes, the richest food, the finest wines and the most beautiful women - in Paris in the Ritz and the demi-monde - where many of the women came from - and an exclusive location in London where the

murder was committed. This major royal scandal, superbly covered up by the Royal Household and the judiciary has remained secret ever since. The Prince, the Princess and the Perfect Murder is the product of several years' research, accessing unpublished documents held in the Royal Archives and private collections in England and France.--Publisher's description.

Viticulture and Winemaking under Climate Change Helder Fraga,2019-12-19 The importance of viticulture and the winemaking socio-economic sector is acknowledged worldwide. The most renowned winemaking regions show very specific environmental characteristics, where climate usually plays a central role. Considering the strong influence of weather and climatic factors on grapevine yields and berry quality attributes, climate change may indeed significantly impact this crop. Recent trends already point to a pronounced increase in growing season mean temperatures, as well as changes in

precipitation regimes, which have been influencing wine typicity across some of the most renowned winemaking regions worldwide. Moreover, several climate scenarios give evidence of enhanced stress conditions for grapevine growth until the end of the century. Although grapevines have high resilience, the clear evidence for significant climate change in the upcoming decades urges adaptation and mitigation measures to be taken by sector stakeholders. To provide hints on the abovementioned issues, we have edited a Special Issue entitled “Viticulture and Winemaking under Climate Change”. Contributions from different fields were considered, including crop and climate modeling, and potential adaptation measures against these threats. The current Special Issue allows for the expansion of scientific knowledge in these particular fields of research, as well as providing a path for future research.
