Austrian Women in the Nineteenth and Twentieth Centuries David F. Good, Margaret Grandner, Mary Jo Maynes, 1996 This volume, the first of its kind in English, brings together scholars from different disciplines who address the history of women in Austria, as well as their place in contemporary Austrian society, from a variety of theoretical and methodological perspectives, thus shedding new light on contemporary Austria and in the context of its rich and complicated history.

Our Italian Surnames Joseph Guerin Fucilla, 1987 Given by Eugene Edge III.

Utopian Feminism Harriet Anderson, 1992-01-01 Women's movements in Vienna at the turn of the 20th century made valuable and original contributions to social reform, feminist ideology and the artistic and intellectual trends of the era. This book discusses their historical development, the activities, personalities and writings of their predominantly middle-class members, and the Viennese culture and politics in which they flourished.

Bomb Scare Joseph Cirincione, 2007 Presents a history of the development and proliferation of nuclear weapons, an analysis of the current crisis with Iran, and advice on what can be done to enforce arms control and ensure peaceful uses of nuclear energy.

Beyond the Screen Jürgen Schäfer, Peter Gendolla, 2015-07-31 While literature in computer-based and networked media has so far been experienced by looking at the computer screen and by using keyboard and mouse, nowadays human-machine interactions are organized by considerably more complex interfaces. Consequently, this book focuses on literary processes in interactive installations, locative narratives and immersive environments, in which active engagement and bodily interaction is required from the reader to perceive the literary text. The contributions from internationally renowned scholars analyze how literary structures, interfaces and genres change, and how transitory aesthetic experiences can be documented, archived and edited.

Experiencing Narrative Worlds Richard Gerrig, 2018-02-23 What does it mean to be transported by a narrative? to create a world inside one's head? How do experiences of narrative worlds alter our experience of the real world? In this book Richard Gerrig integrates insights from cognitive psychology and from research in linguistics, philosophy, and literary criticism to provide a cohesive account of what we have most often treated as isolated aspects of narrative experience. Drawing on examples from Tolstoy to Toni Morrison, Gerrig offers new analysis of some classic problems in the study of narrative. He discusses the ways in which we are cognitively equipped to tackle fictional and nonfictional narratives; how thought and emotion interact when we experience narrative; how narrative information influences judgments in the real world; and the reasons we can feel the same excitement and suspense when we reread a book as when we read it for the first time. Gerrig also explores the ways we enhance the experience of narratives, through finding solutions to textual dilemmas, enjoying irony at the expense of characters in the narrative, and applying a wide range of interpretive techniques to discover meanings concealed by and from authors.

Kant's Theory of Justice Allen Rosen, 2018-07-05 In this accessible interpretation of Kant's political philosophy, Allen D. Rosen concentrates on the relation between justice, political authority (the state), and individual liberty.

Living Like Ed Ed Begley, Jr., 2008-03-25 FROM THE PIONEER OF ECO-CONSCIOUS LIVING A committed environmentalist for more than thirty years, Ed Begley, Jr., has always tried to "live simply so others may simply live." Now, as more and more of us are looking for ways to reduce our impact on the planet and live a better, greener life, Ed shares his experiences on what works, what doesn't-and what will save you money! These are tips for environmentally friendly living that anyone-whether you own or rent, live in a private home or a condo-can try to make a positive change for the environment. From quick fixes to bigger commitments and long-term strategies, Ed will help you make changes in every part of your life. And if you think living green has to mean compromising on aesthetics or comfort, fear not; Ed's wife, Rachelle, insists on style-with a conscience. In *Living Like Ed*, his environmentalism and her design savvy combine to create a guide to going green that keeps the chic in eco-chic. From recycling more materials than you ever thought possible to composting without raising a stink to buying an electric car, *Living Like Ed* is packed with ideas-from obvious to ingenious-that will help you live green, live responsibly, live well. Like Ed.

Brilliant As You Are PeTika Tave, 2020-03-04 Birthed out of a mother's desire to empower her child with self-confidence and high esteem, this book aims to let every young boy know that he is brilliant, just the way he is. Often times children deal with peer pressure and self-doubts that lead them down a path that makes them question their worth. With this book, parents can teach their children to love themselves, just the way they are. Complete with discussion questions at the end, this book is a must have for children of all ages!

City of Bits William J. Mitchell, 1996-07-25 Entertaining, concise, and relentlessly probing, *City of Bits* is a comprehensive introduction to a new type of city, an increasingly important system of virtual spaces interconnected by the information superhighway. William Mitchell makes extensive use of practical examples and illustrations in a technically well-grounded yet accessible examination of architecture and urbanism in the context of the digital telecommunications revolution, the ongoing miniaturization of electronics, the commodification of bits, and the growing domination of software over materialized form.

Look at This Adrian Shaughnessy, 2006-11-02 This book features the best of contemporary printed literature. It offers a critical survey of current graphic design, showing work by leading practitioners from the USA, Europe and Japan. Arranged in a designer-by-designer format and accompanied by interviews with some of the designers responsible for the featured work, this book offers a complete and informative picture of this popular subject.

Generation Zombie Stephanie Boluk, Wylie Lenz, 2011-07-25 Growing from their early roots in Caribbean voodoo to their popularity today, zombies are epidemic. Their presence is pervasive, whether they are found in video games, street signs, hard drives, or even international politics. These eighteen original essays by an interdisciplinary group of scholars examine how the zombie has evolved over time, its continually evolving manifestations in popular culture, and the unpredictable effects the zombie has had on late modernity. Topics covered include representations of zombies in films, the zombie as environmental critique, its role in mass psychology and how issues of race, class and gender are expressed through zombie narratives. Collectively, the work enhances our understanding of the popularity and purposes of horror in the modern era. Instructors considering this book for use in a course may request an examination copy [here](#).

Beauty and the Book Megan Benton, Ingrid D. Rowland, 2000-01-01 After World War I, the US was flooded with newspapers, magazines, radio stations and movies. Many feared serious books would disappear altogether. The concern caused a boom in fine editions, valued for beauty, craftsmanship or rarity, rather than content, and this is their story.

How to Spell the Alphabet Tauba Auerbach, 2007 How arbitrary are the marks, analog and digital, used to express language, and where do they begin to muck it all up? This first book from Tauba Auerbach, *Yes and Not Yes* features over 20 new paintings and drawings that spring from those questions. They offer an excellent if roundabout answer: while letters are largely arbitrary, they are rich with abstract beauty and conceptual depth. In razor-sharp execution--which reveals her training as a sign painter--Auerbach's works on panel and paper update the abstract conceptual tradition, while retaining its intellectual rigor. Uppercase Insides and Numeral Insides recall Russian Suprematism, and, upon further contemplation, turn out to be just what their titles call them. Works based on signal flags and the Ugaritic Alphabet--an extinct language from Syria, 1300 B.C.--confirm that puzzlement is part of the desired effect here. Where direct exchange between sign and meaning is impossible, the beauty of the symbol comes to the fore.

Utopics Louis Marin, 1984 *Utopics* has two parts. The first is a study of Thomas More's *Utopia*, where the noun *utopia* appears for the first time. It attempts to provide the elements for a theoretical reflection on utopic signifying practice. The second part can be seen as

an application of the first: It is an analysis of utopic and pseudo-topic spaces. Marin's analysis shows how utopian texts open the way to an alternative future.

Nordic Genre Film Tommy Gustafsson,2015-05-15 Nordic Genre Film offers a transnational approach to studying contemporary genre production in Nordic cinema.

Logo, revised edition Michael Evamy,2020-08-18 'The next time you are tempted to design a logo, take a look at this book. Chances are, it has already been done. By raising the bar, this wonderful resource will make better designers of all of us.' – Michael Bierut of Pentagram Design, on the first edition of Logo This bestselling logo bible has provided graphic designers with an indispensable reference source for over a decade, and over 300 new logos have been added to this fully revised and updated edition. All the logos are grouped into categories such as crosses, stars, crowns, animals, and people, and are shown in black and white to emphasize the visual form of the logos. This offers designers a ready resource to draw upon in the research phase of identity projects. Logos are also indexed alphabetically by name of designer, and by industrial sector for ease of use.

Letters of Credit Walter Tracy,2003 The revolution in typesetting - a revolution that over the past two decades has eliminated a five-hundred-year-old system of hot metal production and replaced it with one of photo-generated and computer-driven composition - shows no sign of winding down. This book, more than any other we know, traces the steps that went into that revolution and simultaneously makes the argument that the letter forms themselves are in process of evolution. Tracy argues that, whether they are of the sixteenth or the twentieth century, the forms that comprise our alphabet are subject to the same rules of good taste, proportion, and clarity that have always obtained. But what we face today is vastly different from fifty years ago. For the first time, new technology has made the proliferation (and, as some would maintain, debasement) of letter forms fast and easy (or quick and dirty.) With fifty years of professional experience on both sides of the Atlantic (including thirty years as head of type design for the British Linotype Company), Tracy is in a unique position to make this argument and arrive at his sad conclusion: the design of distinguished, contemporary typefaces is far outnumbered by the mediocre and downright bad. Part of the reason for this deplorable deterioration is a lack of critical analysis of the particular esthetics involved. This step-by-step examination of type-design esthetics is precisely what Tracy provides here, while avoiding both the promoter's hype and the manufacturer's claims. Here are the gut issues of what makes type good or bad, legible or unreadable. Extensively illustrated with both typefaces and line drawings, this book belongs on the shelf of anyone interested in the history of letters or in the artistry and peculiar problems that lie behind their production.
