The Jesuit Order As a Synagogue of Jews Robert A. Maryks, 2010 In *The Jesuit Order as a Synagogue of Jews* the author explains how Christians with Jewish family backgrounds went within less than forty years from having a leading role in the foundation of the Society of Jesus to being prohibited from membership in it. The author works at the intersection to two important historical topics, each of which attracts considerable scholarly attention but that have never received sustained and careful attention together, namely, the early modern histories of the Jesuit order and of Iberian purity of blood concerns. An analysis of the pro- and anti-converso texts in this book (both in terms of what they are claiming and what their limits are) advance our understanding of early modern, institutional Catholicism at the intersection of early modern religious reform and the new racism developing in Spain and spreading outwards.

Aging Harry R. Moody, Jennifer R. Sasser, 2017-01-12 Presenting current research in an innovative text-reader format, *Aging: Concepts and Controversies*, Ninth Edition encourages students to become involved and take an informed stand on the major aging issues we face as a society. Not simply a summary of research literature, Harry R. Moody and Jennifer R. Sasser's text focuses on controversies and questions, rather than on assimilating facts or arriving at a single correct view about aging and older people. Drawing on their extensive expertise, the authors first provide an overview

of aging in three domains: aging over the life course, health care, and the socioeconomic aspects of aging. Each section is followed by a series of edited readings, offering different perspectives from experts and specialists on that subject. New readings focus on whether current federal spending on the elderly is sustainable and fair to other groups, how older consumers are reshaping the business landscape, and the challenges of marketing and selling to customers 60 and over. More emphasis is placed on how social class and inequality earlier in life can shape our final years and the number of older Americans living in poverty. The section on Aging and Health Care has been thoroughly updated to reflect the latest data about chronic diseases that affect the elderly, government spending on health care, and policy changes to programs like Medicaid and Medicare. The section on the Social and Economic Outlook for an Aging Society gives the most current picture of the racial and ethnic diversity of older Americans, their participation in the labor force, and their income and wealth.

Marian Devotions, Political Mobilization, and Nationalism in Europe and America Roberto Di Stefano, Francisco Javier Ramón Solans, 2016-11-23
This volume examines the changing role of Marian devotion in politics, public life, and popular culture in Western Europe and America during the nineteenth and twentieth centuries. The book brings together, for the first time, studies on Marian devotions across the Atlantic, tracing their role as a rallying point to fight secularization, adversarial ideologies, and rival

religions. This transnational approach illuminates the deep transformations of devotional cultures across the world. Catholics adopted modern means and new types of religious expression to foster mass devotions that epitomized the catholic essence of the "nation." In many ways, the development of Marian devotions across the world is also a response to the questioning of Pope Sovereignty. These devotional transformations followed an Ultramontane pattern inspired not only by Rome but also by other successful models approved by the Vatican such as Lourdes. Collectively, they shed new light on the process of globalization and centralization of Catholicism.

The Crime of Maldevelopment María Laura Böhm, 2018-09-13 This book explores the causal relationship between the deregulation of international economic interests and the forms of violence that prevail in a large part of the Global South. More specifically, this book tells the story of how transnational corporations benefitting from increasing deregulation of their international economic interests, account for severe harm, the unrelenting violation of human rights, and maldevelopment in Latin America. Dependent on the structural deficiencies of the Latin American region, this book tests the examples of the extractive industries and multinational expansionism and the link between deregulated economies at the international level and the damaging local effects that increase what is here called maldevelopment. Introducing the conceptual category of maldevelopment to

criminology, the author makes recommendations for further research and outlines a network of possible mechanisms for its prevention and sanction - and for the work of reparation and construction towards the satisfaction of the needs of the victim or victimizable populations. This provocative and original text will be essential reading for those concerned with white collar crime and crimes of the powerful, and for researchers in criminology, sociology, law, political science, development studies and international political economy.

Neoliberalism's Fractured Showcase ,2011-01-11

This collection focuses on the multiple consequences of neoliberal policies in Chile and places its showcase status and its re-democratization process into serious question. The volume argues that breaking the status quo is possible, urgent and necessary.

Cultural Property and Contested Ownership

Brigitta Hauser-Schäublin, Lyndel V.

Prott, 2016-06-10 Against the backdrop of international conventions and their implementation, Cultural Property and Contested Ownership explores how highly-valued cultural goods are traded and negotiated among diverging parties and their interests. Cultural artefacts, such as those kept and trafficked between art dealers, private collectors and museums, have become increasingly localized in a 'Bermuda triangle' of colonialism, looting and the black market, with their re-emergence resulting in disputes of ownership and claims for return. This interdisciplinary volume provides the first book-

length investigation of the changing behaviours resulting from the effect of the 1970 UNESCO Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property. The collection considers the impact of the Convention on the way antiquity dealers, museums and auction houses, as well as nation states and local communities, address issues of provenance, contested ownership, and the trafficking of cultural property. The book contains a range of contributions from anthropologists, lawyers, historians and archaeologists. Individual cases are examined from a bottom-up perspective and assessed from the viewpoint of international law in the Epilogue. Each section is contextualised by an introductory chapter from the editors.

The Shock of America David Ellwood, 2012-07-19 An ambitious, original book describing a century of Europe coping with America: its inventions, personalities, films, armies, business, and politics. These decades reveal how much emotional energy Europeans invested in finding their own ways to reconcile tradition and modernity under the pressure of the ever-evolving American challenge.

The Atlantic as Mythical Space: An Essay on Medieval Ethos Alfonso J. García-Osuna, 2023-05-23 'The Atlantic as Mythical Space' is a study of medieval culture and its concomitant myths, legends and fantastic narratives as it developed along the European Atlantic seaboard. It is an inclusive study that touches upon early medieval Ireland, the pre-Hispanic Canary Islands, the

Iberian Peninsula, courtly-love France and the pagan and early-Christian British Isles. The obvious and consequential ligature that runs throughout the different sections of this text is the Atlantic Ocean, a bewildering expanse of mythical substance that for centuries fueled the imagination of ocean-side peoples. It analyzes how and why myths with the Atlantic as preferential stage are especially relevant in pagan and early-Christian western Europe. It further examines how prescientific societies fashioned an alternate cosmos in the Atlantic where events, beings and places existed in harmony with communal mental structures. It explores why in that contrived geography these societies' angels and monsters were able to materialize with wonderful profusion; it further analyzes how the ocean became a place where human beings ventured forth searching for explanations for what is essentially unknowable: the origins of the universe and the reason for our existence in it.

Climate Change, Photosynthesis and Advanced Biofuels Ashwani Kumar, Yuan-Yeu Yau, Shinjiro Ogita, Renate Scheibe, 2020-08-31 The use of fossil fuels results in rising CO₂ and other greenhouse gas (GHG) emissions, causing global temperature rise and climate change that will negatively impact human health, the food supply, and eventually worsen hunger and misery. Presently, fossil fuels meet 88% of the energy demand, resulting in rising CO₂/GHG emissions at alarming rates. The increased use of biofuels would help to mitigate climate change. Efficiently designing methods for the production of biofuels and plant-

derived high-value products requires a deeper understanding of photosynthetic processes as a prerequisite for applying novel biotechnologies. Accordingly, this book provides ample information and a wealth of illustrative examples. The book's eighteen richly illustrated chapters are divided into three thematic parts. I: Photosynthesis and Biomass Production under Changing Conditions, II: Microalgae and Engineered Crops for Production of Biofuels and High-value Products, and III: Genetic Resources and Engineering Methods to Improve Crop Plants. Readers will find the latest information on the molecular basis of photosynthetic processes in plants (including the regulatory principles that allow plants to maintain homeostasis under changing conditions), stress resistance and synthetic pathways. In addition, the basic principles of important biotechnologies, as well as examples of specially designed crops capable of growing under stress conditions with improved productivity, are presented. The book sets the course for future research in the field of biofuel development and production and provides both general and specific information for students, teachers, academic researchers, industrial teams, and general readers who are interested in new developments concerning the production of biofuels with value-added properties.

Cultural History in Europe Jörg Rogge, 2014-04-30
What is the current state of discussion in Cultural History? Which European institutions engage exclusively in Cultural History and which topics do they address? And how will Cultural History develop in the future? These and other

questions are raised by European scholars in the discussion of Institutions, Themes and Perspectives of Cultural History in this volume. It provides a profound overview of contemporary developments in Scandinavia, Finland, Great Britain, Latvia, Poland, Hungary, Austria, Switzerland, Germany, Italy and Spain.

Agronomic Crops Mirza Hasanuzzaman, 2020-03-09

Agronomic crops have been a source of foods, beverages, fodders, fuels, medicines and industrial raw materials since the dawn of human civilization. Over time, these crops have come to be cultivated using scientific methods instead of traditional methods. However, in the era of climate change, agronomic crops are increasingly subjected to various environmental stresses, which results in substantial yield loss. To meet the food demands of the ever-increasing global population, new technologies and management practices are being adopted to boost yield and maintain productivity under both normal and adverse conditions. To promote the sustainable production of agronomic crops, scientists are currently exploring a range of approaches, which include varietal development, soil management, nutrient and water management, pest management etc. Researchers have also made remarkable progress in developing stress tolerance in crops through various approaches. However, finding solutions to meet the growing food demands remains a challenge. Although there are several research publications on the above-mentioned problems, there are virtually no comprehensive books addressing all of the recent topics. Accordingly,

this book, which covers all aspects of production technologies, management practices, and stress tolerance of agronomic crops in a single source, offers a highly topical guide.

Issues in Upper Secondary Science Education Neil Taylor, 2014-03-06 This book provides a comparative look at key issues that characterize and contextualize upper secondary science education in sixteen countries in Oceania, South America, Asia, Europe, North America, Africa, and the Middle East, including links with elementary and early science, final assessment, and the secondary/tertiary education interface.

Your Career In Nursing Annette Vallano, 2002-12-24 Take Charge of Your Nursing Career! What's the ideal nursing job for me, and how can I get it? How can I feel more in control of my professional destiny? How will the nursing shortage affect me? What impact will the sweeping changes of managed healthcare have on my future? These are the questions being asked by today's nurses as their jobs -- and their lives -- are permanently transformed by the turmoil of change. Drawing on the advice and strategies she developed as an educator and career counselor for nurses, Annette Vallano offers a new way of envisioning your career as an entrepreneurial enterprise. By following Vallano's plan for creating and marketing your own nursing product, career mobility will be yours. Your Career in Nursing will help you define the product you offer, develop a marketing plan, research the needs of the nursing marketplace, and target your approach as today's healthcare landscape inevitably changes.

Special chapters for men in nursing, the newly graduated nurse, the older nurse, and second career nurses are included, along with strategies all nurses can use to manage stress and feel empowered. Your Career in Nursing is required reading for the 21st century nurse who wants to be on the winning side in the ongoing healthcare revolution.

Knowledge of the Pragmatici ,2020-03-31

Knowledge of the pragmatici sheds new light on pragmatic normative literature (mainly from the religious sphere), a genre crucial for the formation of normative orders in early modern Ibero-America. Long underrated by legal historical scholarship, these media – manuals for confessors, catechisms, and moral theological literature – selected and localised normative knowledge for the colonial worlds and thus shaped the language of normativity. The eleven chapters of this book explore the circulation and the uses of pragmatic normative texts in the Iberian peninsula, in New Spain, Peru, New Granada and Brazil. The book reveals the functions and intellectual achievements of pragmatic literature, which condensed normative knowledge, drawing on medieval scholarly practices of 'epitomisation', and links the genre with early modern legal culture.

El alma de María, abierta a la corredención

Francisco Acedo Fernández,2021-05-23 El concepto

de la “corredención mariana” ha pasado de quedarse a las puertas de ser proclamado como el quinto dogma sobre la Virgen en la Iglesia latina, a ser hoy sin discusión uno de los fundamentos más cuestionados desde todos los ámbitos de la teología, desconcertando a toda una generación de pastores, teólogos y creyentes católicos que han crecido con la convicción de este rol diferenciado de María en la historia de la salvación, y que ahora se encuentran confundidos ante ambientes que relacionan este término con percepciones exageradas del pasado envueltas en el sentimentalismo. Y es que asumiendo buena parte de las críticas resulta muy complicado para otras tradiciones navegar por el desarrollo mariológico católico sin perderse en la duda o en la indefinición. Ideas que hasta ahora describen bajo términos abstractos una posible realidad de la Virgen adecuada a su puesto actual, pero que desgraciadamente aún no han sabido mostrar con claridad la verdad de su existencia. Y es esta falta de concreción en la exposición de los planteamientos la razón que se antepone para bloquear cualquier avance teológico que se aparte de una simple efusión del Espíritu Santo por parte de Cristo como único mediador hacia todas sus criaturas, sin atreverse a profundizar nada más. Pero la realidad que se nos presenta parece mucho más detallada que como se quiere convenir. Es decir, que sin renunciar a admitir que estas ideas expuestas para el consenso sean rigurosamente ciertas, del mismo modo es necesario reconocer que existe una realidad mucho más pormenorizada donde cada criatura tiene una función

específica en el plan de salvación de Dios. Tras abordar en su primer libro “Unidad en la Verdad. Nuevas perspectivas para el ecumenismo” (2019), la tarea de la unidad en las Iglesias, el autor busca en su segunda obra armonizar con ideas sencillas y coherentes la cuestión de la posible corredención de María, para demostrar que respetando la única mediación entre Cristo y sus criaturas, es posible enriquecer el debate buscando un papel diferenciado para la Virgen en el plan salvación de Dios, y cuya necesidad de anunciar hoy puede ser más pertinente que nunca, fortaleciendo el camino de santidad de muchos que como tantos a lo largo de la historia se apoyaron en la Madre para encontrar a Cristo, como garantía de eficacia en sus propósitos de santificación.

The School of Salamanca: A Case of Global Knowledge Production ,2021-03-01 Over the past few decades, a growing number of studies have highlighted the importance of the ‘School of Salamanca’ for the emergence of colonial normative regimes and the formation of a language of normativity on a global scale. According to this influential account, American and Asian actors usually appear as passive recipients of normative knowledge produced in Europe. This book proposes a different perspective and shows, through a knowledge historical approach and several case studies, that the School of Salamanca has to be considered both an epistemic community and a community of practice that cannot be fixed to any individual place. Instead, the School of Salamanca encompassed a variety of different sites and actors throughout the world and thus represents a

case of global knowledge production. Contributors are: Adriana Álvarez, Virginia Aspe, Marya Camacho, Natalie Cobo, Thomas Duve, José Luis Egío, Dolors Folch, Enrique González González, Lidia Lanza, Esteban Llamosas, Osvaldo R. Moutin, and Marco Toste.

Economic Foundations for Creative Ageing Policy
Andrzej Klimczuk, 2015-08-12 Ageing populations are a major consideration for socio-economic development in the early twenty-first century. This demographic change is mainly seen as a threat rather than as an opportunity to improve the quality of human life, especially in Europe, where ageing has resulted in a reduction in economic competitiveness. Economic Foundations for Creative Ageing Policy mixes the silver economy, the creative economy, and the social economy to construct positive solutions for an ageing population. Klimczuk covers theoretical analyses and case study descriptions of good practices to suggest strategies that could be internationally popularized.

Italian Gothic Horror Films, 1980-1989 Roberto Curti, 2019-02-15 The Italian Gothic horror genre underwent many changes in the 1980s, with masters such as Mario Bava and Riccardo Freda dying or retiring and young filmmakers such as Lamberto Bava (Macabro, Demons) and Michele Soavi (The Church) surfacing. Horror films proved commercially successful in the first half of the decade thanks to Dario Argento (both as director

and producer) and Lucio Fulci, but the rise of made-for-TV products has resulted in the gradual disappearance of genre products from the big screen. This book examines all the Italian Gothic films of the 1980s. It includes previously unpublished trivia and production data taken from official archive papers, original scripts and interviews with filmmakers, actors and scriptwriters. The entries include a complete cast and crew list, plot summary, production history and analysis. Two appendices list direct-to-video releases and made-for-TV films.

Estrategias de territorialización campesina: encrucijadas entre el reconocimiento político y la autonomía territorial Cristancho Garrido, Hellen Charlot, 2023-05-15 Este libro busca aportar a la comprensión del proceso de construcción de territorios campesinos en las denominadas zonas de reserva campesina (ZRC) en Colombia, tanto en zonas de colonización, como en aquellas zonas en donde comunidades organizadas están solicitando la aplicación de esta figura jurídica para sus territorios. Se propone que las ZRC derivan del problema agrario no resuelto y surgen también como resultado de la movilización campesina por el acceso a la tierra y como posibilidad de desencadenar procesos de desarrollo alternativos a los impuestos por el modelo de desarrollo dominante. La fundamentación tórica se elaboró en torno a la centralidad del debate sobre la cuestión agraria; la categoría de territorio y la conceptualización de territorio campesino. Para el análisis empírico se seleccionaron la ZRC de el Pato-Balsillas, municipio de San Vicente del

Caguán, Caquetá y la ZRC de Inzá-Tierradentro, municipio de Inzá, Cauca. Si bien se reconoce el campesinado como sujeto colectivo, se reconstruyen y analizan las trayectorias de sus expresiones organizadas en las asociaciones que lideran la lucha por alcanzar o mantener las ZRC. Como resultado se concluye que, aunque el reclamo central de las organizaciones campesinas que lideran las ZRC es que el Estado cumpla las disposiciones emanadas de la Ley 160 de 1994 (Ley de Reforma Agraria), el hecho de que las comunidades se organicen al rededor de la figura, ya constituye el valor fundamental de su lucha por el territorio, más allá de la efectividad legal. De allí que la territorialización campesina sea permanentemente ejercida a través de múltiples estrategias y relacionamientos diferenciados con las instituciones del Estado y en diferentes redes/plataformas organizativas en las escalas local, regional y nacional. Finalmente se problematiza la encrucijada de las comunidades campesinas que, en la búsqueda de reconocimiento político y autonomía territorial, deben enfrentar los conflictos derivados del ordenamiento jurídico del territorio y de la articulación subordinada al mercado capitalista.
