A Companion to Rorty Alan Malachowski,2020-02-14 A groundbreaking reference work on the revolutionary philosophy and intellectual legacy of Richard Rorty A provocative and often controversial thinker, Richard Rorty and his ideas have been the subject of renewed interest to philosophers working in epistemology, metaphysics, analytic philosophy, and the history of philosophy. Having called for philosophers to abandon representationalist accounts of knowledge and language, Rorty introduced radical and challenging concepts to modern philosophy, generating divisive debate through the new form of American pragmatism which he advocated and the renunciation of traditional epistemology which he espoused. However, while Rorty has been one of the most widely-discussed figures in modern philosophy, few volumes have dealt directly with the expansive reach of his thought or its implications for the fields of philosophy in which he worked. The Blackwell Companion to Rorty is a collection of essays by prominent scholars which provide close, and long-overdue, examination of Rorty's groundbreaking work. Divided into five parts, this volume covers the major intellectual movements of Rorty's career from his early work on consciousness and transcendental arguments, to the lasting impacts of his major writings, to his approach to pragmatism and his controversial appropriations from other philosophers, and finally to his later work in culture, politics, and ethics. Offers a comprehensive, balanced, and insightful account of Rorty's approach to philosophy Provides an assessment of Rorty's more controversial thoughts and his standing as an "anti-philosopher's philosopher" Contains new and original exploration of Rorty's thinking from leading scholars and philosophers Includes new perspectives on topics such as Rorty's influence in Central Europe Despite the relevance of Rorty's work for the wider community of philosophers and for those working in fields such as international relations, legal and political theory, sociology, and feminist studies, the secondary literature surrounding Rorty's work and legacy is limited. A Companion to Rorty address this absence, providing a comprehensive resource for philosophers and general readers.

Pentagon 9/11 Alfred Goldberg,2007-09-05 The most comprehensive account to date of the 9/11 attack on the Pentagon and aftermath, this volume includes unprecedented details on the impact on the Pentagon building and personnel and the scope of the rescue, recovery, and caregiving effort. It features 32 pages of photographs and more than a dozen diagrams and illustrations not previously available.

An Instrument of Peace Daniel I. Pedreira,2019-06-13 This book presents a meticulously researched biography on Guillermo Belt Ramírez, one of Cuba's most important diplomats of the 20th century. As Ambassador, Belt represented his homeland in the United States, the UN, and the Soviet Union as the Cold War turned wartime allies into enemies.

Close Reading New Media Jan van Van Looy,Jan Baetens,2003 Close Reading New Media is the first publication to apply the method of close analysis to new media. Since the early nineteen-nineties, electronic art and literature have continually gained importance in artistic and academic circles. Significant critical and theoretical attention has been paid to how new media allow the text to break traditional power relations and boundaries. The passive reader becomes an active participant choosing his own path and assembling not just his own interpretation of the text (level of the signified), but also his own text (level of the signifier). Texts no longer have a beginning or an ending, being a web of interlinked nodes. The decentered nature of electronic text empowers and invites the reader to take part in the literary process. Poststructuralist theorists predicted a total liberation of textual restrictions imposed by the medium of print. However, while these are culturally significant claims, little attention has been paid to their realization. The goal of this volume is twofold. Our aim is to shed light on how ideas and theories have been translated into concrete works, and we want to comment on the process of close reading and how it can be applied to electronic literature. While all contributions deal with particular works, their aim is always to provide insight into how electronic fiction and new media can be read. This book proposes close readings of work by Mark Amerika, Darren Aronofsky, M.D. Coverley, Raymond Federman, Shelley Jackson, Rick Pryll, Geoff Ryman and Stephanie Strickland.

Public School Safety Joseph P. Hester,2015-10-02 Violence among youth in public schools is one of America's most pressing concerns. Once thought to be something only inner-city schools faced, it has spread to suburban and rural schools. There are no easy solutions to the problem, but this book explores what administrators and other school officials can do to structure school safety programs to curb student violence. An introduction provides information and statistics about the causes of school violence. Chapter One considers government legislation and resulting initiatives to reduce youth violence and improve classroom discipline. Chapter Two covers strategies for building a school safety program, and offers recommended and tested approaches for creating safety initiatives. Chapter Three provides additional information about school-wide strategies and presents model programs that can be implemented at the elementary, middle, and high school levels. Chapter Four examines character-building educational programs and discusses training for teachers and parents. Chapter Five is a directory of organizations, alliances, centers, professional development groups, publications, and websites dealing with school safety.

African American Young Girls and Women in PreK12 Schools and Beyond Renae D. Mayes,Marjorie C. Shavers,James L. Moore III,2022-06-02 African American Young Girls and Women in PreK12 Schools and Beyond: Informing Research, Policy, and Practice presents a comprehensive viewpoint on preK-12 schooling for African American females. This volume offers readers compelling evidence of the educational challenges and successes for this student population.

Perspectives on Teaching and Teacher Issues Linda B. Yurichenko,2007 Teaching is a profession which is so enormous and so packed with significance that the issues related to it have a consistently high ranking with members of society in virtually every public opinion poll. These issues include multicultural education, teacher training and accreditation, burnout, teaching under conditions particular to a world-wide certain country, student behaviour and preparation, computers in the classroom, parental influence on the teaching process, the changing curriculum and its meaning for teaching, budgetary problems, and a multitude of similar issues. This book presents current issues and information in this field from educators and researchers around the globe.

Global Health Informatics Education E.J.S. Hovenga,J. Mantas,2004-08-30 Throughout the world, healthcare professionals often lack knowledge of the possibilities and limitations of systematically processing data, information and knowledge and of the resulting impact on quality decision-making. They are often asked to use information technologies of which they have limited appreciation, in order to enhance their practices through better use of information resources. However, for systematically processing data, information and knowledge in medicine and in healthcare, healthcare professionals who are well-trained in medical informatics or health informatics are needed. It will only be through improved education of healthcare professionals and through an increase in the number of well-trained workers in health and medical informatics that this lack of knowledge and associated skills can begin to be reversed. Although we can recognize further progress in educating health and a considerable number of educational programs for health informatics / medical informatics specialists have been set up, there is still a need to enhance these educational activities world wide, considering global developments as well as new curricular concepts and technological opportunities. IMIA and in particular its working group on health and medical informatics education is the leading international society stimulating such educational activities in various ways. This book is especially helpful for educators in the field of health / medical informatics.

*The Age of Radianc*e Craig Nelson,2014-03-25 A narrative of the Atomic Age by the award-winning author of Rocket Man explores the complexities of nuclear energy, citing the contributions of such individuals as Marie Curie, Albert Einstein and Robert Oppenheimer while sharing lesser-known historical details.

A Catholic Guide to Miscarriage, Stillbirth, and Infant Loss Abigail Jorgensen,2024-04-19 Losing a child is devastating. For Catholic parents who lose a child before or shortly after birth, this profound grief often comes with distinctive, sudden, and difficult questions about God, the Church, and who they are now as parents to the child they have lost. Why did God let this happen? Where is my baby? Can the Church help me make sense of this? What do we do now? In A Catholic Guide to Miscarriage, Stillbirth, and Infant Loss, Abigail Jorgensen serves as a companion and guide through perinatal loss in light of Catholic teaching. She addresses difficult medical, theological, and practical questions asked by loss parents and the friends, family, pastors, ministers, and medical professionals who support them. Jorgensen has first-hand experience, both

as a mother who has lost children in miscarriage and as a Catholic bereavement doula—someone who walks with families through early child loss. Through her own experiences, she discovered how hard it can be to find adequate answers and spiritual help from the within the Church, so she wrote the book that she and her clients have needed. This first-of-its-kind resource blends Jorgensen’s professional expertise with the wisdom of the Church to provide an essential guide through the most pressing concerns that arise during this difficult time. Drawing on the Bible, the Church’s prayer traditions, the saints, sacraments, official teaching documents, and grief support research, Jorgensen offers comfort, hope, and compassionate responses to tough questions, including: Why does perinatal loss happen? Will I be with my baby again? What are normal emotions, and when should I seek extra support? How should we grieve as parents? What saints can I turn to as a loss parent? How do I approach God with these painful questions? Why would God allow such a short life? How can I honor my baby’s memory? What if I say the wrong thing to someone who is grieving the loss of their child? How do I support someone who experiences anger during their grief? Through easy-to-navigate question and answer sections, helpful definitions, and practical takeaways, *A Catholic Guide to Miscarriage, Stillbirth, and Infant Loss* provides parents and their support networks a crucial lifeline through this heartbreaking experience.

Historical Archaeology of Early Modern Colonialism in Asia-Pacific Maria Cruz Berrocal, Cheng-hwa Tsang, 2017-12-19 The essential source for scholarly reassessment of the Asia-Pacific region's diverse and significant archaeology and history.--James P. Delgado, coauthor of *The Maritime Landscape of the Isthmus of Panama* Underpins a nuanced picture of Asia-Pacific that shows how the activities of the Chinese and Japanese in East Asia, the spread of Islam from South Asia, and the efforts of the Iberians and especially the Spanish from southern Europe ushered in a world of complex interaction and rapid and often profound change in local, regional, and wider cultural patterns.--Ian Lilley, editor of *Archaeology of Oceania: Australia and the Pacific Islands* The history of Asia-Pacific since 1500 has traditionally been told with Europe as the main player ushering in a globalized, capitalist world. But these volumes help decentralize that global history, revealing that preexisting trade networks and local authorities influenced the region before and long after Europeans arrived. In the volume *The Southwest Pacific and Oceanian Regions*, case studies from Alofi, Vanuatu, the Marianas, Hawaii, Guam, and Taiwan compare the development of colonialism across different islands. Contributors discuss human settlement before the arrival of Dutch, French, British, and Spanish explorers, tracing major exchange routes that were active as early as the tenth century. They highlight rarely examined sixteenth- and seventeenth-century encounters between indigenous populations and Europeans and draw attention to how cross-cultural interaction impacted the local peoples of Oceania. The volume *The Asia-Pacific Region* looks at colonialism in the Philippines, China, Japan, and Vietnam, emphasizing the robust trans-regional networks that existed before European contact. Southeast Asia had long been influenced by Buddhist, Hindu, and Muslim traders in ways that helped build the region's ethnic and political divisions. Essays show the complexity and significance of maritime trade during European colonization by investigating galleon wrecks in Manila, Japan's porcelain exports, and Spanish coins discovered off China's coast. Packed with archaeological and historical evidence from both land and underwater sites, impressive in geographical scope, and featuring perspectives of scholars from many different countries and traditions, these volumes illuminate the often misunderstood nature of early colonialism in Asia-Pacific.

Playing the Text, Performing the Future Felicitas Meifert-Menhard, 2013-10-14 This volume examines the structure of text-based Future Narratives in the widest sense, including choose-your-own-adventure books, forking-path novels, combinatorial literature, hypertexts, interactive fiction, and alternate reality games. How 'radical' can printed Future Narratives really be, given the constraints of their media? When exactly do they not only play with the mere idea of multiple continuations, but actually stage genuine openness and potentiality? Process-rather than product-oriented, text-based Future Narratives are seen as performative and contingent systems, simulating their own emergence.

Conjugal America Allan C. Carlson, 2017-09-04 The institution of marriage has become perilously weak in America. Changes in the law over the past three decades, such as the spread of no-fault divorce and broad acquiescence to cultures of divorce and intentional childlessness, have stripped traditional marriage of important legal supports. Half of all marriages end in divorce and just as many are childless. *Conjugal America* seeks to recapture the real purposes of marriage and the unchanging nature of this most vital and fundamental human institution. Confronting contemporary issues and drawing heavily on the natural and social sciences, each chapter also reaches into the past to find truths grounded in human experience. Carlson reexamines the basic bond of marriage to procreation, showing that this tie has been no less than the foundation of the unwritten sexual constitution of Western civilization. He also shows how the Gnostic heresy, which despises procreation, posed a stark danger to the early Christian movement and to the sexual constitution of our own time as well. He then dissects claims regarding the evolution of marriage, showing that true marriage always represents the vital connection of the sexual with the economic. Carlson explores the political nature of marriage showing, why every ambitious totalitarian government seeks above all to destroy marriage, and why the true marital bond actually stands for liberty. He concludes by arguing for the necessity of marriage policy. Because both the nature of the centralizing state and the pressures of modernity have altered family circumstances, new protections and encouragements to marriage are now imperative. *Conjugal America* will be central to the new debate on marriage and its purposes. This book sees the current moment as an opportunity to revitalize a necessary institution that has recently been abused and neglected and reinstate it as the primary source of commitment and care in the modern world.

Anti/Vax Bernice L. Hausman, 2019-04-15 Antivaxxers are crazy. That is the perception we all gain from the media, the internet, celebrities, and beyond, writes Bernice Hausman in *Anti/Vax*, but we need to open our eyes and ears so that we can all have a better conversation about vaccine skepticism and its implications. Hausman argues that the heated debate about vaccinations and whether to get them or not is most often fueled by accusations and vilifications rather than careful attention to the real concerns of many Americans. She wants to set the record straight about vaccine skepticism and show how the issues and ideas that motivate it—like suspicion of pharmaceutical companies or the belief that some illness is necessary to good health—are commonplace in our society. Through *Anti/Vax*, Hausman wants to engage public health officials, the media, and each of us in a public dialogue about the relation of individual bodily autonomy to the state's responsibility to safeguard citizens' health. We need to know more about the position of each side in this important stand-off so that public decisions are made through understanding rather than stereotyped perceptions of scientifically illiterate antivaxxers or faceless bureaucrats. Hausman reveals that vaccine skepticism is, in part, a critique of medicalization and a warning about the dangers of modern medicine rather than a glib and gullible reaction to scaremongering and misunderstanding.

Chinese Rhetoric and Writing Andy Kirkpatrick, Zhichang Xu, 2012-03-07 Andy Kirkpatrick and Zhichang Xu offer a response to the argument that Chinese students’ academic writing in English is influenced by “culturally nuanced rhetorical baggage that is uniquely Chinese and hard to eradicate.” Noting that this argument draws from “an essentially monolingual and Anglo-centric view of writing,” they point out that the rapid growth in the use of English worldwide calls for “a radical reassessment of what English is in today’s world.” The result is a book that provides teachers of writing, and in particular those involved in the teaching of English academic writing to Chinese students, an introduction to key stages in the development of Chinese rhetoric, a wide-ranging field with a history of several thousand years. Understanding this important rhetorical tradition provides a strong foundation for assessing and responding to the writing of this growing group of students.
