### **Navigating Languages, Literacies and Identities**

Vally Lytra, Dinah Volk, Eve Gregory, 2016-06-10 Navigating Languages, Literacies and Identities showcases innovative research at the interface of religion and multilingualism, offering an analytical focus on religion in children and adolescents' everyday lives and experiences. The volume examines the connections between language and literacy practices and social identities associated with religion in a variety of sites of learning and socialization, namely homes, religious education classes, places of worship, and faith-related schools and secular schools. Contributors engage with a diverse set of complex multiethnic and religious communities, and investigate the rich multilingual, multiliterate and multi-scriptal practices associated with religion which children and adolescents engage in with a range of mediators, including siblings, peers, parents, grandparents, religious leaders, and other members of the religious community. The volume is organized into three sections according to context and participants: (1) religious practices at home and across generations, (2) religious education classes and places of worship and (3) bridging home, school and community. The edited book will be a valuable resource for researchers in applied linguistics, linguistic anthropology, socio-linguistics, intercultural communication, and early years, primary and secondary education.

### **Particulate Matter Science for Policy Makers**

Peter H. McMurry, Marjorie F. Shepherd, James S. Vickery, 2004-11-29 Particulate Matter Science for Policy Makers: A NARSTO Assessment was commissioned by NARSTO, a cooperative public-private sector organization of Canada, Mexico and the United States. It is a concise and comprehensive discussion of the current understanding by

atmospheric scientists of airborne particulate matter (PM). Its goal is to provide policy makers who implement air-quality standards with this relevant and needed scientific information. The primary audience for this volume will be regulators, scientists, and members of industry, all of whom have a stake in effective PM management. It will also inform exposure and health scientists, who investigate causal hypotheses of health impacts, characterize exposure, and conduct epidemiological and toxicological studies.

World War II and the Delaware Coast Michael Morgan, 2016-08-01 Within weeks of Pearl Harbor, German U-boats arrived off the Delaware coast and attacked numerous ships along the vital shipping lanes to Philadelphia and Wilmington. On February 28, 1942, two German torpedoes hit the destroyer Jacob Jones, which was carrying more than one hundred American sailors. It sank in less than an hour. A center for military activity, Lewes became a refuge for many survivors from such attacks. The dunes along Cape Henlopen hid the massive artillery batteries of Fort Miles. Residents of the beachfront communities rallied amid the blackout regulations and air raid drills with rationing and scrap drives. Spotters watched for enemy warships in concrete towers that still line the coast. Author Michael Morgan tells the remarkable story of a coast at war.

**This Superior Place** Dennis McCann, 2013-05-23 Picturesque little Bayfield on Lake Superior is Wisconsin's smallest city by population but one of its most popular visitor destinations. This book captures those unique qualities that keep tourists coming back year after year and offers a historically reliable look at the community as it is today and how it came to be. Abundantly illustrated with both historical and contemporary images, This Superior Place showcases, as author Dennis McCann writes, "a

community where the past was layered with good times and down times, where natural beauty was the one resource that could not be exhausted by the hand of man, and where history is ever present." Because Bayfield serves as "the gateway to the Apostle Islands," the book also includes chapters on the Apostle Islands National Lakeshore, Madeline Island, and the nearby Red Cliff Ojibwe community. It also covers the significant eras in the city's history: lumbering, quarrying, commercial fishing, and the advent of the orchards visitors see today. It is not a guidebook as such but more of a visual and written tour of the city and the major elements that came together to make it what it is. Colorful stories from the past, written in Dennis McCann's casual, humorous style, give a sense of the unique characters and events that have shaped this charming city on the lake.

**The Children in Child Health** Julie Spray, 2020-03-13

Who are the children in child health policy? How do they live and see the world, and why should we know them? A journey into the lives of children coping in a world compromised by poverty and inequality, *The Children in Child Health* challenges the invisibility of children's perspectives in health policy and argues that paying attention to what children do is critical for understanding the practical and policy implications of these experiences. In the unique context of indigenous Māori and migrant Pacific children in postcolonial New Zealand, Julie Spray explores the intertwining issues of epidemic disease, malnutrition, stress, violence, self-harm, and death to address the problem of how scholars and policy-makers alike can recognize and respond to children as social actors in their health. *The Children in Child Health* innovatively combines perspectives from childhood studies, medical anthropology, and public health and policy together with

evocative ethnography to show how a deep understanding of children's worlds can change our approach to their care.

World Flutelore Dale A. Olsen, 2013-11-30 In many places around the world, flutes and the sounds of flutes are powerful magical forces for seduction and love, protection, vegetal and human fertility, birth and death, and other aspects of human and non-human behavior. This book explores the cultural significance of flutes, flute playing, and flute players from around the world as interpreted from folktales, myths, and other stories--in a word, flutelore. A scholarly yet readable study, *World Flutelore: Folktales, Myths, and Other Stories of Magical Flute Power* draws upon a range of sources in folklore, anthropology, ethnomusicology, and literary analysis. Describing and interpreting many examples of flutes as they are found in mythology, poetry, lyrics, and other narrative and literary sources from around the world, veteran ethnomusicologist Dale Olsen seeks to determine what is singularly distinct or unique about flutes, flute playing, and flute players in a global context. He shows how and why world flutes are important for personal, communal, religious, spiritual, and secular expression and even, perhaps, existence. This is a book for students, scholars, and any reader interested in the cultural power of flutes.

**Solar House** Terry Galloway, 2012-05-16 Covering the full life span of the project, from siting issues through specific design features to maintenance of the property and equipment, this is a comprehensive guide to designing, planning and building a solar house. The author uses his experience of living in a solar house to inform the reader of the technology and practices needed for the design, operation and maintenance of the solar home. Each of the technologies of the house, such as space heating and cooling, domestic hot water and electric power technologies, are critiqued from the point of view of the owner/resident, with the author using his thirty years experience of living in a solar home. This provides home owners who are thinking of going solar with first hand evidence of best practice, and provides the architect and designer with the knowledge of how to best satisfy their clients needs.

### Protective Armor Engineering Design Magdi El

Messiry, 2019-09-24 There is increasing interest in the area of protective vests, either for protection against bullets or protection from the most realistic threats within domestic frontline operations: edged weapon, knives, and medical needles. This volume addresses that need. This new book provides an in-depth survey of the state-of-the-art research and practical techniques in the area of protected fabrics, especially stab-resistant and bulletproof fabrics. The book covers:

- The history of protective armor: the long history of the art of protective armor manufacturing.
- Materials used for body armor: the design and materials used for soft armor to increase its perforation-resistance utilizing high-performance fibers.
- Anti-stab and anti-bullet armor design: the different design parameters required for the design of flexible armor in order to stop high-velocity projectiles.
- The comfort of the body armor design: the flexibility, thermal resistivity, and evaporative moisture resistivity through the fabric.
- Methods of testing the flexible body armors: testing the components of flexible body armor, according to the level of the protection required, such as NIJ Standards, HOSDB Body Armour Standards for UK Police, and the German SK1 Standard, among others.

Written by an expert in textile composite material engineering, this volume fills an important gap in the area of protective fabric against stabbing or bullets and provides invaluable practical knowledge for body armor design.

Technologies of Suspicion and the Ethics of Obligation in Political Asylum Bridget M. Haas,Amy Shuman,2019-03-11 Across the globe, migration has been met with intensifying modes of criminalization and securitization, and claims for political asylum are increasingly met with suspicion. Asylum seekers have become the focus of global debates surrounding humanitarian obligations, on the one hand, and concerns surrounding national security and border control, on the other. In *Technologies of Suspicion and the Ethics of Obligation in Political Asylum*, contributors provide fine-tuned analyses of political asylum systems and the adjudication of asylum claims across a range of sociocultural and geopolitical contexts. The contributors to this timely volume, drawing on a variety of theoretical perspectives, offer critical insights into the processes by which tensions between humanitarianism and security are negotiated at the local level, often with negative consequences for asylum seekers. By investigating how a

politics of suspicion within asylum systems is enacted in everyday practices and interactions, the authors illustrate how asylum seekers are often produced as suspicious subjects by the very systems to which they appeal for protection. Contributors: Ilil Benjamin, Carol Bohmer, Nadia El-Shaarawi, Bridget M. Haas, John Beard Haviland, Marco Jacquemet, Benjamin N. Lawrance, Rachel Lewis, Sara McKinnon, Amy Shuman, Charles Watters
