Censored 2012 Mickey Huff, Project Censored, 2011-10-04 Every year since 1976, Project Censored, our nation's oldest news-monitoring group—a university-wide project at Sonoma State University founded by Carl Jensen, directed for many years by Peter Phillips, and now under the leadership of Mickey Huff—has produced a Top-25 list of underreported news stories and a book, *Censored*, dedicated to the stories that ought to be top features on the nightly news, but that are missing because of media bias and self-censorship. Seven Stories

Press has been publishing this yearbook since 1994, featuring the top stories listed democratically in order of importance according to students, faculty, and a national panel of judges. Each of the top stories is presented at length, alongside updates from the investigative reporters who broke the stories. Beyond the Top-25 stories, additional chapters delve further into timely media topics: The Censored News and Media Analysis section provides annual updates on Junk Food News and News Abuse, Censored Déjà Vu, signs of hope in the alternative and news media, and the state of media bias and alternative coverage around the world. In the Truth Emergency section, scholars and journalists take a critical look at the US/NATO military-industrial-media empire. And in the Project Censored International section, the meaning of media democracy worldwide is explored in close association with Project Censored affiliates in universities and at media organizations all over the world. A perennial favorite of booksellers, teachers, and readers everywhere, Censored is one of the strongest life signs of our current collective desire to get the news we citizens need—despite what Big Media tells us.

Handbook of Research on Effective Advertising Strategies in the Social Media Age Ta?k?ran, Nurdan Öncel, 2015-02-28 Social media pervades people's awareness and everyday lives while also influencing societal and cultural patterns. In response to the social media age, advertising agents are creating new strategies that best suit changing consumer relationships. The Handbook of Research on Effective Advertising Strategies in the Social Media Age focuses on the radically evolving field of advertising within the new media environment. Covering new strategies, structural transformation of media, and

changing advertising ethics, this book is a timely publication for policymakers, government officials, academicians, researchers, and school practitioners interested in furthering their research exposure and analyzing the rapidly evolving advertising sector and its reflection on social media.

The European Impact Assessment and the Environment Kilian Bizer, Sebastian Lechner, Martin Führ, 2010-08-03 This volume contains papers presented in a workshop of international experts in September 2008 in Berlin. The experts discussed how environmental consequences of EU legislation can be incorporated in a more effective way. In other words, this contribution focuses on the question of which measures can strengthen the consideration of environmental effects in the EU impact assessment procedure and in the subsequent legislative decision-making process. This allows drawing conclusions for the impact assessment process in Germany. This volume begins with an introductory paper (Bizer/Lechner/Führ) which served as the basis for discussion in our workshop. The questions raised in this paper are addressed by the authors of the subsequent chapters. Stephen White (DG Environment, EU-Commission) discusses the impact assessment from an internal perspective within the Commission. Pendo Maro (European Environmental Bureau) reviews the impact assessment practice from the perspective of an environmental NGO. Martin Schmidt et al. discuss the potential for more formalism to strengthen environmental issues within impact assessments and favour a checklist.

Wounded Lions Ronald A. Smith, 2016-04-15 The Jerry Sandusky child molestation case stunned the nation. As subsequent revelations uncovered an athletic program operating free of oversight, university officials faced criminal charges while unprecedented NCAA

sanctions hammered Penn State football and blackened the reputation of coach Joe Paterno. In *Wounded Lions*, acclaimed sport historian and longtime Penn State professor Ronald A. Smith draws from university archives to answer the How? and Why? at the heart of the scandal. The Sandusky case was far from the first example of illegal behavior related to the football program--or the university's attempts to suppress news of it. As Smith shows, decades of infighting among administrators, alumni, trustees, faculty, and coaches established policies intended to protect the university, and the football team considered synonymous with its name, at all costs. If the habits predated Paterno, they also became sanctified during his tenure. Smith names names to show how abuses of power warped the Penn State Way even with hires like women's basketball coach Rene Portland, who allegedly practiced sexual bias against players for decades. Smith also details a system that concealed Sandusky's horrific acts just as deftly as it whitewashed years of rules violations, coaching malfeasance, and player crime while Paterno set records and raised hundreds of millions of dollars for the university.

Africa Environment Outlook 2 United Nations, United Nations Environment Programme, United Nations Dept, African Ministerial Conference on the Environment, 2006 This is the second comprehensive report on the state of Africa's environment, produced in collaboration with the African Ministerial Conference on the Environment (AMCEN). This report highlights the central position Africa's environment continues to play in sustainable development, as well as its potential to achieve progress in the implementation of the Millennium Development Goals. The report profiles Africa's environmental resources as an asset for the continent's development. It highlights the opportunities presented by the

region's natural resource base to support the continent's development. It also underscores the concept of sustainable livelihoods, and the importance of the environmental initiatives in supporting them.

Culture and Customs of Greece Artemis Leontis, 2009-04-30 The Parthenon. Plato, Socrates, and Aristotle. Homer's epic poems. Gods and goddesses lounging around, indulging in pleasures on Mount Olympus. All of these images bring to mind the traditional icons of Greece, the cradle of Western Civilization. But what do we know of modern Greece? The answer to that question and more can be found in this comprehensive look at contemporary Greek culture. This one-stop reference source is packed with illustrative descriptions of daily life in Greece in the 21st century. Ideal for high school students and even undergraduates interested in studying abroad, this extensive volume examines topics such as religion, social customs, leisure life, festivals, language, literature, performing arts, media, and modern art and architecture, among many other topics. Woven into the text are beautiful and accurate vignettes of Greek life, helping to illustrate how it is people live. A crossroads between Europe, Africa, and the Middle East, Greece is fighting to hold on to the culture of yesterday, while still looking toward modernity. *Culture and Customs of Greece* is a must-have volume for all high school and public library shelves.

Architecture and Identity Peter Herrle, Erik Wegerhoff, 2008 This book brings together complex fields of knowledge and globally splintered discourses on a subject that is experienced not only by scholars, but in the everyday lives of people around the world. There is a common complaint about the loss of identity which, to a substantial degree, is being associated with the built environment in cities and specifically with their architecture.

Architecture and Identity takes a global, multidisciplinary look on how identities in contemporary architecture are constructed. The general hypothesis underlying this book is that in a globalized world identity in architecture cannot be easily derived from distinct indigenous patterns. The book presents forty contributions from various disciplines aiming to destroy the myth of an inheritable or otherwise prefabricated identity. Some authors dismantle constructs of identity that have long been considered as solid and unbreakable while others meticulously unravel the construction process of identities in

Environmental Change in Lesotho Pendo Maro, 2011-08-20 *Environmental Change in Lesotho* identifies and analyzes the drivers of land-use change and the consequences of these changes on the livelihoods of rural land-users/managers. To accomplish this, a combination of tools from the social sciences and environmental fields were developed to identify causes and consequences of land-use change at selected levels, using a 'nested' approach. These methods were then applied to a case study of two villages in the Lowland region of Lesotho. This book is directed at environmental and social science experts, researchers, decision-makers, and development/aid workers interested in understanding the intricate human-environment relationship as it relates to land-use change in a changing biophysical, socio-economic, political and institutional context, coupled by HIV/AIDS, changing demographics, local perceptions and what is termed here 'dependency syndrome'.

Confronting Ecological and Economic Collapse Laura Westra, Prue Taylor, Agnès Michelot, 2013-06-07 From the first appearance of the term in law in the Clean Water Act of 1972 (US), ecological integrity has been debated by a wide range of researchers, including

biologists, ecologists, philosophers, legal scholars, doctors and epidemiologists, whose joint interest was the study and understanding of ecological/biological integrity from various standpoints and disciplines. This volume discusses the need for ecological integrity as a major guiding principle in a variety of policy areas, to counter the present ecological and economic crises with their multiple effects on human rights. The book celebrates the 20th anniversary of the Global Ecological Integrity Group and reassesses the basic concept of ecological integrity in order to show how a future beyond catastrophe and disaster is in fact possible, but only if civil society and ultimately legal regimes acknowledge the necessity to consider eointegrity as a primary factor in decision-making. This is key to the support of basic rights to clean air and water, for halting climate change, and also the basic rights of women and indigenous people. As the authors clearly show, all these rights ultimately depend upon accepting policies that acknowledge the pivotal role of ecological integrity.

Prime Movers of Globalization Vaclav Smil,2013-02-08 The story of how diesel engines and gas turbines, used to power cargo ships and jet airplanes, made today's globally integrated economy possible. The many books on globalization published over the past few years range from claims that the world is flat to an unlikely rehabilitation of Genghis Khan as a pioneer of global commerce. Missing from these accounts is a consideration of the technologies behind the creation of the globalized economy. What makes it possible for us to move billions of tons of raw materials and manufactured goods from continent to continent? Why are we able to fly almost anywhere on the planet within twenty-four hours? In Prime Movers of Globalization, Vaclav Smil offers a history of two key

technical developments that have driven globalization: the high-compression non-sparking internal combustion engines invented by Rudolf Diesel in the 1890s and the gas turbines designed by Frank Whittle and Hans-Joachim Pabst von Ohain in the 1930s. The massive diesel engines that power cargo ships and the gas turbines that propel jet engines, Smil argues, are more important to the global economy than any corporate structure or international trade agreement. Smil compares the efficiency and scale of these two technologies to prime movers of the past, including the sail and the steam engine. The lengthy processes of development, commercialization, and diffusion that the diesel engine and the gas turbine went through, he argues, provide perfect examples of gradual technical advances that receive little attention but have resulted in epochal shifts in global affairs and the global economy.

Two Prime Movers of Globalization Vaclav Smil, 2010 The story of how diesel engines and gas turbines, used to power cargo ships and jet airplanes, made today's globally integrated economy possible.

Sport and International Development Roger Levermore, Aaron Beacom, 2008-11-27 Investigating the capacity of sport to act both as a conduit for traditional development assistance activities and as an agent for change in its own right, this book argues that sport can contribute to the development process, particularly where traditional development approaches have difficulty in engaging with communities.

International Military Operations in the 21st Century Per M. Norheim-Martinsen, Tore

Nyhamar,2015-05-08 This book examines the challenges that military forces will face in multinational operations in the 21st century. Expanding on Rupert Smith's *The Utility of Force*, the volume assesses the changing parameters within which force as a political instrument is ultimately carried out. By analysing nine carefully selected mission types, the volume presents a comprehensive analysis of key trends and trajectories. Building upon this analysis, the contributors break the trends and parameters down into real and potential tasks and mission types in order to identify concrete implications for military forces in future multinational operations. The context of military intervention in conflicts and crises around the world is rapidly evolving. Western powers' shrinking ability and desire to intervene makes it pertinent to analyse how the cost of operations can be reduced and, how they can be executed more intelligently in the future. New challenges to international military operations are arising and this book addresses these challenges by focusing on three key areas of change: 1) An increasingly urbanised world; 2) The changing nature of missions; 3) The commercial availability of new technologies. In answering these questions and embracing some of the insights of a growing field of future studies, the volume presents an innovative perspective on future international military operations. This book will be of much interest to students of international intervention, military and strategic studies, war and conflict studies, security studies and IR in general.
