Reputation Management Online Ben Medeiros,2022-02-20 This book examines the work of the public relations, technology, and legal professionals who provide online "reputation management" services, situating their work within contemporary debates about regulating speech on the internet. The author argues that legal solutions like the European "Right to Be Forgotten" are not really possible in the United States, but that the private solutions of reputation management help to ameliorate novel concerns about reputation. At the same time, he contends that these practices prompt different free speech and dignitary concerns unique to the digital environment. Drawing upon rhetorical and legal analysis of diverse texts, including reputation management promotional materials, interviews with practitioners, legal cases, and popular online commentary about reputational disputes themselves, the book intervenes in specific debates about the regulation of the internet, as well as broader socio-legal debates about the role of reputation-damaging speech in a democratic society. This timely and relevant study will have great relevance for all students and scholars of communication studies, public relations, rhetoric, new and digital media, internet law, technology and society, computer-mediated communication, and sociology.

**The World of Peter Max** Peter Max,1970

**Max** Katherine Cecil Thurston,1910

The Trust Edge David Horsager,2012-10-09 In *The Trust Edge*, David Horsager reveals the foundation of genuine success—trust. Based on research but made practical for today's leader, *The Trust Edge* shows that trust is quantifiable and brings dramatic results to businesses and leaders. In this book, Horsager teaches readers how to build the 8 Pillars of Trust: 1. Clarity: People trust the clear and mistrust the ambiguous. 2. Compassion: People put faith in those who care beyond themselves. 3. Character: People notice those who do what is right over what is easy. 4. Competency: People have confidence in those who stay fresh, relevant, and capable. 5. Commitment: People believe in those who stand through adversity. 6. Connection: People want to follow, buy from, and be around friends. 7. Contribution: People immediately respond to results. 8. Consistency: People love to see the little things done consistently. When leaders learn how to implement these pillars, they enjoy better relationships, reputations, retention, revenue, and results. Fascinating and timely, *The Trust Edge* unveils how trust has the ability to accelerate or destroy any business, organization, or relationship. The lower the trust, the more time everything takes, the more everything costs, and the lower the loyalty of everyone involved. Conversely, an environment of trust leads to greater innovation, morale, and productivity. The trusted leader is followed. From the trusted salesperson, people will buy. For the trusted brand, people will pay more, come back, and tell others. Trust, not money, is the currency of business and life!

*The Sustainability of Higher Education in an Era of Post-Massification*  
Deane E. Neubauer, Ka Ho Mok, Jin Jiang, 2017-11-22 This volume examines the sustainability of higher education massification throughout the Asia Pacific region. The massification of higher education has swept across the region over the past three decades in complex and astounding ways in some cases. The book inquires after the many faces that higher education massification is taking in varied country settings and seeks to identify the more important implications that follow. It discusses massification and its sustainability within the region's complex contexts and addresses the issues of implications, challenges, and limitations. Paying particular attention to implications on resources, employment and social mobility, institutional identity, programs, funding and teacher education, the book explores the capacity of countries to stay on the course they have chosen and the implications this may have for the continued identification of resources to do so, the choice to focus more particularly and importantly on the considerable range of innovations and variations and the ability to recognize and develop them in meaningful ways.
