Probing the Depths of Evil and Good ,2007-01-01 In the few years since the attack on the World Trade Center on September 11, 2001, evil has become a central theme in the media and human consciousness: the evil of terrorism, the evil of secular culture, concern for poverty, and climate change... Yet different cultures and religious traditions have different ideas of what evil is and what its root causes are. Although there is no massive clash of cultures, many disagreements and also conflicts in the world arise from the deep differences in views of evil. This volume explores religious views of evil. Scholars from different religions and from various parts of the world describe how people probe the depths of evil—and by necessity that of good—from their own background in various worldviews. In their explorations, almost all address the need to go beyond morality, and beyond legalistic definitions of evil and of good. They point to the radical depths of evil in the world and in human society and reinforce our intuition that there is no easy solution. But if we can gain a better understanding of what people from other worldview traditions and cultures consider evil, we are that much closer to a more peaceful world.

Mirrors - Manual on combating antigypsyism through human rights education Collectif,2015-06-01 Everyday in Europe, people associated with Roma or Traveller communities are exposed to acts of discrimination and exclusion on a scale that has stopped shocking people and institutions. Too often, it is only when lives are claimed that we wake up to the persistence of realities that have no place in any democratic society. Antigypsyism is a term used to refer to the multiple forms of biases, prejudice and stereotype that motivate the everyday discriminatory behaviour of institutions and many individuals towards Roma. Antigypsyism is a form of racial discrimination. Most antigypsyism acts are illegal and contrary to human rights, even when they are not prosecuted, and even if they are widespread and often ignored or tolerated. Antigypsyism undermines the moral fabric of societies. Democracy and human rights cannot take root where discrimination is institutionalised, tolerated or conveniently ignored. Education plays a central role in combating and overcoming antigypsyism because the result of centuries of prejudice cannot be fought by laws and courts alone. Human rights education – learning for, through and about human rights – provides an ideal approach to raising awareness about antigypsyism and promoting a culture of universal human rights. This manual was produced within the Roma Youth Action Plan of the Council of Europe to provide teachers, trainers and facilitators of non-formal education processes with essential information and methodological tools to address antigypsyism with young people of all ages and in any social-cultural setting. It is equally suitable for work with groups of non-Roma, Roma only, or mixed groups. Combating antigypsyism is a task for all of us; learning about it is a necessary starting point. As human beings we have the capability to discriminate and impose prejudice upon others. Fortunately, we are also capable to learn and change. Mirrors is a great help to help us notice this, correct distorted views and to recognise ourselves in the eyes of others.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Prosthetic Memory Alison Landsberg,2004 Prosthetic Memory argues that mass cultural forms such as cinema and television in fact contain the still-unrealized potential for a progressive politics based on empathy for the historical experiences of others. The technologies of mass culture make it possible for anyone, regardless of race, ethnicity, or gender, to share collective memories--to assimilate as deeply felt personal experiences historical events through which they themselves did not live.

Ethnic Mobilization, Violence, and the Politics of Affect Adis Maksić,2017-03-25 This book offers an unprecedented account of the Serb Democratic Party's origins and its political machinations that culminated in Europe's bloodiest conflict since World War II. Within the first two years of its existence, the nationalist movement led by the infamous genocide convict Radovan Karadzic, radically transformed Bosnian society. It politically homogenized Serbs of Bosnia-Herzegovina, mobilized them for the Bosnian War, and violently carved out a new geopolitical unit, known today as Republika Srpska. Through innovative and in-depth analysis of the Party's discourse that makes use of the recent literature on affective cognition, the book argues that the movement's production of existential fears, nationalist pride, and animosities towards non-Serbs were crucial for creating Serbs as a palpable group primed for violence. By exposing this nationalist agency, the book challenges a commonplace image of ethnic conflicts as clashes of long-standing ethnic nations.

Teaching 20th-century European History Robert Stradling,2001-01-01 Produced for the Council of Europe project Learning and teaching about the history of Europe in the 20th century, this book concentrates on the how rather than the what of teaching. Besides a study of selected themes and topics, it covers the teaching of sensitive issues, the reading of visual archives, analysing history on television and the Internet and assessing new technologies. Some of these new sources have not been made part of standard teacher training, yet they have a powerful role in the way young people perceive the past. The author is a Senior Research Fellow at Leirsinn Research Centre, University of Highlands and Islands Millennium Institute.
