*The Lighthouse Function of Social Law* Yves Jorens, 2023-07-30 This is the conference book for the XIV European Regional Congress of the International Society for Labour and Social Security Law, dedicated to the interactions between social law and other areas of law. In recent years, labour law and social security law have been subject to various reforms and developments. Social law is however not an isolated domain but rather interacts with other fields, often even functioning as a guide or giving direction to those lost at sea. In other words: serving as a lighthouse. The key aspect addressed in this book is the existence of a connection between social law *sensu stricto* (labour law and social security law) and other areas of law. Pursuing an inter- and multidisciplinary approach, it gathers contributions on topical and challenging issues in four broad areas: 1. Basic and fundamental principles of European social law 2. The future in the light of the past 3. The impact of regionalisation 4. Enforcement in social law In turn, various developments can be identified in connection with these topics: the emergence of social criminal law is creating new overlaps between social and criminal law; the growing number of administrative law sanctions offers new insights into and connections between social security law and administrative law; the increasing similarity of employment in the public and private sectors raises questions about the applicability of administrative law in labour law relations; the relation between the ECHR and the articles of the Constitution opens up new perspectives on the constitutional interpretation of freedoms and on the interaction between human rights, constitutional law and social law; and lastly, there is a growing influence of EU law and international treaty law (concerning trade) on social law. Can we, by looking at these developments, draw certain conclusions at a different and innovative level? The contributions were selected by an international working group of distinguished scholars from across Europe.

**Visual Soil Evaluation** Bruce C. Ball, Lars J. Munkholm, 2015-10-23 Visual Soil Evaluation (VSE) provides land users and environmental authorities with the tools to assess soil quality for crop performance. This book describes the assessment of the various structural conditions of soil, especially after quality degradation such as compaction, erosion or organic matter loss. Covering a broad range of land types from abandoned peats to prime arable land, this useful handbook assesses yield potential across a range of scales. It also appraises the use of VSE in determining the potential of different land types for carbon storage, greenhouse gas emissions and nutrient leaching, and for diagnosing and rectifying erosion and compaction in soils.

*Capitals of the Northlands: Tales of Ten Cities* Ian C. Hannah, 2021-05-19 *Capitals of the Northlands: Tales of Ten Cities* by Ian C. Hannah. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Understanding Pathophysiology - E-Book Sue E. Huether, Kathryn L. McCance, 2019-09-27 Make difficult pathophysiology concepts come to life! Filled with vibrant illustrations, simplified language, and detailed online

content Understanding Pathophysiology, 7th Edition delivers the most accurate information on treatments, manifestations, and mechanisms of disease across the lifespan. This new edition is fully revised and includes coverage of rare diseases and epigenetics to you with a thorough understanding of conditions affecting the human body. Plus, with over 30 new 3D animations on the companion Evolve site, quick check boxes at the end of each chapter, and disease progression algorithms, this text helps you engage with the fundamental knowledge you need to succeed in nursing school and in practice. Student resources include animations, review questions, answers to the Quick Check boxes (featured in the text), chapter summary reviews, and case study with answers for select chapters. Algorithms throughout the text clarify disease progression. Did You Know boxes highlight new developments in biologic research, diagnostic studies, preventive care, treatments, and more. Quick Check boxes tests your retention of important chapter concepts. Risk Factor boxes alert you to important safety considerations associated with specific diseases. Summary Review sections provide fast, efficient review of chapter content. Geriatric Considerations boxes and Pediatric Considerations boxes highlight key considerations for these demographics in relevant chapters. Consistent presentation helps you to better distinguish pathophysiology, clinical manifestations, and evaluation and treatment for each disease. Glossary of approximately 1,000 terms familiarizes you with the most difficult or important terminology related to pathophysiology. NEW! Chapters on Alterations in Immunity and Obesity and Disorders of Nutrition feature the latest coverage of these hot topics. NEW! Additional coverage of rare diseases and epigenetics gives you a comprehensive understanding of conditions and cell growths that affect the human body. NEW! Streamlined content and illustrations ensures content is at an appropriate level for undergraduate students. NEW! More than 1000 illustrations in the text and 30+ new 3D animations on companion Evolve site bring difficult concepts to life for a new perspective on disease processes.

### **III-Nitride Based Light Emitting Diodes and Applications Tae-Yeon**

Seong,Jung Han,Hiroshi Amano,Hadis Morkoc,2014-07-08 Light emitting diodes (LEDs) are already used in traffic signals, signage lighting, and automotive applications. However, its ultimate goal is to replace traditional illumination through LED lamps since LED lighting significantly reduces energy consumption and cuts down on carbon-dioxide emission. Despite dramatic advances in LED technologies (e.g., growth, doping and processing technologies), however, there remain critical issues for further improvements yet to be achieved for the realization of solid-state lighting. This book aims to provide the readers with some contemporary LED issues, which have not been comprehensively discussed in the published books and, on which the performance of LEDs is seriously dependent. For example, most importantly, there must be a breakthrough in the growth of high-quality nitride semiconductor epitaxial layers with a low density of dislocations, in particular, in the growth of Al-rich and In-rich GaN-based semiconductors. The materials quality is directly dependent on the substrates used, such as sapphire, Si, etc. In addition, efficiency droop, growth on different orientations and polarization are also important. Chip processing and packaging technologies are key issues. This book presents a comprehensive review of contemporary LED issues. Given the interest and importance of future research in nitride semiconducting materials and solid state lighting

applications, the contents are very timely. The book is composed of chapters written by leading researchers in III-nitride semiconducting materials and device technology. This book will be of interest to scientists and engineers working on LEDs for lighting applications. Postgraduate researchers working on LEDs will also benefit from the issues this book provides.

**Steering Against Superbugs** Olivier Rubin,Erik Baekkeskov,2023-05-19 Many people correctly understand that superbugs can threaten health. Superbugs are microbial organisms, including bacteria, viruses, parasites, or fungi, that resist one or more antibiotic or other antimicrobial treatments. What may be less widely understood is that the threat is global, growing, and encompasses human systems surrounding healthcare, agriculture, and the environment. In 2019, 1.3 million people around the world are estimated to have died from resistant microbes (Murray et al., 2022). This is similar to how many succumb annually to HIV/AIDS and Malaria combined (Laxminarayan, 2022). The recent coronavirus pandemic may have further exacerbated the global health challenge posed by superbugs (Rizvi & Ahammad, 2022; Adebisi et al., 2021; Rodríguez-Baño et al., 2021). By 2050, worst-case projections include annual superbug fatalities of ten million people (O'Neil, 2016). Some experts have started to refer to the increase and spread of superbugs as the overlooked or silent pandemic (Laxminarayan, 2022; UN, 2020; Mahoney et al., 2021). Other experts warn that we might be heading towards a 'post-antibiotic' era where minor infections become increasingly severe or even impossible to treat (Reardon, 2014; Kwon & Powderly, 2021). Annual economic losses related to superbugs are already estimated in the tens of billion U.S. dollars (Hall, McDonnell & O'Neil, 2018). As a response to these global challenges, this book analyses and discusses ways to reduce barriers to and create opportunities for global governance of antimicrobial resistance. Or more briefly, steering against superbugs--

**Re-Inventing Labour Law Enforcement** Louise Munkholm,2020-04-30 This monograph investigates current issues in labour law enforcement from a socio-legal perspective. It analyses how local Italian enforcement actors promote the protection of workers in Prato – a city that in recent decades has seen a significant influx of Chinese migrants who run small workshops as part of the local clothing industry. Many of the Chinese firms in Prato fail to live up to core labour standards, such as maximum working hours, health and safety at work and payment of social security contributions. The book analyses the strategies and practices employed by three local enforcement actors (labour inspectors, labour unionists and a new type of labour law consultant) in their efforts to assist Chinese firms in improving their level of labour law compliance. Combining documentary, interview and observational data, the book applies theories of legal culture and legal development to address the interaction between law and society. It focuses on the operational aspects of law by asking three interrelated research questions: How do local enforcement actors promote the protection of workers in Chinese firms in Prato? Which tools are employed, and which rationalities drive the initiatives? The book thereby sheds light upon processes of legal cultural adaptation, informing ongoing international and national debates about what can actually be done to combat contemporary gaps in the protection of workers.

**Transnationalisation and Legal Actors** Bettina Lemann Kristiansen,Katerina Mitkidis,Louise Munkholm,Lauren Neumann,Cécile Pelaudeix,2019-06-10 Transnational tendencies have led to a pluralistic legal environment in which

emerging and established legal actors, regulatory levels and types of legal norms co-exist, compete and interact in complex ways. This challenges and changes not only how legal norms are created, applied and enforced but also when these actors, norms and processes are considered legitimate. The book investigates how states and non-state actors interact in transnational settings and pays attention to the understudied question of what effect transnational tendencies have on the legitimacy of legal actors, norms and processes. It seeks to confront three fundamental questions: Has legitimacy significantly changed? Who creates norms and with which consequences for legal procedures and norms? The book considers the question of legitimacy from a broad range of legal perspectives, including environmental law, human rights law and commercial law. It maps out the contours of legitimacy today with an emphasis on the reactions of central actors like states and courts to transnational tendencies. The book thereby provides a conceptually powerful structure within which to further debate the complexity of transnational tendencies in law and proposes innovative approaches to problem solving while designing pathways for further reflection on the development of law in a transnational context.

**Trans Rights and Wrongs** Isabel C. Jaramillo, Laura Carlson, 2021-06-23 This book maps various national legal responses to gender mobility, including sex and name registration, access to gender modification interventions, and anti-discrimination protection (or lack thereof) and regulations. The importance of the underlying legislation and history is underlined in order to understand the law's functions concerning discrimination, exclusion, and violence, as well as the problematic nature of introducing biology into the regulation of human relations, and using it to justify pain and suffering. The respective chapters also highlight how various governmental authorities, as well as civil society, have been integral in fostering or impeding the welfare of trans persons, from judges and legislators, to medical commissions and law students. A collective effort of scholars scattered around the globe, this book recognizes the international trend toward self-determination in sex classification and a generous guarantee of rights for individuals expressing diverse gender identities. The book advocates the dissemination of a model for the protection of rights that not only focuses on formal equality, but also addresses the administrative obstacles that trans persons face in their daily lives. In addition, it underscores the importance of courts in either advancing or obstructing the realization of individual rights.

**Due North or Glimpses of Scandinavia and Russia** Maturin Murray Ballou, 2024-01-24 Embark on a captivating journey through the enchanting landscapes of Scandinavia and Russia with Maturin Murray Ballou in 'Due North or Glimpses of Scandinavia and Russia.' Penned in the late 19th century, this travel narrative offers readers a vivid and firsthand account of Ballou's exploration of the northern realms. As Ballou traverses the picturesque landscapes, encounters with diverse cultures, and explores the historic cities of Scandinavia and Russia, he unfolds tales of adventure, cultural insights, and the timeless beauty of the North. 'Due North' is more than a travelogue; it's a literary expedition that captures the essence of these fascinating regions. Join Ballou on this literary journey where each page reveals a new chapter of discovery, making 'Due North or Glimpses of Scandinavia and Russia' an essential read for those captivated by tales of Northern exploration and the rich cultural tapestry of Scandinavia and

Russia.

*Theorizing the Sharing Economy* Indre Maurer, Johanna Mair, Achim Oberg, 2020-04-10 This volume takes advantage of this opportunity by presenting a collection of empirical and conceptual work that explores the variety and the trajectories of new forms of organizing in the sharing economy, and in doing so builds on, rejuvenates, and refines existing organization theories.

*Beyond Bedside Manner* Jaime G. Corvalan, MD, FACS, 2010-06-18 The purpose of "Beyond Bedside Manner" isn't simply to maintain your optimal physical body - it's to actively participate in the blessings of an increased life span by moving us towards higher levels of consciousness. The soul needs a physical body in which to live out its adventure - the human experience - as it seeks to fulfill its specific, transcendent purpose. The soul needs time to unfold its meaning to bring forth a new consciousness. "Beyond Bedside Manner" brings you everything you need to know to maintain your body so your soul may thrive and achieve its purpose.

*The Emerging Spatial Mind* Jodie M. Plumert, John P. Spencer, 2007-04-12 How does the spatial mind develop? In this book, Jodie Plumert and John Spencer bring together the leading researchers from the field of spatial cognitive development to examine how the spatial mind emerges from its humble origins in infancy and becomes its mature, flexible, and skilled adult form. The work presented sheds light on how the emerging spatial mind is fostered and shaped over time by our experiences of thinking about and interacting in the space around us. Each chapter presents cutting-edge research and theory that addresses the two pivotal questions of what changes in the spatial mind, and how these changes come about. The authors provide both conceptual and formal theoretical accounts of developmental process at multiple levels of analysis--genes, neurons, behaviors, social interactions--creating a contemporary overview of the general mechanisms of cognitive change. Commentary chapters show how the developmental advances discussed in these accounts fit into our understanding of not only spatial cognitive development, but also spatial cognition more generally.

*Handbook of Energy Law in the Low-Carbon Transition* Giuseppe Bellantuono, Lee Godden, Hanri Mostert, Hannah Wiseman, Hao Zhang, 2023-05-22 The low-carbon transition is ongoing everywhere. This Handbook, written by a group of senior and junior scholars from six continents and nineteen countries, explores the legal pathways of decarbonisation in the energy sector. What emerges is a composite picture. There are many roadblocks, but also a lot of legal innovation. The volume distils the legal knowledge which should help move forward the transition. Questions addressed include the differences between the decarbonization strategies of developed and developing countries, the pace of the transition, the management of multi-level governance systems, the pros and cons of different policy instruments, the planning of low-carbon infrastructures, the roles and meanings of energy justice. The Handbook can be drawn upon by legal scholars to compare decarbonisation pathways in several jurisdictions. Non-legal scholars can find information to be included in transition theories and decarbonization scenarios. Policymakers can discover contextual factors that should be taken into account when deciding how to support the transition.

**The United Nations Convention on the Law of the Sea** Kristina Siig, Birgit Feldtmann, Fenella M.W. Billing, 2023-10-09 The 1982 United Nations Convention

on the Law of the Sea (UNCLOS) has for four decades been considered by many to be one of the most important legislative achievements of international law. It is revered as a constitution of the oceans, providing the legal framework for the governance of the oceans. This volume explores how the UNCLOS is functioning in various complex settings, how it adapts to new, emerging developments, as well as how it interacts with other regulation, both within the law of the sea regime and outside. Engaging in themes such as law and order at sea, UNCLOS' interaction with human rights and the role of private actors, the book raises complex questions in the application, understanding, and enforcement of the convention and how it can be envisaged, interpreted, and used in a dynamic world. The volume also raises methodological questions, the answers to which may enhance the predictability and coherence of the law under UNCLOS and thus secure its role as the predominant and relevant system for legal governance at sea for many decades to come. As a contribution to ensuring the future relevance of UNCLOS, the book will be a valuable resource for scholars, diplomats, judges and other practitioners who are working with and interpreting the law of the sea and related issues of maritime law, migration law, human rights law and humanitarian law.

Psychopathology and Mental Distress Jonathan D. Raskin, 2024-01-15 This groundbreaking core textbook offers a comprehensive overview of different approaches to the causes, assessment and treatment of psychological disorders. The book includes important diagnostic frameworks, including the new DSM-5-TR, ICD-11 and PDM, but also widens the scope of coverage beyond mainstream psychiatric models to include psychological, biological, historical, sociocultural and therapeutic approaches. Contemporary and well-balanced, this book provides an even-handed and holistic foundation, allowing students to develop a strong critical mindset while retaining a robust research-driven orientation. This new edition: - features an innovative structure organized by presenting problem, examining each in a broad context of traditional psychiatric and alternative approaches - is grounded in lived experience of disorder: shining a spot-light on service-users through 'Case Examples' scenarios and 'Lived Experience' perspective pieces - Supports student learning and critical thinking through engaging 'Controversial Question' and 'In Depth' features - Features an attractive new layout and plenty of colour illustrations - Is supported by impressive online support features including lecture slides, a test bank, instructor manual, video library, student study questions, self-test quizzes, flashcard activities and more. Now thoroughly updated to include the latest developments in research and clinical practice, along with enhanced in-text and online pedagogy to support instructors and learners, this book is ideal for undergraduate and graduate students on abnormal psychology, psychopathology, mental health or clinical psychology courses.

**EU Collective Labour Law** ter Haar, Beryl, Kun, Attila, 2021-12-09 This unique book offers a comprehensive systematization and overview of the EU's emerging 'acquis' and practice of Collective Labour Law. Although the core aspects of Collective Labour Law lie outside the EU's competence to regulate, the laws and industrial relations systems of Member States are undoubtedly influenced by the EU, and the involvement of Social Partners, i.e. representatives of employers and workers, is essential for many aspects of EU law and policy.

**Privacy@work** Frank Hendrickx, Elena Gramano, David Mangan, 2023-06-12 The

right to privacy is a fundamental right. Along with the related right to personal data protection, it has come to take a central place in contemporary employment relations and shows significant relevance for the future of work. This thoroughly researched volume, which offers insightful essays by leading European academics and policymakers in labour and employment law, is the first to present a thoroughly up-to-date Europe-wide survey and analysis of the intensive and growing interaction of workplace relations systems with developments in privacy law. With abundant reference to the EU's General Data Protection Regulation, the case law of the European Court of Human Rights, and the work of the International Labour Organisation, the book proceeds as a series of country chapters, each by a recognised expert in a specific jurisdiction. Legal comparison is based on a questionnaire circulated to the contributors in advance. Each country chapter addresses the national legal weight of such issues and topics as the following: interaction of privacy and data protection law; legitimacy, purpose limitation, and data minimisation; transparency; role of consent; artificial intelligence and automated decision-making; health-related data, including biometrics and psychological testing; monitoring and surveillance; and use of social media. A detailed introductory overview begins the volume. The research for this book is based on a dynamic methodology, founded in scientific desk research and expert networking. Recognising that the need for further guidance for privacy at work has been demonstrated by various European and international bodies, this book delivers a signal contribution to the field for social partners, practitioners, policymakers, scholars, and all other stakeholders working at the crossroads of privacy, data protection, and labour law.

**Managers in European Law** Natalie Videbæk Munkholm, Vincenzo Pietrogiovanni, Karsten Engsig Sørensen, 2024-02-08 Business organisations depend on having one or more persons who can legitimately make strategic business decisions. But what are the legal entitlements of such key professionals? This is the first book – with contributions from experts across Europe – to take a broad comparative look at how the delimitation of rights and duties of executive and non-executive managers is done under different areas of EU law and across different jurisdictions (namely, EU and national law). Aspects of the executive role covered include the following: extensive treatment of definitions and methodologies to ascertain the status of managers as 'workers' in Europe; comprehensive interdisciplinary and comparative analysis of cross-cutting issues affecting managers in Europe, including complexities arising from national variations in governance structures and roles and functions of managers; comprehensive analysis of cases before the European courts with full awareness of applicable rules; distinction between registered front directors and those who act as de facto managers; how employees (and to some degree other stakeholders) may be involved in management; trends in current EU law that increase the need to protect managers; trends that increase the need to hold managers liable; right to inter alia information and consultation, occupational health and safety, non-discrimination and free movement; and recognition that managers may not necessarily be powerful professionals with strength vis-à-vis the company as employer. According to EU statistics, in 2019, nearly 9.4 million persons held a managerial position across the EU's Member States, meaning that many managers currently can no longer inherently be considered unworthy of employment protection. The legal status of these individuals thus cannot

be sidestepped. This very important volume accordingly will be of value to practitioners, policymakers, and academics in employment and labour law.

*Social Law 4.0* Ulrich Becker, Olga Chesalina, 2020-12-14 Digitalisierung und die damit einhergehenden Veränderungen der Arbeitswelt stellen das Standardmodell der Beschäftigung als Basis von sozialen Sicherungssystemen zunehmend in Frage. Während sich eine wachsende Zahl an Veröffentlichungen mit deren Folgen für das Arbeitsrecht beschäftigen, bleibt bis heute das Sozialrecht weitgehend ausgeblendet. Das Buch schafft Abhilfe. Es beschäftigt sich mit den wichtigsten Herausforderungen für den sozialen Schutz durch Digitalisierung, dem Zugang zu Sicherungssystemen und deren Finanzierung am Beispiel der Plattformarbeit. Es gibt einen Überblick über nationale Lösungsansätze, analysiert dies in vergleichender Perspektive und stellt sie in einen transnationalen Kontext. Das Buch vereint Fallstudien aus Belgien, Italien, dem Vereinigten Königreich, den Niederlanden, Dänemark, Schweden, Spanien, Frankreich und Estland und behandelt die Herausforderungen, die Reformen für eine Standardsetzung auf EU-Ebene, für die Koordinierung innerhalb der EU und für ihr Verhältnis zum Steuerrecht ausgesetzt sind. Es vermittelt damit neue Einsichten, wie ein Sozialrecht 4.0 aussehen sollte.
