Enough Roger Thurow,2010 For more than thirty years, humankind has known how to grow enough food to end chronic hunger worldwide. Yet while the "Green Revolution" succeeded in South America and Asia, it never got to Africa. More than 9 million people every year die of hunger, malnutrition, and related diseases every year - most of them in Africa and most of them children. More die of hunger in Africa than from AIDS and malaria combined. Now, an impending global food crisis threatens to make things worse. In the west we think of famine as a natural disaster, brought about by drought; or as the legacy of brutal dictators. But in this powerful investigative narrative, Thurow & Kilman show exactly how, in the past few decades, American, British, and European policies conspired to keep Africa hungry and unable to feed itself. As a new generation of activists work to keep famine from spreading, *Enough* is essential reading on a humanitarian issue of utmost urgency.

Roots in the Air Nadezda Rumjanceva,Nadezda Rumjanceva,2015-07-15 Located on the seam of Diaspora and Israeli Literature, Anglophone Israeli Literature comprises a loose community of 100-500 authors and has co-existed with the Hebrew writing tradition in Israel since the 1970s. Consisting mainly of immigrants from Anglophone countries, Anglophone Israeli Literature is characterized by a search for personal and poetic identity in a highly transcultural environment, challenging settled identities and opting instead for flexibility, flux and inclusion. The present volume considers Anglophone Israeli Literature as a phenomenon in its critical, social and historical aspects on the one hand and explores the specific mechanisms of constructing and representing poetic identity on the other hand. Focusing on the works by and interviews with some of the core representatives of Anglophone Israeli Literature – Shirley Kaufman, Rachel Tzvia Back, Karen Alkalay-Gut, Lami, Richard Sherwin, Jerome Mandel, Riva Rubin and Rochelle Mass – the book analyzes three pivotal elements of identity: language, geography and place, and political and emotional self-positioning towards the Other.

The Last Warrior Andrew F Krepinevich,Barry D Watts,2015-01-06 Andrew Marshall is a Pentagon legend. For more than four decades he has served as Director of the Office of Net Assessment, the Pentagon's internal think tank, under twelve defense secretaries and eight administrations. Yet Marshall has been on the cutting edge of strategic thinking even longer than that. At the RAND Corporation during its golden age in the 1950s and early 1960s, Marshall helped formulate bedrock concepts of US nuclear strategy that endure to this day; later, at the Pentagon, he pioneered the development of net assessment -- a new analytic framework for

understanding the long-term military competition between the United States and the Soviet Union. Following the Cold War, Marshall successfully used net assessment to anticipate emerging disruptive shifts in military affairs, including the revolution in precision warfare and the rise of China as a major strategic rival of the United States. In *The Last Warrior*, Andrew Krepinevich and Barry Watts -- both former members of Marshall's staff -- trace Marshall's intellectual development from his upbringing in Detroit during the Great Depression to his decades in Washington as an influential behind-the-scenes advisor on American defense strategy. The result is a unique insider's perspective on the changes in US strategy from the dawn of the Cold War to the present day. Covering some of the most pivotal episodes of the last half-century and peopled with some of the era's most influential figures, *The Last Warrior* tells Marshall's story for the first time, in the process providing an unparalleled history of the evolution of the American defense establishment.

The Falashas David F. Kessler, 2012-10-12 This third, revised edition comprises the whole of the original volume and is enhanced by the addition of a new preface and afterward which seek to reply to criticisms of the authors argument about the origins of the Falashas, and include some new thinking on the subject. Drawing on tradition and legend to reinforce his argument, the author again traces the source of the community to the Jewish settlements which existed in ancient Egypt (particularly at Elephantine on the Nile) and in the ancient Meroitic Kingdom, in present day Sudan known in the Bible as Cush. The story told in this book is remarkable, heroic and stimulating and makes a valuable contribution to our understanding of the history of the horn of Africa.

Intelligence, Surveillance, and Reconnaissance United States. Government Accountability Office, 2008 The Department of Defense's (DOD) intelligence, surveillance, and reconnaissance (ISR) capabilities-such as satellites and unmanned aircraft systems-are crucial to military operations, and demand for ISR capabilities has increased. For example, DOD plans to invest \$28 billion over the next 7 years in 20 airborne ISR systems alone. Congress directed DOD to fully integrate its ISR capabilities, also known as the ISR enterprise, as it works to meet current and future ISR needs. GAO was asked to (1) describe the challenges, if any, that DOD faces in integrating its ISR enterprise, (2) assess DOD's management approach for improving integration of its future ISR investments, and (3) evaluate the extent to which DOD has implemented key activities to ensure proposed new ISR capabilities fill gaps, are not duplicative, and use a joint approach to meeting warfighters' needs. GAO assessed DOD's integration initiatives and 19 proposals for new ISR capabilities. We supplemented this analysis with discussions with DOD officials.

Cultural Capital and Prospects for Democracy in Botswana and Ethiopia Asafa Jalata, 2021-03-31 This book focuses on and examines the impact of cultural capital, political economy, social movements, and political consciousness on the potential development of substantive democracy in Botswana and Ethiopia. While explaining the challenges, obstacles, and opportunities for the development of democracy, *Cultural Capital and Prospects for Democracy in Botswana and Ethiopia* engages in defining democracy as a contested, open, and expanding concept through a comparative and historical examination. The book's analysis employs interdisciplinary, multidimensional, comparative methods and critical approaches to examine the dynamic interplay among social structures, human agencies, cultural factors, and social movements. This comparative and historical study has required an examination of critical social history that looks at societal issues from the bottom up: specifically critical discourse and the particular world system approach, which deal with long-term and large-scale social changes. *Cultural Capital and Prospects for Democracy in Botswana and Ethiopia* will be of interest to scholars and students of African politics, political theory, and democratization.

Philosophising in Mombasa Kai Kresse, 2007-05-16 *Philosophising in Mombasa* provides an approach to the anthropological study of philosophical discourses in the Swahili context of Mombasa, Kenya. In this historically established Muslim environment, at the dawn of the twenty-first century, philosophy is investigated as social discourse and intellectual practice, situated in everyday life. This is done from the perspective of an 'anthropology of philosophy', a project which is spelled out in the opening chapter. Entry-points and guidelines for the ethnography are provided by discussions of Swahili literary genres, life histories, and social debates. From here, local discourses of knowledge are described and analysed. The social environment and discursive dynamics of the Old Town are portrayed, firstly, by means of following and contextualising informal discussions among neighbours and friends at daily meeting points in the streets; and secondly, by presenting and discussing in-depth case studies of local intellectuals and their contributions to moral and intellectual debates within the community. Taking recurrent internal discussions on social affairs, politics, and appropriate Islamic conduct as a focus, this study sheds light on local practices of critique and reflection. In particular, three local intellectuals (two poets, one Islamic scholar) are portrayed against the background of regional intellectual history, Islamic scholarship, as well as common public debates and private discussions. The three contextual portrayals discuss exemplary issues for the wider field of research on philosophical discourse in Mombasa and the Swahili context on the whole, with reference to the lives and projects of distinct individual thinkers. Ultimately, the study directs attention beyond the regional and the African contexts, towards the anthropological study of knowledge and intellectual practice around the world.

Using DNA to Solve Cold Cases U.s. Department of Justice,Office of Justice Programs,National Institute of Justice,2012-07-18 DNA has proven to be a powerful tool in the fight against crime. DNA evidence can identify suspects, convict the guilty, and exonerate the innocent. Throughout the Nation, criminal justice professionals are discovering that advancements in DNA technology are breathing new life into old, cold, or unsolved criminal cases. Evidence that was previously unsuitable for DNA testing because a biological sample was too small or degraded may now yield a DNA profile. Development of the Combined DNA Index System (CODIS) at the State and national levels enables law enforcement to aid investigations by effectively and efficiently identifying suspects and linking serial crimes to each other. The National Commission on the Future of DNA Evidence made clear, however, that we must dedicate more resources to empower law enforcement to use this technology quickly and effectively. Using DNA to Solve Cold Cases is intended for use by law enforcement and other criminal justice professionals who have the responsibility for reviewing and investigating unsolved cases. This report will provide basic information to assist agencies in the complex process of case review with a specific emphasis on using DNA evidence to solve previously unsolvable crimes. Although DNA is not the only forensic tool that can be valuable to unsolved case investigations, advancements in DNA technology and the success of DNA database systems have inspired law enforcement agencies throughout the country to reevaluate cold cases for DNA evidence. As law enforcement professionals progress through investigations, however, they should keep in mind the array of other technology advancements, such as improved ballistics and fingerprint databases, which may substantially advance a case beyond its original level.
