**Web Client Programming with Perl** Clinton Wong,1997 This text teaches users how to extend scripting skills to the Web. Readers learn the basics of how browsers communicate with servers and how to write customized Web clients to automate common tasks.

**James Bond** Alan J. Porter,2008 Now for the first time, the complete history of the illustrated James Bond is chronicled by pop-culture historian Alan J. Porter in James Bond: The History of the Illustrated 007. Before Bond became world famous with his movie series, the character was the subject of successful English newspaper strips and later in comic books. James Bond: The History of the Illustrated 007 examines it all, covering Bond's newspaper strip and comic book appearances from the 1950s to the present.

**Information Architecture for the World Wide Web** Louis Rosenfeld,Peter Morville,2002 Today's web sites and intranets are larger, more valuable, and more complex than ever before, and their users are busier and less forgiving. Designers, information architects, and web site managers are required to juggle vast amounts of information, frequent changes, new technologies, and corporate politics, making some web sites look like a fast-growing but poorly planned city -roads everywhere, but impossible to navigate. A well-planned information architecture has never been as essential as it is now. Information Architecture for the World Wide Web, Second Edition, shows how to use both aesthetics and mechanics to create distinctive, cohesive web sites that work. Most books on web development concentrate either on the graphics or on the technical issues of a site. This book focuses on the framework that holds the two together. By applying the principles outlined in this completely updated classic, you'll build scalable and maintainable web sites that are easier to navigate and more appealing to your users. Using examples and case studies, Information Architecture for the World Wide Web will help you: Develop a strong, cohesive vision for your site that makes it both distinctive and usable; Organize your site's hierarchy in ways that are meaningful to its users and that minimize the need to re-engineer the site; Create navigation systems that allow users to move through the site without getting lost or frustrated; Accurately label your site's content; Organize your site in a way that supports both searching for specific items and casual browsing; Configure search systems so that users' queries actually retrieve meaningful results; Manage the process of developing an information architecture, from selling the concept to research and conceptual design to planning and production. The world will be a better place when web designers read this book. It's smart, funny, and artfully distills years of the authors' hard-won experience. Information Architecture for the World Wide Web tackles political/organizational challenges as well as content, structure, and user interface. This is not design-lite, but a deep treatment of fundamental issues of information presentation that advances the state of the art. It's light years ahead of the competition. -Bonnie Nardi, Co-author of Information Ecologies- Using Technology with Heart

Agent Technology Nicholas R. Jennings,Michael J. Wooldridge,2012-12-06 The first book to provide an integrative presentation of the issues, challenges and success of designing, building and using agent applications. The chapters presented are written by internationally leading authorities in the field, with a general audience in mind. The result is a unique overview of agent technology applications, ranging from an introduction to the technical foundations to reports on dealing with specific agent systems in practice.

**Information, Organization and Management** Ralf Reichwald,Rolf T. Wigand,2008-03-27 This book offers a comprehensive treatment of the economic and technical foundations for new organizational forms, relations and processes. It provides a wide range of underlying concepts and frameworks that help the reader understand the major forces driving organizational and marketplace change, rather than presenting these changes as simple outcomes of technological or management fads. Contains case studies are included.

**Security Complete** ,2002-10-10 This edition of Security Complete is the ultimate resource, including new coverage of firewalls, Cisco PIX, wireless networks, and Windows XP. Every business needs a secure network to share information, computer resources, and Internet access this

volume provides users with the information they need to ensure that their data is safe and secure.

**Ecommerce** Robert T. Plant, 2000 Drawing on research at more than 40 top e-commerce organizations, he helps you optimize brand, technology, service, market, and development - and answer critical questions.--BOOK JACKET.

Crossing Platforms A Macintosh/Windows Phrasebook Adam Engst, David Pogue, 1999-11-23 Like travelers in a foreign land, Mac users working in Windows or Windows users working on a Mac often find themselves in unfamiliar territory with no guidebook. Crossing Platforms: A Macintosh/Windows Phrasebook, with information presented in a translation dictionary-like format, offers users a handy way of translating skills and knowledge from one platform to the other. Whether it's explaining the difference between Macintosh aliases and Windows shortcuts or explaining how a Windows user would go about setting up Internet access on a Mac, this book provides readers a simple means to look up familiar interface elements and system features and learn how that element or feature works on the other platform. Crossing Platforms: A Macintosh/Windows Phrasebook includes: A general introduction to the key differences between the Mac and Windows A to Z sections for each platform: one section where Mac users look up familiar Macintosh terms to find the equivalent function in Windows along with an explanation of the differences; and another section where Windows users find familiar Windows terms with pointers to the Macintosh equivalent along with full descriptions of how the function works on the Mac and important differences between the two platforms The complete translation dictionary-like reference book, Crossing Platforms: A Macintosh/Windows Phrasebook provides a simple solution for everyone who has been confused and frustrated by the arbitrary and sometimes capricious differences between the Macintosh and Windows operating systems. This book bridges the Mac-PC knowledge gap many users are faced with when work or preference demands the use of both a PC and Mac. Whether you already know the Macintosh or Windows, this book helps you navigate in the other operating system using your existing skills and knowledge.

Pink Think: Becoming a Woman in Many Uneasy Lessons Lynn Peril, 2002-10-17 A pop-culture history of the quest for ideal feminine expression traces the advice of marketing experts from the 1940s to the 1970s, during which women were pressured to adhere to stereotypical roles, in a volume that displays period artifacts and memorabilia. Original. 30,000 first printing.

**Encountering Kali** Rachel Fell McDermott, Jeffrey John Kripal, 2005 Encountering Kali explores one of the most remarkable divinities the world has seen. The Hindu goddess Kali is simultaneously understood as a blood thirsty warrior a deity of ritual possession a tantric sexual partner and an all loving compassionate mother. Popular and scholarly interest in her has been on the rise in the west in recent years. Responding to this phenomenon McDermott and Kripal's volume focuses on the complexities involved in interpreting Kali in both her indigenous south Asian settings and her more recent Western incarnation. Through the shifting lenses of scriptural history temple architecture political reflection and the goddess's recent guises on the Internet the contributors pose questions that illuminate our understanding of Kali while addressing the problems and promises inherent in every act of cross cultural interpretation.

**Competition, Strategy, and Innovation** Rafał Śliwiński, Łukasz Puślecki, 2021-11-19 Understanding the latest trends and technologies and their impact on enterprises, organizations or state administrations is essential to successfully develop a business in the age of Industry 4.0. This book presents a unique selection of topics and offers the reader an understanding of the implications of the newest technologies such as Artificial Intelligence (AI), Internet of Things (IoT), Augmented Reality (AR) and new trends like social media and sustainable competitiveness in business. It presents the impact of the newest trends on businesses, consumers, and the result on the economy. Contributions showcase the technical perspective of new technologies and provides an innovative and enriching perspective on the implementation of AI in e-commerce and the developmental barriers it can create, modern social media usage in enterprises, the newest trends in innovation management, sustainable competitiveness in the business

context, the influence and effect of augmented reality, and the privacy problem of Internet of Things to consumers. This book illustrates how to develop innovation cooperation between business, academia and public institutions through the example of biopharmaceutical industry. It will be of value to researchers, academics, professionals, and students in the fields of economics, management, international business--

**Feminist Consequences** Elisabeth Bronfen, Misha Kavka, 2001-02-14 Exploring the status of feminism in this postfeminist age, this sophisticated meditation on feminist thinking over the past three decades moves away from the all too common dependence on French theorists and male thinkers and instead builds on a wide-ranging body of feminist theory written by women. These writings address the question Where are we going? as well as Where have we come from? As evidenced in the essays compiled here, the multiplicity of directions available to this new feminism ranges from poststructuralist academic theory through cultural activism to re-readings of law, literature, and representation. Contributors include Mieke Bal, Lauren Berlant, Rosi Braidotti, Elisabeth Bronfen, Judith Butler, Rey Chow, Drucilla Cornell, Ann Cvetkovich, Jane Gallop, Beatrice Hanssen, Claire Kahane, Ranjana Khanna, Biddy Martin, Juliet Mitchell, Anita Haya Patterson, and Valerie Smith. *Feminist Consequences*, representing the forefront of international feminist thought, marks a new and long-desired stage of feminist criticism where women are themselves making theory rather than reacting to male production.

**Theorizing Gender** Rachel Alsop, Annette Fitzsimons, Kathleen Lennon, 2002-06-03 This accessible text aims to give a theoretical overview of approaches to gender. The book discusses the major theories concerned with the ways in which we 'become engendered', and explains and evaluates naturalist, psychoanalytic, materialist and post-structuralist accounts. Tensions between these different approaches are acknowledged, but stark polarities are resisted. Throughout the book it is recognized that becoming gendered implicates and is implicated by other aspects of social becoming. The work of Judith Butler is discussed in detail and its importance and limitations spelt out in key chapters on sexuality, the body, transgending and political agency. Debates between 'queer' approaches to gender and those prioritizing sexual difference are also brought to the fore. *Theorizing Gender* aims to provide a framework for weaving together what are often viewed as opposing directions of thought. Students and researchers in sociology, philosophy and gender studies, and all those with an interest in gender will find it an invaluable resource.

**Man and Beast** Elizabeth Weed, Ellen Rooney, 2004 The contributors to *Man and Beast*, writing from an array of academic disciplines, collectively rethink human relationships with other animals.

**An Inexpressible State of Grace** Cameron Abbott, 2004 Dissatisfied in her marriage and haunted by memories of the woman who broke her heart in college, New York attorney Ashleigh Moore sees the final unraveling of her neatly ordered life begin the minute she receives a letter from the father she's never met. At the same time, her career is suddenly jeopardised by the manipulations of the firm's most powerful partner. Suddenly she's in charge of a case involving a ruthless client - a client whose stunning in-house counsel evokes in Ashleigh a hunger that she has kept safely buried for fifteen years. A sizzling page-turner.

**Cyberwar is Coming!** John Arquilla, 1992

**iMovie 08 and iDVD 08 for Mac OS X** Jeff Carlson, 2007-11-28 Visual QuickStart Guide—the quick and easy way to learn! This full-color, amply illustrated, accessible book teaches readers the essential skills necessary for creating compelling movies with iMovie and iDVD, Apple's consumer-friendly digital movie and DVD-burning software applications. Readers can follow the step-by-step instructions from the beginning to get a tour of the applications or look up specific tasks to learn just what they need to know. Longtime Macintosh and technology writer Jeff Carlson takes extra steps to ensure that readers understand all of the key aspects of digital movie making. Easy visual approach uses pictures to guide you through iMovie and iDVD (and how they interact with the other iLife '08 applications) and show you what to do. Concise steps and explanations let you get up and

running in no time. Page for page, the best content and value around. Companion Web site at [www.jeffcarlson.com/imovievqs](http://www.jeffcarlson.com/imovievqs) offers links mentioned in the book, sample movies, and ongoing news and information about iMovie, iDVD, and video editing.

**Belief in Media** Mary E. Hess, 2020-07-24 Most works on media developments and Christianity approach the subject from the perspective of the implications of new media technologies for traditional Christian practices or how churches can use new media to further their goals. The common framework of analysis is a 'given reality' of traditional institutional Christianity and how it interacts with, affects and is affected by media. Media are treated as a separate cultural reality. This book presents, in an accessible form, the new directions that approach the interaction of media and religion from a cultural perspective, and illustrates these new directions by a number of international and intercultural case studies and explorations. Looking at how global media are constructing cultural forms, structures and processes, the authors show how these have become the life out of which individual and social meaning is created and practised. Examining how individuals create religious meaning by interacting with media of various kinds, crossing boundaries of traditional religious cultures and contemporary media cultures, this book reveals how Christian institutions are also defined in the process of living culturally within their broader media context.
