Greek Prostitutes in the Ancient Mediterranean, 800 BCE-200 CE Allison Glazebrook, Madeleine M. Henry, 2011-01-06 Greek Prostitutes in the Ancient Mediterranean, 800 BCE-200 CE challenges the often-romanticized view of the prostitute as an urbane and liberated courtesan by examining the social and economic realities of the sex industry in Greco-Roman culture. Departing from the conventional focus on elite society, these essays consider the Greek prostitute as displaced foreigner, slave, and member of an urban underclass. The contributors draw on a wide range of material and textual evidence to discuss portrayals of prostitutes on painted vases and in the literary tradition, their roles at symposia (Greek drinking parties), and their place in the everyday life of the polis. Reassessing many assumptions about the people who provided and purchased sexual services, this volume yields a new look at gender, sexuality, urbanism, and economy in the ancient Mediterranean world.

Vessel Health and Preservation: The Right Approach for Vascular Access Nancy L. Moureau, 2019-06-10 This Open access book offers updated and revised information on vessel health and preservation (VHP), a model concept first published in poster form in 2008 and in JVA in 2012, which has received a great deal of attention, especially in the US, UK and Australia. The book presents a model and a new way of thinking applied to vascular access and administration of intravenous treatment, and shows how establishing and maintaining a route of access to the bloodstream is essential for patients in acute care today. Until now, little thought has been given to an intentional process to guide selection, insertion and management of vascular access devices (VADs) and by default actions are based on crisis management when a quickly selected VAD fails. The book details how VHP establishes a framework or pathway model for each step of the patient experience, intentionally guiding, improving and eliminating risk when possible. The evidence points to the fact that reducing fragmentation, establishing a pathway, and teaching the process to all stakeholders reduces complications with intravenous therapy, improves efficiency and diminishes cost. As such this book appeals to bedside nurses, physicians and other health professionals.

Women's Equality in America Nancy Hendricks, 2024-01-25 Written in vivid prose and with a keen eye for detail, *Women's Equality in America* is a valuable resource for understanding the issues and trends that dominate public discourse in discussions of women's rights and gender equality in America. Since its inception, the women's equality movement in America has been criticized for moving too slowly, moving too quickly, being too demanding, or not being demanding enough. Some of its goals have aroused passionate opposition in those who believed women's equality contradicted not only basic human biology, but also the word of God. Meanwhile, Americans voice starkly different opinions about where women stand in their quest for equality in American workplaces, classrooms, boardrooms, and homes. *Women's Equality in America: Examining the Facts* presents sensibly organized and accurate summaries of the relevant facts concerning all of these claims and counterclaims. But while the volume is primarily concerned with providing an accurate picture of the state of women's equality in the 21st century, it also provides vital contextual coverage of major historical turning points and important historical figures, from leaders of the Seneca Falls women's rights convention in 1848 to the organizers of the #MeToo movement.

Beyond Health, Beyond Choice Paige Hall Smith, Bernice Hausman, Miriam Labbok, 2012-08-15 Current public health promotion of breastfeeding relies heavily on health messaging and individual behavior change. Women are told that "breast is best" but too little serious attention is given to addressing the many social, economic, and political factors that combine to limit women's real choice to breastfeed beyond a few days or weeks. The result: women's, infants', and public health interests are undermined. *Beyond Health, Beyond Choice* examines how feminist perspectives can inform public health support for breastfeeding. Written by authors from diverse disciplines, perspectives, and countries, this collection of essays is arranged thematically and considers breastfeeding in relation to public health and health care; work and family; embodiment (specifically breastfeeding in public); economic and ethnic factors; guilt; violence; and commercialization. By examining women's experiences and bringing feminist insights to bear on a public issue, the editors attempt to reframe the discussion to better inform public health approaches and political action. Doing so can help us recognize the value of breastfeeding for the public's health and the important productive and reproductive contributions women make to the world.

1650-1850 Kevin L. Cope, Samara Anne Cahill, 2021-05-14 Volume 26 of *1650-1850: Ideas, Aesthetics, and Inquiries in the Early Modern Era* travels beyond the usual discussions of power, identity, and cultural production to visit the purlieus and provinces of Britain's literary empire. Bulging at its bindings are essays investigating out-of-the-way but influential ensembles, whether female religious enthusiasts, annotators of Maria Edgeworth's underappreciated works, or modern video-based Islamic super-heroines energized by Mary Wollstonecraft's irreverence. The global impact of the local is celebrated in studies of the personal pronoun in Samuel Johnson's political writings and of the outsize role of a difficult old codger in catalyzing the literary career of Charlotte Smith. Headlining a volume that peers into minute details in order to see the outer limits of Enlightenment culture is a special feature on metaphor in long-eighteenth-century poetry and criticism. Five interdisciplinary essays investigate the deep Enlightenment origins of a trope usually associated with the rise of Romanticism. Volume 26 culminates in a rich review section containing fourteen responses to current books on Enlightenment religion, science, literature, philosophy, political science, music, history, and art. About the annual journal *1650-1850* *1650-1850* publishes essays and reviews from and about a wide range of academic disciplines: literature (both in English and other languages), philosophy, art history, history, religion, and science. Interdisciplinary in scope and approach, *1650-1850* emphasizes aesthetic manifestations and applications of ideas, and encourages studies that move between the arts and the sciences—between the "hard" and the "humane" disciplines. The editors encourage proposals for special features that bring together five to seven essays on focused themes within its historical range, from the Interregnum to the end of the first generation of Romantic writers. While also being open to more specialized or particular studies that match up with the general themes and goals of the journal, *1650-1850* is in the first instance a journal about the artful presentation of ideas that welcomes good writing from its contributors. ISSN 1065-3112. Published by Bucknell University Press. Distributed worldwide by Rutgers University Press.

The Transgender Phenomenon Richard Ekins, Dave King, 2006-10-23 Dave King and Richard Ekins are the leading world sociologists in this field. The book brings together a brilliant synthesis of history, case studies, ideas and positions as they have emerged over the past thirty years, and brings together a rich but always grounded account of this field, providing a state of the art of critical concepts and ideas to take this field further during the twenty first century. - Ken Plummer, University of Essex An outstanding survey of the evolution of trans phenomena, splendidly written, highly informative, scholarly at its best, yet easy to read even for those neither trans nor sociologist. Ekins and King, experts in the field, unroll the panoramas of sex, gender, and transgenering that have evolved during the last decades. For everyone wanting to understand the interaction of women and men and of those who cannot or will not identify with either of these two categories, reading this book is a must, and a real pleasure. - Friedmann Pfaefflin, University of ULM This groundbreaking study sets out a framework for exploring transgender diversity for the new millennium. It sets forth an original and comprehensive research and provides a wealth of vivid illustrative material. Based on two decades of fieldwork, life history work, qualitative analysis, archival work and contact with several thousand cross-dressers and sex-changers around the world, the authors distinguish a number of contemporary transgenering 'stories' to illustrate: The binary male/female divide The interrelations between sex, sexuality and gender The interrelations between the main sub-processes of transgenering. Wonderfully insightful, *The Transgender Phenomenon* develops an original and innovative conceptual framework for understanding the full range of the transgender experience.

Religion, Religious Ethics and Nursing Marsha D. Fowler, PhD, MDiv, MS,, Sheryl Reimer Kirkham, PhD, RN, Rick Sawatzky, PhD, RN, Elizabeth Johnston Taylor, PhD, RN, 2011-11-14 [This] is a book that challenges you to step back and broaden your thinking about religion in general and religion in nursing... Nurses at all levels will appreciate the applications to nursing practice, theory, and research. - Journal of Christian Nursing The Reverend Dr. Marsha Fowler and her colleagues have written a landmark book that will change and enlighten the discourse on religion and spirituality in nursing. The authors address the awkward silence on religion in nursing theory and education and with insightful scholarship move beyond the current level of knowledge and limited discourse on religion in nursing theory, education and practice. This book is path-breaking in that [it] gives many new ways to think about the relationships between ethics, health, caregiving, moral imagination, religion and spirituality. From the Foreword by Patricia Benner, PhD, RN, FAAN Professor Emerita of Nursing Department of Social and Behavioral Sciences and Nursing University of California, San Francisco The past 25 years have witnessed an escalating discussion on the role of spirituality within health care. This scholarly volume is rooted in the belief that not only is religion integral to nursing care, but the religious beliefs of both nurse and patient can significantly influence care and its outcome. It offers an in-depth analysis of the ways in which religion influences the discipline of nursing, its practitioners, and treatment outcomes. Through the contributions of an international cadre of nurse scholars representing the world's major religious traditions, the book explores how theories, history and theologies shape the discipline, bioethical decision making, and the perspective of the nurse or patient who embraces a particular religion. It examines the commonalities between the values and thinking of nursing and religion and identifies basic domains in which additional research is necessary. The authors believe that ultimately, scholarly dialogue on the relationship between religion and nursing will foster and enhance nursing practice that is ethical and respectful of personal values. Key Features: Offers in-depth analysis of how religion influences the discipline of nursing, its practitioners, and treatment outcomes Uses critical theories to explore the intersections of religion, ethics, culture, health, gender, power, and health policy Includes an overview of all major world religions Focuses on the implications of religion for nursing practice rather than nursing interventions Designed for graduate and upper-level undergraduate students, nurse academicians and clinicians

Once there, he would go on to spend much of his time during the next 25 years in the Death Valley region, witnessing the transition of Death Valley from a prospector's hunting ground to a mecca for winter tourists. This book, which was first published in 1951, is William Caruthers' personal narrative of the old days in Death Valley—"of people and places in Panamint Valley, the Amargosa Desert and the big sink at the bottom of America." A wonderful read.

The Collective Spirit of Aging Across Cultures Halaevalu F.Ofahengaue Vakalahi,Gaynell M. Simpson,Nancy Giunta,2014-01-28 The collective, inclusive, and intersectional framework used in this book speaks to the significance of understanding aging across diverse cultures from multiple perspectives, but still as a shared human experience. The underlying message of the book is that although we are unique and different in our aging processes, we are ultimately connected through this physical, mental and spiritual experience of aging. Thus, regardless of whether we are service providers, service recipients, educators or merely fellow human beings, it is important that we approach the aging experience through a collective lens for discovering and sharing resources as we age; honoring the past while simultaneously accepting that the future is here. A few select examples of key findings from this collaborative work are as follows. First, despite progress in the field, certain issues remain to be addressed including the challenges of racism and sexism, mistreatment, the digital divide, poverty, and other social and economic crises in urban and rural communities as they relate to our aging population. Second, the need for sustaining a sense of independence among the aged and interdependence among supportive systems is warranted. Third, our elders continue to benefit from culturally competent services community-based health interventions and social services that addresses normative and emerging challenges for them. Fourth, spirituality in both indigenous and contemporary perspectives remains important for our elders’ development and quality of life.

Atomic Tunes Tim Smolko,Joanna Smolko,2021-05-11 What is the soundtrack for a nuclear war? During the Cold War, over 500 songs were written about nuclear weapons, fear of the Soviet Union, civil defense, bomb shelters, McCarthyism, uranium mining, the space race, espionage, the Berlin Wall, and glasnost. This music uncovers aspects of these world-changing events that documentaries and history books cannot. In *Atomic Tunes*, Tim and Joanna Smolko explore everything from the serious to the comical, the morbid to the crude, showing the widespread concern among musicians coping with the effect of communism on American society and the threat of a nuclear conflict of global proportions. *Atomic Tunes* presents a musical history of the Cold War, analyzing the songs that capture the fear of those who lived under the shadow of Stalin, Sputnik, mushroom clouds, and missiles.
